SUMMARY: On November 7, 1997, the **Federal Register** published the Environmental Protection Agency's (the Agency's) Finding of Significant Contribution and Rulemaking for Certain States in the Ozone Transport Assessment Group Region for Purposes of Reducing Regional Transport of Ozone; Proposed Rule, 40 CFR part 52. The proposed rule provides a 120-day comment period which ends March 9, 1998. The proposed rule also states that "Because commenters may wish to submit technical information that may require additional time to develop, EPA will accept additional pertinent information beyond the 120-day time frame and will do what is possible to take the information into account for the final rulemaking." However, the EPA is publishing today's document to clarify that certain information, described below, must be submitted by the end of the 120-day comment period to be considered in the final rulemaking.

As part of the final rulemaking, EPA intends to perform certain air quality modeling analyses. In order for these analyses to be completed in time for the final rulemaking, emission inventory data need to be finalized by mid-March. Therefore, any comments concerning emission inventory data that are to be considered in the modeling analyses must be received by EPA within the official 120-day comment period (i.e., by March 9, 1998). Comments related to the inventory that are received after this date cannot be considered for the purpose of modeling.

FOR FURTHER INFORMATION CONTACT: Laurel Schultz, Office of Air Quality Planning and Standards, Emissions, Monitoring and Analysis Division, MD–14, Research Triangle Park, NC 27711, telephone (919) 541–5511.

Dated: January 23, 1998.

Richard D. Wilson,

Acting Assistant Administrator for Air and Radiation.

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 98–2; RM–9217]

Radio Broadcasting Services; Hawesville and Whitesville, KY

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition filed by WLME, Inc., proposing the reallotment of Channel 246A from Hawesville to Whitesville, Kentucky, and the modification of Station WXCM(FM)'s license accordingly. Channel 246A can be reallotted to Whitesville in compliance with the Commission's minimum distance separation requirements with a site restriction of 13.9 kilometers (8.6 miles) north to accommodate petitioner's requested site. The coordinates for Channel 246A at Whitesville are North Latitude 37–48–39 and West Longitude 86–53–18. In accordance with § 1.420(i) of the Commission's Rules, we will not accept competing expressions of interest in the use of Channel 246A at Whitesville, Kentucky.

DATES: Comments must be filed on or before March 16, 1998, and reply comments on or before March 31, 1998.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Patricia M. Chuh, Pepper & Corazzini, L.L.P., 1176 K Street, NW., Suite 200, Washington, DC. 20006 (Counsel for Petitioner).

FOR FURTHER INFORMATION CONTACT: Sharon P. McDonald, Mass Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 98–2, adopted January 14, 1998, and released January 23, 1998. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Center (Room 239), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, Inc., (202) 857–3800, 1231 20th Street, NW., Washington, DC 20036.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 98–3; RM–9218]

Radio Broadcasting Services; Manson, WA

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition filed by Manson Broadcasting proposing the allotment of Channel 234C3 at Manson, Washington, as the community's first local aural transmission service. Channel 234C3 can be allotted to Manson in compliance with the Commission's minimum distance separation requirements at city reference coordinates. The coordinates for Channel 234C3 at Manson are North Latitude 47–53–18 and West Longitude 120–09–18. Since Manson is located within 320 kilometers (200 miles) the U.S.-Canadian border, concurrence of the Canadian government has been requested.

DATES: Comments must be filed on or before March 16, 1998, and reply comments on or before March 31, 1998.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, his counsel, or consultant, as follows: Duane J. Polich, Manson Broadcasting, P.O. Box 70, Oak Harbor, Washington 98277 (Petitioner).

FOR FURTHER INFORMATION CONTACT: Sharon P. McDonald, Mass Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 98–3, adopted January 14, 1998, and released January 23, 1998. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Center (Room 239), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, Inc., (202) 857–3800, 1231 20th Street, NW., Washington, DC 20036.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018–AE57

Endangered and Threatened Wildlife and Plants; Proposed Threatened Status for the Plant Astragalus Desereticus (Deseret milk-vetch)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The U.S. Fish and Wildlife Service (Service) proposes to determine a Utah plant species, *Astragalus desereticus* (Deseret milk-vetch), to be a threatened species under the authority of the Endangered Species Act of 1973, as amended (Act). *Astragalus desereticus*, considered extinct for 72 years prior to 1981, exists as one small population in Utah County, Utah. Threats to the plant include residential development, livestock grazing, livestock and wildlife trampling, and threats associated with small population size. This proposal, if made final, would implement Federal protection provided by the Act. The Service seeks data and comments from the public on this proposal.

DATES: Comments from all interested parties must be received by March 30, 1998. Public hearing requests must be received by March 16, 1998.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Field Supervisor, Utah Ecological Services Field Office, U.S. Fish and Wildlife Service, Lincoln Plaza Suite 404, 145 East 1300 South, Salt Lake City, Utah 84115. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: John L. England at the above address (telephone: 801/524–5001, ext. 138).

SUPPLEMENTARY INFORMATION:

Background

Marcus E. Jones collected a distinctive *Astragalus* from "below Indianola," a town in Sanpete County, Utah, on June 2, 1893. The same species was again collected by Ivar Tidestrom from "near Indianola" on June 17, 1909. Specimens from these two collections lay in obscurity in various herbaria until Rupert Barneby recognized their uniqueness and described them as *Astragalus desereticus* (Barneby 1964). Efforts to relocate the species were initially fruitless (Barneby 1964; Welsh 1978a, 1978c), leading to a presumption of extinction (Ripley 1975; Welsh 1975, 1978b). However, a population of *A. desereticus* was discovered by Elizabeth Neese on May 27, 1981, on a sandstone outcrop above the town of Birdseye, Utah County, Utah, less than 16 kilometers (km) (10 miles (mi)) from Indianola (Welsh and Chatterley 1985). This population remains the only known occurrence of this species (Franklin 1990, 1991; U.S. Fish and Wildlife Service (USFWS) 1991). It is possible that this population is the one from which Jones and/or Tidestrom made their collections more than 70 years earlier (Franklin 1990, 1991; Welsh and Chatterley 1985).

Astragalus desereticus is a perennial, herbaceous plant in the bean family (Fabaceae). Individual plants are approximately 4 to 15 centimeters (cm) (2 to 6 inches (in)) in height, with stems about 6 cm (2 in) tall. The pinnately compound leaves are 4 to 11 cm (2 to 4 in) long with 11 to 17 leaflets. The leaflets are elliptic to ovate in shape, with dense silvery gray hairs on both sides. The flowers are 1.8 to 2.2 cm (0.7 to 0.9 in) long, white in color with a purple tip on the keel, and borne on a stalk of 5 to 10 flowers. The seed pods are 1 to 2 cm (0.4 to 0.8 in) long, covered with lustrous hairs, and bear 14 to 16 ovules (Barneby 1964; Barneby in Cronquist *et al.* 1989; Welsh 1978c; Welsh *et al.* 1987).

Astragalus desereticus occurs primarily on steep south- and west-facing slopes. The plant grows on soils derived from a specific and unusual portion of the geologic Moroni Formation. This geologic feature is characterized by coarse, crudely bedded conglomerate (Franklin 1990). The plant community in which *A. desereticus* occurs is dominated by pinon pine (*Pinus edulis*) and Utah juniper (*Juniperus osteosperma*). Other associated plant species include: sagebrush (*Artemisia tridentata*), scrub oak (*Quercus gambelii*), and wild buckwheat (*Eriogonum brevicaule*) (Franklin 1990).

The only known population of *Astragalus desereticus* consists of between 5,000 and 10,000 individuals growing in an area of less than 120 hectares (ha) (300 acres (ac)) (Franklin 1990, Stone 1992). The species' total range is approximately 2.6 km (1.6 mi) long and 0.5 km (0.3 mi) across. Extensive searches of similar habitat in other parts of Utah have not revealed any other populations (Franklin 1991; Larry England, USFWS, pers. comm., 1997). The land upon which *A. desereticus* grows is owned by the State

VOL 63 ISS 18 JA 28 1998 UMI

of Utah and three private landowners (Franklin 1990, 1991; Chris Montague, The Nature Conservancy, pers. comms., 1992, 1997). This plant species is threatened by grazing and trampling by ungulates, alteration of its habitat due to residential development and road widening, and naturally occurring events such as fire, due to its limited distribution.

Previous Federal Action

Section 12 of the Act directed the Secretary of the Smithsonian Institution to prepare a report on those plants considered to be endangered, threatened, or extinct. This report, designated as House Document No. 94–51, was presented to Congress on January 9, 1975. On July 1, 1975, the Service published a notice in the **Federal Register** (40 FR 27823) accepting the report as a petition to list those taxa named therein under section 4(c)(2) (now 4(b)(3)) of the Act, and its intention to review the status of those plants. *Astragalus desereticus* was included in the July 1, 1975, notice on list "C," indicating that the species was probably extinct.

On June 16, 1976, the Service published a proposed rule in the **Federal Register** (41 FR 24523) to designate approximately 1,700 vascular plant species, including *Astragalus desereticus*, as endangered pursuant to section 4 of the Act. The list of those 1,700 plant species was assembled on the basis of comments and data received by the Smithsonian Institution and the Service in response to House Document No. 94–51 and the July 1, 1975, **Federal Register** publication. In the proposed rule, the Service also designated *A. desereticus* as a species about which the Service was particularly interested in obtaining any new information on living specimens and extant populations. General comments received in relation to the 1976 proposal are summarized in an April 26, 1978, **Federal Register** publication (43 FR 17909). The 1978 amendments to the Act required that all proposals over 2 years old be withdrawn, although proposals published before the 1978 amendments' enactment could not be withdrawn before the end of a 1-year grace period beginning on the enactment date. On December 10, 1979, the Service published a notice of withdrawal (44 FR 70796) of that portion of the June 16, 1976, proposal that had not been made final, which included *A. desereticus*.

On December 15, 1980, the Service published a revised notice of review for native plants in the **Federal Register** (45 FR 82480) designating *Astragalus desereticus* a category 1 candidate species. Category 1 candidates were defined as those taxa for which the Service had on file information on biological vulnerability and threats to support the preparation of listing proposals. In addition, *A. desereticus* was identified as a species that may have recently become extinct. In 1981, a population of *A. desereticus* was discovered. On November 28, 1983, the Service published a revised notice of review in the **Federal Register** (48 FR 53640) in which *A. desereticus* was included as a category 2 candidate species. Category 2 candidates were formerly defined as taxa for which data on biological vulnerability and threats indicated that listing was possibly appropriate, but for which data were not sufficient to support issuance of listing proposals. In preparing the 1983 notice, the Service deemed it appropriate to acquire additional information on the distribution and abundance of *A. desereticus* before proposing the species for listing. The Service maintained *A. desereticus* as a category 2 species in updated notices of review published on September 27, 1985 (50 FR 39526), and February 21, 1990 (55 FR 6184). As a result of additional information obtained in 1990 and 1991 status surveys (Franklin 1990, USFWS 1991), the Service reclassified *A. desereticus* as a category 1 candidate in the September 30, 1993, notice of review (58 FR 51144). In the February 28, 1996, notice of review (61 FR 7596), the Service discontinued the designation of category 2 candidates. *Astragalus desereticus* was included as a candidate in the February 28, 1996 (61 FR 7596), and September 19, 1997, notices of review (62 FR 49398).

The processing of this proposed rule conforms with the Service's final listing priority guidance for fiscal year 1997, published in the **Federal Register** on December 5, 1996 (61 FR 64475). In a **Federal Register** notice published on October 23, 1997 (62 FR 55628), the guidance was extended beyond fiscal year 1997 until new guidance is published following passage of the fiscal year 1998 appropriations bill for the Department of the Interior. The fiscal year 1997 guidance clarifies the order in which the Service will process rulemakings following two related events: (1) The lifting on April 26, 1996, of the moratorium on final listings imposed on April 10, 1995 (Public Law 104–6), and (2) the restoration of significant funding for listing through passage of the Omnibus Budget Reconciliation Act on April 26, 1996, following severe funding constraints imposed by a number of continuing resolutions between November 1995 and April 1996. Based on biological considerations, this guidance establishes a "multi-tiered approach that assigns relative priorities, on a descending basis, to actions to be carried out under section 4 of the Act" (61 FR 64479). The guidance calls for giving highest priority to handling emergency situations (Tier 1) and second highest priority (Tier 2) to resolving the listing status of the outstanding proposed listings. Tier 3 includes the processing of new proposed listings for species facing high magnitude threats. This proposed rule for *Astragalus desereticus* falls under Tier 3. The guidance states that "effective April 1, 1997, the Service will concurrently undertake all of the activities presently included in Tiers 1, 2, and 3" (61 FR 64480). The Service has thus begun implementing a more balanced listing program, including processing more Tier 3 activities. The completion of this Tier 3 activity (a proposal for a species with high-magnitude, imminent threats) follows those guidelines.

Summary of Factors Affecting the Species

Section 4 of the Act and regulations (50 CFR part 424) promulgated to implement the listing provisions of the Act set forth the procedures for adding species to the Federal lists. A species may be determined to be endangered or threatened due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Astragalus desereticus* Barneby (Deseret milk-vetch) are as follows:

A. The Present or Threatened Destruction, Modification, or Curtailment of Its Habitat or Range

Astragalus desereticus is located on highly accessible public and private land that is used for cattle grazing and wildlife management (Franklin 1991, Stone 1992). The land managed by the State of Utah Division of Wildlife Resources (DWR) is a wildlife management area that is also used for cattle grazing (Franklin 1991). Cattle are used by DWR in the spring to encourage plant growth for big game forage in the winter. This grazing occurs within the habitat of *A. desereticus* (Stone 1992). The cattle tend to concentrate primarily on the upslope areas where forage production is greater (Stone 1992). Erosion in these areas is exacerbated by cattle grazing and game trails. In addition to the effects of erosion, trampling threatens *A. desereticus*, particularly at the southern end of the range (Franklin 1991). As cattle and wildlife graze the habitat of *A. desereticus*, the animals are likely to trample plants as they forage. Whereas mule deer (*Odocoileus hemionus*) have maintained stable numbers recently, Rocky Mountain elk (*Cervas elephas*) populations are increasing. Erosion and trampling by cattle and wildlife constitute threats to *A. desereticus*.

Development in the Wasatch Front metropolitan area is spreading into the surrounding agricultural lands, especially small communities in the drainages of the Provo, Spanish Fork, and Weber rivers (Utah Governor's Office of Planning and Budget (UGOPB) 1997). Areas such as Birdseye are predicted to be rezoned residential within a short time. The population growth of the metropolitan area is expected to nearly double by the year 2020. In addition, conversion of agricultural land to urban use is also expected to nearly double in the same time period (UGOPB 1997). The entire *Astragalus desereticus* population is within 300 meters (1,000 feet) of U.S. Highway 89 and is within the area proposed for future development (UGOPB 1997). Transportation needs of the expanding population will also require roads to be widened or improved. U.S. Highway 89 is currently a two-lane rural highway that will likely be expanded when residential development expands into southern Utah County and northern Sanpete County. Such highway widening and the concomitant residential development could destroy a significant portion of the remaining habitat of *A. desereticus*.

A potential threat to *Astragalus desereticus* is related to the populations of ungulates in the area and their effect on pollinators. Other species in the genus *Astragalus* have suffered from low numbers of pollinators due to the indirect effects ungulates may have on the pollinators' nest sites (Stone 1992). Bumblebees (*Bombus* sp.), which nest in abandoned rodent burrows, are likely the primary pollinators of *A. desereticus*. Land use practices which increase grazing pressure may cause burrows to collapse, destroying bumblebee nests (Stone 1992). Since bees have low fecundity, their populations may not recover for many years, particularly if grazing by large numbers of ungulates is maintained.

B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

Overutilization is not known to be a threat to *Astragalus desereticus*.

C. Disease or Predation

In contrast to many species of *Astragalus*, *A. desereticus* appears to be palatable to cattle. Many *Astragalus* species concentrate the toxic element selenium in their tissues; these species, called selenophytes, poison grazing cattle (Stone 1992). The fact that *A. desereticus* does not produce a "snakelike" odor typical of other "snakeweeds," as selenophytes are sometimes called, and the fact that no other selenophytes occur in the area, indicate that *A. desereticus* is not a selenophyte (Stone 1992). While *A. desereticus* may not be preferred forage for cattle or native ungulates, it is palatable and may be inadvertently taken along with preferred forage in the area.

In habitat similar to that occupied by *Astragalus desereticus* in Utah County that has been surveyed by Service personnel, overgrazing by domestic ungulates has almost completely denuded the landscape (USFWS 1991). Similar grazing pressure has been known from the current habitat of *A. desereticus;* therefore, the effects of grazing, particularly overgrazing, constitute a likely threat. This species is much less abundant in the more heavily grazed southern portion of its habitat (Franklin 1990, 1991), indicating that grazing may be a significant threat. Cattle grazing may be particularly harmful because it occurs during a critical period for *A. desereticus* reproduction (i.e., flowering) (Stone 1992).

There are no known insect parasites or disease organisms that significantly affect this species.

D. The Inadequacy of Existing Regulatory Mechanisms

Astragalus desereticus presently receives no protection or consideration under any Federal, State or local law or regulation.

E. Other Natural or Manmade Factors Affecting Its Continued Existence

By virtue of the limited number of individuals and range of the single remaining population of *Astragalus desereticus*, this species may be threatened with extinction from naturally occurring events. The probability that a natural event such as a fire, drought, or disease will cause extinction is greater for species having a small population size and highly restricted range (Stone 1992). Rare species in the genus *Astragalus* have exhibited low levels of genetic diversity when compared to other more widespread, closely related species (Stone 1992). Low genetic variability may make it difficult for a species to respond to changes in the environment and thus places it at greater risk to extinction or additional range reduction.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by *Astragalus desereticus* in determining to propose this rule. Grazing and trampling by ungulates, residential development, road widening, and naturally occurring events such as fire variously threaten this species. Based on this evaluation, the preferred action is to list *A. desereticus* as threatened. Threatened status reflects the vulnerability of this species to factors that may negatively affect the species and its limited habitat. While not in immediate danger of extinction, *A. desereticus* is likely to become an endangered species in the foreseeable future if present threats continue or increase. Critical habitat is not being proposed for this species for reasons discussed in the "Critical Habitat" section of this proposal.

Critical Habitat

Critical habitat is defined in section 3 of the Act as: (i) The specific areas within the geographical area occupied by a species, at the time it is listed in accordance with the Act, on which are found those physical or biological features (I) essential to the conservation of the species and (II) that may require special management considerations or protection and; (ii) specific areas outside the geographical area occupied by the species at the time it is listed, upon determination that such areas are essential for the conservation of the species. "Conservation" means the use of all methods and procedures needed to bring the species to the point at which listing under the Act is no longer necessary.

Section 4(a)(3) of the Act and implementing regulations (50 CFR 424.12) require that, to the maximum extent prudent and determinable, the Secretary designate critical habitat at the time a species is determined to be endangered or threatened. Service regulations (50 CFR 424.12(a)(1)) state that designation of critical habitat is not prudent when one or both of the following situations exist: (1) The species is threatened by taking or other human activity, and identification of critical habitat can be expected to increase the degree of threat to the species, or (2) such designation of critical habitat would not be beneficial to the species. The Service determines that designation of critical habitat for

VOL 63 ISS 18 JA 28 1998 UMI

Astragalus desereticus is not prudent due to lack of benefit to the species.

Critical habitat receives consideration under section 7 of the Act with regard to actions carried out, authorized, or funded by a Federal agency (see Available Conservation Measures section). As such, designation of critical habitat may affect activities on Federal lands and may affect activities on non-Federal lands where such a Federal nexus exists. Under section 7 of the Act, Federal agencies are required to ensure that their actions do not jeopardize the continued existence of a species or result in destruction or adverse modification of critical habitat. However, both jeopardizing the continued existence of a species and adverse modification of critical habitat have similar standards and thus similar thresholds for violation of section 7 of the Act. In fact, biological opinions that conclude that a Federal agency action is likely to adversely modify critical habitat but not jeopardize the species for which the critical habitat has been designated are extremely rare. Also, the designation of critical habitat for the purpose of informing Federal agencies of the locations of *Astragalus desereticus* habitat is not necessary because the Service can inform Federal agencies through other means. For these reasons, the designation of critical habitat for *A. desereticus* would provide no additional benefit to the species beyond that conferred by listing, and therefore, such designation is not prudent.

Astragalus desereticus has an extremely narrow distribution in a sandstone outcrop, totaling about 120 ha (300 ac) in one population. At the present time, no other site is known to be occupied by or suitable for this plant. The private landowners at Birdseye are aware of the plant's presence and extremely limited habitat, as are the DWR managers and others involved in management of the area. Therefore, designation of critical habitat would provide no benefit with respect to notification. In addition, given the species' narrow distribution and precarious status, virtually any conceivable adverse effect to the species' habitat would very likely jeopardize its continued existence. Designation of critical habitat for *A. desereticus* would, therefore, provide no benefit to the species apart from the protection afforded by listing the plant as threatened.

Protection of the habitat of *Astragalus desereticus* will be addressed through the section 4 recovery process and the section 7 consultation process. Although this plant occurs only on private and State land, it may be affected by projects with Federal connections, including potential Federal Highway Administration funding of road widening. The Service believes that activities involving a Federal action which may affect *A. desereticus* can be identified without designating critical habitat, by providing Federal agencies with information on the location of occupied habitat and information on the kinds of activities which could affect the species. For the reasons discussed above, the Service finds that the designation of critical habitat for *A. desereticus* is not prudent.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing results in public awareness and conservation actions by Federal, State and local agencies, private organizations, and individuals. The Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. The protection required of Federal agencies and the prohibitions against certain activities involving listed plants are discussed, in part, below.

Section 7(a) of the Act requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) of the Act requires Federal agencies to confer with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. The single known population of *Astragalus desereticus* is on State and privately owned land. However, highway widening, which could adversely affect *A. desereticus* due to the proximity of the plants to the highway, could be partially funded by the Federal Highway Administration, thereby providing an avenue for section 7 consultation.

The Act and its implementing regulations set forth a series of general prohibitions and exceptions that apply to all threatened plants. All prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.71 for threatened plants, apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export, transport in interstate or foreign commerce in the course of a commercial activity, sell or offer for sale in interstate or foreign commerce, or remove and reduce the species to possession from areas under Federal jurisdiction. In addition, for plants listed as endangered, the Act prohibits malicious damage or destruction on areas under Federal jurisdiction, and the removal, cutting, digging up, or damaging or destroying of such plants in knowing violation of any State law or regulation, including State criminal trespass law. Section 4(d) of the Act allows for the provision of such protection to threatened species through regulation. This protection may apply to this species in the future if such regulations are promulgated. Seeds from cultivated specimens of threatened plants are exempt from these prohibitions provided that their containers are marked "Of Cultivated Origin." Certain exceptions to the prohibitions apply to agents of the Service and State conservation agencies.

The Act and 50 CFR 17.72 also provide for the issuance of permits to carry out otherwise prohibited activities involving threatened species under certain circumstances. Such permits are available for scientific purposes and to enhance the propagation or survival of the species. For threatened plants, permits are also available for botanical and horticultural exhibition, educational purposes, or special reasons consistent with the Act's purposes. With respect to *Astragalus desereticus*, it is anticipated that few, if any, trade permits would be sought or issued, since the species is not common in the wild and is unknown in cultivation. Requests for copies of the regulations regarding listed species and inquiries about prohibitions and permits may be addressed to: Regional Director, U.S. Fish and Wildlife Service, P.O. Box 25486, Denver Federal Center, Denver, Colorado 80225.

It is the policy of the Service, published in the **Federal Register** on July 1, 1994 (59 FR 34272), to identify to the maximum extent practicable those activities that would or would not constitute a violation of section 9 of the Act if a species is listed. The intent of this policy is to increase public awareness of the effect of a proposed listing on proposed and ongoing activities within a species' range. This species is not located on areas under Federal jurisdiction. Collection, damage, or destruction of this species on Federal lands is prohibited (although in appropriate cases a Federal endangered species permit may be issued to allow collection for scientific or recovery purposes). Such activities on areas not under Federal jurisdiction would constitute a violation of section 9 if conducted in knowing violation of State law or regulations, or in violation of State criminal trespass law. Normal highway maintenance, fence maintenance, and recreational hunting are among the activities that would be unlikely to violate section 9. Questions regarding whether specific activities would constitute a violation of section 9, should this species be listed, should be directed to the Field Supervisor, Utah Ecological Services Field Office (see **ADDRESSES** section).

Public Comments Solicited

The Service intends that any final action resulting from this proposal will be as accurate and effective as possible. Therefore, comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning this proposed rule are hereby solicited. In particular, comments are sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to *Astragalus desereticus*;

(2) The location of any additional populations of this species and the reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(3) Additional information concerning the range, distribution, and population size of this species; and

(4) Current or planned activities in the subject area and their possible impacts on this species.

A final determination of whether to list this species will take into consideration the comments and any additional information received by the Service. Such communications may lead to a final decision document that differs from this proposal.

The Act provides for one or more public hearings on this proposal, if requested. Requests for hearings must be received within 45 days of the date of the publication of the proposal in the **Federal Register**. Such requests must be made in writing and be addressed to the Field Supervisor, Utah Ecological Services Field Office (see **ADDRESSES** section).

National Environmental Policy Act

The Fish and Wildlife Service has determined that Environmental Assessments and Environmental Impact Statements, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Required Determinations

This rule does not contain collections of information that require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

References Cited

A complete list of all references cited herein is available upon request from the Field Supervisor, Utah Ecological Services Field Office (see **ADDRESSES** section).

Author: The primary author of this proposed rule is John L. England, Utah Ecological Services Field Office (see **ADDRESSES** section).

Proposed Regulation Promulgation

Accordingly, the Service hereby proposes to amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

PART 17—[AMENDED]

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500, unless otherwise noted.

2. Amend section 17.12(h) by adding the following, in alphabetical order under Flowering Plants, to the List of Endangered and Threatened Plants:

§ 17.12 Endangered and threatened plants.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 226

[I.D. No. 101097A]

Designated Critical Habitat; Central California Coast and Southern Oregon/ Northern California Coast Coho Salmon

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; reopening of comment period.

SUMMARY: NMFS is reopening the public comment period on proposed regulations to designate critical habitat for Central California Coast and Southern Oregon/Northern California Coast coho salmon (*Oncorhynchus kisutch*). These proposals were made on November 25, 1997, under provisions of the Endangered Species Act of 1973 (ESA). NMFS has received several requests for additional time to complete the review and compilation of information. NMFS finds the requests to be reasonable and hereby reopens the comment period until April 26, 1998.

DATES: Comments on the proposed rule must be received on or before April 26, 1998.

ADDRESSES: Comments should be sent to: Garth Griffin, NMFS, Protected Resources Division, 525 NE Oregon St. - Suite 500, Portland, OR 97232–2737; or Craig Wingert, NMFS, Southwest Region, Protected Species Management Division, 501 W. Ocean Blvd., Suite 4200, Long Beach, CA 90802–4213.

FOR FURTHER INFORMATION CONTACT: Garth Griffin at (503) 231–2005, Craig Wingert at (562) 980–4021, or Joe Blum at (301) 713–1401.

SUPPLEMENTARY INFORMATION:

Background

On October 31, 1996, NMFS published its determination to list the Central California Coast Evolutionarily Significant Unit (ESU) of coho salmon as threatened under the ESA (61 FR 41514). Subsequently, on May 6, 1997, NMFS published its determination to list the Southern Oregon/Northern California Coast coho salmon ESU as threatened under the ESA (62 FR 24588). On November 25, 1997 (62 FR 62741), NMFS published a proposed rule identifying critical habitat for each ESU and identified a 90-day comment period (which ends January 26, 1998) to solicit information relevant to the proposal. During the comment period, three public hearings were held between December 8–11, 1997 in Gold Beach, Oregon; Eureka, California; and Santa Rosa, California.

Requests for an extension of the public comment period have been received from a California Congressional representative, as well as several county and private organizations and private citizens in northern California and southern Oregon. Reasons given for these requests included additional time required under state law to assemble county governments for a review of the proposal, and time needed to assess the scope and impact of the proposed rule. NMFS finds the requests to be reasonable and hereby reopens the comment period.

Critical habitat is defined as the specific areas within the geographical area occupied by the species, on which are found those physical and biological features essential to the conservation of the species and which may require special management considerations or protections (ESA section 3(5)(A)(I)). Critical habitat shall not include the entire geographical area occupied by the species unless failure to designate such areas would result in the extinction of the species.

Proposed critical habitat for the Central California Coast ESU encompasses accessible reaches of all rivers (including estuarine areas and tributaries) between Punta Gorda and the San Lorenzo River (inclusive) in California. Also included are two rivers entering San Francisco Bay: Mill Valley Creek and Corte Madera Creek. Proposed critical habitat for the Southern Oregon/Northern California Coast ESU encompasses accessible reaches of all rivers (including estuarine areas and tributaries) between the Mattole River in California and the Elk River in Oregon, inclusive.

The areas described in the proposed rule represent the current freshwater and estuarine range of the listed species. Marine habitats are also vital to the species and ocean conditions are believed to have a major influence on coho salmon survival. However, there does not appear to be a need for special management consideration or protection of this habitat. Therefore, NMFS is not proposing to designate critical habitat in marine areas at this time. For both ESUs, critical habitat includes all waterways, substrate, and adjacent riparian zones below longstanding, naturally impassable barriers (i.e., natural waterfalls in existence for at least several hundred years). NMFS has identified twelve dams in the range of these ESUs (see proposed rule) that currently block access to habitats historically occupied by coho salmon. However, NMFS has not designated these inaccessible areas as critical habitat because areas downstream are believed to be sufficient for the conservation of the ESUs. The economic and other impacts resulting from this critical habitat designation are expected to be minimal.

NMFS is soliciting information, comments and/or recommendations on any aspect of this proposal from all concerned parties (see **ADDRESSES**); comments must be received by April 26, 1998. In particular, NMFS is requesting any data, maps, or reports describing areas that currently or historically supported coho salmon populations and that may require special management considerations. NMFS will consider all information received before reaching a final decision.

Date: January 22, 1998.

Patricia A. Montanio,

Deputy Director, Office of Protected Resources, National Marine Fisheries Service.

Notices

Federal Register

Vol. 63, No. 18

Wednesday, January 28, 1998

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

Privacy Act of 1974; Revision of System of Records

AGENCY: Office of the Secretary, USDA.

ACTION: Notice of Revision of an Existing Privacy Act System of Records.

SUMMARY: In accordance with the Privacy Act (5 U.S.C. 552a(e)(11)), the Department of Agriculture (USDA) is issuing notice of our intent to amend the system of records entitled the Personnel and Payroll System for USDA Employees, USDA/OP–1, to include a new routine use. The disclosure is required by the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (Pub. L. 104–193). We invite public comment on this publication.

DATES: Persons wishing to comment on the proposed routine use must do so by 30 days from date of publication. (February 27, 1998).

EFFECTIVE DATE: The proposed routine use will become effective as proposed without further notice 45 days from date of publication (March 16, 1998), unless comments dictate otherwise.

ADDRESSES: Interested individuals may comment on this publication by writing to Joan Golden, Room 341–W Jamie L. Whitten Federal Building, 1400 Independence Avenue, SW., Washington, DC 20250, by fax to (202) 720–8721, or by email to *joan.golden@usda.gov*. All comments received will be available for public inspection at that address.

FOR FURTHER INFORMATION CONTACT: Evelyn Davis, Room 43–W Jamie L. Whitten Federal Building, 1400 Independence Avenue, SW., Washington, DC 20250, (202) 720–7765, (202) 690–4728 (Fax).

SUPPLEMENTARY INFORMATION: Pursuant to Pub. L. 104–193, the Personal Responsibility and Work Opportunity Reconciliation Act of 1996, USDA will disclose data from its Personnel and Payroll System for USDA Employees system of records to the Office of Child Support Enforcement, Administration for Children and Families, Department of Health and Human Services for use in the National Database of New Hires, part of the Federal Parent Locator Service (FPLS) and Federal Tax Offset System, DHHS/OCSE No. 09–90–0074. A description of the Federal Parent Locator Service may be found at 62 FR 51663 (October 2, 1997).

FPLS is a computerized network through which States may request location information from Federal and State agencies to find non-custodial parents and their employers for purposes of establishing paternity and securing support. On October 1, 1997, the FPLS was expanded to include the National Directory of New Hires, a database containing employment information on employees recently hired, quarterly wage data on private and public sector employees, and information on unemployment compensation benefits. On October 1, 1998, the FPLS will be expanded further to include a Federal Case Registry. The Federal Case Registry will contain abstracts on all participants involved in child support enforcement cases. When the Federal Case Registry is instituted, its files will be matched on an ongoing basis against the files in the national Directory of New Hires to determine if an employee is a participant in a child support case anywhere in the country. If the FPLS identifies a person as being a participant in a State child support case, that State will be notified. State requests to the FPLS for location information will also continue to be processed after October 1, 1998.

When individuals are hired by USDA, we may disclose to the FPLS their names, social security numbers, home addresses, dates of birth, dates of hire, and information identifying us as the employer. We also may disclose to FPLS names, social security numbers, and quarterly earnings of each USDA employee, within one month of the end of the quarterly reporting period.

Information submitted by USDA to the FPLS will be disclosed by the Office of Child Support Enforcement to the Social Security Administration for verification to ensure that the social security number provided is correct. The data disclosed by USDA to the FPLS will also be disclosed by the Office of Child Support Enforcement to the Secretary of Treasury for use in verifying claims for the advance payment of the earned income tax credit or to verify a claim of employment on a tax return.

A "Report on New System," required by 5 U.S.C. 552a(o), as implemented by Transmittal Memoranda 1 and 3 to OMB Circular A–108, was sent to the Chairman, Committee on Governmental Affairs, United States Senate, the Chairman, Committee on Government Reform and Oversight, House of Representatives, and the Administrator, Office of Information and Regulatory Affairs, Office of Management and Budget on January 22, 1998.

Signed at Washington, DC, on January 22, 1998.

Dan Glickman,

Secretary of Agriculture.

Accordingly, the system notice is amended as follows:

USDA/OP–1

SYSTEM NAME:

Personnel and Payroll System for USDA Employees.

* * * * *

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

* * * * *

(26) The names, social security numbers, home addresses, dates of birth, dates of hire, quarterly earnings, employer identifying information, and State of hire of employees may be disclosed to the Office of Child Support Enforcement, Administration for Children and Families, Department of Health and Human Services for the purpose of locating individuals to establish paternity, establishing and modifying orders of child support, identifying sources of income, and for other child support enforcement actions as required by the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (Pub. L. 104–193).

DEPARTMENT OF AGRICULTURE

Cooperative State Research, Education, and Extension Service

Notice of Intent to Seek Approval to Extend and Revise a Current Information Collection

AGENCY: Cooperative State Research, Education, and Extension Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–13) and Office of Management and Budget (OMB) regulations at 5 CFR Part 1320 (60 FR 44977, August 29, 1995), this notice announces the Cooperative State Research, Education, and Extension Service's (CSREES) intention to request approval to revise and extend a current information collection from applicants for Federal financial assistance.

DATES: Comments on this notice must be received by April 3, 1998 to be assured of consideration.

ADDITIONAL INFORMATION OR COMMENTS: Contact Sally J. Rockey, Deputy Administrator, Competitive Research Grants and Awards Management, CSREES, USDA, STOP 2240, 1400 Independence Avenue, S.W., Washington, D.C. 20250–2240, (202) 401–1761. E-mail: OEP@reeusda.gov.

SUPPLEMENTARY INFORMATION:

Title: Application Kit for Research, Education, and Extension Projects.

OMB Number: 0524–0022.

Expiration Date of Current Approval: May 31, 1998.

Type of Request: Intent to seek approval to revise and extend an information collection for three years.

Abstract: USDA/CSREES sponsors ongoing agricultural research, education, and extension programs under which competitive, special, and other awards of a high-priority nature are made. These programs are authorized pursuant to the authorities contained in the Act of August 4, 1965, Pub. L. 89–106, as amended (7 U.S.C. 450i); Section 1414 of Pub. L. 95–113, "National Agricultural Research, Extension, and Teaching Policy Act of 1977" (7 U.S.C. 450i(b)); Sections 1417(b)(1), 1417(b)(4), 1419, 1458A, 1472, 1473D, 1475, and 1480 of Pub. L. 95–113, as amended (7 U.S.C. 3154); Section 9 of Pub. L. 95–592, as amended, 7 U.S.C. 5821, "Native Latex Commercialization and Economic Development Act of 1978," (7 U.S.C. 178); Research and Marketing Act of 1946, as amended (7 U.S.C. 427i, 1624); section 1433 of Pub. L. 97–98, "National Agricultural Research, Extension, and Teaching Policy Act Amendments of 1981"; Section 632 of the Foreign Assistance Act (22 U.S.C. 2392(a)); Pub. L. 100–460; Section 1668 of the Food, Agriculture, Conservation, and Trade Act of 1990 (7 U.S.C. 5921); Section 1455 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended by Section 815 of the Federal Agriculture Improvement and Reform Act (FAIR Act) of 1996 (7 U.S.C. 3241); the Equity in Educational Land-Grant Status Act of 1994 (7 U.S.C. 301 *et seq.*) for the Tribal Colleges Education Equity Grants Program; the Small Business Development Act of 1982, Pub. L. 97–219, as amended (15 U.S.C. 638); Section 25 of the Food Stamp Act of 1977, as amended by Section 401(h) of the FAIR Act of 1996 (Pub. L. 104–127) (7 U.S.C. 2034); Section 793 of the FAIR Act of 1996 (7 U.S.C. 2204(f)).

In addition, formula-funded programs administered by CSREES use one form to provide assurances about their programs. These programs are authorized by the Hatch Act of 1887, as amended (7 U.S.C. 361a–i); the Evans-Allen Cooperative Agricultural Program, Section 1445 of Pub. L. 95–113, the Food and Agriculture Act of 1977, as amended (7 U.S.C. 3222); Section 1433 of Subtitle E (Section 1429–1439), Title XIV of Pub. L. 95–113 (7 U.S.C. 3191–3201, as amended; and the McIntire-Stennis Cooperative Forestry Research Act of October 10, 1962 (16 U.S.C. 582a–582a–7).

Before awards can be made, certain information is required from applicants as part of an overall proposal package. In addition to project summaries, descriptions of the research, extension, or education efforts, literature reviews, curricula vitae of principal investigators/project directors, and other, relevant technical aspects of the proposed project, supporting documentation of an administrative and budgetary nature also must be provided. Because of the nature of the competitive, peer-reviewed process, it is important that information from applicants be available in a standardized format to ensure equitable treatment.

Each year, solicitations are issued requesting proposals for various research, education, and extension areas targeted for support. Applicants submit proposals for these targeted areas following formats outlined in the proposal application guidelines accompanying each program's solicitation. These proposals are evaluated by peer review panels and awarded on a competitive basis.

These programs use forms approved in prior OMB-approved collection of information packages (OMB Nos. 0524–0022 and 0524–0024).

Forms CSREES–661, "Proposal Cover Page;" CSREES–55, "Proposal Budget;" CSREES–662, "Assurance Statement(s)," CSREES–663, "Current and Pending Support;" and CSREES–1234, "National Environmental Policy Act Exclusions" are mainly used for proposal evaluation and administration purposes. The CSREES–1234 has been approved under a separate CSREES collection (OMB Number 0524–0033 contains the burden hours for all CSREES programs) and is included in the Application Kit so an applicant can provide pertinent information regarding the possible environmental impacts of a proposed project. While some of the information will be used to respond to inquiries from Congress and other government agencies, the forms are not designed to be statistical surveys or data collection instruments. Their completion by potential recipients is a normal part of the application to Federal agencies which support basic and applied science.

The following information will continue to be collected:

Form CSREES–661—*Proposal Cover Page:* Provides names, mailing and electronic addresses, and telephone numbers of principal investigators/project directors and authorized agents of applicant institutions and general information regarding the proposals.

Form CSREES–55—*Proposal Budget:* Provides a breakdown of the purposes for which funds will be spent in the event of an award.

Form CSREES–662—*Assurance Statement(s):* Provides required assurances of compliance with regulations involving the protection of human subjects, animal welfare, and recombinant DNA research. This form is used for competitive, special, and formula-funded projects.

Form CSREES–663—*Current and Pending Support:* Provides information for active and pending projects.

Form CSREES–1234—*National Environmental Policy Act Exclusions:* Allows identification of whether or not the proposal fits one of the exclusions listed for compliance with the National Environmental Policy Act (7 CFR Part 3407). This information has been and will continue to be used in determinations as to whether or not further action is needed to meet the requirements of this Act.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average five and three-quarter (5¾) hours per response (including one-quarter hour for the CSREES–1234).

Respondents: Non-profit institutions, individuals, business, Federal government, and State, local, or Tribal governments.

Estimated Number of Responses per Form: 8,900. 6,600 complete the entire collection; 2,300 complete only the CSREES–662.

Estimated Total Annual Burden on Respondents: 37,450 hours, broken down by: 19,800 hours for Form CSREES–661 (three hours per 6,600 respondents); 6,600 hours for Form CSREES–55 (one hour per 6,600 respondents); 4,450 hours for Form CSREES–662 (one-half hour per 8,900 respondents); and 6,600 hours for Form CSREES–663 (one hour per 6,600 respondents).

Frequency of Responses: Annually.

Copies of this information collection can be obtained from Suzanne Plimpton, Policy and Program Liaison Staff, CSREES, (202) 401–1302. *E-mail:* OEP@reeusda.gov.

Comments: Comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. Comments may be sent to: Sally J. Rockey, Deputy Administrator, Competitive Research Grants and Awards Management, CSREES, USDA, STOP 2240, 1400 Independence Avenue, S.W., Washington, D.C. 20250–2240, (202) 401–1761. E-mail: OEP@reeusda.gov. Comments also may be submitted directly to OMB and should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20502.

All responses to this notice will be summarized and included in the request for OMB approval. All comments also will become a matter of public record.

Done at Washington, D.C., this day of 21st day of January 1998.

B.H. Robinson,

Administrator, Cooperative State Research, Education, and Extension Service.

[FR Doc. 98–1979 Filed 1–27–98; 8:45 am]

BILLING CODE 3410–22–P

DEPARTMENT OF AGRICULTURE

Farm Service Agency

Rural Housing Service

Rural Business-Cooperative Service

Notice of Request for Extension of Currently Approved Information Collection

AGENCIES: Farm Service Agency, Rural Housing Service, and Rural Business-Cooperative Service, USDA.

ACTION: Proposed Collection; comments request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the intent of the Farm Service Agency (FSA), Rural Housing Service (RHS), and the Rural Business-Cooperative Service (RBS) to request an extension of currently approved information collections for four regulations and a form used in support of the FSA Farm Loan Program (FLP) (formerly Farmer Programs of the Farmers Home Administration (FmHA)), two regulations used in support of the RHS Multi-family Housing (MFH) and Community Facilities (CF) loan programs, and one regulation used in support of the RBS Direct Business and Industry loan program. These rules do not involve the loans of the Commodity Credit Corporation (CCC) administered by FSA or the Single Family Housing (SFH) loans of RHS. This renewal does not involve any revisions to the program rules.

DATES: Comments on this notice must be received on or before March 30, 1998 to be assured consideration.

FOR FURTHER INFORMATION CONTACT: For additional information contact Phillip Elder, Senior Loan Officer, USDA, Farm Service Agency, Farm Loan Programs, Loan Servicing Division, 1400 Independence Avenue, SW., STOP 0523, Washington, DC 20013–0523; Telephone (202) 690–4012; Electronic mail: pelder@wdc.fsa.usda.gov.

SUPPLEMENTARY INFORMATION:

Title: Form FmHA 1962–1, Agreement for the Use of Proceeds/Release of Chattel Security.

OMB Control Number: 0560–0171.

Expiration Date of Approval: March 31, 1998.

Type of Request: Extension of Currently Approved Information Collection.

Abstract: The collection of information on Form FmHA 1962–1 is required by a consent decree executed in relation to Coleman V. Block, 663 F. Supp 1315 (D.N.D. 1987). The former Farmers Home Administration (FmHA) agreed in the consent decree to approve a borrower's planned use of proceeds from the disposition of their chattel security, record any changes to planned use, and record the actual disposition of chattel security for the year of operation. Also, this form is needed to implement Section 335(f) of the Consolidated Farm and Rural Development Act (Act) (7 U.S.C. 1985(f)), which requires release of normal income security to pay essential household and farm operating expenses of the borrower, until the Agency accelerates the loan. Form FmHA 1962–1 provides a uniform method for local Agency loan officers to approve these actions.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 20 minutes per response.

Respondents: Individuals or households, businesses or other for profit and farms.

Estimated Number of Respondents: 56,075.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 18,505 hours.

Title: 7 CFR 1806–A, Real Property Insurance.

OMB Control Number: 0575–0087.

Expiration Date: March 31, 1998.

Type of Request: Extension of Currently Approved Information Collection.

Abstract: This regulation is currently shared by FSA and the MFH programs of RHS. This regulation governs the servicing of property insurance on buildings and land securing the interest of RHS or FSA in connection with an FSA FLP Loan or RHS MFH loan. This regulation does not apply to the CF and SFH programs of RHS. The information collections pertain primarily to the verification of insurance on property securing Agency loans. This information collection is submitted by FSA or RHS borrowers to Agency offices. It is necessary to protect the government from losses due to weather, natural disasters, or fire and ensure that the Act's loan making requirements of hazard insurance are met by loan applicants. See §§ 303(c), 312(c), and 321(b) of the Act.

Estimate of Burden: Public reporting burden for this collection of information

is estimated to average 29 minutes per response.

Respondents: Individuals or households, businesses or other for profit and farms.

Estimated Number of Respondents: 20,391.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 9,944 hours.

Title: 7 CFR 1951–L, Servicing Cases Where Unauthorized Loan or Other Assistance Was Received.

OMB Control Number: 0560–0160.

Expiration Date: March 31, 1998.

Type of Request: Extension of Currently Approved Information Collection.

Abstract: FSA encounters cases where unauthorized assistance was received by a borrower. This assistance may be a loan where the recipient did not meet the eligibility requirements set forth in statute or program regulations, or both, or where the borrower qualified for loan assistance but a lower subsidized interest rate was charged on the loan, resulting in the borrower's receipt of unauthorized interest subsidy benefits. The unauthorized assistance may also be in the form of loan servicing where a borrower received an excessive write-down or write-off of their debt. The information collected under this regulation is provided on a voluntary basis by the borrower, although failure to cooperate to correct loan accounts may result in liquidation of the loan. The information to be collected will primarily be financial data such as amount of income, farm operating expenses, depreciation, crop yields, etc.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 4 hours per response.

Respondents: Individuals or households, businesses or other for profit and farms.

Estimated Number of Respondents: 105.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 420 hours.

Title: 7 CFR 1965–A, "Servicing of Real Estate Security for Farmer Program Loans and Certain Note-Only Cases."

OMB Control Number: 0560–0158.

Expiration Date: March 31, 1998.

Type of Request: Extension of Currently Approved Information Collection.

Abstract: This regulation promulgates provisions of sections 331 and 335 of the Act (7 U.S.C. §§ 1981 and 1985). Section 331, of the Act, in part, authorizes the Secretary of Agriculture to modify, subordinate and release terms of security instruments, leases, contracts, and agreements entered into by FSA. That section also authorizes transfers of security property as the Secretary deems necessary to carry out the purpose of the loan or protect the Government's financial interest. Section 335 of the Act provides servicing authority for real estate security; operation or lease of realty, disposition of property; conveyance of real property interest of the United States; easements; and condemnations. The information collection required by this subpart relates to a program benefit recipient or loan borrower requesting action on security which they own, which was purchased with FSA loan funds, improved with FSA loan funds or has otherwise been mortgaged to the Agency to secure a government loan. The information to be collected will primarily be financial data not already on file, such as borrower asset values.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average .42 hours per response.

Respondents: Individuals or households, businesses or other for profit and farms.

Estimated Number of Respondents: 15,263.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 6,465 hours.

Title: 7 CFR part 1951, subpart F—Analyzing Credit Needs and Graduation of Borrowers.

OMB Control Number: 0575–0093.

Expiration Date: March 31, 1998.

Type of Request: Extension of Currently Approved Information Collection.

Abstract: This regulation is currently shared by FSA, RHS, and RBS. Section 333 of the Act and § 502 of the Housing Act of 1949, as amended, require the Agencies to graduate their direct loan borrowers to other credit when they are able to do so. Graduation is an integral part of Agency lending, as Government loans are not meant to be extended beyond a borrower's need for subsidized rates or non-market terms. The notes, security instruments, or loan agreements of most borrowers require borrowers to refinance their Agency loans when other credit becomes available at reasonable rates and terms. If a borrower finds other credit is not available at reasonable rates and terms, the Agency will continue to review the borrower for possible graduation at periodic intervals. Also, § 333A(f) of the Act (7 U.S.C. 1983a(f)) requires the Agency to provide a financial prospectus to lenders who may be interested in providing guaranteed and non-guaranteed credit to the FSA's direct farm loan borrowers. The information to be collected to carry out these mandates will primarily be financial data such as amount of income, farm operating expenses, asset values, and liabilities.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 2.85 hours per response.

Respondents: Individuals or households, businesses or other for profit and farms.

Estimated Number of Respondents: 69,781.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 199,020.

Title: 7 CFR part 1941, Subpart A—Operating Loan Policies, Procedures and Authorizations.

OMB Control Number: 0560–0162.

Expiration Date: March 31, 1998.

Type of Request: Extension of Currently Approved Information Collection.

Abstract: Section 311 of the Act (7 U.S.C. 1941) requires that an applicant for an FSA farm operating loan be a citizen of the United States, possess the legal capacity to incur the loan obligation, have training and experience sufficient to assure reasonable prospects of success in the proposed farm operation, be an operator of not larger than a family farm, be unable to obtain sufficient credit elsewhere, and not have received a direct operating loan in 6 or fewer years. Section 373 of the Act also generally prohibits the Secretary from making or guaranteeing a farm loan to a borrower who has received debt forgiveness on such a loan. The Debt Collection Improvement Act (31 U.S.C. § 3720B(a)) further generally precludes an agency from making a loan to a borrower who to a person who is delinquent on any Federal debt. Also, FSA loan approval officials must determine that adequate security and repayment ability for the loan are available, and that funds are used only for those purposes authorized by law. Reporting requirements to ensure compliance with these eligibility requirements are imposed on the public by regulations set out in 7 CFR part 1941, subpart A.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average .21 hours per response.

Respondents: Individuals or households, businesses or other for profit and farms.

Estimated Number of Respondents: 56,170.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 11,673 hours.

Comments

The Agencies are soliciting comments on the burden of all of the above subparts regarding: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. These comments should be sent to Phillip Elder, Senior Loan Officer, USDA, FSA, Farm Loan Programs, Loan Servicing Division, 1400 Independence Avenue, SW., STOP 0523, Washington, DC 20250–0523.

Copies of the information collections may be obtained from Mr. Elder at the above address. Comments regarding paperwork burden will be summarized and included in the request for OMB approval of the information collection. All comments will also become a matter of public record.

Signed in Washington, DC, on January 20, 1998.

Bruce R. Weber,

Acting Administrator, Farm Service Agency.

Jan E. Shadburn,

Administrator, Rural Housing Service.

Dayton J. Watkins,

Administrator, Rural Business—Cooperative Service.

DEPARTMENT OF AGRICULTURE

Forest Service

Committee of Scientists Meeting

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: A meeting of the Committee of Scientists is scheduled for February 12–13, 1998, in Seattle, Washington. The purpose of the meeting is to discuss planning issues concerning the National Forests in the Pacific Northwest (Washington and Oregon) and Alaska Regions; to meet with representatives from federal, state, and tribal organizations, to share information and ideas about Committee members' assignments; to continue discussions on the scientific principles underlying land and resource management; and to conduct any other Committee business that may arise. The meeting is open to the public.

DATES: The meeting is scheduled for February 12–13 in Seattle, Washington.

ADDRESSES: The meeting will be held at the University Plaza Hotel, 400 NE 45th Street, Seattle, Washington.

Written comments on improving land and resource management planning may be sent to the Committee of Scientists, P.O. Box 2140, Corvallis, OR 97339. Also the Committee may be accessed via the Internet at www.cof.orst.edu./org/scicomm/.

FOR FURTHER INFORMATION CONTACT:

Bob Cunningham, Designated Federal Official to the Committee of Scientists, telephone: 202–205–2494.

SUPPLEMENTARY INFORMATION: On February 12, the Committee of Scientists meeting will begin at 8 a.m. and end at 7 p.m. On February 13, the meeting will begin at 8 a.m. and end at 4 p.m. Citizens may address the Committee, February 12, beginning at 4 p.m., to present ideas on how to improve National Forest System land and resource management planning. Citizens who wish to speak must register at the meeting before 4 p.m. Each speaker will be limited to a maximum of 5 minutes. Persons may also submit written suggestions to the Committee at the meeting or by mail at the addresses listed under the Addresses heading.

The Committee of Scientists is chartered to provide scientific and technical advice to the Secretary of Agriculture and the Chief of the Forest Service on improvements that can be made to the National Forest System land and resource management planning process (62 FR 43691); August 15, 1997). Notice of the names of the appointed Committee members was published December 16, 1997 (62 FR 65795). Agendas and locations for future meetings will be published as separate notices in the **Federal Register**.

Dated: January 22, 1998.

Robert C. Joslin,

Deputy Chief for National Forest System.

Willamette Provincial Interagency Executive Committee (PIEC), Advisory Committee

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Willamette PAC Committee will meet on Thursday, February 19, 1998, at the Courtyard By Marriott, 3443 Hutton Street, Springfield, Oregon 97477; phone (541) 726–2121. The PAC Committee meeting is scheduled for 9:00 a.m. to approximately 3:00 p.m. The tentative agenda includes: (1) Riparian Reserves, (2) Update on Province Late-Successional Reserve Assessment, (3) Update from Interagency Advisory Committee Staff, (4) Decision on response to 1997 Monitoring results, and (5) Public Forum.

The public forum is tentatively scheduled to begin at 10:00 a.m. Time allotted for individual presentations will be limited to 3 minutes. Written comments are encouraged. Written comments may be submitted prior to the meeting by sending them to Designated Federal Official Neal Forrester at the address given below.

FOR FURTHER INFORMATION CONTACT: For more information regarding this meeting, contact Designated Federal Official Neal Forrester, Willamette National Forest, 211 East Seventh Avenue, Eugene, Oregon 97401; (541) 465–6924.

Dated: January 22, 1998.

Rural Business—Cooperative Service

Maximum Portion of Guarantee Authority Available for Fiscal Year 1998

AGENCY: Rural Business—Cooperative Service, USDA.

ACTION: Notice.

SUMMARY: As set forth in the final rule under 7 CFR part 4279, subpart B, each fiscal year the Agency shall establish a limit on the maximum portion of guarantee authority available for that fiscal year that may be used to guarantee loans with a guarantee fee of 1 percent or guaranteed loans with a guarantee percentage exceeding 80 percent.

VOL
63
ISS
18
JA
28
1998
UMI

Allowing the guarantee fee to be reduced to 1 percent or exceeding the 80 percent guarantee on certain guaranteed loans that meet the conditions set forth in subpart B of part 4279 will allow for the targeting of projects in rural communities that remain persistently poor, experience long-term population decline and job deterioration, and other related criteria.

Not more than 7 percent of the Agency quarterly apportioned guarantee authority will be reserved for loan requests with a guarantee fee of 1 percent, and not more than 15 percent of the Agency quarterly apportioned guarantee authority will be reserved for guaranteed loan requests with a guaranteed percentage exceeding 80 percent. Once the above quarterly limits have been reached, all additional loans guaranteed during the remainder of that quarter will require a 2 percent guarantee fee and not exceed an 80 percent guarantee limit.

Written requests by the Rural Development State Office for approval of a guaranteed loan with a 1 percent guarantee fee or a guaranteed loan exceeding 80 percent must be forwarded to the National Office, Attn.: Director, Business Programs Processing Division, for review and consideration prior to obligation of the guaranteed loan. The Administrator will provide a written response to the State Office confirming approval or disapproval of the request.

EFFECTIVE DATE: January 28, 1998.

FOR FURTHER INFORMATION CONTACT: Kenneth E. Hennings, Senior Loan Specialist, Business Programs Processing Division, Rural Business—Cooperative Service, USDA, Stop 3221, Washington, DC 20250–3221, telephone (202) 690–3809.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12866.

Dated: January 11, 1998.

Dayton J. Watkins,

Administrator.

BILLING CODE 3410–XY–U

COMMISSION ON CIVIL RIGHTS

Hearing on Police-Community Relations—Sonoma County

AGENCY: Commission on Civil Rights.

ACTION: Notice of hearing.

SUMMARY: Notice is hereby given pursuant to the provisions of the Civil Rights Commission Amendments Act of 1994, Section 3, Public Law 103–419, 108 Stat. 4338, as amended, and 45 CFR 702.3, that a public hearing before a Subcommittee of the U.S. Commission on Civil Rights will commence on Friday, February 20, 1998, beginning at 8:30 a.m., in the Justice Joseph A. Rattigan Building, in Conference Room 410, located at 50 D Street, Santa Rosa, CA 95404.

The purpose of the hearing is to collect information within the jurisdiction of the Commission, under 45 CFR 702.2, related particularly to administration of justice, police-community relations, and the interaction between Federal and local law enforcement agencies in Sonoma County in order to determine underlying causes contributing to allegations of excessive force by policy and other administration of justice officials.

The Commission is authorized to hold hearings and to issue subpoenas for the production of documents and the attendance of witnesses pursuant to 45 CFR 701.2(c). The Commission is an independent bipartisan, factfinding agency authorized to study, collect, and disseminate information, and to appraise the laws and policies of the Federal Government, and to study and collect information with respect to discrimination or denials of equal protection of the laws under the Constitution because of race, color, religion, sex, age, disability, or national origin, or in the administration of justice.

Hearing impaired persons who will attend the hearing and require the services of a sign language interpreter, should contact Betty Edmiston, Administrative Services and Clearinghouse Division at (202) 376–8105 (TDD (202) 376–8116), at least five (5) working days before the scheduled date of the hearing.

FOR FURTHER INFORMATION CONTACT: Barbara Brooks, Press and Communications (202) 367–8312.

Dated: January 23, 1998.

Stephanie Y. Moore,

General Counsel.

Certain Pasta From Italy and Turkey: Notice of Extension of Time Limits for Antidumping Duty First Administrative and New Shipper Reviews

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: January 28, 1998.

FOR FURTHER INFORMATION CONTACT: Edward Easton or John Brinkmann, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 482–1777 and (202) 482–5288, respectively.

SUPPLEMENTARY INFORMATION:

Postponement of Preliminary Results

A. First Administrative Reviews

On August 28, 1997, the Department initiated the first administrative reviews of the antidumping duty orders on certain pasta from Italy and Turkey, covering the period January 19, 1996 through June 30, 1997 (62 FR 45621). The current deadline for the preliminary results of these reviews is April 2, 1998. Section 751(a)(3)(A) of the Tariff Act of 1930, as amended by the Uruguay Round Agreements Act ("the Act"), requires the Department to make a preliminary determination in an administrative review within 245 days after the last day of the anniversary month of an order for which a review is requested. However, if it is not practicable to complete the review within the time period, section 751(a)(3)(A) allows the Department to extend this time period to up to 365 days.

We determine that it is not practicable to complete this review within the original time frame because this review involves collecting and analyzing information from a large number of companies and examining allegations of sales below the cost of production for all companies. Although section 751(a)(3)(A) of the Act allows for an extension of up to 120 days, we believe at this time that only a limited extension of the deadline is necessary to analyze the complex legal and methodological issues and coordinate verification of the companies participating in these reviews. Accordingly, the Department is extending the time limit for completion of the preliminary results of these administrative reviews by 90 days, or until July 1, 1998. We plan to issue the final results of these administrative reviews within 120 days after publication of the preliminary results.

B. New Shipper Review

On August 15, 1997, the Department initiated a new shipper review relating to the antidumping duty order on certain pasta from Italy, covering the period July 1, 1996 through June 30, 1997 (62 FR 44643, August 22, 1997). The current deadline for the preliminary results is February 11, 1998. Section 751(a)(2)(B)(iv) of the Act requires the Department to make a preliminary determination within 180 days after the date on which the new shipper review was initiated. However, if the Department concludes that the case is extraordinarily complicated, it may extend the 180-day period to 300 days.

Pursuant to section 751(a)(2)(B)(iv) of the Act, the Department has determined that this case is extraordinarily complicated given the complex nature of the issues similar to those in the first administrative reviews, including an allegation of sales below the cost of production. In order to analyze the issues specific to this case and to benefit from the analyses of similar issues in the administrative reviews, we are extending the deadline for issuing the preliminary results to no later than June 11, 1998. We plan to issue the final results within 90 days after the date the preliminary results are issued.

These extensions are in accordance with sections 751(a)(2)(B)(iv) and 751(a)(3)(A) of the Act.

Dated: January 22, 1998.

Robert S. LaRussa,

Assistant Secretary for Import Administration.

City College of New York; Notice of Decision on Application for Duty-Free Entry of Scientific Instrument

This is a decision pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 am and 5:00 pm in Room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Decision: Denied. Applicant has failed to establish that domestic instruments of equivalent scientific value to the foreign instrument for the intended purposes are not available.

Reasons: Section 301.5(e)(4) of the regulations requires the denial of applications that have been denied without prejudice to resubmission if they are not resubmitted within the specified time period. This is the case for the following docket.

Docket Number: 97–054. *Applicant:* City College of New York, CUNY, 140th Street and Convent Avenue, Room 165, New York, NY 11235. *Instrument:* Rapid Kinetics Device, Model SFA–20. *Manufacturer:* Hi-Tech Scientific, United Kingdom. *Date of Denial Without Prejudice to Resubmission:* September 9, 1997.

National Institutes of Health; Notice of Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 A.M. and 5:00 P.M. in Room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket Number: 97–093. *Applicant:* National Institutes of Health, Bethesda, MD 20892. *Instrument:* Micromanipulator Microscope, Model MSM. *Manufacturer:* Singer Instrument Co., Ltd., United Kingdom. *Intended Use:* See notice at 62 FR 62288, November 21, 1997.

Comments: None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States. *Reasons:* The foreign instrument provides an optical microscope mounted over a micromanipulator with a videoscreen and camera and a unique optic-fiber dissection needle. A university research laboratory and a manufacturer of similar equipment advised December 23, 1997 that (1) this capability is pertinent to the applicant's intended purpose and (2) they know of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

We know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

Export Trade Certificate of Review

ACTION: Notice of Issuance of an Export Trade Certificate of Review, Application No. 97–00003.

SUMMARY: The Department of Commerce has issued an Export Trade Certificate of Review to The Association for the Administration of Rice Quotas, Inc. ("AARQ"). This notice summarizes the conduct for which certification has been granted.

FOR FURTHER INFORMATION CONTACT: Morton Schnabel, Acting Director, Office of Export Trading Company Affairs, International Trade Administration, 202–482–5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (15 U.S.C. 4001–21) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. The regulations implementing Title III are found at 15 CFR Part 325 (1997).

The Office of Export Trading Company Affairs ("OETCA") is issuing this notice pursuant to 15 CFR 325.6(b), which requires the Department of Commerce to publish a summary of a Certificate in the **Federal Register**. Under Section 305(a) of the Act and 15 CFR 325.11(a), any person aggrieved by the Secretary's determination may, within 30 days of the date of this notice, bring an action in any appropriate district court of the United States to set aside the determination on the ground that the determination is erroneous.

Description of Certified Conduct

Export Trade

Semi-milled or wholly milled rice, whether or not polished or glazed (item 1006.30 of the Harmonized Tariff Schedules (HTS)), and husked (brown) rice (item 1006.20 of the HTS).

Export Markets

Rice for which TRQ awards have been made will be exported to the countries that comprise the European Union. Exports that will serve as a basis for distribution of the proceeds of the TRQ awards will be to the European Union as well as all parts of the world except the United States (the fifty states of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands).

Export Trade Activities and Methods of Operations

1. Purpose. AARQ will manage on an open tender basis the tariff-rate quotas ("TRQs") for milled and brown rice granted by the European Union ("EU") to the United States under the U.S.-EU Enlargement Agreement signed July 22, 1996, or any amended or successor agreement providing for EU rice TRQs for the United States and provide for distribution of the proceeds received from the tender process based on exports of milled and brown rice, and rice in the husk (paddy or rough) as set forth below ("the TRQ System").

2. Implementation.

A. Administrator

AARQ shall contract with a neutral third party Administrator who is not engaged in the production, milling, distribution, or sale of rice, who shall bear responsibility for administering the TRQ System, subject to general oversight and supervision by the Board of Directors of AARQ.

B. Membership

Any person or entity domiciled or incorporated in the United States may become a Member of AARQ upon (i) submission to the Administrator of an application accompanied by evidence that the applicant is a rice mill or has exported U.S. rice from the United States, (ii) execution of the AARQ Operating Agreement, and (iii) in the case of applications received after December 31, 1997, payment of a one-time, nonrefundable fee of $3,000 to AARQ. The fee may be waived for small exporters, as determined by the Board of Directors of AARQ.

C. Open Tender Process; Persons or Entities Eligible To Bid

(a) AARQ shall offer TRQ Certificates for duty-free or reduced-duty shipments of rice to the EU on open tender to the highest bidders. All U.S. TRQ quantities (in metric tons) shall be allocated through the Open Tender Process for such tranches ("TRQ Tranches") as may be provided for in the relevant EU regulations. The Open Tender Process shall constitute the sole and exclusive mechanism by which AARQ allocates TRQ quantities.

(b) Any person or entity incorporated or domiciled in the United States, whether or not a Member of AARQ, shall be eligible to bid in any Open Tender Process.

D. Notice

The Administrator will publish notice ("Notice") of each Open Tender Process to be held for the allocation of TRQs for each TRQ Tranche in the Journal of Commerce, and at the discretion of AARQ in other publications of general circulation within the U.S. rice industry. The Notice will invite independent bids and will specify (i) the total amount (in metric tons) of each TRQ to be allocated pursuant to the applicable TRQ Tranche; and (ii) the date on which all bids for TRQ Certificates must be submitted to and received by the Administrator (the "Bid Date"). The Notice will normally be published not later than 45 days prior to the opening of the TRQ Tranche; if EU decisions on the opening of TRQs or EU regulations necessitate a condensed timetable for notice and bidding, the Administrator will publish the required Notice as promptly as possible after the EU announcements, and will in any event specify a Bid Date that is at least 5 working days after publication of the Notice. The Notice will provide information on how to obtain forms to be used to submit bids. Bids may be submitted by hand delivery or facsimile, and must be received by the Administrator by 5:00 p.m. EST on the Bid Date.

E. Form of Bid; Performance Security

(a) A bid shall be submitted on a form provided by the Administrator and shall state (i) the name, address, telephone, and facsimile or telex number of the bidder; (ii) the form of rice and quantity in metric tons bid, with a minimum bid quantity of twenty (20) metric tons; (iii) the bid price in U.S. dollars per metric ton; and (iv) the total value of the bid.

(b) The bid form shall contain a provision, signed by the bidder, that the bidder agrees that any dispute that may arise relating to the bidding process or the award of TRQ Certificates shall be settled by arbitration administered by the American Arbitration Association in accordance with its Commercial Arbitration Rules, and judgment on the award rendered by the arbitrator may be entered in any court having jurisdiction thereof.

(c) The bidder shall submit with its bid(s) a performance bond, irrevocable letter of credit drawn on a U.S. bank, cashier's check, wire transfer, or equivalent performance security, in a form approved by AARQ and for the benefit of an account designated by the Administrator, in the amount of $50,000 or the total value of its bid(s), whichever is less. Such performance security shall be forfeited if the bidder fails timely to pay for TRQ Certificates awarded to it. At the option of a successful bidder, its performance security may be applied to the price of its successful bid(s), or retained as security for a subsequent Open Tender Process. Any performance security not forfeited, applied to a bid price, or retained as future security shall be returned to the bidder promptly after the close of the Open Tender Process.

(d) The contents of the bids shall be treated by the Administrator as confidential and may be disclosed only to another neutral third party as necessary to ensure the effective operation of the TRQ System; provided, however, that after issuance of all TRQ Certificates in an Open Tender Process, the Administrator shall promptly notify all bidders of and release to the public (i) the total tonnage for which TRQ Certificates were awarded under the milled rice TRQ Tranche and the brown rice TRQ Tranche, respectively, and (ii) the price per metric ton of the lowest successful bid for each TRQ Tranche.

F. TRQ Certificate Awards

(a) Following the close of the bidding period, after having carefully reviewed each apparently high bid to ensure its conformity with applicable requirements, the Administrator shall notify each high bidder that its bid(s) have been determined to be high bid(s). If two or more bidders have submitted identically priced high bids that together cover more than the available tonnage, the Administrator shall divide the award among those bidders in proportion to the quantities of their bids and offer the proportionate shares to each of those bidders. If any of those bidders rejects all or part of the quantity offered, it shall be offered first to the remaining such bidder(s) and then to the next highest bidder.

(b) Promptly after issuance of the notification that its bid is a high bid, a bidder shall pay the full amount of the bid to the Administrator either by certified check or by wire transfer to an account designated by the Administrator. If the bidder fails to pay the full amount of the bid on a timely

VOL 63 ISS 18 JA 28 1998 UMI

basis, the Administrator shall revoke the award, and grant the award to the next highest bidder.

(c) If the total bids received cover less than the tonnage of the relevant TRQ Tranche, the unused portion shall, to the extent consistent with EU regulations, be carried over to a succeeding Tranche. In any Tranche as to which EU regulations prohibit such carry-over, should total bids received cover less than the total tonnage available in the Tranche, the unused portion shall be offered to all successful bidders, in proportion to the size of their respective awards, at the lowest successful bid price.

(d) The full amounts received from successful bidders shall be deposited in an interest-bearing account designated by the Administrator in a financial institution approved by the Board of Directors of AARQ.

G. Delivery of TRQ Certificates

(a) Promptly after receiving the full amount of a successful bid, the Administrator shall transmit to the successful bidder(s) a TRQ Certificate that designates the quantity and form of rice covered by the bid and any known expiration date pursuant to EU regulations.

(b) To facilitate monitoring of shipments of packaged rice pursuant to EU regulations, the TRQ Certificate shall include a space for designation by the exporter of the type of packaging, if any, of the rice covered by the TRQ Certificate.

(c) TRQ Certificates issued to successful bidders shall be freely transferable.

H. Disposition of Tender Proceeds

(a) The proceeds of Open Tender Processes shall be applied and distributed as provided in paragraphs (b) through (g) below.

(b) Operating expenses of AARQ, including legal, accounting, and administrative costs of establishing and operating the TRQ System, shall be paid as incurred from tender proceeds as they become available, pursuant to authorization by the AARQ Board of Directors.

(c) From the remaining proceeds of tenders as soon as available—

(i) The U.S. Rice Industry Coalition for Exports, Inc. ("US RICE") shall be reimbursed for its documented TRQ-related legal expenses up to $450,000.

(ii) The Rice Millers' Association ("RMA") shall be reimbursed up to $450,000 (A) for its documented TRQ-related legal and administrative expenses, (B) for payment of up to $100,000 to the Committee for Fair Allocation of Rice Quotas for its documented TRQ-related legal expenses, (C) for payment of up to $25,000 to each former member of RMA's former export trade certificate of review (96–00003) (RMA/ETCR) for its documented third party legal expenses in calendar years 1996 and 1997 in connection with the establishment of an ETC for administration of the TRQs, and (D) for payment of $25,000 to each former member of the RMA/ETCR that documents that it shipped a minimum of 500 metric tons of milled or brown rice to the EU in calendar year 1996 and has not received a distribution under item (C). If there are insufficient funds available to make payments provided for in subparagraphs (c)(ii)(C) and (D), the amount that each former RMA/ETCR member would otherwise be entitled to receive will be reduced by a pro-rata amount so that the total distribution will be equal to the amount available for this purpose.

(d) From the proceeds of tenders in each of the first two years of operations, each Member of AARQ that documents to the Administrator exports of milled or brown rice to Austria, Sweden, or Finland during 1990–1994 shall be paid up to $75 per metric ton of its documented 1990–1994 annual average of such shipments, provided, however, that the total amount paid to all eligible Members under this provision may not exceed $1,800,000 in each of the two years. If $1,800,000 is insufficient to permit payments of $75 per metric ton, the amount that each eligible Member would otherwise be entitled to receive will be reduced pro rata so that the total distribution will be equal to the amount available for this purpose. Any documented costs previously incurred by the RMA in reviewing and analyzing documentation of member shipments to Austria, Finland, or Sweden during 1990–1994 shall be considered a cost of administering the TRQ System, pursuant to paragraph (b) above.

(e) Of the proceeds remaining at the end of each year of operations—

(i) Thirty-nine percent (39%) shall be distributed to Members exporting U.S. paddy, brown, and/or milled rice to the EU based on their percentage shares by volume, adjusted as provided in item (iii) of this subparagraph, of Members' exports to the EU during that year.

(ii) Thirty-nine percent (39%) shall be distributed to Members exporting U.S. paddy, brown, and/or milled rice to all non-EU Export Markets, based on their percentage shares by volume, adjusted as provided in item (iii) of this subparagraph, of Members' non-EU Export Markets exports during that year.

(iii) The computation of Members' exports under this paragraph (e) shall be made on a milled rice equivalent basis using U.S. Department of Agriculture standard equivalency factors.

(f) A year shall be the calendar year, except that if an Open Tender Process occurs in 1997, the first year of operations shall be the period from the date of that tender through December 31, 1998.

(g) Notwithstanding the foregoing provisions of this paragraph, promptly upon implementation of the TRQ System by the EU, the Board of Directors shall consider and may direct distributions during 1998 of proceeds from tenders of a major portion of the TRQ tonnage to be offered in the first year of operations, basing distributions pursuant to paragraph (e) (i) and (ii) on Members' exports during calendar year 1997.

I. Eligibility for Distributions; Submission of Export Documentation

Any Member of AARQ will be eligible to participate in distributions of tender proceeds if: (i) it is a member under the ETCR issued to AARQ by the U.S. Department of Commerce on the date of a distribution or its membership under the ETCR is the subject of an ETCR amendment pending with the Department of Commerce on that date, and (ii) it has timely submitted the required export documentation to the Administrator.

J. Distribution of Tender Proceeds

Within sixty (60) days of the submission of the required documentation for the year or as soon as practicable thereafter, the Administrator shall notify each Member, on a confidential basis, of its percentage share of U.S. rice exports by Members to the EU and/or non-EU destinations, as applicable, for the previous year, and the dollar amount of its distribution. As promptly as possible following such notification, the Administrator shall cause the distributions to be made to eligible Members. If an amendment to include an eligible Member under the ETCR is pending at the Department of Commerce, the Administrator shall cause such Member's distribution to be held for distribution promptly upon issuance of the amendment.

K. Arbitration of Disputes

Any controversy or claim arising out of or relating to the TRQ System or to the AARQ Operating Agreement, or the breach thereof, including *inter alia* a Member's qualification for a distribution, the interpretation of documents, or the distribution itself, shall be settled by arbitration administered by the American Arbitration Association in accordance with its Commercial Arbitration Rules, and judgment on the award rendered by the arbitrator may be entered in any court having jurisdiction thereof. Decisions by arbitrators shall not be incorporated by reference in this Certificate of Review. Any change to the Export Trade Activities and Methods of Operation listed in this certificate as a result of arbitration shall not be covered by this Certificate of Review unless certified by an amendment to this Certificate of Review.

L. Confidential Information

Confidential export documentation and any other confidential information submitted to AARQ by an applicant for membership, by a Member in connection with qualifying for a distribution, or by any person in connection with the TRQ System shall be marked "Confidential" and submitted to the Administrator, who shall maintain its confidentiality. The Administrator shall not disclose such confidential information to any Member other than the submitter, or to any officers, agents, or employees of any Member other than the submitter, and shall not disclose such confidential information to any other person except to another neutral third party as necessary to make the determination for which the information was submitted, to process distributions, or in connection with the arbitration of a dispute.

M. Annual Reports

In accordance with its Bylaws, AARQ shall publish an annual report, including a statement of the operating expenses and aggregate data on the distribution of proceeds, as reflected in the audited financial statement of the AARQ TRQ System.

3. Cooperation with the U.S. Government and the European Commission. AARQ will provide whatever information and consultations may be useful in order to ensure effective consultations between the U.S. Government and the European Commission concerning the implementation and operation of the TRQ System. In particular, while maintaining the confidentiality of confidential information submitted by bidders and Members, AARQ will provide its annual report, regular reports following the tender for each TRQ Tranche, reports on distributions of tender proceeds, and/or any other information that might be requested by the U.S. Government. Directly or through the U.S. Government, AARQ will endeavor to accommodate any information requests from the Commission (while protecting confidential data), and will consult with the Commission as appropriate.

4. Miscellaneous Implementing Provisions. AARQ and/or its members may (i) meet, discuss and provide for an administrative structure to implement the foregoing tariff rate quota management system, assess its operations and discuss modifications as necessary to improve its workability, (ii) meet, exchange and discuss information regarding the structure and method for implementing the foregoing tariff rate quota management system, (iii) meet, exchange and discuss the types of information needed regarding the bidding process, distribution of the bid proceeds, and past export transactions that are necessary for implementation of the system, (iv) meet, exchange and discuss information concerning U.S. and foreign agreements, legislation and regulations affecting the TRQ management system, (v) and otherwise meet, discuss and exchange information as necessary to implement the activities described above and take the necessary action to implement the foregoing TRQ management system.

Terms and Conditions of Certificate

1. Except as authorized in Paragraphs 2.E(d) and H(c) and (d) of the Export Trade Activities and Methods of Operation, in engaging in Export Trade Activities and Methods of Operation, neither AARQ, the Administrator, any Member, nor any neutral third party shall intentionally disclose, directly or indirectly, to any Member (including parent companies, subsidiaries, or other entities related to any Member) any information regarding any other Member's costs, production, inventories, domestic prices, domestic sales, capacity to produce Products for domestic sale, domestic orders, terms of domestic marketing or sale, or U.S. business plans, strategies, or methods, unless such information is already generally available to the trade or public.

2. AARQ and its Members will comply with requests made by the Secretary of Commerce on behalf of the Secretary or the Attorney General for information or documents relevant to conduct under the Certificate. The Secretary of Commerce will request such information or documents when either the Attorney General or the Secretary of Commerce believes that the information or documents are required to determine that the Export Trade, Export Trade Activities and Methods of Operation of a person protected by this Certificate of Review continue to comply with the standards of section 303(a) of the Act.

Definition

Neutral third party, as used in this Certificate of Review, means a party not otherwise associated with AARQ or any of its Members and who is not engaged in the production, milling, distribution, or sale of rice.

Members (Within the Meaning of Section 325.2(1) of the Regulations)

Members (in addition to applicant): Affiliated Rice Milling, Inc., Alvin, Texas; American Rice, Inc., Houston, Texas; Brinkley Rice Milling Company, Brinkley, Arkansas; Broussard Rice Mill, Inc., Mermentau, Louisiana; Busch Agricultural Resources, Inc., St. Louis, Missouri; Cargill, Inc. for the activities of its division, Cargill Rice Milling, Greenville, Mississippi; Connell Rice & Sugar Co., Westfield, New Jersey; Continental Grain Company, New York, New York; El Campo Rice Milling Company, Louise, Texas; Farmers' Rice Cooperative, Sacramento, California; Farmers Rice Milling Company, Inc., Lake Charles, Louisiana; Gulf Rice Milling, Inc., Houston, Texas; Liberty Rice Mill, Inc., Kaplan, Louisiana; Louis Dreyfus Corporation, Wilton, Connecticut; Newfield Partners Ltd., Miami, Florida; Producers Rice Mill, Inc., Stuttgart, Arkansas; Riceland Foods, Inc., Stuttgart, Arkansas; RiceTec, Inc., Alvin, Texas; Riviana Foods, Inc., Houston, Texas; SunWest Foods, Inc., Davis, California; Supreme Rice Mill, Inc., Crowley, Louisiana; The Rice Company, Roseville, California; and Uncle Ben's, Inc., Houston, Texas.

Protection Provided by Certificate

This Certificate protects AARQ, its Members, and directors, officers, and employees acting on behalf of AARQ and its Members from private treble damage actions and government criminal and civil suits under U.S. federal and state antitrust laws for the export conduct specified in the Certificate and carried out during its effective period in compliance with its terms and conditions.

Effective Period of Certificate

This Certificate continues in effect from the effective date indicated below until it is relinquished, modified, or revoked as provided in the Act and the Regulations.

Other Conduct

Nothing in this Certificate prohibits AARQ and its Members from engaging

VOL 63 ISS 18 JA 28 1998 UMI

in conduct not specified in this Certificate, but such conduct is subject to the normal application of the antitrust laws.

Disclaimer

The issuance of this Certificate of Review to AARQ by the Secretary of Commerce with the concurrence of the Attorney General under the provisions of the Act does not constitute, explicitly or implicitly, an endorsement or opinion by the Secretary of Commerce or by the Attorney General concerning either (a) the viability or quality of the business plans of AARQ or its Members or (b) the legality of such business plans of AARQ or its Members under the laws of the United States (other than as provided in the Act) or under the laws of any foreign country.

The application of this Certificate to conduct in export trade where the United States Government is the buyer or where the United States Government bears more than half the cost of the transaction is subject to the limitations set forth in Section V.(D.) of the "Guidelines for the Issuance of Export Trade Certificates of Review (Second Edition)," 50 Fed. Reg. 1786 (January 11, 1985).

In accordance with the authority granted under the Act and Regulations, this Certificate of Review is hereby granted to Association for the Administration of Rice Quotas, Inc.

A copy of this certificate will be kept in the International Trade Administration's Freedom of Information Records Inspection Facility Room 4102, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230.

Dated: January 22, 1998.

Morton Schnabel,

Acting Director, Office of Export Trading Company Affairs.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Coastal Zone Management: Federal Consistency Appeal by Jessie W. Taylor From an Objection by South Carolina

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of decision.

On December 30, 1997, the Secretary of Commerce (Secretary) issued a decision in the consistency appeal of Mr. Jessie W. Taylor (Appellant). The Appellant had applied to the U.S. Army Corps of Engineers (Corps) for a permit to fill wetlands to construct a commercial business on the property. In conjunction with the Federal permit application, the Appellant submitted to the Corps a certification that the proposed activity is consistent with the State's federally approved Coastal Management Program (CMP). The State of South Carolina's coastal management agency, reviewed the certification pursuant to section 307(c)(3)(A) of the Coastal Zone Management Act of 1972, as amended (CZMA), 16 U.S.C. 1456(c)(3)(A).

On March 11, 1996, the State objected to the Appellant's consistency certification for the proposed project on the ground that the proposed project is not consistent with the enforceable policies contained in the State's coastal management program. State policies prevented OCRM from considering the Appellant's offer of mitigation in evaluating his activity. Under CZMA section 307(c)(3)(A) and 15 CFR 930.131, the State's consistency objection precludes the Corps from issuing a permit for the activity unless the Secretary finds that the activity is either consistent with the objectives or purposes of the CZMA (Ground I) or necessary in the interest of national security (Ground II). The Appellant based his appeal on Ground I.

Upon consideration of the information submitted by the Appellant, the State and interested Federal agencies, the Secretary made the following findings pursuant to 15 CFR 930.121: First, the proposed project furthers one or more of the competing national objectives or purposes of the CZMA by minimally contributing to the national interest in economic development of the coastal zone. Second, the proposed project, including the Appellant's mitigation measure, would lessen rather than increase cumulative impacts on the natural resources of the coastal zone. Thus, there would appear to be no adverse coastal effects to outweigh the projects minimal contribution to the national interest. Third, the proposed activity will not violate the requirements of the Clean Water Act or the Clean Air Act. Fourth, there would be no reasonable alternative available to the Appellant that would permit the activity to be conducted in a manner consistent with the State's coastal management program. Accordingly, the proposed project is consistent with the objectives or purposes of the CZMA. Because the Appellant's proposed project satisfied all of the requirements of Ground I, the Secretary overrode the State's objection to the Appellant's consistency certification. Consequently, the proposed project may be permitted by Federal agencies. Copies of the decision may be obtained from the contact person listed below.

Margo E. Jackson, Assistant General Counsel for Ocean Services, National Oceanic and Atmospheric Administration (NOAA), U.S. Department of Commerce, 1305 East-West Highway, Room 6111, Silver Spring, MD 20910, (301) 713–2967.

Dated: January 16, 1998.

Monica Medina,

General Counsel.

BILLING CODE 3510–08–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 012098B]

New England Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meetings.

SUMMARY: The New England Fishery Management Council (Council) is scheduling a number of public meetings of its oversight committees and advisory panels in February, 1998, to consider actions affecting New England fisheries in the exclusive economic zone. Recommendations from these groups will be brought to the full Council for formal consideration and action, if appropriate.

DATES: The meetings will be held between February 10 and February 24, 1998. See **SUPPLEMENTARY INFORMATION** for specific dates and times.

ADDRESSES: Meetings will be held in Peabody, MA; East Boston, MA; Warwick, RI, and Portsmouth, NH. See **SUPPLEMENTARY INFORMATION** for specific locations.

FOR FURTHER INFORMATION CONTACT: Paul J. Howard, Executive Director, New England Fishery Management Council; telephone: (781) 231-0422.

SUPPLEMENTARY INFORMATION:

Meeting Dates and Agendas

Tuesday, February 10, 1998, 9:30 a.m.—Groundfish Committee Meeting

Location: Peabody Marriott Hotel, 8A Centennial Drive, Peabody, MA 01960; telephone: (978) 977–9700.

Groundfish Advisory Panel and Plan Development Team reports on a proposal to protect Gulf of Maine cod submitted by the Gulf of Maine Fishermen's Alliance; review of overfishing definitions, stock status, and effort reduction requirements to meet the Sustainable Fisheries Act requirements; development of related management options where appropriate.

Tuesday, February 10, 1998, 10 a.m.—Joint New England Fishery Management Council Herring Committee and Atlantic States Marine Fisheries Commission Herring Section Meeting

Location: Holiday Inn, One Newbury Street (Route 1), Peabody, MA 01960; telephone: (978) 535-4600.

Further development of management measures for inclusion in a Herring Fishery Management Plan (FMP) public hearing document.

Wednesday and Thursday, February 11-12, 1998, 9:30 a.m.—Monkfish Committee Meeting

Location: Airport Holiday Inn, 225 McClellan Highway, East Boston, MA 02128; telephone: (617) 569-5250.

Development of recommendations for final management measures; review of draft submission documents for Amendment 9 to the Northeast Multispecies FMP.

Thursday, February 12, 1998, 9:30 a.m.—Joint Habitat Committee and Advisory Panel Meeting

Location: Holiday Inn, One Newbury Street (Route 1), Peabody, MA 01960; telephone: (978) 535-4600.

Further development of essential fish habitat designations for Council-managed species.

Wednesday, February 18, 1998, 8:30 a.m.—Scallop Committee Meeting

Location: Radisson Hotel, 2081 Post Road, Warwick, RI 02886; telephone: (401) 739-3000.

Development of management measures to address the requirement of the Sustainable Fisheries Act concerning overfishing; development of objectives for an open/closed area management program; development framework adjustments to the Multispecies and Scallop FMPs to open the areas of Georges Bank now closed to scallop fishing for groundfish conservation purposes.

Monday, February 23, 1998, 10 a.m.—Interspecies Committee Advisory Panel Meeting

Location: Holiday Inn, One Newbury Street (Route 1), Peabody, MA 01960; telephone: (978) 535-4600.

Discussion of long-range management strategies; update on efforts to eliminate inconsistencies in vessel upgrading provisions; development of policy statement concerning the introduction of fish harvesting innovations and new fisheries technology.

Tuesday, February 24, 1998, 10 a.m.—Interspecies Committee Meeting

Location: Sheraton Portsmouth, 250 Market Street, Portsmouth, NH 03801; telephone: (603) 431-2300.

Same agenda as Advisory Panel meeting listed above.

Although other issues not contained in these agendas may come before these groups for discussion, in accordance with the Magnuson-Stevens Fishery Conservation and Management Act, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically identified in the agendas listed in this notice.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Paul J. Howard (see **FOR FURTHER INFORMATION CONTACT**) at least 5 days prior to the meeting dates. Requests for special accommodations should be addressed to the New England Fishery Management Council, 5 Broadway, Saugus, MA 01906-1097; telephone: (781) 231-0422.

Dated: January 23, 1998.

Bruce C. Morehead,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–F

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 011398A]

Marine Mammals; Scientific Research Permit No. 550–1441 (File No. P36D)

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Issuance of permit.

SUMMARY: Notice is hereby given that Dr. Bernd Wursig, Director, Marine Mammal Research Program, Texas A&M University, 4700 Avenue U/Building 303, Galveston, Texas 77551, has been issued a permit to take Atlantic bottlenose dolphins (*Tursiops truncatus*) for purposes of scientific research.

ADDRESSES: The permit and related documents are available for review upon written request or by appointment in the following offices:

Permits Division, Office of Protected Resources, NMFS,

1315 East-West Highway, Room 13705, Silver Spring, MD 20910 (301/713–2289); and

Regional Administrator, Southeast Regional Office, NMFS, NOAA, 9721 Executive Center Drive North, St. Petersburg, FL 33702–2432 (813/570–5301).

SUPPLEMENTARY INFORMATION: On October 29, 1997, notice was published in the **Federal Register** (62 FR 56151), that the above-named applicant had submitted a request for a scientific research permit to harass bottlenose dolphins during the course of: (1) photo-identification and boat-based behavioral studies; (2) biopsy sampling of 100 individuals for genetic and contaminant studies; and (3) acoustic playback experiments to test the behavioral reaction of the dolphins to "pingers" used to deter marine mammal entanglement in commercial fishing gear. The requested permit has been issued under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

Dated: January 21, 1998.

Ann D. Terbush,

Chief, Permits and Documentation Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 6355–01–M

DEPARTMENT OF DEFENSE

Office of the Secretary

Submission for OMB Review; Comment Request

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance, the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Title, Associated Form, and OMB Number: Air Force ROTC College Scholarship Application; AF Form 113; OMB Number 0701–0101.

Type of Request: Extension.

Number of Respondents: 11,000.

Responses Per Respondent: 1.

Annual Responses: 11,000.

Average Burden Per Response: 42 minutes.

Annual Burden Hours: 7,700.

Needs and Uses: Respondents are high school students or graduates between the ages of 16 and 21 years. Respondents must complete all requirements listed in the application package and return before the final deadline of December 1. Due to the number of factors that have proven to influence successful completion of a college program, it is necessary to collect information in all areas listed on the application. Additionally, the national average attrition from college is about 40 percent. In order to obtain a reasonable return for the dollars expended on scholarships, we must apply as comprehensive an evaluation of each candidate as possible. Without this screening process, the consequences to this federal program would be wasted dollars on individuals who left the program prior to incurring an obligation to serve in the military. In addition to the concern for the economy of scholarship dollars, Congressional oversight of the program demands that the Services be able to report on the numbers and kinds of individuals who apply for scholarships and provide leads for AFROTC units around the nation.

Affected Public: Individuals or Households.

Frequency: On occasion.

Respondent's Obligation: Required to Obtain or Retain Benefits.

OMB Desk Officer: Mr. Edward C. Springer.

Written comments and recommendations on the proposed information collection should be sent to Mr. Springer at the Office of Management and Budget, Desk Officer for DOD, Room 10236, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. Robert Cushing.

Written requests for copies of the information collection proposal should be sent to Mr. Cushing, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202–4302.

Dated: January 22, 1998.

Patricia L. Toppings,

Alternate OSD Federal Register, Liaison Officer, Department of Defense.

BILLING CODE 5000–04–M

DEPARTMENT OF DEFENSE

Office of the Secretary

List of Institutions of Higher Education Ineligible for Federal Funds

AGENCY: Department of Defense.

ACTION: Notice.

SUMMARY: This document is published to identify institutions of higher education that are ineligible for contracts and grants by reason of a determination by the Secretary of Defense that the institution prevents military recruiter access to the campus or students or maintains a policy against ROTC. It also implements the requirements set forth in the Omnibus Consolidated Appropriations Act of 1997 and 32 CFR Part 216.

Recently, American University reported modifications to policies of its Washington College of Law sufficient to merit removal of that college from the list of ineligible schools. Currently, no institution of higher education is ineligible for contracts of grants under the aforementioned law and policy.

ADDRESSES: Director for Accession Policy, Office of the Assistant Secretary of Defense for Force Management Policy, 4000 Defense Pentagon, Washington, DC 20301–4000.

FOR FURTHER INFORMATION CONTACT: William J. Carr, (703) 697–8444.

SUPPLEMENTARY INFORMATION: On April 8, 1997 (62 FR 16691), the Department of Defense published 32 CFR part 216 as an interim rule. This rule requires that the Department of Defense semi-annually publish a list of the institutions of higher education ineligible for Federal funds due to a policy or practice that either prohibits, or in effect prevents, the Secretary of Defense from obtaining, for military recruiting purposes, entry to campuses, access to students on campuses, access to directory information on students or that has an anti-ROTC policy. On December 9, 1997 (62 FR 64813), the Department of Defense published a list of the institutions of higher education ineligible for Federal funding; this notice updates and supersedes that listing.

Dated: January 22, 1998.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Department of the Army

Proposed Collection; Comment Request

AGENCY: Deputy Chief of Staff for Personnel (DAPE–ZXI–RM), DoD.

ACTION: Notice.

In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Department of the Army announces a proposed public information collection and seeks public comment on the provisions thereof. Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by March 30, 1998.

ADDRESSES: Written comments and recommendations on the proposed information collection should be sent to Department of the Army, Military Traffic Management Command, 5611 Columbia Pike, Falls Church, Virginia 22041–5050, ATTN: MTOP–T–S (Barbara Cornell). Consideration will be given to all comments received within 60 days of the date of publication of this notice.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to the above address, or call Department of the Army Reports clearance officer at (703) 614–0454.

Title: Tender of Service and Letter of Intent for Personal Property, Household Goods and Unaccompanied Baggage Shipments, OMB Control Number 0702–0022, DD Form 619.

Needs and Uses: The Tender of Service is the carrier's certification that they will conduct business with DoD IAW the Tender of Service, solicitations, and other instructions, as published. The DD Form 619 is a receipt for goods/services provided by the carrier. The Tender of Service specifies the terms and conditions of participation in the DOD personal property program, and provides details concerning service and performance requirements, and certifications.

Affected Public: Business or other for profit.

Annual Burden Hours: 64,118.

Number of Respondents: 2,404.

Responses Per Respondent: 619.

Average Burden Per Response: 1.22 hrs for Tender of Service and 5 minutes for DD 619.

Frequency: On occasion.

VOL 63 ISS 18 JA 28 1998 UMI

SUPPLEMENTARY INFORMATION: Since household goods move at government expense, data is needed to choose the best service at least cost. The information provided serves as a bid for contract to transport household goods and unaccompanied baggage. The best service for least cost carrier receives the contract.

Gregory D. Showalter,

Army Federal Register Liaison Officer.

Title: Uniform Tender of Rates and/or Charges for Domestic Transportation Services (DOD/USCG) Sponsored HHG, OMB Control Number 0702–0018, Form Number MT–HQ–43.

Needs and Uses: DOD-approved household goods carriers file voluntary rates to engage in the movement of DOD and USCG-sponsored shipments within CONUS. The Uniform Tender of Rates and/or Charges for Domestic Transportation Services is carriers' certification that they will conduct business with DOD IAW Tender of Service, solicitations, and other instructions, as published. HQ MTMC evaluates the rates and awards traffic to low-rate responsible carriers whose rates are responsive and most advantageous to the government.

Affected Public: Business or other for profit.

Annual Burden Hours: 2,701.

Number of Respondents: 1,268.

Responses Per Respondent: 4.

Average Burden Per Response: 30 minutes.

Frequency: On occasion.

SUPPLEMENTARY INFORMATION: The Uniform Tender of Rates and/or Charges is used by transportation carriers to bid rates in response to MTMC solicitations, and carriers use the tender to solicit DOD's business by offering transportation rates and services.

Gregory D. Showalter,

Army Federal Register Liaison Officer.

Title: Signature and Tally Records, OMB Control Number 0702–0027, DD Form Number 1907.

Needs and Uses: Signature and Tally Record (STR) is an integral part of the Defense Transportation System and is used for commercial movements of all sensitive and classified material. The STR provides continuous responsibility for the custody of shipments in transit and requires each person responsible for the proper handling of the cargo to sign their name at the time they assume responsibility for the shipment, from point of origin and at specified stages until delivery at destination. When two drivers are used, both drivers will sign the form when the pair assume responsibility for the shipment.

Affected Public: Business or other for profit.

Annual Burden Hours: 5,000.

Number of Respondents: 200.

Responses Per Respondent: 500.

Average Burden Per Response: 3 minutes.

Frequency: As required.

SUPPLEMENTARY INFORMATION: The designation transportation officer uses the DD Form 1907 to assure that the carriers utilize the STR and provide the transportation service as requested by origin shipper. A copy of the STR, along with other transportation documentation, is forwarded by the carrier to the appropriate finance center for payment. The DD Form 1907 verifies the protected service requested in the

Government Bill of Lading was provided.

Title: DOD Standard Tender of Freight Services, OMB Control Number 0704–0261, Form Number MT 364–R.

Needs and Uses: The information derived from the DOD tenders on file with MTMC is used by MTMC subordinate commands and DOD shippers to select the lowest cost carrier to transport about 1.2 million surface freight shipments annually. This information is also used to develop about 140,000 procurement rate quotations annually. Additionally, DOD tender rate and other pertinent tender data are noted on the Government Bill of Lading at the time of shipment. The DOD tender also is the source document for the General Services Administration post-shipment audit of carrier freight bills.

Affected Public: Business or other for profit.

Annual Burden Hours: 9,682.

Nubmer of Respondents: 993.

Responses Per Respondent: 13.

Average Burden Per Response: 45 minutes.

Frequency: On occasion.

SUPPLEMENTARY INFORMATION: The DOD Standard Tender of Freight Services collection of information is used to determine freight transportation charges, accessorial and security service costs, and to select carriers for 1.2 million Global bill of lading (GBL) freight shipments annually.

DEPARTMENT OF EDUCATION

Notice of Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Deputy Chief Information Officer, Office of the Chief Information Officer, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1995.

DATES: An emergency review has been requested in accordance with the Act (44 U.S.C. Chapter 3507 (j)), since public harm is reasonably likely to result if normal clearance procedures are followed. Approval by the Office of Management and Budget (OMB) has been requested by January 30, 1998. A regular clearance process is also beginning. Interested persons are invited to submit comments on or before March 30, 1998.

ADDRESSES: Written comments regarding the emergency review should be addressed to the Office of Information and Regulatory Affairs, Attention: Dan Chenok, Desk Officer: Department of Education, Office of Management and Budget, 725 17th Street, NW., Room 10235, New Executive Office Building, Washington, D.C. 20503. Requests for copies of the proposed information collection request should be addressed to Patrick J. Sherrill, Department of Education, 7th & D Streets, S.W., Room 5624, Regional Office Building 3, Washington, D.C. 20202–4651. Written comments regarding the regular clearance and requests for copies of the proposed information collection requests should be addressed to Patrick J. Sherrill, Department of Education, 600 Independence Avenue, S.W., Room 5624, Regional Office Building 3, Washington, D.C. 20202–4651, or should be electronic mailed to the internet address #FIRB@ed.gov, or should be faxed to 202–708-9346.

FOR FURTHER INFORMATION CONTACT: Patrick J. Sherrill (202) 708–8196. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information

Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: Section 3506 (c)(2)(A) of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 3506 (c)(2)(A) requires that the Director of OMB provide interested Federal agencies and the public an early opportunity to comment on information collection requests. The Office of Management and Budget (OMB) may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Deputy Chief Information Officer, Office of the Chief Information Officer, publishes this notice containing proposed information collection requests at the beginning of the Departmental review of the information collection. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. ED invites public comment at the address specified above. Copies of the requests are available from Patrick J. Sherrill at the address specified above.

The Department of Education is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department, (2) will this information be processed and used in a timely manner, (3) is the estimate of burden accurate, (4) how might the Department enhance the quality, utility, and clarity of the information to be collected, and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology.

Dated: January 22, 1998.

Gloria Parker,

Deputy Chief Information Officer, Office of the Chief Information Officer.

Office of Special Education and Rehabilitative Services

Type of Review: Reinstatement.
Title: Annual Performance Report and Report to the Secretary Under the Infants and Toddlers with Disabilities Program (Part H, Individuals with Disabilities Education Act (IDEA)).
Abstract: The State Interagency Coordinating Counsel in each State is required to submit an Annual Report to the Secretary on the status of the Early Intervention Program operated within the State for infants and toddlers with disabilities and their families. States are required to submit a performance report in accordance with CFR § 80.40. This collection serves both functions.
Additional Information: Part H of IDEA requires States to prepare and submit an annual report to the Secretary on the status of early intervention programs for infants and toddlers with disabilities which they operated within the State.

Since the Secretary cannot waive the statutory requirement, it is necessary that we immediately seek an emergency review. The collection is for the period July 1, 1996 through September 30, 1997.
Frequency: Annually.
Affected Public: State, local or Tribal Gov't, SEAs or LEAs.

Notice reopening the closing date for transmittal of applications for new awards for fiscal year (FY) 1998.

Deadline for Transmittal of Applications: The deadline date for transmittal of applications is reopened from January 13, 1998, to April 21, 1998.

On October 30, 1997, the Secretary published in the **Federal Register** (62 FR 58725) a notice inviting applications for new awards for fiscal year 1998 under the Projects With Industry program.

The purpose of this notice is to reopen the deadline date for transmittal of applications. This action is taken because a Department World Wide Web site inadvertently contained the fiscal year 1997, and not the fiscal year 1998, application kit and fiscal year 1998 notice inviting applications for new awards under the Projects With Industry program. The Department discontinued public access to the fiscal year 1997 application kit and notice on January 8, 1998, but applicants who visited the World Wide Web site prior to that date may have downloaded and mistakenly used the fiscal year 1997 application kit to prepare for the fiscal year 1998 competition. Applicants must use the fiscal year 1998 application kit for the fiscal year 1998 competition.

Deadline for Intergovernmental Review: June 20, 1998.

For Applications Contact: The Grants and Contracts Service Team (GCST), U.S. Department of Education, 600 Independence Avenue, S.W., Room 3317, Switzer Building, Washington, D.C. 20202–2649. Telephone: (202) 205–8351. The preferred method for requesting applications is to FAX your request to (202) 205–8717. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

Individuals with disabilities may obtain a copy of the application package in an alternate format by contacting the GCST. However, the Department is not able to reproduce in an alternate format the standard forms included in the application package.

FOR FURTHER INFORMATION CONTACT: Martha Muskie, U.S. Department of Education, 600 Independence Avenue, S.W., Room 3320, Switzer Building, Washington, D.C. 20202–2740. Telephone: (202) 205-3293.

Individuals with disabilities may obtain this document in an alternate format (e.g., Braille, large print, audiotape, or computer diskette) on request to the contact person listed in the preceding paragraph.

Electronic Access to this Document: Anyone may view this document, as well as all other Department of Education documents published in the **Federal Register**, in text or portable document format (pdf) on the World Wide Web at either of the following sites:
http://ocfo.ed.gov/fedreg.htm
http://www.ed.gov/news.html

To use the pdf you must have the Adobe Acrobat Reader Program with Search, which is available free at either of the previous sites. If you have questions about using the pdf, call the U.S. Government Printing Office toll free at 1–888–293–6498.

Anyone may also view these documents in text copy only on an electronic bulletin board of the Department. Telephone: (202) 219-1511 or toll free, 1–800–222–4922. The documents are located under Option G—Files/Announcements, Bulletins and Press Releases.

Note: The official version of a document is the document published in the **Federal Register**.

Program Authority: 29 U.S.C. 795g.

Dated: January 22, 1998.

Judith E. Heumann,

Assistant Secretary for Special Education and Rehabilitative Services.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Privacy Act of 1974; System of Records

AGENCY: Office of Inspector General, Department of Education.
ACTION: Notice of an altered system of records.

SUMMARY: In accordance with the Privacy Act of 1974, as amended (Act), the Department of Education (Department) publishes this notice of proposed alterations to its system of records for the Investigatory Material Compiled for Personnel Security and Suitability Purposes for the Office of Inspector General (OIG)—18–10–0002. These alterations serve to update the system of records to reflect current administrative and related procedures, implementation of computer database technology, organizational restructuring, clarification and expanded language to provide greater detail and description applicable to the system of records, and proposed new and revised routine uses of the information contained in this system of records. Because the routine uses have been revised or expanded, the Department requests comment regarding the proposed routine uses contained in this notice.

DATES: Comments on the proposed routine uses of this system of records must be received by the Department on or before February 27, 1998. The Department filed a report on the altered system of records with the Chair of the Committee on Governmental Affairs of the Senate, the Chair of the Committee on Government Reform and Oversight of the House, and the Administrator of the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB) on January 23, 1998. This altered system of records will become effective after the 30-day period for

VOL
63
ISS
18
JA
28
1998
UMI

OMB review of the system expires on February 22, 1998, unless OMB gives specific notice within the 30 days that the system is not approved for implementation or requests an additional 10 days for its review. The new and revised routine uses become effective 30 days after publication unless they need to be changed as a result of public comment. The Department will publish any changes to the routine uses that are required as a result of the comments.

ADDRESSES: All comments on the proposed routine uses should be addressed to the Deputy Inspector General, U.S. Department of Education, 600 Independence Avenue, SW., 4022 MES, Washington, DC 20202–1510. Comments may also be sent through the Internet to: Comments@ed.gov

You must include the term "Security Notice" in the subject line of the electronic comment.

All comments submitted in response to this notice will be available for public inspection, during and after the comment period, in Room 4022 Switzer Building, 330 C Street, SW., Washington, DC, between the hours of 8:00 a.m. and 4:30 p.m., Eastern time, Monday through Friday of each week except Federal holidays.

On request the Department supplies an appropriate aid, such as a reader or print magnifier, to an individual with a disability who needs assistance to review the comments or other documents in the public rulemaking docket for this notice. An individual with a disability who wants to schedule an appointment for this type of aid may call (202) 205–8113 or (202) 260–9895. An individual who uses a TDD may call the Federal Information Relay Service at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Sandra H. Warren, Security Officer, Office of Inspector General, U.S. Department of Education, 600 Independence Avenue, SW., 4022 MES, Washington, DC 20202–1510. Telephone: (202) 205–5400. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

Individuals with disabilities may obtain this document in an alternate format (e.g., Braille, large print, audiotape, or computer diskette) on request to the contact person listed in the preceding paragraph.

SUPPLEMENTARY INFORMATION:

Electronic Access to This Document

Anyone may view this document, as well as all other Department of Education documents published in the **Federal Register**, in text or portable document format (pdf) on the World Wide Web at either of the following sites:

http://ocfo.ed.gov/fedreg.htm
http://www.ed.gov/news.html

To use the pdf you must have the Adobe Acrobat Reader Program with Search, which is available free at either of the previous sites. If you have questions about using the pdf, call the U.S. Government Printing Office toll free at 1–888–293–6498.

Anyone may also view these documents in text copy only on an electronic bulletin board of the Department. Telephone: (202) 219–1511 or, toll free, 1–800–222–4922. The documents are located under Option G—Files/Announcements, Bulletins and Press Releases.

Note: The official version of this document is the document published in the **Federal Register**.

General

The Act (5 U.S.C. 552a)(e)(4) requires the Department to publish in the **Federal Register** this notice of an altered system of records. The Department's regulations implementing the Act are contained in the Code of Federal Regulations (CFR) in 34 CFR part 5b. A system of records is considered altered whenever an agency changes the way it retrieves records, expands the types or categories of information, or revises its routine uses for information contained in the system. This system notice has not been updated since its publication in the **Federal Register** on April 20, 1982. As a result, revisions are needed to accurately describe the current system of records that maintains investigatory material on current and former Department employees, individuals who have applied for employment with the Department, and other individuals doing business with the Department.

The records in this system are maintained to provide the Inspector General and other responsible Department of Education (Department) officials with information to assist them in making individual personnel determinations concerning suitability for Federal employment, security clearances, access to classified information or restricted areas, and evaluations as to suitability for performance under Federal contracts or other agreements with the Federal Government. For those investigations conducted by the Office of Inspector General, these records may also be disclosed to other Federal and non-Federal investigatory agencies to protect the public or Federal interest, or both.

The revisions in this system notice change the name of the system manager and add additional system locations; update the authority for the maintenance of the system; provide a detailed description of the nature of the security investigation case files; revise and clarify the purpose of the system; expand the categories of individuals covered by the system to include people seeking association with the Department under Federal contracts or other agreements as well as individuals seeking employment or retention with the Department; revise and expand the routine use disclosures to provide for the disclosure of information to contractors, grantees, experts, consultants, or volunteers performing or working on a contract, grant, or service for the Department and with respect to litigation-related disclosures and for purposes relating to the Freedom of Information Act; and disclosures to specified intelligence agencies of the Federal Government for use in intelligence or investigation activities. This notice also revises the manner in which the records are stored, retrieved, and safeguarded with regard to the use of computer database technology; clarifies the retention and disposal period for records maintained in the system; and expands the notification procedures to assist the system manager in the identification of requested information contained in the system of records.

Direct access is restricted to authorized agency staff in the performance of their official duties. Due to the extensive revisions in this notice, it is being published in its entirety.

Dated: January 23, 1998.

Thomas R. Bloom,

Inspector General.

The Office of Inspector General of the U.S. Department of Education publishes notice of an altered system of records as follows:

18–10–0002

SYSTEM NAME:

Investigatory Material Compiled for Personnel Security and Suitability Purposes—ED/OIG.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATIONS:

Security Program Staff, Office of Inspector General, U.S. Department of Education, 600 Independence Avenue, SW., Washington, DC 20202–1510.

U.S. Office of Personnel Management, Investigations Group, P.O. Box 886, Washington, DC 20044–0886.

Washington National Records Center, Suitland, MD 20746–2042.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Applicants seeking employment with the Department of Education (Department), former and current employees of, and other persons and entities doing business with, the Department.

CATEGORIES OF RECORDS IN THE SYSTEM:

These records contain investigative information pertaining to current and former Department employees, current and former contractor personnel, and current employees of entities making offers to the Department for purposes of doing business. This information regards individuals' character, conduct, and loyalty to the United States as relevant to their association with the Department. These records may, as appropriate to the individual being investigated, include the following types of information: (1) Documentation as to his or her arrests and convictions for violations of the law. (2) Reporting as to interviews held with the individual, his or her present and former supervisors, co-workers, associates, neighbors, educators, etc. (3) Correspondence relating to adjudication matters involving the individual. (4) Reports of inquiries made of law enforcement agencies for information about the individual contained in the agencies' records. (5) Information provided by organizations having association with the individual, such as employers, educational institutions attended, professional or fraternal or social organizations to which the individual is or was a member, etc. (6) Reports of action following an Office of Personnel Management (OPM) investigation or a Federal Bureau of Investigation Section 8(d) full field investigation. (7) Other information developed from the previous sources.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Executive Orders 10450, 10577, and 12968; as amended.

PURPOSE(S):

Records in this system are maintained to provide the Inspector General and other responsible Department officials with information to assist them in making individual personnel determinations concerning suitability for Federal employment, security clearances, access to classified information or restricted areas, and evaluations as to suitability for performance under Federal contracts or other agreements with the Federal Government. Incidental to this purpose, for those investigations conducted by the OIG, these records may also be disclosed to other Federal and non-Federal investigatory agencies to protect the public or Federal interest, or both.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information contained in this system of records may be disclosed as a routine use in the following instances:

1. To public or private sources to the extent necessary to obtain information to be included in this system of records.

2. To officials and employees of a Federal, State, or local governmental entity in response to its request in connection with the issuance of security clearances or the conduct of security or suitability investigations of individuals seeking employment, licensure, other benefits, or to perform contractual services, or to otherwise associate with the governmental entity.

3. To a Federal, State, local, or foreign entity or other public authority responsible for the investigation, prosecution, enforcement, or implementation of a statute, rule, regulation, or order, when a record on its face or in combination with any other information indicates a violation or potential violation of law (whether civil, criminal, or regulatory in nature) if that information is relevant to any enforcement, regulatory, investigative, or prosecutive responsibility of the receiving entity. It is OIG policy not to disclose records under this routine use that pertain to those questions for which the OIG has promised confidentiality under Standard Form 85P, "Questionnaire for Public Trust Positions."

4. To contractors, grantees, experts, consultants, or volunteers performing or working on a contract, grant, service, or job for the Department or under a Department program.

5. To parties pertaining to litigation disclosure as follows:

a. In the event that one of the following parties is involved in litigation, or has an interest in litigation, the Department may disclose certain records to the parties described in the following paragraphs b, c, and d of this routine use under the conditions specified in those paragraphs:

(i) The Department or any of its components.

(ii) Any Department employee in his or her official capacity.

(iii) Any employee of the Department in his or her official capacity where the Department of Justice (Justice) has agreed to provide or arrange for representation of the employee.

(iv) Any employee of the Department in his or her individual capacity where the Department has agreed to represent the employee.

(v) The United States where the Department determines that the litigation is likely to affect the Department or any of its components.

b. If the Department determines that disclosure of certain records to the Department of Justice (DOJ) or attorneys engaged by DOJ is relevant and necessary to litigation and is compatible with the purpose for which the records were collected, the Department may disclose those records as a routine use to DOJ.

c. If the Department determines that disclosure of certain records to an adjudicative body before which the Department is authorized to appear, individual, or entity designated by the Department or otherwise empowered to resolve disputes is relevant and necessary to the administrative litigation and is compatible with the purpose for which the records were collected, the Department may disclose those records as a routine use to the adjudicative body, individual, or entity.

d. If the Department determines that disclosure of certain records to an opposing counsel, representative, or witness in an administrative proceeding is relevant and necessary to the litigation and is compatible with the purpose for which the records were collected, the Department may disclose those records as a routine use to the counsel, representative, or witness.

6. To the Department of Justice for the purpose of obtaining advice regarding the releasability of records maintained in this system of records under the Freedom of Information Act and the Privacy Act of 1974.

7. To a Member of Congress in response to an inquiry from that member made at the written request of the individual about whom the information pertains; however, the congressional member's right to the information is no greater than the right of the individual who requested it.

8. To the intelligence agencies of the Department of Defense, the National Security Agency, the Central Intelligence Agency, and the Federal Bureau of Investigation for use in intelligence or investigation activities.

VOL 63 ISS 18 JA 28 1998 UMI

POLICIES AND PRACTICES OF STORING, RETRIEVING, SAFEGUARDING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in folders secured in fire resistant safes with manipulation proof combination locks, or in metal lock-bar file cabinets with three position combination locks, and in a computer database.

RETRIEVABILITY:

Records are alphabetically indexed by name of the individual subject of the file. Retrieval is made by the name, date of birth, and social security number of the individual on whom they are maintained.

SAFEGUARDS:

Folders are maintained and secured in fire resistant safes with manipulation proof combination locks, or in metal file cabinets secured by three position combination locks. All records, including those records that are maintained on the computer database, are in limited access rooms with keyless cipher locks. All employees are required to have an appropriate security clearance before they are allowed access, on a need-to-know basis, to the records. Computer databases are kept on a local area network that is not connected to any outside network including the Internet. Database accessibility is restricted to hard wire network connection from within the office or via modem. Authorized log-on codes and passwords prevent unauthorized users from gaining access to data and system resources. All users have unique log-on codes and passwords. The password scheme requires that users must change passwords every 90 days and may not repeat the old password. Any individual attempting to log on who fails is locked out of the system after three attempts. Access after that time requires intervention by the system manager.

RETENTION AND DISPOSAL:

Most background investigative records are maintained for five years after the individual separates from his or her departmental association if subject to Executive Orders 12968 and 10450, as amended. Reports of background investigations conducted by the Office of Inspector General are retained for 15 years, plus the current year of the most recent investigative activity, in accordance with OPM guidance. The records are disposed of by electronic erasure, shredding, or burning.

SYSTEM MANAGER(S) AND ADDRESS:

Security Officer, Office of Inspector General, U.S. Department of Education, 600 Independence Avenue, SW, Washington, DC 20202–1510.

NOTIFICATION PROCEDURE:

If an individual wishes to determine whether a record exists regarding him or her in this system of records, the individual must provide the system manager with his or her name, date of birth, social security number, signature, and the address to which the record information should be sent. Requests for notification about an individual must meet the requirements of the Department's Privacy Act regulations in 34 CFR 5b.5.

RECORD ACCESS PROCEDURE:

If an individual wishes to gain access to a record in this system, he or she must contact the system manager and provide information as described in the notification procedure.

CONTESTING RECORD PROCEDURE:

If an individual wishes to change the content of a record in the system of records, he or she must contact the system manager with the information described in the notification procedure, identify the specific item or items to be changed, and provide a written justification for the change, including any supporting documentation. Requests to amend a record must meet the requirements of the Department's Privacy Act regulations in 34 CFR 5b.7.

RECORD SOURCE CATEGORIES:

Information contained in this system of records is obtained from—

a. Investigative and other record material furnished by other Federal entities, other departmental components, State, local, and foreign governments;

b. Applications and other personnel and security forms;

c. Personal investigation, written inquiry, interview, or the electronic accessing of computer databases of sources, such as the OPM system of records known as "Personnel Investigations Records" (OPM/Central-9), employers, educational institutions, references, neighbors, associates, police departments, courts, credit bureaus, medical records, probation officials, prison officials, newspapers, magazines, periodicals, and other publications; and

d. Confidential sources.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

As indicated in 34 CFR 5b.11, individuals will be provided information from this record system unless, in accordance with the provisions of 5 U.S.C. 552a(k)(5)—(1) Disclosure of that information would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence; or (2) The information was obtained prior to September 27, 1975 and disclosure of that information would reveal the identity of a source who provided information under an implied promise that the identity of the source would be held in confidence.

[FR Doc. 98–2077 Filed 1–27–98; 8:45 am]

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

[Docket No. EA–172]

Application To Export Electric Energy; the Power Company of America, L.P.

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of application.

SUMMARY: The Power Company of America, L.P. (PCA), a power marketer, has submitted an application to export electric energy to Canada pursuant to section 202(e) of the Federal Power Act.

DATES: Comments, protests or requests to intervene must be submitted on or before February 27, 1998.

ADDRESSES: Comments, protests or requests to intervene should be addressed as follows: Office of Coal & Power Im/Ex (FE–27), Office of Fossil Energy, U.S. Department of Energy, 1000 Independence Avenue, SW, Washington, DC 20585–0350 (FAX 202–287–5736).

FOR FURTHER INFORMATION CONTACT: Ellen Russell (Program Office) 202–586–9624 or Michael Skinker (Program Attorney) 202–586–6667.

SUPPLEMENTARY INFORMATION: Exports of electricity from the United States to a foreign country are regulated and require authorization under section 202(e) of the Federal Power Act (FPA) (16 U.S.C. § 824a(e)).

On January 15, 1998, PCA applied to the Office of Fossil Energy (FE) of the Department of Energy (DOE) for authorization to export electric energy to Canada, as a power marketer, pursuant to section 202(e) of the FPA. Specifically, PCA has proposed to transmit to Canada electric energy purchased from electric utilities and other suppliers within the U.S.

PCA would arrange for the exported energy to be transmitted to Canada over the international transmission facilities owned by Basin Electric Power Cooperative, Bonneville Power Administration, Citizens Utilities, Detroit Edison Company, Eastern Maine Electric Cooperative, Joint Owners of the Highgate Project, Maine Electric Power Company, Maine Public Service Company, Minnesota Power and Light Company, Minnkota Power Cooperative, New York Power Authority, Niagara Mohawk Power Corporation, Northern States Power, and Vermont Electric Transmission Company. Each of these transmission facilities, as more fully described in the application, has previously been authorized by a Presidential permit issued pursuant to Executive Order 10485, as amended.

Procedural Matters

Any persons desiring to become a party to this proceeding or to be heard by filing comments or protests to this application should file a petition to intervene, comment or protest at the address provided above in accordance with §§ 385.211 or 385.214 of the FERC's Rules of Practice and Procedures (18 CFR 385.211, 385.214). Fifteen copies of such petitions, comments and protests should be filed with the DOE on or before the date listed above. Additional copies are to be filed directly with Stephen C. Smith, President, The Power Company of America, Two Greenwich Plaza, Greenwich, CT 06830 and Lynn H. Hargis, Robert F. Shapiro, Chadbourne & Parke LLP, 1200 New Hampshire Ave., N.W., Suite 300, Washington, DC 20036.

A final decision will be made on this application after the environmental impacts have been evaluated pursuant to the National Environmental Policy Act of 1969, and a determination is made by the DOE that the proposed action will not adversely impact on the reliability of the U.S. electric power supply system.

Copies of this application will be made available, upon request, for public inspection and copying at the address provided above.

Issued in Washington, DC on January 23, 1998.

Anthony J. Como,

Manager, Electric Power Regulation, Office of Coal and Power Im/Ex, Office of Coal and Power Systems, Office of Fossil Energy.

[FR Doc. 98–2046 Filed 1–27–98; 8:45 am]

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Record of Decision on the Disposal of the S3G and D1G Prototype Reactor Plants

AGENCY: Department of Energy.

ACTION: Record of decision.

SUMMARY: This Record of Decision has been prepared on the Disposal of the S3G and D1G Prototype Reactor Plants, located at the Knolls Atomic Power Laboratory Kesselring Site (Kesselring Site) near West Milton, New York, pursuant to Section 102(2) of the National Environmental Policy Act of 1969 (NEPA, 42 U.S.C. 4321 *et seq.*), and in accordance with the Council on Environmental Quality regulations implementing NEPA procedures (40 CFR parts 1500–1508), and Department of Energy (DOE) regulations implementing NEPA procedures (10 CFR part 1021). The DOE Office of Naval Reactors (Naval Reactors Program) has decided to promptly dismantle the defueled S3G and D1G Prototype reactor plants. The project will be completed as soon as practicable subject to available appropriated funding. To the extent practical, the resulting low-level radioactive materials will be recycled at existing commercial facilities. The remaining low-level radioactive wastes will be disposed of at the DOE Savannah River Site in South Carolina. All non-radiological waste would be recycled or disposed of off-site at permitted facilities using licensed haulers.

FOR FURTHER INFORMATION CONTACT: Requests for further information should be directed to Mr. Andrew S. Baitinger, Chief, West Milton Field Office, Office of Naval Reactors, Department of Energy, PO Box 1069, Schenectady, NY 12301–1069, *telephone* (518) 884–1234.

SUPPLEMENTARY INFORMATION: The S3G and D1G Prototype reactor plants are located on the 65-acre Kesselring Site near West Milton, New York, approximately 17 miles north of Schenectady. The S3G and D1G Prototype reactor plants first started operation in 1958 and 1962, respectively, and served for more than 30 years as facilities for testing reactor plant components and equipment and for training of U.S. Navy personnel. As a result of the end of the Cold War and the downsizing of the Navy, the S3G and D1G Prototype reactor plants were shutdown in May 1991 and March 1996, respectively. Removal of the spent nuclear fuel from the S3G and D1G Prototype reactors and shipments of the spent nuclear fuel to the Expended Core Facility at the DOE's Idaho National Engineering and Environmental Laboratory were completed in July 1994 and February 1997, respectively. After defueling, the S3G and D1G Prototype reactor plants were placed in a safe and stable protective storage condition. The Kesselring Site will not be released for other uses in the foreseeable future since two active prototype reactor plants continue to operate to perform training of U.S. Navy personnel and testing of naval nuclear propulsion plant equipment.

The alternatives analyzed in detail in the Final Environmental Impact Statement were the preferred alternative of prompt dismantlement, a deferred dismantlement alternative, and a no action alternative of keeping the defueled S3G and D1G Prototype reactor plants in protective storage indefinitely.

DOE has selected prompt dismantlement of the S3G and D1G Prototype reactor plants. All S3G and D1G Prototype reactor plant systems, components and structures will be removed from the Kesselring Site. To the extent practicable, the resulting low-level radioactive metals will be recycled at existing commercial facilities. The remaining low-level radioactive waste will be disposed of at the DOE Savannah River Site in South Carolina. There will be an estimated total of 60 radioactive material shipments from the Kesselring Site to either the Savannah River Site or to commercial recycling facilities. Two or three of the shipments will be by rail and the remainder will be by truck. The Savannah River Site currently receives low-level radioactive waste from Naval Reactors' sites in the eastern United States. Both the volume and radioactive content of the S3G and D1G Prototype reactor plant low-level waste fall within the projections of Naval Reactors' waste provided to the Savannah River Site, which are included and analyzed in the *Savannah River Site Waste Management Final Environmental Impact Statement*, dated July 1995. All nonradiological shipments would be by truck, and would be recycled or disposed of off-site at permitted facilities using licensed haulers.

The deferred dismantlement alternative would involve keeping the defueled S3G and D1G Prototype reactor plants in protective storage for 30 years before dismantlement. Deferring dismantlement for 30 years would allow nearly all of the cobalt-60 radioactivity to decay. Nearly all of the gamma radiation within the reactor plant comes from cobalt-60. The very small amount of longer-lived radioisotopes, such as nickel-59, would remain and would

VOL 63 ISS 18 JA 28 1998 UMI

have to be addressed during dismantlement.

The no action alternative would involve keeping the defueled S3G and D1G Prototype reactor plants in protective storage indefinitely. Since there is some residual radioactivity with long half-lives, such as nickel-59, in the defueled reactor plant, this alternative would leave some radioactivity at the Kesselring Site indefinitely.

The Naval Reactors Program distributed the Draft Environmental Impact Statement on the Disposal of the S3G and D1G Prototype Reactor Plants in July 1997. Comments from 14 individuals and agencies were received in either oral or written statements at a public hearing or in comment letters. Approximately one-third of the commenters expressed a preference for the Naval Reactors' preferred alternative, prompt dismantlement. Based on U.S. Environmental Protection Agency (EPA) review of the Draft Environmental Impact Statement, EPA rated the proposed project as "LO" (Lack of Objection). All of the comments and Naval Reactors' responses are included in an appendix to the Final Environmental Impact Statement, distributed in November 1997.

From an environmental perspective, no single alternative stands out as environmentally preferable. The radiation exposure to the general public would be small and comparable for all three alternatives. Occupational exposure would be higher for the prompt dismantlement alternative, however, this expected exposure would be comparable in magnitude to the radiation exposure routinely received during current operation and maintenance activities of Naval prototype reactor plants. Non-radiological environmental, health and safety impacts associated with all of the alternatives would also be small and consistent with ongoing Kesselring Site operations. Based on current conditions, any of the alternatives could be accomplished within Federal and State requirements, in both the short term and the long term. However, 30 years from now, changing conditions associated with the regulatory environment, and the availability of trained personnel and waste disposal facilities could result in unforeseeable complications or delays. Such future unforeseeable conditions cause additional uncertainty in the impacts associated with the deferred dismantlement and no action alternatives. Naval Reactors has identified the prompt dismantlement alternative as the preferred alternative since it is consistent with the Naval Reactors' record of managing waste efficiently and minimizing its generation. Prompt dismantlement would allow Naval Reactors to utilize an experienced work force that is presently located at the Kesselring Site. Prompt dismantlement can be accomplished safely, economically, and with a high degree of certainty that the environmental impacts would be small.

As discussed in the Final Environmental Impact Statement, the Naval Reactors Program implements a large number of conservative engineering practices in its operations. These conservative engineering practices will serve to ensure that environmental impacts will be very small. No additional mitigative measures have been identified which are needed to further reduce the small impacts which were described in the Final Environmental Impact Statement. Accordingly, all practicable means to avoid or minimize environmental harm from the preferred alternative have been adopted.

Issued at Arlington, VA, this 20th day of January 1998.

F.L. Bowman,

Admiral, U.S. Navy, Director, Naval Nuclear Propulsion Program.

BILLING CODE 8460–01–P

DEPARTMENT OF ENERGY

Record of Decision, Shutdown of the River Water System at the Savannah River Site, Savannah River Operations Office, Aiken, South Carolina

AGENCY: U.S. Department of Energy.

ACTION: Record of Decision.

SUMMARY: The U.S. DOE has decided to implement the No Action alternative identified in the Final Environmental Impact Statement for the Shutdown of the River Water System (RWEIS) at the Savannah River Site (SRS). Under this alternative, DOE will continue to operate and maintain the system and maintain the water level of L-Lake.

DOE will assess the need for future environmental remediation alternatives for L-Lake under existing Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) commitments. Characterization activities associated with CERCLA closure are expected to begin in the year 2000 and be completed in several years. This characterization will inform any required remedial action. Pending these activities, DOE will continue to operate the RWS. If during continued operation of the RWS a system component fails, DOE will take appropriate emergency actions. DOE will then determine if the system is too costly to repair (by comparing this cost to estimated shutdown costs and future possible remediation costs under the CERCLA). If DOE determines that the RWS is too costly to repair, it will reevaluate all relevant commitments and the information in the RWEIS, to determine necessary actions to shut down the RWS. However, the RWS is in good condition and not expected to fail over this period of time.

This RWEIS evaluates three alternatives for the disposition of the RWS at the SRS. The RWS is a 50-mile underground concrete piping structure and pumping system that was built in the early 1950s to provide cooling water for the SRS' five nuclear production reactors. The RWEIS alternatives cover the spectrum of reasonable options as follows:

(1) Continue operation of the RWS (No Action Alternative);

(2) Shut down and maintain the RWS for potential restart (Preferred Alternative); and

(3) Shut down and deactivate the RWS with no maintenance for potential restart.

Based on the RWEIS evaluation of the potential environmental impacts, as well as the costs, energy consumption, and regulatory implications of the alternatives, DOE has selected the No Action alternative and will continue to operate the RWS. Other than potential CERCLA remediation activities, if DOE continued to operate and maintain the RWS indefinitely the No-Action Alternative would require the greatest commitment of money and energy resources. The RWS would continue to supply 5,000 gpm to L-Lake from the Savannah River. To do so, DOE would spend approximately $1,084,000 annually to provide RWS surveillance and maintenance and $494,000 annually for electrical energy to pump the water uphill from the river. Finally, DOE would continue to dredge the RWS intake canal to keep it clear of debris. However, there is great uncertainty regarding the cost of remedial action under CERCLA. Therefore, until characterization is completed, it will not be evident whether shutting down or continuing to operate and maintain the RWS is economically the most prudent course of action.

In its present configuration, the RWS circulates water from the Savannah River to a 1000 acre man-made lake known as L-Lake. L-Lake no longer serves to mitigate thermal effluents from L-Reactor because it no longer operates. RWS flow is necessary to maintain the full pool water level of L-Lake.

Low-levels of radionuclides were released to Steel Creek before L-Lake was constructed. As a result, contaminated sediments are largely confined to the former Steel Creek stream bed and floodplain that exists under L-Lake. The methods for any needed environmental remediation of these low-level radionuclide releases to Steel Creek, as well as those to other SRS streams, will be determined under the Federal Facility Agreement (FFA). This agreement, between DOE, the U.S. Environmental Protection Agency (EPA), and the South Carolina Department of Health and Environmental Control (SCDHEC), provides a commitment and schedule for the comprehensive remediation of contamination at the SRS, including SRS streams and lakes.

In accordance with the present FFA schedule, DOE will begin characterization of the L-Lake CERCLA unit in fiscal year 2000. DOE anticipates that this process will lead to an Interim Record of Decision (IROD) in Fiscal Year 2001. At that time DOE will decide whether L-Lake should be drawn down to facilitate characterization of future risks to human health and the environment. The characterization process and risk evaluation will lead to the selection of a preferred remedial alternative.

During these future draw down and characterization activities, DOE expects to stabilize exposed sediments and address the "reasonable and prudent" measures for protection of threatened and endangered species that the U. S. Fish and Wildlife Service (USFWS) has recommended as a result of the Endangered Species Act Section 7 consultation process.

SUPPLEMENTARY INFORMATION:

Background

Located in southwest South Carolina, the SRS occupies an area of approximately 300 square miles (800 square kilometers). The Savannah River forms the SRS's southwestern boundary for approximately twenty-seven miles (forty-three kilometers) on the South Carolina-Georgia border. The SRS is approximately twenty-five miles (forty kilometers) southeast of Augusta, Georgia and twenty miles (thirty-two kilometers) south of Aiken, South Carolina, the nearest major population centers. The U.S. Atomic Energy Commission (AEC), a DOE predecessor agency, established the SRS in the early 1950s for the production of nuclear materials to support the United States' national defense, research, and medical programs.

SRS produced these materials by irradiating nuclear fuel and targets in SRS' five production reactors (C-, K-, L-, P-, and R-Reactors). In the reactors, closed pipe loops contained water to cool the fuel assemblies by passing water directly across them. The water in this closed loop was then pumped to heat exchangers where heat was transferred from the closed system to a secondary-cooling system. This arrangement of closed loops minimized contamination of the environment.

The water for the secondary-cooling system was provided by the RWS. The RWS pumped river water from the Savannah River using intake canals and pumps to the heat exchangers in the reactor areas (C-, K-, L-, P-, and R-Reactor areas) by way of distribution piping and water-storage basins.[1] The RWS also pumped water to Par Pond, which was used to store additional secondary-cooling water for P- and R-Reactors.

After passing through the heat exchangers and absorbing the heat from the primary closed-loop cooling system, the heated water in the secondary-cooling system was returned to the Savannah River by way of several discharge canals and streams. After 1985, when construction of L-Lake was completed, heated secondary-cooling water was also returned to the Savannah River by way of L-Lake which dissipated the heat from the thermal effluent (hot water) from L-Reactor. Thus, in all, the RWS is composed of river water intake canals, intake pumps, distribution piping to the reactor areas, 186-Basins, discharge canals, receiving streams, and lakes (Par Pond and L-Lake).

At the end of the Cold War in 1992, SRS' mission emphasis shifted from the production of nuclear materials to cleanup and environmental restoration. Consequently, SRS' reactors were shut down, thereby decreasing the demand for RWS flow. From 1988 to 1996, demand for RWS flow and flow discharged to onsite streams decreased from 380,000 gallons per minute (gpm) to 5,000 gpm. Therefore, reflecting decreased water needs and DOE's mandate to reduce operating costs, a 5,000 gpm pump was installed in 1997 to replace a larger, and more costly to operate, 28,000 gpm pump.[2] Further, because of reduced RWS demand, and because SRS' reactors will not operate again, DOE identified the RWS as excess infrastructure, costly to operate and maintain, but with limited application. Accordingly, DOE prepared the RWEIS to examine the environmental impacts of RWS shutdown with the preference of eliminating the operational costs of this infrastructure, now only marginally useful.

[1] The water-storage basins are also known as 186-Basins.

NEPA Process

DOE prepared this Record of Decision pursuant to the regulations of the Council on Environmental Quality for implementing the National Environmental Policy Act (NEPA), 40 CFR Parts 1500–1508, and DOE's NEPA Implementing Procedures, 10 CFR Part 1021. This Record of Decision is based on DOE's Final RWEIS for the Shutdown of the River Water System at the Savannah River Site, Aiken, South Carolina (DOE/EIS–0268), for which DOE published a Notice of Intent to prepare on June 12, 1996, in the **Federal Register**, 61 Fed. Reg. 29744. The notice announced a public scoping period, ending on July 12, 1996, and solicited comments and suggestions on the EIS' scope. DOE held scoping meetings in North Augusta, South Carolina on June 27, 1996. Comments received during the scoping period and DOE's responses thereto were used to prepare an action plan, issued in August 1996, defining the scope and approach of the RWEIS. The action plan and reference materials cited in the RWEIS were made available for review in the DOE Public Reading Room, located at the University of South Carolina-Aiken Campus, Gregg-Graniteville Library, 2nd Floor,

[2] In the RWEIS, the No-Action Alternative impacts are assessed against the baseline provided by operation of the 5,000 gpm pump. DOE reviewed installation of the 5,000 gpm pump as a categorical exclusion (EEC–SS–G–96–003) in accordance with DOE's NEPA regulations. 10 CFR 1021. During assessment of the categorical exclusion, DOE determined that a 5,000 gpm pump would be sufficient to maintain L-Lake at 190 feet MSL and to provide the minimum operating needs of K- and L-Reactor areas without violating any SRS permits. Accordingly, the categorical exclusion was approved on June 6, 1996, and the pump installed thereafter.

VOL 63 ISS 18 JA 28 1998 UMI

University Parkway, Aiken, South Carolina at (803) 641–3320.

DOE completed the draft RWEIS in November 1996, and on November 15, 1996, EPA published a Notice of Availability for the document in the **Federal Register**, 61 Fed. Reg. 58548. This notice started the public comment period for the draft RWEIS, which extended through December 30, 1996. DOE received comments by letter, electronic mail, and statements made during public hearings held in North Augusta, South Carolina on December 4, 1996, all of which were considered in preparing the final RWEIS. DOE completed distribution of the final RWEIS in May 1997, and on May 16, 1997, EPA published a Notice of Availability in the **Federal Register**, 61 Fed. Reg. 27024. This ROD is the culmination of and final step in the NEPA process for action on the RWS and announces DOE's selection of an alternative.

Alternatives Considered in Final RWEIS

No-Action Alternative

The No-Action Alternative does not change the current status quo and involves continued operation of the RWS using a 5,000 gpm pump. Under this alternative, L-Lake would maintain its water level at 190 feet MSL with makeup water provided by the RWS. Par Pond water level would continue to fluctuate naturally between 195 feet and 200 feet MSL. Under severe drought conditions, and if necessary, the RWS could be used to maintain Par Pond water level.

Proposed Action—Shut Down and Maintain Alternative

The Proposed Action—and Preferred Alternative, the Shut Down and Maintain Alternative—provides for shutdown and maintenance of the RWS in a standby condition that would allow restart. RWS shutdown would result in the L-Lake water level returning to the original Steel Creek stream bed over a ten year period. RWS shutdown would not change the status quo regarding Par Pond's water level; it would continue to fluctuate naturally between 195 feet and 200 feet MSL.

Under the Shut Down and Maintain Alternative, the RWS operational capacity would be preserved in a standby mode to account for unforeseen events, mission changes, or remedial action decisions. Maintaining the RWS in a standby condition [3] requires draining the system of water and placing the equipment in a protective state minimizing degradation.[4] Under this alternative, the RWS operation could be restored to provide water for future missions or, if necessary, to maintain Par Pond water level above 195 feet MSL in the unlikely event of a severe drought. In addition, the RWS could be restarted if the final outcome of the FFA process recommends refilling L-Lake with water to manage risk from contaminated sediments in the Steel Creek stream bed. During the interim, or in the event none of these potentialities are realized, shutdown of the RWS would eliminate operational costs associated with this system.

Shut Down and Deactivate Alternative

The Shut Down and Deactivate Alternative provides for the permanent cessation of RWS operation and does not preserve system capabilities, even in the most marginal state, for restart. DOE would shut down and deactivate the system in a secure, environmentally satisfactory condition and isolate all the intake pipes to prevent river water intrusion into the RWS. DOE would conduct no maintenance or surveillance on the RWS, with the exception of the L-Lake dam, which would be maintained until the Lake's water level returned to the original Steel Creek stream bed in approximately 10 years.

Under this alternative, L-Lake water level would return to the original Steel Creek stream bed. Par Pond water level would continue to fluctuate naturally between 195 feet and 200 feet MSL. Under severe drought conditions, the RWS could not be used to maintain Par Pond water level, even if necessary. Furthermore, the RWS could not be restarted if the final outcome of the FFA process recommended refilling L-Lake with water to manage risk from contaminated sediments in the Steel Creek stream bed.

Environmental Impacts of the Alternatives

Environmental Impacts of No Action Alternative

The No Action alternative would preserve the status quo and continue current operation of the RWS through a 5,000 gpm pump.[5] Under the No Action Alternative, L-Lake would remain at its normal water level of 190 feet MSL. Par Pond water level would continue to fluctuate naturally between 195 feet and 200 feet MSL.

Environmental Impacts of Shut Down and Maintain & Shut Down and Deactivate Alternatives

The environmental impacts of the Proposed Action—and Preferred Alternative, the Shut Down and Maintain Alternative—are the same as those of the Shut Down and Deactivate Alternative. Both alternatives call for DOE to shutdown the RWS. While the Proposed Action calls for DOE to preserve the RWS in a standby condition, the actions necessary to accomplish that goal do not entail environmental impacts beyond those associated with the shutdown action. Accordingly, the environmental impacts of either alternative are the same and DOE considers them together in the following paragraphs.

L-Lake

Under either the Shut Down and Maintain Alternative or the Shut Down and Deactivate Alternative, DOE would not augment water flow to L-Lake. L-Lake cannot maintain a water level of 190 feet MSL, its normal full pool water level, without flow augmentation from the RWS. Consequently, it would recede to the original Steel Creek stream bed conditions over a ten-year period.

As L-Lake recedes to the Steel Creek stream bed as a consequence of either shutdown alternative, habitat for amphibians, reptiles, semi-aquatic mammals, wading birds, and waterfowl would be gradually reduced and eliminated. Consequently, these species would be more vulnerable to predation. Eventually, alligators would be displaced due to the loss of habitat. Drawdown of L-Lake would result in the loss of nests, eggs, or hatchlings.

In addition, the reversion of L-Lake water level to the former Steel Creek stream bed would uncover lake bed sediments. As a result, these sediments could be susceptible to the forces of erosion, especially during storm events. In addition, the reversion of L-Lake water level to the original Steel Creek stream bed could expose some sediments, primarily in the Steel Creek stream bed, that could contain low levels of contamination, primarily cesium-137.[6] Animals foraging in the L-Lake lake bed or Steel Creek stream bed could be exposed to these sediments via inhalation, ingestion, direct radiation exposure, and/or skin contact. Similarly, an on-site human working in the L-Lake bed lake could be exposed to the contaminants in sediments via inhalation, incidental ingestion, direct radiation exposure and/or skin contact. An off-site human could be exposed to contaminants in sediments through atmospheric or aqueous pathways via inhalation or ingestion from sediments that have been re-suspended in air or water. The off-site human would not be exposed to direct radiation.

Exposure to L-Lake lake bed contaminants is unlikely to pose a significant risk to SRS workers, the public, or the environment. The L-Lake lake bed contaminants would be unlikely to pose a significant risk to SRS workers because the concentration of the contaminants in the sediments is low and the amount of time that an SRS worker would be expected to spend in the lake bed would not yield an annual dose above DOE administrative limits (700 mrem). For example, an SRS worker spending eight hours per days for 250 days a year over a twenty-five year period would receive an annual dose of 41 mrem. The 41 mrem dose is well below DOE's 700 mrem administrative limit.

The L-Lake lake bed contaminants would be unlikely to pose a significant risk to the public because the public would not be exposed to direct radiation, which is the primary hazard associated with cesium-137. The probability of the maximally-exposed individual, located at the SRS site boundary, developing a fatal cancer as a result of 70 years exposure would be less than one in a million (5.6 X 10E–7). In DOE's judgment this risk is extremely small.

Finally, the L-Lake lake bed contaminants would be unlikely to pose a significant risk to the environment because erosion would be controlled and contaminated sediments would not pose a significant risk to foraging animals. Erosion would be controlled because, based on DOE's historic hydrologic data and models, L-Lake would probably recede during the growing season. As the Lake's water level slowly receded, wetland plants growing in the shore zone would recede down slope with the water. Seed banks along the shoreline would germinate and stabilize sediments in portions of the newly exposed shoreline. In addition, DOE would artificially seed the exposed L-Lake lake bed with appropriate vegetation in order to further stabilize the sediment. Thus, exposure to contaminants in the L-Lake due to erosion or resuspension of lake bed sediment would be minimized because the sediments would be protected from wave or wind agitation.

Furthermore, erosion and transport of contaminated L-Lake lake bed sediments would be reduced by the slow drawdown of the water level in the Lake, occurring over a ten year period, and by the resulting growth of stabilizing vegetation. Because of this slow drawdown and growth of stabilizing vegetation, suspension of sediments in the water column would be minimized. Further, DOE would maintain the Steel Creek dam during the drawdown to impede the transport of those sediments that became suspended in the water column. The Steel Creek dam would minimize the movement of contaminants suspended in the water column by creating a stilling basin to still the water and allow sediments to settle out of the water column.

Contaminants in L-Lake lake bed would not pose a significant risk to foraging animals either from radiological or non-radiological sources. As described in the RWEIS, radiological contaminants were screened against known background contaminant concentrations yielding estimated radiation dose rates, which were then compared to applicable standards. This comparison indicated that two radionuclides exceeded twice the background level, namely cesium-137 and Co-60. Cs-137 and Co-60 in L-Lake lake bed sediments would primarily cause risk from the direct exposure of penetrating gamma radiation. The concentrations of these radiological sources was used to estimate a dose rate to selected receptor species. The estimated radiation dose rates to selected receptor species are well below the applicable standards.

For non-radiological sources, it was recognized that L-Lake lake bed sediments would be exposed and that the sediments could become surface soil or facilitate vegetative growth. All samples detected in sediments were compared to screening levels for sediments, surface soils, and terrestrial plants. No sediment contaminants were present in average concentrations that exceeded available screening levels. Screening levels were not available for four non-radiological samples found in L-Lake sediment—beryllium, cobalt, thallium, and vanadium—which had an average concentration between two and three times their background levels. The potential risk of these contaminants (as well as all contaminants that were detected) were assessed by screening their respective concentrations against surface soil screening levels.

Assuming the sediments became surface soils, the average concentrations of beryllium, thallium, chromium, and vanadium were between two and three times their average background levels. Thallium was detected in five of forty-four samples and beryllium, chromium, and vanadium slightly exceeded twice its background screening level. This indicated that these contaminants either are not present in high concentrations or are not widespread because of the few occurrences in samples. Accordingly, they would not represent an unacceptable risk. The average concentration of cobalt was below its associated screening level.

Assuming the detected sediment concentrations were found in terrestrial plants, chromium, thallium and vanadium were between two and three times their background screening levels. Again, thallium was detected in five of 44 samples. It should also be noted that plants absorb chromium, thallium, and vanadium minimally from soils. Because of this fact and that L-Lake currently supports a healthy, diverse ecological community, it does not appear that effects to L-Lake plants from contaminants are occurring or would occur under the Proposed Action.

The screening process is discussed in greater detail in Appendix B of the RWEIS.

Par Pond

Par Pond water level would not be impacted by any of the alternatives considered in the RWEIS. Par Pond has not received makeup water from the RWS since January 1996, and has been allowed to fluctuate naturally between 195 feet and 200 feet MSL. Accordingly, ceasing operation of the RWS could not effect Par Pond water level because it is not currently receiving make-up water from the RWS.

[3] This standby condition is also referred to as "lay-up."

[4] Placing the RWS in lay-up also allows maintaining portions of the system in a higher state of readiness in order to restore pumping capability more rapidly. Maintenance of certain portions of the RWS in such a condition might be warranted (1) where those portions are likely to be needed for future missions; (2) where they might be necessary to maintain Par Pond water levels in the event of a severe drought; or (3) where they might be necessary to refill L-Lake in the event of determination to do so as a result of the FFA process.

[5] As previously noted, the environmental impacts of the 5,000 gpm pump were evaluated under a categorical exclusion. On December 30, 1996, EPA provided comments on the Draft RWEIS and questioned the appropriateness of this categorical exclusion. EPA requested DOE to describe more thoroughly the impacts associated with the 5,000 gpm pump. In response to EPA's comment, those impacts were included in the Final RWEIS. A discussion demonstrating the appropriateness of the categorical exclusion may be found in the RWEIS at page E–61.

[6] Cesium-137 is an external radiation hazard from direct exposure to gamma radiation which penetrates clothing and skin. Measurements taken under the surface of L-Lake show that cesium in the Lake sediments is largely concentrated in the original Steel Creek floodplain, currently beneath the surface of L-Lake. These measurements also show that a maximum (24-hour per day) radiation dose received by a human would be approximately 180 mrem per year above the typical radiation dose to which Americans are routinely exposed (approximately 360 mrem per year). The occupational dose limit for adults is 5,000 mrem per year, and this additional dose would not exceed that limit. 10 CFR § 20.1201.

VOL 63 ISS 18 JA 28 1998 UMI

Allowing Par Pond to fluctuate naturally was the product of prior analysis and decisions conducted under authority of NEPA and the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). In response to safety concerns presented by a 1992 leak in the Par Pond dam, DOE prepared a NEPA document called a Special Environmental Analysis (SEA) to assess the environmental impacts of an emergency drawdown of the Par Pond water level from 200 feet MSL, its normal water level, to 181 feet MSL. The SEA reviewed the anticipated and observed environmental impacts of drawing down, repairing, and refilling Par Pond, including potential health and ecological impacts resulting from the possible exposure to radiocesium contaminated sediment. It concluded that "consideration would be given to begin refilling operations as soon as possible, perhaps before dam repairs are completed, to minimize impacts on the Par Pond ecosystem." DOE, Special Environmental Analysis for Par Pond at the Savannah River Site, page 4, (April, 1992). In addition, the SEA summarized consequences of possible future repair, remedial, and refilling actions, and developed a Mitigation Action Plan (MAP) to reduce the impacts of the repair activity. Under authority of the SEA, DOE proceeded with the Par Pond drawdown and repair project.

Following the repair action, DOE prepared a Par Pond Interim Record of Decision (IROD) to provide a CERCLA remedial action to address the interim period following the dam repair until a final remedial action could be studied and selected. The IROD's selected remedy consisted of refilling and maintaining Par Pond to 200 +/-1 feet until a NEPA evaluation could be accomplished to evaluate the environmental impacts from reduced flow to Lower Three Runs Creek (the creek below Par Pond dam), fluctuating reservoir water level, and discontinuing of river water pumping to the reservoir. DOE, Interim Action Record of Decision, Remedial Alternative Selection, Par Pond Unit, WSRC–RP–93–1549 (January 26, 1995). EPA and SCDHEC approved the IROD in February 1995, and Par Pond was completely refilled by March 15, 1995.

In 1995, DOE prepared a NEPA Environmental Assessment (EA), Natural Fluctuation of Water Level in Par Pond and Reduced Water Flow in Steel Creek Below L-Lake at the SRS (DOE/EA–1070). The EA analysis showed that no significant impacts would likely result to the Par Pond ecosystem if the Pond's water level were maintained at 195 feet MSL or above. Hydrological models analyzed in the EA showed that even without RWS flow augmentation, the Par Pond water level is not likely to decrease below 196 feet MSL, even in drought conditions. Further, the EA analysis showed that elimination of RWS water flow and the accompanying reduction of Savannah River nutrients flowing through Par Pond would cause the Pond's ecosystem to revert to that typically found in reservoirs in the southeastern United States. Based on the analysis in the EA, DOE issued a Finding of No Significant Impact (FONSI) in August 1995 under which RWS water flow to Par Pond was eliminated. Under the FONSI, if Par Pond water level decreases to 195 feet MSL or below, DOE will resume water flow augmentation through the RWS. Since issuance of the FONSI, natural water flow into Par Pond has maintained the Pond above 199 feet MSL.

Under either of the RWEIS shutdown alternatives, the status quo would not be changed and RWS water would not augment natural water flow into Par Pond. Under the Shut Down and Maintain Alternative DOE would be able to restart the RWS and resume pumping to Par Pond if the water level drops below 195 feet MSL, as called for in the FONSI and consistent with the IROD. However, under the Shut Down and Deactivate Alternative, DOE would not have the capability to restart the RWS to augment water flow to Par Pond in the event a severe drought demanded such an action.

Other Impacts

Under either of the shutdown alternatives, DOE would need to find an alternate water supply for auxiliary equipment cooling and for fire protection water reserves. The alternate water supply would be approximately 400 gpm and be drawn from groundwater. This groundwater would be provided by existing wells at rates much less than was historically provided by these same wells during reactor operations.

RWS shutdown would result in increased survival of Savannah River larval fish and fish eggs because they would no longer be entrained at the RWS intake structures. In addition, RWS shutdown would return 225 acres of original wetlands inundated by the damming of Steel Creek and creation of L-Lake. This acreage is approximately the same amount of wetlands that exists along the present shoreline of L-Lake that would be lost as L-Lake water level recedes to the original Steel Creek stream bed.

Environmentally Preferable Alternative

The proposed action in this instance presents a situation where the environmentally preferable action is different based on whether a short-term or long-term period of reference is used. Based on the analysis in the RWEIS, DOE finds that in the short-term, the environmentally preferable alternative is the No-Action Alternative to preserve the status quo and continue current operation of the RWS through a 5,000 gpm pump. The No-Action Alternative would preserve L-Lake and prevent the return of the Lake's water level to the original Steel Creek stream bed. The preservation of the Lake would, in turn, preserve up to 1000 acres of aquatic habitat formed by it, and forestall the transition of this habitat to uplands and wetlands habitat.

However, in the long-term, the Shut Down and Maintain Alternative is the environmentally preferable alternative. Under this alternative, L-Lake water level would return to the original Steel Creek stream bed over a ten year period, which would allow for the gradual restoration of a more stable ecosystem, such as that in existence prior to construction of L-Lake. The pre-Lake ecosystem would be more stable because it is the indigenous ecosystem, and because it would not be susceptible to potential imbalances, such as those introduced by changes in L-Lake water level associated with repair or renovation of the Steel Creek dam.

Furthermore, the restored L-Lake ecosystem would benefit from the reemergence of 225 acres of wetlands inundated by the creation of L-Lake, an amount that approximately equals the amount of wetland acreage that would be lost along the shoreline of L-Lake as it gradually recedes. After these areas are exposed, they would naturally reestablish wetland characteristics with cycles of drying and flooding typical of other hardwood swamps on the SRS and in the southeast. As typical wetlands they would support diverse ecological communities.

In addition, while a decrease in aquatic productiyity would be expected as a consequence of the return of L-Lake water level to the original Steel Creek stream bed, an increase in terrestrial productivity would occur concomitantly. As the L-Lake water level receded, grasses, forbs, shrubs, and trees indigenous to the ecosystem would re-colonize the L-Lake lake bed over time. In addition to flora, indigenous fauna would return to the ecosystem, and a variety of terrestrial and semi-aquatic animal species would inhabit the area as L-Lake gradually receded to the original Steel Creek stream bed.

Other than potential CERCLA remediation activities, if DOE continued to operate and maintain the RWS indefinitely the No-Action Alternative would require the greatest commitment of money and energy resources. The RWS would continue to supply 5,000 gpm to L-Lake from the Savannah River. To do so, DOE would spend approximately $1,084,000 annually to provide RWS surveillance and maintenance and $494,000 annually for electrical energy to pump the water uphill from the river. Finally, DOE would continue to dredge the RWS intake canal to keep it clear of debris. However, there is great uncertainty regarding the cost of remedial action under CERCLA. Therefore, until characterization is completed, it will not be evident whether shutting down or continuing to operate and maintain the RWS is economically the most prudent course of action.

Associated Actions

DOE considered a number of actions that affect the selection of an alternative for the RWS, as well as the timing of implementing a selected alternative. The actions are described in the following paragraphs.

Remedial Action Process for L-Lake

Through the FFA, DOE, EPA, and SCDHEC established the procedure for environmental restoration activities at the SRS. The FFA integrates DOE responsibilities under the Resource Conservation and Recovery Act (RCRA) and CERCLA. In response to EPA and SCDHEC comments on the Draft RWEIS, DOE recommends further assessment of L-Lake under the FFA, possibly resulting in a Baseline Risk Assessment (BRA) and a Remedial Investigation/ Feasibility Study (RI/FS).

A BRA will assess the risk associated with the contaminants identified in the L-Lake sediment, primarily located in the original Steel Creek stream bed, and it will provide a quantified expression of risk for key receptors, such as humans or wildlife, which may be exposed to the contaminants. An RI/FS will gather data necessary to determine more exactly the nature and extent of contamination in L-Lake sediment, establish criteria for remediating the Lake, identify the preliminary alternatives for remedial actions, and support the technical and cost analyses of the remedial alternatives.

DOE believes that the analysis and data collection necessary to prepare a BRA and RI/FS is more accurately, easily, and economically obtained once L-Lake has returned to its original Steel Creek stream bed. This is because there are inherent difficulties in taking sediment samples while L-Lake is filled if additional samples are needed. Because shutdown of the RWS will present no unreasonable risk to human health or the environment, and because analysis of L-Lake sediment is more appropriate after the Lake has returned to the original Steel Creek stream bed, DOE anticipates that this process will be accomplished under an Interim Record of Decision (IROD). In accordance with the present FFA schedule, DOE will begin characterization of the L-Lake CERCLA unit in fiscal year 2000 and begin L-Lake draw down in Fiscal Year 2001. The characterization process and risk evaluation will lead to the selection of a preferred remedial alternative. It is DOE's intention to incorporate National Environmental Policy Act values in the IROD and supporting documents.

Remedial Action Process for Onsite Streams

Steel Creek, Four Mile Branch, Pen Branch, and Lower Three Runs, are listed in the FFA as RCRA/CERCLA units because each stream received contaminants from past operations. EPA and SCDHEC expressed concern about the effect on these units due to the installation of the 5,000 gpm pump because the installation of that pump reduced water flow capacity through the streams from 28,000 gpm to 5,000 gpm. The reduction in water flow through the SRS streams has increased the concentration of tritium transported to SRS streams from the seepage basins.

Increased tritium concentrations in site streams are the consequence of two factors. First, tritium from the seepage basins is carried with rainwater to site streams as it percolates through the soil at a fairly constant rate. Second, the RWS flow formerly diluted the tritium-containing rainwater as it percolated to the streams. Installation of the 5,000 gpm pump reduced RWS flow contribution to the streams and removed this dilution water. Consequently, installation of the 5,000 gpm pump had the effect of increasing tritium concentrations.

To respond to comments on the draft RWEIS, the Final RWEIS evaluated the impacts to workers, ecosystems, and the public due to the installation of the 5,000 gpm pump from the resulting increase in tritium concentrations. Workers and ecological receptors would be at risk due to increased tritium exposure through incidental ingestion and skin contact. The public could be at risk due to ingestion of increased concentrations of tritium in drinking water. However, the RWEIS risk assessment showed that a hypothetical future worker's annual dose would be below 1 mrem. The RWEIS environmental risk assessment showed that the highest annual dose to an ecological receptor would be 92 mrem. Both of these dose rates are well below accepted standards.

Drinking water taken from the Savannah River would not be impacted because installation of the 5,000 gpm did not increase the total amount of tritium released to the River. Because the flow rate of water in the Savannah River is typically over 10,000 cubic feet per second (compared to the 45 cubic feet per second reduction of flow from installation of the 5,000 gpm pump) and because the nearest domestic water plant intake is approximately 40 miles downstream from SRS, the on-site increased concentrations have an insignificant health impact to the public. In summary, the increased concentrations of tritium in site streams were determined to be acceptable because these concentrations did not pose an unacceptable risk to workers, the ecosystems or the public.

Steel Creek, Four Mile Branch, Pen Branch, and Lower Three Runs, as well as other SRS streams have received low-levels of radionuclides, including tritium, from past SRS operations. Therefore, all of them will be evaluated in accordance with the FFA and be the subject of a risk analysis based on hypothetical future residents and industrial workers.[7] DOE is scheduled to provide information to EPA and SCDHEC, which will assist in the characterization of each stream and the selection of a remedial alternative.

Water Requirements for Alternatives

Under the No-Action Alternative, the RWS would continue to supply existing operational cooling and make-up water requirements for the reactor areas and maintain L-Lake at 190 feet MSL. For either of the shutdown alternatives, DOE must supply 400 gpm of groundwater to replace that provided by the RWS to cool auxiliary equipment and to provide make-up water for fire protection reserves.

[7] These two hypothetical future groups could be at risk because the risk analysis assumes that they drink water from SRS streams before it is mixed with the Savannah River. A down stream receptor is not at risk because the Savannah River flow rate is significantly higher than SRS streams and, in effect, dilutes tritium to concentrations which do not pose a risk to human health.

VOL 63 ISS 18 JA 28 1998 UMI

L-Area Sanitary Wastewater Treatment Plant

The L-Area sanitary wastewater effluent mixes with RWS flow before reaching L-Lake. The L-Area Sanitary Wastewater Treatment Plant wastewater permit took credit for RWS blending flow in determining the extent of treatment necessary before the wastewater was discharged to L-Lake. To stop RWS flow, DOE must implement an alternate compliance method to manage L-Area sanitary wastewater.

Reactor 186-Basins Alternative Uses Study

In 1994, DOE analyzed the feasibility of using the SRS C-, L-, P-, and R-Reactor 186-Basins[8] and 904-Retention Basins[9] for aquacultural purposes. In March 1995 DOE advertised the availability of the Reactor 186-Basins for commercial use. DOE accepted one fish farming proposal that would have relied on ground water for make-up water, although this proposal was later withdrawn. At the present time, no future uses of the 186-Basins or the 904-Retention Basins are planned. DOE could accept similar proposals in the future regardless of the RWEIS alternative selected because the basins do not rely on the RWS for make-up water.

Decision

DOE selects the No Action Alternative of the RWEIS—Continue to Operate the RWS. Under this alternative, DOE will continue to operate and maintain the system as well as maintain the water level of L-Lake at its full pool water level of 190 feet MSL.

DOE will assess the need for future environmental remediation alternatives for L-Lake under existing CERCLA commitments. Characterization activities associated with CERCLA closure are expected to begin in the year 2000 and be completed in several years. This characterization will inform any required remedial action. Pending these activities, DOE will continue to operate the RWS. If during continued operation of the RWS a system component fails, DOE will take appropriate emergency actions. DOE will then determine if the system is too costly to repair (by comparing this cost to estimated shutdown costs and future possible remediation costs under CERCLA). If DOE determines that the RWS is too costly to repair, it will reevaluate all relevant commitments and the information in the RWEIS, to determine necessary actions to shut down the RWS. However, the RWS is in good condition and not expected to fail over this period of time.

In accordance with the present FFA schedule, DOE will begin characterization of the L-Lake CERCLA unit in fiscal year 2000. DOE anticipates that this process will lead to an Interim Record of Decision (IROD) in Fiscal Year 2001. At that time DOE will decide whether L-Lake should be drawn down to facilitate characterization of future risks to human health and the environment. The characterization process and risk evaluation will lead to the selection of a preferred remedial alternative. Not withstanding a major system failure, DOE has decided to operate and maintain the RWS until a preferred remedial alternative is selected.

DOE made this decision after considering the most recent operating and maintenance costs and estimated shutdown implementation costs. DOE has concluded the amount and uncertainty in shutdown implementation costs suggest the RWS should continue to be operated while DOE monitors RWS operating and maintenance costs to determine when continued operation becomes too costly. For example, if a portion of the system failed, DOE may elect to take an emergency action in accordance with 40 CFR 1506.11, if appropriate, and then determine if repair was too costly. If DOE determines that repair is too costly it will announce this decision in a future Record of Decision under the requirements of NEPA and CERCLA, as necessary.

Prior to drawdown, DOE will notify the USFWS to ensure all "reasonable and prudent" measures, which were recommended by USFWS during the Endangered Species Action consultation process to protection of threatened and endangered species, are still adequate and appropriate. DOE will also negotiate a schedule with USFWS for the review and completion of these measures.

During any future draw down and characterization activities DOE expects to stabilize exposed sediments and address the "reasonable and prudent" measures, discussed above.

DOE considers continued operation of the RWS to be environmentally preferable in the short-term because L-Lake remain as a lake with its ecology unaffected.

Comments on Final RWEIS

DOE received two letters commenting on the Final RWEIS. The first, a letter from EPA, Region IV, dated June 12, 1997, expressed concern that the RWEIS does not adequately consider injury or impacts to endangered species. To consider injury or impacts to these species DOE and USFWS entered into a formal consultation process regarding endangered species. The USFWS recommended specific "reasonable and prudent" measures to protect the bald eagle and wood stork during the L-Lake water level return to the original Steel Creek stream bed. DOE endorsed these reasonable and prudent measures. However, these measures will not be implemented at this time because the draw down of L-Lake will not occur as a result of this decision.

The letter from EPA, Region IV also expressed concern that the RWEIS did not adequately consider the ecological risks associated with shutdown of the RWS. However, as explained in the Environmental Impacts section, the RWEIS ecological risk assessment (ERA) concluded that significant potential risks to ecological receptors from contaminants is not likely.

Finally, as a general statement, the letter from EPA, Region IV stated that, "This NEPA action should be coordinated to the fullest extent possible with FFA activities". The selection of the No Action alternative has been made, in part, in response to this statement.

In addition, the RWEIS documented several measures that were taken to coordinate the NEPA with the FFA process, which include the following: (1) use of FFA criteria as contamination level screening limits to estimate future potential remedial action decisions; (2) movement of the L-Lake unit from Appendix G to Appendix C of the FFA in order to avoid the unnecessary generation of a Site Evaluation Report and expedite the FFA process; and (3) preservation of the ability to refill L-Lake under the RWEIS shut down and maintain alternative in the event that such action is determined to be necessary under the FFA.

The second letter, dated June 11, 1997, from the Office of Environmental Policy and Compliance within the Department of the Interior (DOI) addressed several concerns regarding the revised ecological risk assessment (ERA) provided in the RWEIS. Specifically, DOI commented that guidance DOE used to develop the RWEIS ERA "is inadequate and inconsistent with the US EPA's guidance on ecological risk assessment." To the contrary, DOE believes the RWEIS ERA was conducted in accordance with the most current EPA guidance.

The objective of the RWEIS ERA was to determine, as accurately as possible under the existing L-Lake characteristics, the probable outcome of a CERCLA ERA.[10] The RWEIS ERA is adequate because it used maximum contaminant concentrations in its risk assessments. In fact, all radiological risks were within dosimetry-based limits acceptable to the International Atomic Energy Agency. Where the maximum concentrations of some non-radiological contaminants showed a risk potential, either the average concentration of the contaminant was compared to background levels or, alternately, the contaminant concentration was compared with more contaminant-specific information available in accepted scientific literature. This procedure is part of the typical process of interpreting the results and uncertainties of an ERA and represents the general ERA approach recommended in the EPA guidance for Superfund. EPA, Ecological Risk Assessment for Superfund: Process for Designing and Conducting Ecological Risk Assessments, Review Draft, (1996).

DOI also asserted that the "[c]onclusions of no risk are inconsistent with actual research findings." DOI cited specific DOE studies sent to USFWS during the formal Endangered Species Act consultation. The studies DOI cited assessed DNA changes found in blood samples of various wildlife species present on the SRS. In response to this assertion, DOE notes that, in no case did any of the studies suggest that an observable change in a wildlife population would result from the exposure to low levels of radionuclides found in L-Lake. Accordingly, this supports the RWEIS ERA finding that significant potential risks to ecological receptors from contaminants are not likely.

Finally, DOI commented on various DOE studies showing the presence of elevated mercury concentrations in the SRS environment. However, DOI's comment does not reflect the fact that the presence of mercury in the SRS environment is not the result of releases attendant to SRS operations. Indeed, mercury is elevated throughout areas of the southeastern United States due to atmospheric deposition, not due to SRS operations. Reflecting and restating this fact, SCDHEC issued a fish consumption advisory for numerous lakes and rivers in South Carolina based on mercury concentrations in fish. Again, the presence of this mercury was not and cannot be correlated to any SRS operations. Accordingly, DOE has no control over and is not responsible for the atmospheric deposition of mercury at SRS, or in other areas of the southeastern United States. Consequently, a returning L-Lake water level to the original Steel Creek stream bed would not exacerbate this regional phenomenon or increase ecological risk.

Conclusion

After consideration of all relevant information and data, DOE selects the No Action alternative as the most appropriate action for the future of the River Water System at the Savannah River Site at this time. This operational decision is made in recognition of all beneficial and adverse environmental impacts, monetary costs, regulatory implications and commitments under the FFA, and dictates of relevant statutes.

Signed this 23rd day of December, 1997, at Aiken, South Carolina.

Greg Rudy,

Acting Manager, Savannah River Operations Office.

[FR Doc. 98–1947 Filed 1–27–98; 8:45 am]

BILLING CODE 6450–01–P

[8] 186-Basins are water storage basins which are not contaminated.

[9] 904-Retention Basins are 50 million gallon basins that were designed to receive emergency cooling water in the event of a reactor accident.

[10] The CERCLA ERA will be used to aid the determination of a final remedial action at L-Lake. A final action is typically made only after the lake bed is characterized in detail using information such as groundwater hydrogeology, extent of groundwater contamination, and existing burial area contamination profiles. Presently, these areas are under as much as 50 feet of water and cannot be adequately characterized. As a result, a complete risk assessment cannot be performed and a final remedial alternative cannot be selected until L-Lake returns to the original Steel Creek stream bed.

DEPARTMENT OF ENERGY

Hydrogen Technical Advisory Panel

AGENCY: Department of Energy.

ACTION: Notice of open meeting.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. No. 92–463, 86 Stat. 770, as amended), notice is hereby given of the following advisory committee meeting: Hydrogen Technical Advisory Panel.

Date: Monday, March 2, 1998, 9:00 A.M.–4:30 P.M., Tuesday, March 3, 1998, 9:00 A.M.–3:30 P.M.

Place: Sheraton Premiere Hotel at Tysons Corners, 8631 Leesburg Pike, Vienna, Virginia 22182; Telephone: 800–572–7666.

FOR FURTHER INFORMATION CONTACT: Russell Eaton, Designated Federal Official, Department of Energy, Golden Field Office, 1617 Cole Blvd, Golden, CO 80401, Telephone: 303–275–4740.

SUPPLEMENTARY INFORMATION:

Purpose of the Panel: The Hydrogen Technical Advisory Panel (HTAP) will advise the Secretary of Energy who has the overall management responsibility for carrying out the programs under the Matsunaga Hydrogen Research, Development, and Demonstration Program Act of 1990, Pub. L. No. 101–566 and the Hydrogen Future Act of 1996, Public Law No. 104–271. The Panel will review and make any necessary recommendations to the Secretary on the following items: (1) The implementation and conduct of programs required by the Act, and (2) the economic, technological, and environmental consequences of the deployment of hydrogen production and use systems.

Tentative Schedule

Monday, March 2, 1998

9:00 AM, Introduction and Opening Comments—A. Lloyd
9:15, Opening Comments and Introduction of New Panelists—A. Lloyd/A. Hoffman
9:45, DOE Federal Report—R. Eaton
10:00, Report of the President's Committee of Advisors on Science and Technology (P–CAST), 11-Lab Study—S. Gronich
10:30, Break
10:45, Russian-American Fuel Cell Consortium (RAFCO)—R. Bradshaw
11:15, DOE's Fuel Cell Coordination Committee—R. Bradshaw
12:00 PM, Lunch
1:30, Strategic Directions Draft Plan—Bailey/Kamal/Zalosh
2:30, DOE Fuel Cell Program for Transportation—P. Patil
3:00, Break
3:15, California Hydrogen Business Council—D. Moard
3:30, Public Comments—Audience
4:00, HTAP Panel Comments—Panel
4:30, Adjourn
6:00, Reception

Tuesday, March 3, 1998

9:00 AM, HTAP Report to Congress—A. Lloyd
12:00 PM, Lunch
1:30, HTAP Report to Congress—Discussion
2:45, Public Comments
3:15, HTAP Panel Discussion and Roundup Panel
3:30, Adjourn

Public Participation: The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Individuals who wish to make oral statements pertaining to agenda items should contact Russell Eaton's office at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation in the agenda. The Designated Federal Official is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Each individual wishing to make public comment will be provided a maximum of 5 minutes to present their comments.

Minutes: The minutes of this meeting will be available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000

VOL 63 ISS 18 JA 28 1998 UMI

Independence Avenue, SW, Washington, DC 20585, between 9:00 A.M. and 4 P.M., Monday–Friday, except Federal holidays. Minutes will also be available by writing to Russell Eaton, Department of Energy, Golden Field Office, 1617 Cole Blvd., Golden, CO 80401, or by calling (303) 275–4740.

Issued at Washington, DC, on January 23, 1998.

Rachel Samuel,

Deputy Advisory Committee Management Officer.

DEPARTMENT OF ENERGY

Secretary of Energy Advisory Board; Notice of Open Meeting

AGENCY: Department of Energy.

SUMMARY: Consistent with the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following advisory committee meeting:

Name: Secretary of Energy Advisory Board—Openness Advisory Panel.

Date and Time: Friday, February 13, 1998, 8:30 A.M.—3:30 P.M.

Place: Doubletree Hotel, Columbia Room, 802 George Washington Way, Richland, Washington 99352.

FOR FURTHER INFORMATION CONTACT: Richard C. Burrow, Secretary of Energy Advisory Board (AB–1), US Department of Energy, 1000 Independence Avenue, SW, Washington, D.C. 20585, (202) 586–1709.

SUPPLEMENTARY INFORMATION: The purpose of the Openness Advisory Panel is to provide advice to the Secretary of Energy Advisory Board regarding the status and strategic direction of the Department's classification and declassification policies and programs, and other aspects of the Department's ongoing Openness Initiative. The Panel's work will help institutionalize the Department's Openness Initiative.

Tentative Agenda

Friday, February 13, 1998

8:30–9:00 AM, Opening Remarks & Introductions—R. Meserve, Chairman
9:00–9:30 AM, Subgroup Report: Observations from the February 4 Meeting of the Hanford Openness Workshop—T. Cotton, OAP Member
9:30–10:15 AM, Presentation & Discussion: Hanford Openness Workshop Overview—Objectives, Issues, Observations & Status—Hanford Openness Workshop Spokesperson
10:15–10:30 AM, Break
10:30–11:30 AM, Status Report: Records Management Implementation Strategy & Status Report—Howard Landon, DOE Office of Information Management
11:30–12:00 PM, Public Comment Period
12:00–1:00 PM, Lunch
1:00–1:45 PM, Status Report: Declassification Implementation Strategy & Status—Richard Lyons, DOE Office of Declassification
1:45–2:45 PM, Panel Discussion: Declassification & Records Management Issues: A Path Forward—Guest Panelists & OAP Members
2:45–3:15 PM, Public Comment Period
3:15 PM, Adjourn

This tentative agenda is subject to change. A final agenda will be available at the meeting.

Public Participation: The Chairman of the Panel is empowered to conduct the meeting in a way which will, in the Chairman's judgment, facilitate the orderly conduct of business. During its meeting in Richland, Washington the Panel welcomes public comment. Members of the public will be heard in the order in which they sign up at the beginning of the meeting. The Panel will make every effort to hear the views of all interested parties. Written comments may be submitted to Skila Harris, Executive Director, Secretary of Energy Advisory Board, AB–1, US Department of Energy, 1000 Independence Avenue, SW, Washington, DC 20585.

Minutes: Minutes and a transcript of the meeting will be available for public review and copying approximately 30 days following the meeting at the Freedom of Information Public Reading Room, 1E–190 Forrestal Building, 1000 Independence Avenue, SW, Washington, D.C., between 9:00 A.M. and 4:00 P.M., Monday through Friday except Federal holidays. Information on the Openness Advisory Panel may also be found at the Secretary of Energy Advisory Board's web site, located at http://www.hr.doe.gov/seab.

Issued at Washington, D.C., on January 23, 1998.

Rachel M. Samuel,

Deputy Advisory Committee Management Officer.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP98–183–000]

ANR Pipeline Company; Notice of Application

January 22, 1998.

Take notice that on January 14, 1998, ANR Pipeline Company (ANR), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP98–183–000, an application pursuant to Section 7(b) of the Natural Gas Act, as amended, and Sections 157.7 and 157.18 of the Federal Energy Regulatory Commission's Regulations for permission and approval to abandon a natural gas exchange service with Koch Gateway Pipeline Company (Koch), all as more fully set forth in the application on file with the Commission and open to public inspection.

ANR states that the exchange service was originally authorized by Commission order issued November 15, 1983, in Docket No. CP83–457–000. ANR further states that under the terms of the agreement, ANR is authorized to exchange up to 10,000 Mcf of natural gas per day with Koch. ANR indicates that this agreement is designated as Rate Schedule X–138 in ANR's FERC Gas Tariff, Original Volume No. 2.

Any person desiring to be heard or to make protest with reference to said application should on or before February 12, 1998, file with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given. Under the procedure provided for, unless otherwise advised, it will be unnecessary for ANR to appear or be represented at the hearing.

David P. Boergers,

Acting Secretary.

[FR Doc. 98–1982 Filed 1–27–98; 8:45 am]

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP96–558–001]

CNG Transmission Corporation; Notice of Amendment

January 22, 1998.

Take notice that on January 15, 1998, CNG Transmission Corporation (CNG), 445 West Main Street, Clarksburg, West Virginia 26301, filed in Docket No. CP96–558–001 an amendment pursuant to Section 7 of the Natural Gas Act, as amended, and the Commission's Rules and Regulations thereunder, to amend its certificate issued at Docket No. CP96–558–000 on October 11, 1996, all as more fully set forth in the application on file with the Commission and open to public inspection.

According to CNG, the above order approved the abandonment in place of 67.07 miles of 14-inch pipeline, known as Line 14, located in Potter County, Pennsylvania and Livingston, Allegany and Wyoming Counties, New York. By this amendment, CNG requests to abandon an additional 5.5 miles of Line 14 in Allegany County, New York, due to age and condition.

CNG states that the abandonment of Line 14 will have no impact on CNG's existing services. This is so, according to CNG, because (1) the markets served by Line 14 have declined, and (2) CNG's existing, parallel pipelines, Lines 24 and 554 have sufficient capacity to maintain existing services to the markets served by this part of CNG's system.

Any person desiring to be heard or to make any protest with reference to said application, should on or before February 12, 1998, file with the Federal Energy Regulatory Commission, 888 First Street, NW., Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (Rule 210, 211, or 214) and regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceedings. Any person wishing to become a party to the proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act, as amended, and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission, or its delegate, on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that the certificate is required by the public convenience and necessity.

If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that an oral hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for CNG to appear or be represented at the hearing.

David P. Boergers,

Acting Secretary.

[FR Doc. 98–1981 Filed 1–27–98; 8:45 am]

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No CP98–188–000]

CNG Transmission Corporation; Notice of Request Under Blanket Authorization

January 22, 1998.

Take notice that on January 15, 1998, CNG Transmission Corporation (CNG), 445 West Main Street, Clarksburg, West Virginia 26301, filed in Docket No. CP98–188–000 a request pursuant to Sections 157.205 and 157.216 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.216) for authorization to abandon in place 0.42 mile of 12-inch pipeline, located in Marshall County, West Virginia, crossing the Ohio River and ending in York Township, Ohio, under CNG's blanket certificate issued in Docket No. CP82–537–000, pursuant to Section 7(c) of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

CNG proposes to abandon in place 0.42 mile of bare 12-inch pipeline, known as H–197, starting in Marshall County, West Virginia, crossing the Ohio River, and ending in York Township, Ohio, where it originally tied into East Ohio Gas Company's TPL–9. CNG states that gas has not flowed through this segment of H–197 since the 1980's, therefore the abandonment of this segment of H–197 will have no effect on any existing customers.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

David P. Boergers,

Acting Secretary.

Federal Energy Regulatory Commission

[Docket No. RP98–113–000]

Colorado Interstate Gas Company; Notice of Tariff Filing

January 22, 1998.

Take notice that on January 20, 1998, Colorado Interstate Gas Company (CIG), tendered for filing to become part of its FERC Gas Tariff, First Revised Volume No. 1, the revised tariff sheets listed on Appendix A to the filing, with a requested effective date of May 1, 1998.

CIG states that the purpose of the filing is to reform its Gas Quality Control service and low-Btu purchase requirements pursuant to Section 1.15 of the Stipulation and Agreement in Docket No. RP96–190–000, approved by the Commission on October 16, 1997.

CIG states that the copies of the filing are being mailed to all holders of the tariff and to public bodies.

Any person desiring to be heard or to make any protest with reference to said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 and 385.211 of the Commission's Rules of Practice and Procedure. All such motions or protests must be filed in

VOL 63 ISS 18 JA 28 1998 UMI

accordance with Section 154.210 of the Commission's Regulations. All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

David P. Boergers,

Acting Secretary.

[Docket No. OA97–572–000]

Easton Utilities Commission; Notice of Filing

January 22, 1998.

Take notice that on April 11, 1997, the Easton Utilities Commission on behalf of the Town of Easton, Maryland (Easton) filed a request for waiver of the standards of conduct and functional separation requirements adopted by the Commission in Order No. 889. Easton also seeks a declaration by the Commission that Easton's willingness to provide information concerning its transmission system for inclusion in data provided to the Pennsylvania-New Jersey-Maryland (PJM). Interconnection for posting of PJM's Oasis Shall be deemed to satisfy any requirements applicable to Easton to establish an OASIS.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before February 4, 1998. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Natural Gas Pipeline Company of America; Notice of Filing Refund Report

January 22, 1998.

Take notice that on January 16, 1998, Natural Gas Pipeline Company of America (Natural) filed its report of refunds in the above referenced docket for the period April 1, 1996, through November 30, 1997.

Natural states the refunds were disbursed on December 19, 1997, and that customers were served with calculations supporting their individual refunds at that time.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests should be filed on or before January 29, 1998. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Docket No. RP98–112–000]

Williston Basin Interstate Pipeline Company; Notice of Proposed Changes in FERC Gas Tariff

January 22, 1998.

Take notice that on January 20, 1998, Williston Basin Interstate Pipeline Company (Williston Basin), tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1 and Original Volume No. 2, the following revised tariff sheets to become effective January 1, 1998:

Second Revised Volume No. 1

1st Rev 28th Revised Sheet No. 15
1st Rev 31st Revised Sheet No. 16
1st Rev 27th Revised Sheet No. 18
1st Rev 24th Revised Sheet No. 21

Original Volume No. 2

1st Rev 72nd Revised Sheet No. 11B

Williston Basin states that it has determined that the take-or-pay amounts associated with Docket No. RP93–175–000 have been fully recovered as of December 31, 1997. As a result, the instant tariff sheets reflect the elimination of the throughput surcharge associated with Docket No. RP93–175–000, effective January 1, 1998. Williston Basin further states that it will file a final reconciliation of such throughput surcharge at the time of its next annual reconciliation, to be filed May 29, 1998. At that time, the appropriate accounting will be finalized and Williston Basin will propose a mechanism for final disposition of any overcollections.

Williston Basin also states that on December 31, 1997, it filed its Semi-annual Fuel Reimbursement Adjustment filing in Docket No. TM98–2–49–000. The tariff sheets in that filing reflected an effective date of February 1, 1998. Therefore, Williston Basin has filed the following revised tariff sheets to its December 31, 1997 filing in Docket No. TM98–2–49–000 to reflect the reduction in the take-or-pay surcharge reflected in the instant filing:

Second Revised Volume No. 1

Sub Twenty-ninth Revised Sheet No. 15
Sub Thirty-second Revised Sheet No. 16
Sub Twenty-eighth Revised Sheet No. 18
Sub Twenty-fifth Revised Sheet No. 21

Original Volume No. 2

Sub Seventy-third Revised Sheet No. 11B

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Sections 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

David P. Boergers,

Acting Secretary.

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER98–1186–000, et al.]

The Dayton Power and Light Company, et al.; Electric Rate and Corporate Regulation Filings

January 21, 1998.

Take notice that the following filings have been made with the Commission:

1. The Dayton Power and Light Company

[Docket No. ER98–1186–000]

Take notice that on December 23, 1997, The Dayton Power and Light Company (Dayton), submitted service agreements establishing DTE Energy Trading, Inc., as customers under the terms of Dayton's Open Access Transmission Tariff.

Dayton requests an effective date of one day subsequent to this filing for the service agreements. Accordingly, Dayton requests waiver of the Commission's notice requirements. Copies of the filing were served upon establishing DTE Energy Trading, Inc., and the Public Utilities Commission of Ohio.

Comment date: February 4, 1998, in accordance with Standard Paragraph E at the end of this notice.

2. Energy Masters International, Inc.

[Docket No. ER98–1187–000]

Take notice that on December 19, 1997, Energy Masters International, Inc. (Energy Masters), filed a Notice of Succession pursuant to § 35.16 and § 131.51 of the Commission's Regulations for the purpose of notifying the Commission that Energy Masters has succeeded to the tariffs and contracts of Cenerprise, Inc., currently on file with the Commission, as of December 9, 1997.

Comment date: February 4, 1998, in accordance with Standard Paragraph E at the end of this notice.

3. Commonwealth Electric Company

[Docket No. ER98–1188–000]

Take notice that on December 23, 1997, Commonwealth Electric Company (Commonwealth), tendered for filing a non-firm point-to-point transmission service agreement between Commonwealth and Williams Energy Services Company (Williams Energy). Commonwealth states that the service agreement sets out the transmission arrangements under which Commonwealth will provide non-firm point-to-point transmission service to Williams Energy under Commonwealth's open access transmission tariff accepted for filing in Docket No. ER97–1341–000, subject to refund and issuance of further order.

Comment date: February 4, 1998, in accordance with Standard Paragraph E at the end of this notice.

4. PECO Energy Company

[Docket No. ER98–1189–000]

Take notice that on December 23, 1997, PECO Energy Company (PECO), filed a Service Agreement dated December 15, 1997, with QST Energy Trading, Inc. (QST), under PECO's FERC Electric Tariff Original Volume No. 1 (Tariff). The Service Agreement adds QST as a customer under the Tariff.

PECO requests an effective date of December 15, 1997, for the Service Agreement.

PECO states that copies of this filing have been supplied to QST and to the Pennsylvania Public Utility Commission.

Comment date: February 2, 1998, in accordance with Standard Paragraph E at the end of this notice.

5. Madison Gas and Electric Company

[Docket No. ER98–1190–000]

Take notice that on December 23, 1997, Madison Gas and Electric Company (MGE), tendered for filing a service agreement with:

- NP Energy Inc.
- Southern Energy Trading & Marketing, Inc.
- TransCanada Energy Ltd.
- Williams Energy Services Company

MGE requests an effective date 60 days from the filing date.

VOL 63 ISS 18 JA 28 1998 UMI

Comment date: February 4, 1998, in accordance with Standard Paragraph E at the end of this notice.

6. Madison Gas and Electric Company

[Docket No. ER98–1191–000]

Take notice that on December 23, 1997, Madison Gas and Electric Company (MGE), tendered for filing a service agreement under MGE's Power Sales Tariff with:

- NP Energy Inc.
- Southern Energy Trading & Marketing, Inc.
- TransCanada Energy Ltd.
- Williams Energy Services Company

MGE requests an effective date 60 days from the filing date.

Comment date: February 4, 1998, in accordance with Standard Paragraph E at the end of this notice.

7. Portland General Electric Company

[Docket No. ER98–1192–000]

Take notice that on December 23, 1997, Portland General Electric Company (PGE), tendered for filing under PGE's Final Rule pro forma tariff (FERC Electric Tariff Original Volume No. 8, Docket No. OA96–137–000), an executed Service Agreement for Short-Term Firm Point-to-Point Transmission Service with LG&E Energy Marketing.

Pursuant to 18 CFR 35.11, and the Commission's Order in Docket No. PL93–2–002 issued July 30, 1993, PGE respectfully requests that the Commission grant a waiver of the notice requirements of 18 CFR 35.3 to allow the Service Agreement to become effective December 1, 1997.

A copy of this filing was caused to be served upon LG&E Energy Marketing as noted in the filing letter.

Comment date: February 2, 1998, in accordance with Standard Paragraph E at the end of this notice.

8. Fitchburg Gas and Electric Light Company

[Docket No. ER98–1193–000]

Take notice that on December 23, 1997, Fitchburg Gas and Electric Light Company (Fitchburg), tendered for filing five service agreements between Fitchburg and Green Mountain Power, Inc., New England Power Company, The United Illuminating Company, New Energy Ventures, and Enron Power Marketing, Inc., for service under Fitchburg's Market-Based Power Sales Tariff. This Tariff was accepted for filing by the Commission on September 25, 1997, in Docket No. ER97–2463–000. Fitchburg requests an effective date of November 23, 1997, for Green Mountain Power, Inc., New England Power Company and Enron Power Marketing, Inc., and an effective date of December 25, 1997, for United Illuminating Company, and December 26, 1997, for New Energy Ventures.

Comment date: February 4, 1998, in accordance with Standard Paragraph E at the end of this notice.

9. Illinois Power Company

[Docket No. ER98–1195–000]

Take notice that on December 23, 1997, Illinois Power Company (Illinois Power), 500 South 27th Street, Decatur, Illinois 62526, tendered for filing a Power Sales Tariff, Service Agreement under which Edgar Electric Cooperative Association will take service under Illinois Power Company's Power Sales Tariff. The agreements are based on the Form of Service Agreement in Illinois Power's tariff.

Illinois Power has requested an effective date of January 1, 1997.

Comment date: February 4, 1998, in accordance with Standard Paragraph E at the end of this notice.

10. Arizona Public Service Company

[Docket No. ER98–1196–000]

Take notice that on December 22, 1997, Arizona Public Service Company (the Company), tendered for filing an informational report on refunds of over billed amounts to wholesale customers through the Company's FERC Fuel Adjustment Clause.

Copies of this filing have been served upon the affected parties as follows:

Customer name	APS–FPC/FERC rate schedule
Electrical District No. 3 (ED–3)	12
Tohono O'odham Utility Authority (TOUA)	52
Arizona Electric Power Cooperative[1] (AEPCO)	57
Wellton-Mohawk Irrigation and Drainage District (Wellton-Mohawk)	58
Arizona Power Authority[1] (APA)	59
Colorado River Indian Irrigation Project[1] (CRIIP)	65
Electrical District No. 1 (ED–1)	68
Arizona Power Pooling Association[1] (APPA)	70
Town of Wickenburg (Wickenburg)	74
Southern California Edison Company (SCE)	120
Electrical District No. 6 (ED–6)	126
Electrical Distnct No. 7 (ED–7)	128
City of Page[1] (Page)	134
Electrical District No. 8 (ED–8)	140
Aguila Irrigation District (AID)	141
McMullen Valley Water Conservation and Drainage District (MVD)	142
Tonopah Irrigation District (TID)	143
Citizens Utilities Company[1] (Citizens)	149
Harquahala Valley Power District (HVPD)	153
Buckeye Water Conservation and Drainage District (Buckeye)	155
Roosevelt Irrigation District (RID)	158
Maricopa County Municipal Water Conservation District (MCMWCD)	168
City of Williams (Williams)	192
San Carlos Indian Irrigation Project (SCIIP)	201
Maricopa County Municipal Water Conservation District at Lake Pleasant (MCMLk.Pl.)	209

[1] AFS–FPC Rate Schedule in effect during the refund period.

Copies of the filing have been served upon the California Public Utilities Commission and the Arizona Corporation Commission.

Comment date: February 4, 1998, in accordance with Standard Paragraph E at the end of this notice.

11. Cinergy Services, Inc.

[Docket No. ER98–1197–000]

Take notice that on December 24, 1997, Cinergy Services, Inc. (Cinergy), tendered for filing a service agreement under Cinergy's Power Sales Standard Tariff (the Tariff) entered into between Cinergy and Canadian Niagara Power Company (CNP).

Cinergy and CNP are requesting an effective date of December 1, 1997.

Comment date: February 4, 1998, in accordance with Standard Paragraph E at the end of this notice.

12. Northeast Utilities Service Company

[Docket No. ER98–1199–000]

Take notice that on December 24, 1997, Northeast Utilities Service Company (NUSCO), tendered for filing, a Service Agreement with the Town of Littleton, New Hampshire Water & Light Department (Littleton), under the NU System Companies' System Power Sales/Exchange Tariff No. 6.

NUSCO states that a copy of this filing has been mailed to Littleton.

NUSCO requests that the Service Agreement become effective January 1, 1998.

Comment date: February 4, 1998, in accordance with Standard Paragraph E at the end of this notice.

13. Wisconsin Electric Power Company

[Docket No. ER98–1200–000]

Take notice that on December 24, 1997, Wisconsin Electric Power Company (Wisconsin Electric), tendered for filing an electric service agreement under its Coordination Sales Tariff (FERC Electric Tariff, Original Volume No. 2). Wisconsin Electric respectfully requests an effective date of January 2, 1998. Wisconsin Electric is authorized to state that Tenaska Power Services Company joins in the requested effective date.

Copies of the filing have been served on Tenaska Power Services Company, the Michigan Public Service Commission, and the Public Service Commission of Wisconsin.

Comment date: February 4, 1998, in accordance with Standard Paragraph E at the end of this notice.

14. Additional Signatories to PJM Interconnection, L.L.C. Operating Agreement

[Docket No. ER98–1201–000]

Take notice that on December 23, 1997, the PJM Interconnection, L.L.C. (PJM), filed, on behalf of the Members of the LLC, membership application's for MidCon Gas Services Corporation and Mc2. PJM requests an effective on the day after received by FERC.

Comment date: February 4, 1998, in accordance with Standard Paragraph E at the end of this notice.

15. Texas Utilities Electric Company

[Docket No. ER98–1202–000]

Take notice that on December 23, 1997, Texas Utilities Electric Company (TU Electric), tendered for filing certain unexecuted Transmission Service Agreements (TSA's), with customers receiving service from TU Electric pursuant to TU Electric's Tariff for Transmission Service To, From and Over Certain HVDC Interconnections (TFO Tariff).

By its October 15, 1997, Order in Docket No. ER97–3113–000, the Commission accepted the revised TFO Tariff for filing, with modifications, to become effective as of January 1, 1997. TU Electric requests an effective date for the TSA's that corresponds to the January 1, 1997, effective date of the revised TFO Tariff. Copies of the filing were served on customers receiving service under the TSA's, as well as the Public Utility Commission of Texas.

Comment date: February 4, 1998, in accordance with Standard Paragraph E at the end of this notice.

16. Public Service Company of New Mexico

[Docket No. ER98–1204–000]

Take notice that on December 24, 1997, Public Service Company of New Mexico (PNM), submitted for filing an executed service agreement, dated December 17, 1997, for firm point-to-point transmission service and ancillary service, between PNM Transmission Development and Contracts (Transmission Provider) and PNM International Business Development (Transmission Customer), under the terms of PNM's Open Access Transmission Service Tariff. This service agreement supersedes an existing service agreement between the Transmission Provider and the Transmission Customer which will expire by its own terms on December 31, 1997.

Under the Service Agreement, Transmission Provider provides to Transmission Customer reserved capacity from PNM's San Juan Generating Station 345 kV Switchyard (point of receipt) to PNM's Luna 345 kV Switching Station (point of Delivery) for the period beginning January 1, 1998 and ending December 31, 1998.

Comment date: February 4, 1998, in accordance with Standard Paragraph E at the end of this notice.

17. Central Illinois Light Company

[Docket No. ER98–1205–000]

Take notice that on December 24, 1997, Central Illinois Light Company (CILCO), 300 Liberty Street, Peoria, Illinois 61202, tendered for filing with the Commission a substitute Index of Customers under its Coordination Sales Tariff and two service agreements for two new customers, Tenaska Power Services Co., and Griffin Energy Marketing L.L.C.

CILCO requested an effective date of December 7, 1997.

Copies of the filing were served on the affected customers and the Illinois Commerce Commission.

Comment date: February 4, 1998, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding.

Any person wishing to become a party must file a motion to intervene. Copies of these filings are on file with the Commission and are available for public inspection.

David P. Boergers,

Acting Secretary.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–5955–7]

Agency Information Collection Activities: Submission for OMB Review; Comment Request; Hazardous Waste Combustors; Revised Standards; Final Rule—Part 1

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that the following new Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: Hazardous Waste Combustors; Revised Standards; Final Rule—Part 1, EPA No. 1840.01. The ICR describes the nature of the information collection and its expected burden and cost.

DATES: Comments must be submitted on or before February 27, 1998.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA by phone at (202) 260–2740, by email at farmer.sandy@epamail.epa.gov, or download off the Internet at http://www.epa.gov/icr and refer to EPA ICR No. 1840.01.

SUPPLEMENTARY INFORMATION:

Title: Hazardous Waste Combustors; Revised Standards; Final Rule—Part 1, EPA No. 1840.01. This is a new collection.

Abstract: On April 19, 1996, EPA proposed revised standards for hazardous waste combustors (HWCs) (61 FR 17358), defined as incinerators, cement kilns, and light-weight aggregate kilns that burn hazardous waste. These rules were proposed under joint authority of the Resource Conservation and Recovery (RCRA) and the Clean Air Act (CAA), as amended. The proposal fulfills the Agency's commitments to meet CAA requirements and also to upgrade the emission standards for hazardous waste burning facilities, as outlined in the 1994 Hazardous Waste Combustion Strategy.

In the rulemaking entitled "Hazardous Waste Combustors; Revised Standards; Final Rule—Part 1," EPA finalizes some of the requirements

VOL
63
ISS
18
JA
28
1998
UMI

contained in the earlier proposal. This ICR covers reporting and recordkeeping provisions of the new requirements. The changes to the RCRA regulations: (1) outline provisions for excluding generators of comparable/syngas fuel from the definition of solid waste under 40 CFR part 261; and (2) provide new RCRA permit modification provisions to make it easier for facilities to make changes to existing permits when adding air pollution equipment or making other changes in equipment or operation needed to comply with the upcoming air emission standards.

In addition to the RCRA changes, under the CAA the rule establishes 40 CFR part 63, subpart EEE, which applies to HWCs. As a first step in establishing national emission standards for hazardous air pollutants (NESHAPs) for HWCs (these standards were proposed on April 19, 1996 at 61 FR 17358), part 63, subpart EEE provides public notification and regulatory notification of intent to comply (NIC) provisions. These provisions require HWCs to submit materials to EPA outlining their plan to comply with the forthcoming NESHAP standards, which will be promulgated at a later date. These provisions also allow for extensions to the compliance period to promote the installation of cost effective pollution prevention technologies to replace or supplement emission control technologies for meeting the emission standards.

EPA is collecting the information for this rule to ensure adequate environmental protection. The information being collected is primarily for facilities to demonstrate to EPA that they meet the necessary criteria for regulatory exemptions. The information is necessary for EPA to ensure that the specified facilities are appropriately regulated, but that duplicate regulation is not taking place. EPA also requires the HWC notification procedures to ensure stakeholder involvement and to ensure that facilities are preparing to comply with the forthcoming NESHAPs for HWCs. Responses to this information collection are mandatory according to the Resource Conservation and Recovery Act.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The proposed rule was published on April 19, 1996 (61 FR 17358); and no comments were received on the information requirements.

Burden Statement: For those generators applying for the comparable/syngas fuel exemption, the average annual respondent reporting burden is estimated to be 0.5 hours per facility and the average annual recordkeeping burden is estimated to be 24.9 hours per facility. For burners of comparable/syngas fuels, there is no reporting burden and the annual recordkeeping burden is 3.3 hours per facility. For HWCs complying with the notification of intent to comply regulations, the average annual reporting burden (to EPA) is 60.4 hours per facility and the average annual recordkeeping burden is 9.0 hours per facility. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Hazardous waste combustors.

Estimated Number of Respondents: 315.

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 12,905 hours.

Estimated Total Annualized Cost Burden: $1,660,000.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 1840.01 in any correspondence.

Ms. Sandy Farmer, U.S. Environmental Protection Agency, OPPE Regulatory Information Division (2137), 401 M Street, SW, Washington, DC 20460

and

Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, NW, Washington, DC 20503

Dated: January 22, 1998.

Joseph Retzer,

Director, Regulatory Information Division.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–5954–9]

Agency Information Collection Activities: Submission for OMB Review; Comment Request; Clean Water Act State Revolving Fund Program

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: Clean Water Act State Revolving Fund Program, OMB Control Number 2040–0118, and expiration date of 02/28/98. The ICR describes the nature of the information collection and its expected burden and cost; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before February 27, 1998.

FOR FURTHER INFORMATION CONTACT: Contact Sandy Farmer at EPA by phone at (202) 260–2740, by email at farmer.sandy@epamail.epa.gov, or download off the Internet at http://www.epa.gov/icr and refer to EPA ICR No. 1391.04.

SUPPLEMENTARY INFORMATION:

Title: Clean Water Act State Revolving Fund Program; OMB Control No. 2040–0118; EPA ICR No. 1391.04; expiring on 02 /28/98. This is a request for an extension of a currently approved collection.

Abstract: The Clean Water Act, as amended by "The Water Quality Act of 1987" (U.S.C. 1381–1387 *et seq.*), created a Title VI which authorizes grants to States for the establishment of State Water Pollution Control Revolving Funds (SRFs). The information activities are pursuant to section 606 of the Act, and SRF Interim Final Rule (March 1990).

The 1987 Act declares that water pollution control revolving loan funds shall be administered by an instrumentality of the State subject to the requirements of the Act. This means that each State has a general

responsibility for administering its revolving fund and must take on certain specific responsibilities in carrying out its administrative duties. The information collection activities will occur primarily at the program level through the Capitalization Grant Application and Agreement / Intended Use Plan, Annual Report, State Audit, and Financial Assistance Application Review.

The State must prepare a Capitalization Grant Application and Agreement that includes an Intended Use Plan (IUP) outlining in detail how it will use the program funds. The agreement is an instrument by which the State commits to manage its revolving fund program.

The State must agree to complete and submit an Annual Report on the uses of the fund. The report will indicate how activities financed will contribute toward meeting the goals and objectives and provides information on loan recipients, loan amounts, loan terms and project categories of eligible costs.

The State will conduct or have conducted a financial audit of its CWSRF program. The audit report will contain an opinion on the financial statements of the CWSRF, a report on its internal controls, and a report on whether the compliance requirements have been met.

Since the States provide assistance to local applicants, the States will review completed loan applications and verify that proposed projects meet all applicable Federal and State requirements.

EPA will use the Capitalization Grant Agreement and Application / Intended Use Plan, Annual Report, and Annual Audit to conduct its oversight responsibilities as mandated by the CWA.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on 11/21/97 (FRL–5926–1); no comments were received.

Burden Statement: The annual public reporting and record keeping burden for this collection of information is estimated to average 1,915 hours per State response and 60 hours per local community response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Fifty states, Puerto Rico, and the recipients of assistance in these jurisdictions.

Estimated Number of Respondents: 1,530.

Frequency of Response: Annually.

Estimated Total Annual Hour Burden: 186,405 hours.

Estimated Total Annualized Cost Burden: $3,573,740.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 1391.04 and OMB Control No. 2040–0118 in any correspondence.

Ms. Sandy Farmer, U.S. Environmental Protection Agency, OPPE Regulatory Information Division (2137), 401 M Street, SW, Washington, DC 20460.

and

Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, NW, Washington, DC 20503.

Dated: January 22, 1998.

Joseph Retzer,

Director, Regulatory Information Division.

Clean Air Advisory Committee Notice of Meeting

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) established the Clean Air Act Advisory Committee (CAAAC) on November 19, 1990 to provide independent advice and counsel to EPA on policy issues associated with implementation of the Clean Air Act of 1990. The Committee advises on economic, environmental, technical, scientific, and enforcement policy issues.

OPEN MEETING POLICY: Pursuant to 5 U.S.C. App. 2 section 10(a)(2), notice is hereby given that the Clean Air Act Advisory Committee will hold its next open meeting on Wednesday, February 18, 1998, from 8:30 a.m., to 3:00 p.m. at Omni Shoreham Hotel, 2500 Calvert Street, N.W., Washington, D.C. Seating will be available on a first come, first served basis. Four Subcommittees will conduct meeting on Tuesday, February 17, 1998, at the same hotel at approximately the following time periods: (1) The Energy, Clean Air and Climate Change Subcommittee from 10:00 a.m. to 2:00 p.m.; (2) the Linking Transportation, Land Use and Air Quality Concerns Subcommittee from 1:00 p.m. to 5:00 p.m.; (3) the Permits/NSR/Toxics Subcommittee from 5:00 p.m. to 9:00 p.m.; and (4) the Economic Incentives and Regulatory Innovations Subcommittee from 5:00 p.m. to 9:00 p.m.

INSPECTION OF COMMITTEE DOCUMENTS: The Committee agenda and any documents prepared for the meeting will be publicly available at the meeting. Therefore, these documents, together with CAAAC meeting minutes, will be available by contacting Committee DFO Paul Rasmussen at (202) 260–6877.

FOR FURTHER INFORMATION: Concerning this meeting of the CAAAC, please contact Paul Rasmussen, Office of Air and Radiation, US EPA (202) 260–6877, Fax (202) 260–4185 or by mail at US EPA, Office of Air and Radiation (Mail Code 6102), Washington, D.C. 20460. If you would like to receive an agenda for the CAAAC meeting, please leave your fax number on Mr. Rasmussen's voice mail and it will be forwarded to you.

Dated: January 22, 1998.

Robert D. Brenner,

Acting Assistant Administrator For Air and Radiation.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–5955–6]

Public Stakeholders Meeting on the Process for Implementing the Guidelines for Carcinogen Risk Assessment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of meeting.

SUMMARY: This document announces a stakeholders meeting sponsored by the Environmental Protection Agency's (EPA's) Science Policy Council. EPA is presenting a process for reassessing cancer assessments as part of EPA's initiative for implementing the Guidelines for Carcinogen Risk Assessment. The Guidelines were proposed in 1996. EPA also proposed an implementation process for reassessing cancer assessments in 1996 and is revising the process based on public comments. EPA is now seeking additional public comment and input on its current implementation process. The implementation process will be finalized at the same time as the Guidelines for Carcinogen Risk Assessment. The agenda will include opportunities for short stakeholder presentations, as well as structured, informal discussion based on the issues.

DATES: The meeting will begin on Tuesday, February 24, 1998, at 8:30 a.m. and end on Wednesday, February 25, 1998, at approximately 12 noon. Members of the public are invited to attend.

ADDRESSES: The meeting will be held at the Sheraton Crystal City Hotel at 18th and Eads Streets in Arlington, VA.

Resolve, Inc., an EPA contractor, has sub-contracted to The Mediation Institute, the logistical support and facilitation for the meeting. EPA urges participants to pre-register with Alana Knaster or Janet Pittman, The Mediation Institute, 4508 Park Cordero, Calabasas, CA 91302, Tel: 818/591–9526, FAX: 818/591–0980 as soon as possible. Space is limited. Registrants will receive an information packet containing the draft meeting agenda, and a discussion document outlining EPA's position on several major issues, along with other meeting information.

PRESENTATIONS: Members of the public who are interested in making a short presentation on a particular issue at the stakeholder meeting are requested to sign up for one of the topic areas at the time of their registration. EPA would appreciate receiving a short summary of the presentation, which should be no more than one page. Presentations are limited to 5 minutes. Because EPA is seeking a variety of opinions, the facilitator will ensure that there is a balance of viewpoints.

SUBMITTING COMMENTS: To ensure that stakeholders who are unable to attend the meeting may present their views, EPA will also accept short written comments on the implementation process until March 27, 1998. Comments should be submitted to: Alana Knaster, same address and phone numbers as above.

Please note that all comments responding to this notice will be placed in a public administrative record. For that reason, commentors should not submit personal information such as medical data or home addresses, confidential business information or information protected by copyright. Due to limited time and resources, acknowledgments will not be sent.

FOR FURTHER INFORMATION CONTACT: For technical inquiries, as well as questions about the meeting, please contact Alana Knaster, same address and phone numbers as above. The main discussion document containing the implementation process can be obtained from the EPA World Wide Web site at http://www.epa.gov/ncea/riskassf.htm.

SUPPLEMENTARY INFORMATION: EPA is presenting a process for implementing the Guidelines for Carcinogen Risk Assessment for reassessing cancer assessments. The Guidelines were developed under the auspices of the EPA's Risk Assessment Forum (RAF) and proposed in 1996 (61 FR 17960). EPA also proposed an implementation process for reassessing cancer assessments in 1996 (61 FR 32799) and is revising the process based on public comments. The implementation process will be finalized at the same time as the Guidelines for Carcinogen Risk Assessment.

It is expected that once the Guidelines become final, existing cancer assessments will need reassessment based upon the revised Guidelines. The implementation process will help the EPA and the public select and prioritize the chemicals that would need a reassessment. It will also allow a selection of new assessments to be incorporated in the schedule for the reassessments.

The four main issues for which EPA specifically seeks public opinion include: (1) The implementation process, including opportunities for public input, (2) the criteria for selection of chemicals for reassessment, (3) whether small changes can be made in toxicity assessments without completely reassessing all toxicity information, and (4) the form of external review for identification and prioritization of chemicals.

Following this meeting, EPA will use the comments to finalize the implementation process for cancer reassessments once the Guidelines for Carcinogen Risk Assessment are final.

Dated: January 22, 1998.

Dorothy E. Patton,

Director, Office of Science Policy.

ENVIRONMENTAL PROTECTION AGENCY

[PF–787; FRL–5763–6]

Notice of Filing of Pesticide Petitions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the initial filing of pesticide petitions proposing the establishment of regulations for residues of certain pesticide chemicals in or on various food commodities.

DATES: Comments, identified by the docket control number PF–787, must be received on or before February 27, 1998.

ADDRESSES: By mail submit written comments to: Public Information and Records Integrity Branch, Information Resources and Services Division (7502C), Office of Pesticides Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person bring comments to: Rm. 1132, CM #2, 1921 Jefferson Davis Highway, Arlington, VA.

Comments and data may also be submitted electronically to: opp-docket@epamail.epa.gov. Follow the instructions under "SUPPLEMENTARY INFORMATION." No confidential business information should be submitted through e-mail.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). CBI should not be submitted through e-mail. Information marked as CBI will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 1132 at the address given above, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: The product manager listed in the table below:

Product Manager	Office location/telephone number	Address
Amelia M. Acierto	Rm. 4W60, 4th. floor, CSI #2, 703–308–8377, e-mail:acierto.amelia@epamail.epa.gov.	2800 Crystal Drive, Arlington, VA
Adam Heyward	Rm. 206, CM #2, 703–305–5518, e-mail: heyward. adam@epamail.epa.gov.	1921 Jefferson Davis Hwy., Arlington, VA
Joseph Tavano	Rm. 214, CM #2, 703–305–6411, e-mail: tavano.joseph@epamail.epa.gov.	Do.

SUPPLEMENTARY INFORMATION: EPA has received pesticide petitions as follows proposing the establishment and/or amendment of regulations for residues of certain pesticide chemicals in or on various food commodities under section 408 of the Federal Food, Drug, and Comestic Act (FFDCA), 21 U.S.C. 346a. EPA has determined that these petitions contain data or information regarding the elements set forth in section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data supports granting of the petition. Additional data may be needed before EPA rules on the petition.

The official record for this notice of filing, as well as the public version, has been established for this notice of filing under docket control number [PF–787] (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The official record is located at the address in "ADDRESSES" at the beginning of this document.

Electronic comments can be sent directly to EPA at:

opp-docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comment and data will also be accepted on disks in Wordperfect 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number [PF–787] and appropriate petition number. Electronic comments on notice may be filed online at many Federal Depository Libraries.

List of Subjects

Environmental protection, Agricultural commodities, Feed additives, Food additives, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: January 20, 1998

James Jones,

Acting Director, Registration Division, Office of Pesticide Programs.

Summaries of Petitions

Petitioner summaries of the pesticide petitions are printed below as required by section 408(d)(3) of the FFDCA. The summaries of the petitions were prepared by the petitioners and represent the views of the petitioners. EPA is publishing the petition summaries verbatim without editing them in any way. The petition summary announces the availability of a description of the analytical methods available to EPA for the detection and measurement of the pesticide chemical residues or an explanation of why no such method is needed.

1. Gowan Company

PP 6F4738

In May, 1996, EPA received a pesticide petition (PP 6F4738) from Gowan Company, P. O. Box 5569, Yuma, AZ 85366-5569. The petition proposed, pursuant to section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a(d), to amend 40 CFR part 180 to establish tolerances for the acaricide hexythiazox and its metabolites in or on the raw agricultural commodities stone fruits (except plums) at 1 part per million (ppm), almonds at 0.2 ppm and almond hulls at 10 ppm, and also in milk, cattle meat and cattle fat at 0.05 ppm, and cattle meat byproducts at 0.1 ppm (April 30, 1997, 62 FR 23455-23457) (FRL-5600-8). In April 1997, the registrant amended the tolerance petition by proposing to establish a tolerance for stone fruits including plums at 1 ppm, a tolerance for prunes at 5 ppm, and a tolerance for all tree nuts at 0.2 ppm. The proposed tolerances for animal products were unchanged. EPA has determined that the petition contains data or information regarding the elements set forth in section 408(d)(2) of the FFDCA; however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the petition. Additional data may be needed before EPA rules on the petition. The proposed analytical method is high performance liquid chromatography with an ultraviolet detector. As required by section 408(d) of the FFDCA, as recently amended by the Food Quality Protection Act (FQPA) Pub. L. 104-170, Gowan Company included in the petition a summary of the petition and authorization for the summary to be published in the Federal Register in a notice of receipt of the petition.

A. Residue Chemistry

1. *Plant metabolism.* The metabolism of hexythiazox in apples, citrus, grapes and pears has been studied. The major portion of the residue is parent compound. The metabolites are hydroxycyclohexyl and ketocyclohexyl analogs of hexythiazox and the amide formed by loss of the cyclohexyl ring.

2. *Analytical method.* An adequate analytical method (HPLC with UV detection) is available for enforcement purposes. Parent compound and all of its metabolites are converted to a common moiety before analysis.

3. *Magnitude of residues.* Twenty-four stone fruit residue trials were conducted over 3–years. The geographic distribution of the trials agrees with the recommendation given in the "EPA Residue Chemistry Guidance"(1994). In these trials, the maximum combined residues of hexythiazox and its metabolites were 0.52 ppm. Twelve tree nut residue trials were conducted over 4 years. In these trials, the maximum combined residues of hexythiazox and its metabolites were 0.17 ppm in almond nutmeat and 7.5 ppm in the raw agricultural commodity almond hulls.

B. Toxicological Profile

1. *Acute toxicity.* The acute oral and dermal LD_{50} of technical hexythiazox is greater than 5,000 milligram/kilograms (mg/kg), and the 4-hour acute inhalation LC_{50} is greater than 2 mg/L. It is not a dermal irritant or sensitizer and is a mild eye irritant.

2. *Genotoxicity.* The following genotoxicity tests were all negative:

VOL 63 ISS 18 JA 28 1998 UMI

Ames gene mutation, CHO gene mutation, CHO chromosome aberration, mouse micronucleus and rat hepatocyte unscheduled DNA synthesis.

3. *Reproductive and developmental toxicity.* Hexythiazox has not been observed to induce developmental or reproductive effects. The lowest reproductive or developmental no-observed-effect-level (NOEL) observed was 200 milligram/kilograms/day (mg/kg/day), the highest dose tested, in a 2-generation rat reproduction study.

4. *Subchronic toxicity.* The Office of Pesticide Programs has established the RfD for hexythiazox at 0.025 mg/kg/day. The RfD for hexythiazox is based on a 1–year dog feeding study with a NOEL of 2.5 mg/kg/day and an uncertainty factor of 100. The endpoint effect of concern was hypertrophy of the adrenal cortex in both sexes, decreased red blood cell counts, hemoglobin content and hematocrit in males.

5. *Chronic toxicity.* The Agency has classified hexythiazox as a category C (possible human) carcinogen based on an increased incidence of hepatocellular carcinomas ($p = 0.028$) and combined adenomas/carcinomas ($p = 0.024$) in female mice at the highest dose tested (1,500 ppm) when compared to the controls as well as a significantly increased ($p > 0.001$) incidence of pre-neoplastic hepatic nodules in both males and females at the highest dose tested. The decision supporting a category C classification was based primarily on the fact that only one species was affected and mutagenicity studies were negative. In classifying hexythiazox as a category C carcinogen, the Agency concluded that a quantitative estimate of the carcinogenic potential for humans should be calculated because of the increased incidence of liver tumors in the female mouse. A Q^{1*} of 0.039 $(mg/kg/day)^{-1}$ in human equivalents was calculated.

C. Aggregate Exposure

Tolerances have been established (40 CFR 180.448) for the combined residues of hexythiazox [trans-5-(4-chlorophenyl)-N-cyclohexyl-4-methyl-2-oxothiazolidine-3-carboxamide] and its metabolites containing the (4-chlorophenyl)-4-methyl-2-oxo-3-thiazolidine moiety in or on apples at 0.02 ppm and pears at 0.3 ppm. The nature and metabolism of hexythiazox in plants and animals is adequately understood.

Hexythiazox is also registered for use on outdoor ornamental plants by commercial applicators only. It is believed that non-occupational exposure from this use is very low. Hexythiazox is not registered for greenhouse, lawn, garden, or residential use. The environmental fate of hexythiazox has been evaluated, and the compound is not expected to contaminate groundwater or surface water to any measurable extent.

1. *Dietary exposure.* The Agency has calculated in the **Federal Register** of February 21, 1996 (61 FR 6152-6154) (FRL-5350-6), that current uses on apples and pears would result in an exposure of 0.000051 mg/kg/day for the U.S. population, assuming that all residues are at tolerance levels and 100% of the crops are treated. Non-nursing infants, the subgroup having the highest exposure, would have an exposure of 0.000600 mg/kg/day. Using the same conservative assumptions, it is calculated that the current and proposed uses together would result in an exposure of 0.001133 mg/kg for the U.S. population and 0.007256 mg/kg/day for non-nursing infants, which remains the most highly exposed subgroup.

Actual exposure will be much lower, however. Only a small fraction of these crops will be treated with hexythiazox, and average residues are far below the tolerance levels. For example, residues in apples treated at 10 times the currently approved application rate remained below the limit of quantitation, 0.01 ppm. Also, residues in apple juice are expected to be less than 50% of the residue level in the whole fruit. Average residues in stone fruits except cherries are expected to be 7% of the proposed tolerance level, average residues in cherries are expected to be 11% of the tolerance level and average residues in almond nutmeat are expected to be below 20% of the proposed tolerance level. Furthermore, only a very small percentage of crops (less than 1% up to 5%, depending on the crop) are expected to be treated with hexythiazox. When actual residues rather than tolerance levels and the percentage of treated crop are taken into account, then the actual exposure is estimated to be 0.0000069 mg/kg/day for the U.S. population.

2. *Drinking water.* The Agency has not conducted a detailed analysis of potential exposure to hexythiazox via drinking water or outdoor ornamental plants. However, it is believed that chronic exposure from these sources is very small.

3. *Non-dietary exposure.* No developmental, reproductive or mutagenic effects have been observed with hexythiazox. Therefore, an analysis of acute exposure has not been conducted.

D. Cumulative Effects

At this time the Agency has not reviewed available information concerning the potentially cumulative effects of hexythiazox and other substances that may have a common mechanism of toxicity. For purposes of this petition only, the Agency is considering only the potential risks of hexythiazox in its aggregate exposure.

E. Determination of Safety for U.S. Population

1. *Chronic risk.* The Agency has calculated (FR 61 6152-6154), assuming that residues are at tolerance levels and 100% of crops are treated, that the current use on apples and pears utilizes 0.2% of the reference dose (RfD) for the U.S. population and 2.4% of the RfD for non-nursing infants. Using these same assumptions, it is calculated that all current and proposed uses would result in TMRCs equivalent to 4.5% of the RfD for the U.S. population and 29.0% of the RfD for non-nursing infants. However, when actual residues rather than tolerance levels and the percent of crop treated are taken into account, actual chronic risk for the U.S. population is expected to be only 0.43% of the RfD.

The actual dietary carcinogenic risk to the U.S. population is calculated to be 2.7×10^{-7}, which is below the Agency's criterion of 1×10^{-6}.

2. *Acute risk.* An estimate of acute risk with this compound has not been conducted since no acute reproductive or developmental effects have been observed.

F. Determination of Safety for Infants and Children

In assessing the potential for additional sensitivity of infants and children to residues of hexythiazox, EPA considered data from developmental toxicity studies in the rat and rabbit and a 2-generation study in the rat. The developmental toxicity studies are designed to evaluate adverse effects on the developing organism resulting from pesticide exposure during pre-natal development to one or both parents. Reproduction studies provide information relating to effects from exposure to the pesticide on the reproductive capability of mating animals and data on systemic toxicity.

No developmental or reproductive effects have been observed in any study with hexythiazox. The lowest acute NOEL was 2,400 ppm in the diet (200 mg/kg/day), the highest dose tested, in the 2-generation rat reproduction study. In the rat developmental study, the maternal and fetotoxic NOEL was 240 mg/kg/day and the developmental NOEL was 2,160 mg/kg/day, the highest dose tested. In the rabbit developmental study, the maternal and developmental NOEL was 1,080 mg/kg/day, the highest dose tested.

Taking into account current toxicological data requirements, the database for hexythiazox relative to pre-natal and post-natal effects is complete. In the rat developmental study, the NOELs for maternal toxicity and fetotoxicity were the same, which suggests that there is no special pre-natal sensitivity in the absence of maternal toxicity. Furthermore, the lowest developmental or reproductive NOEL is two orders of magnitude higher than the chronic NOEL on which the RfD is based. It is concluded that there is a reasonable certainty of no harm to infants and children from aggregate exposure to hexythiazox residues.

G. International Tolerances

Codex maximum residue levels (MRLs) of 1 mg/kg (1 ppm) have been established for residues of hexythiazox in cherries and peaches. The U.S. tolerance proposal for stone fruits is in harmony with these MRLs. There are no Codex MRLs for the other commodities in this petition. There are no Canadian or Mexican MRLs for hexythiazox. (Adam Heyward)

2. Monsanto Company

PP 5E4503

EPA has received a pesticide petition (PP 5E4503) from Monsanto Company, 700 14th St., NW., Washington, DC 20005, proposing pursuant to section 408(d) of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 346a(d), to amend 40 CFR part 180 by establishing a tolerance for residues of the inert ingredient 4-(dichloroacetyl)-1-oxa-4-azospiro [4.5] decane (MON 4660) in or on the raw agricultural commodity, corn, resulting from early post-emergence applications. The analytical method, which determines the residue by gas-liquid chromatography using an electron-capture detector has been reviewed by the Agency and accepted for enforcement purposes. EPA has determined that the petition contains data or information regarding the elements set forth in section 408(d)(2) of the FFDCA; however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data supports granting of the petition.

A. Residue Chemistry

1. *Plant metabolism.* The metabolism of MON 4660 in corn was studied with radiolabeled MON 4660 in the greenhouse and the field. Parent MON 4660 was not found in any of the corn samples. MON 4660 is rapidly and extensively metabolized to a large number of highly polar metabolites characterized as weak organic acids or residues conjugated to natural sugars.

2. *Analytical method.* Monsanto has developed an analytical method using gas liquid chromatography with electron capture detection that has a verified limit of quantitation of 0.005 ppm for parent MON 4660 in all corn matrices. This method has been validated by the Agency.

3. *Magnitude of residues.* Monsanto has conducted 14 residue field studies with MON 4660 applied pre-emergence to corn. Analysis of corn forage, silage, fodder and grain showed no residues above the limit of quantitiation of 0.005 ppm. Two residue field studies with MON 4660 applied pre-emergence to corn at rates 20 and 28 times the proposed maximum use rate showed no measurable residues (<0.005 ppm) in corn grain. Based on these results it was concluded that the potential for measurable concentration of MON 4660 in processed commodities of corn was very low. Eight residue field trials (2 samples per trial) were conducted with MON 4660 applied early post-emergence with corn plants 6 to 11 inches tall. Analysis of corn forage, fodder and grain again showed no measurable residues (<0.005 ppm). These residues, derived from postemergence applications are below the established Sensitivity of Method Tolerance for corn (0.005 ppm).

B. Toxicological Profile

The toxicology data considered in support of the revised tolerance include the following:

1. *Acute toxicity*— i. An acute oral toxicity study in the rat with an LD_{50} of 2,600 mg/kg. Toxicity Category III.

ii. An acute dermal toxicity study in the rabbit with an LD_{50} of > 5,000 mg/kg. Toxicity Category IV.

iii. An acute inhalation study in the rat with a 4-hour inhalation LC_{50} of 0.27 mg/L. Toxicity Category III.

iv. A rabbit eye irritation study in which 4-(dichloroacetyl)-1-oxa-4-azospiro [4.5] decane is determined not to be an eye irritant. Toxicity Category III.

v. A dermal irritation study which exhibited slight skin irritation. Toxicity Category IV.

vi. A guinea pig dermal sensitization study in which 4-(dichloroacetyl)-1-oxa-4-azospiro [4.5] decane is determined to be a skin sensitizer.

2. *Genotoxicity.* Mutagenicity studies including *Salmonella typhimurium*/mammalian plate incorporation (Ames) assay, CHO/HGPRT gene mutation assay, DNA repair studies (rat hepatocytes), and *Salmonella*/mammalian activation gene mutation (Ames) assay were negative with and without activation.

3. *Reproductive and developmental toxicity*— i. A rat developmental effects study with a NOEL for maternal toxicity of 10 mg/kg/day and developmental toxicity of 75 mg/kg/day.

ii. A rabbit developmental effects study with a NOEL for maternal toxicity of 10 mg/kg/day and developmental toxicity of 30 mg/kg/day.

iii. A 2-generation reproduction study in the rat fed diet levels of 0, 10, 100, and 1,000 ppm. There were no treatment-related effects on mating, fertility or offspring survival in this study. The NOEL for toxicity in parental animals and offspring was 100 ppm (6 to 7 mg/kg/day). As there were no adverse effects on reproductive performance, the NOEL for reproductive toxicity was 1,000 ppm (57 to 72 mg/kg/day).

4. *Subchronic toxicity*— i. A 90–day oral toxicity study in the rat with a NOEL of 120 parts per million (ppm) or 12 mg/kg/day.

ii. A 90-day oral (gavage) study in the dog with a NOEL of 30 mg/kg/day, the highest dose tested.

5. *Chronic toxicity*— i. A mouse oncogenicity study in which 5 groups of 60 male and 60 female CD-1 mice were administered diets containing 4-(dichloroacetyl)-1-oxa-4-azospiro [4.5] decane at concentrations 0, 5, 80, 800 or 2,500 ppm for approximately 18 months. These concentrations corresponded to 0, 0.7, 10.7, 108 and 350 mg/kg/day in males and 0, 1, 16.8, 167 and 556 mg/kg/day in females. The primary target organs were liver, lung and stomach. The NOEL for both oncogenic and non-oncogenic effects was considered to be 10.7 mg/kg/day in males and 116.8 mg/kg/day in females.

ii. A chronic toxicity/oncogenicity study in rats in which 5 groups of 60 male and 60 female rats were administered diets containing 4-(dichloroacetyl)-1-oxa-4-azospiro [4.5] decane for approximately 23 months. Target concentrations were 0, 5, 50, 500, or 1,600 ppm for males and, 0, 5, 50, or 1,200 ppm for females. These concentrations correspond to 0, 0.2, 2.2, 22 and 71 mg/kg/day in males and 0, 0.3, 2.8, 29 and 69 mg/kg/day in females. The primary effects in this study occurred in the liver and stomach. The NOEL for oncogenic effects is 22 mg/kg/day in males and 29 mg/kg/day in females. The NOEL for non-

VOL

1998
UMI

oncogenic effects is 2.2 mg/kg/day in males and 2.8 mg/kg/day in females.

6. *Animal metabolism.* Because field trial residue data showed non-detectable residues of MON 4660 in corn, neither animal metabolism nor residue transfer studies with livestock were required. It is considered likely that metabolism will be similar to that of other dichloroacetamide safeners in mammals which are characterized by extensive metabolism and elimination of most of the residue from the body with very low levels of parent safener, if any, retained in the tissues. The major route of metabolism is typically glutathione conjugation followed by formation of an aldehyde intermediate which is then either oxidized to an oxamic acid or reduced to the corresponding alcohol.

7. *Metabolite toxicology.* The metabolism of MON 4660 is extensive and results in a large number of polar metabolites each of which is present in soil or corn plants in very low concentrations. These metabolites have not been identified as being of toxic concern.

Based on the available toxicity data, Monsanto believes the RfD for MON 4660 will be 0.02 mg/kg/day based on a 2–year feeding study in rats with a NOEL of 2.2 mg/kg/day and application of an uncertainty factor of 100. For cancer risk assessment for MON 4660, Monsanto believes that margin of exposure assessment should be calculated using the carcinogenic NOEL of 10.7 mg/kg/day observed in the mouse, which was the most sensitive species.

C. Aggregate Exposure

1. *Dietary exposure*— i. *Food.* Monsanto has used the Theoretical Maximum Residue Contribution as a conservative estimate of the potential dietary exposure for MON 4660. This approach assumes that 100% of all raw agricultural commodities for which tolerances have been established for acetochlor, bear tolerance-level (0.005 ppm) residues of MON 4660. This over-estimate of actual dietary exposure provides a quite conservative basis for risk assessment.

ii. *Drinking water.* Although MON 4660 is stable to hydrolyis and shows only a small amount of photodegradation in soil and in water, it is rapidly degraded in the soil. The aerobic soil half-life is approximately 18 days. This low persistence in the environment combined with the low application rate (maximum of 0.4 pound per acre) indicates that MON 4660 is not likely to be present in groundwater. Based on these considerations, Monsanto does not anticipate exposure to residues of MON 4660 in drinking water. The EPA has not established a Maximum Concentration Level or a health advisory level for residues of MON 4660 in drinking water.

2. *Non-dietary exposure.* MON 4660 is used only as a safener or antidote to the effects of acetochlor herbicide on corn seed or seedlings. It is sold only as part of acetochlor herbicide end-use products which are classified as Restricted Use by EPA which means they are used only by certified applicators and are not available to the general public. Herbicide products containing MON 4660 are not registered for residential, home owner, or other non-crop uses. They are thus not used in parks, school grounds, public buildings, roadsides or rights-of-way or other public areas. Commercial cornfields are generally located well away from public areas where incidental contact could occur. Therefore, the general public is very unlikely to have any non-dietary exposure to MON 4660.

D. Cumulative Effects

Monsanto has no reliable data or information to suggest that MON 4660 has toxic effects that arise from toxic mechanisms that are common to other substances. Therefore, a consideration of common toxic mechanism and cumulative effects with other substances is not appropriate for MON 4660, and Monsanto is considering only the potential effects of MON 4660 in this exposure assessment.

E. Safety Determination

1. *U.S. population*— i. *Chronic risk.* The conservative estimate of aggregate chronic exposure is 2.0 x 10^{-6} mg/kg/day. This potential exposure represents only 0.01% of the RfD of 0.02 mg/kg/day and provides a Margin of Exposure of 5,350,000 when compared to the 10.7 mg/kg/day carcinogenic reference point. EPA generally has no concern for exposures below 100% of the RfD and there are adequate margins of safety for cancer. Monsanto concludes there is a reasonable certainty of no harm resulting from exposure to MON 4660.

ii. *Acute risk.* The acute toxicity of MON 4660 is low, and there are no concerns for acute dietary, occupational or non-occupational exposures to MON 4660.

2. *Infants and children.* Employing the same conservative TMRC estimates of exposure used in the risk assessment for the general population, Monsanto has calculated that the aggregate exposures for nursing infants, non-nursing infants, children age 1–6 and children age 7–12 are less than one-tenth of 1% of the RfD for each group.

Monsanto notes the developmental toxicity NOELs for rats (75 mg/kg/day) and rabbits (30 mg/kg/day) are 34-fold and 14-fold higher than the NOEL of 2.2 mg/kg/day in the chronic rat study on which the RfD is based. This indicates that the RfD is adequate for assessing risk to children. Also, the developmental toxicity NOELs for rats and rabbits are higher than the NOELs for maternal toxicity (10 mg/kg/day in each specie) indicating that the offspring were no more sensitive to MON 4660 than were the parents.

In the 2-generation reproduction study in rats, the NOEL for pup toxicity (57-72 mg/kg/day) was higher than the NOEL for parental or systemic effects (6-7 mg/kg/day) indicating that offspring were no more sensitive to MON 4660 than were the parents. Also, the NOEL for pup toxicity (57-72 mg/kg/day) was 25 to 33-fold higher than the NOEL for chronic toxicity upon which the RfD is based.

Monsanto believes that these data do not indicate an increased pre-natal or post-natal sensitivity of children and infants to MON 4660 exposure and concludes that the 100-fold uncertainty factor used in the RfD is adequate to protect infants and children.

F. International Tolerances

The Codex Alimentarius Commission has not established a maximum residue level for MON 4660. (Amelia Acierto)

3. Rohm and Haas Company

PP 5F4587

EPA has received a pesticide petition (PP 5F4587) from Rohm and Haas Company, 100 Independence Mall West, Philadelphia, PA 19106-2399, proposing pursuant to section 408(d) of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 346a(d), to amend 40 CFR part 180 by establishing a tolerance for residues of Tebufenozide, benzoic acid,3,5-dimethyl-,1-(1,1-dimethylethyl)-2-(4-ethylbenzoyl) hydrazide in or on the raw agricultural commodity pecans at .05 parts per million (ppm). EPA has determined that the petition contains data or information regarding the elements set forth in section 408(d)(2) of the FFDCA; however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data supports granting of the petition. Additional data may be needed before EPA rules on the petition.

A. Residue Chemistry

1. *Plant metabolism.* The metabolism of tebufenozide in plants (apples, beets, grapes, rice and sugar) is adequately understood for the purposes of these tolerances. The metabolism of tebufenozide in all crops was similar and involves oxidation of the alkyl substituents of the aromatic rings primarily at the benzylic positions. The extent of metabolism and degree of oxidation are a function of time from application to harvest. In all crops, parent compound comprised the majority of the total dosage. None of the metabolites were in excess of 10% of the total dosage. The metabolism of tebufenozide in goats and hens proceeds along the same metabolic pathway as observed in plants. No accumulation of residues in tissues, milk or eggs occurred.

2. *Analytical method.* High performance liquid chromatographic (HPLC) analytical method using ultraviolet (UV) or mass selective detection has been developed for pecans. The method involves Soxhlet extraction with solvents, purification of the extracts by liquid-liquid partitions and final purification of the residues using solid phase extraction column chromatography. The limit of quantitation of the method is 0.01 ppm (HPLC) analytical method using (UV) or mass selective detection has been developed for pecans. The method involves Soxhlet extraction with solvents, purification of the extracts by liquid-liquid partitions and final purification of the residues using solid phase extraction column chromatography. The limit of quantitation of the method is 0.01 ppm.

B. Toxicological Profile

1. *Acute toxicity.* Tebufenozide has low acute toxicity. Tebufenozide Technical was practically non-toxic by ingestion of a single oral dose in rats and mice (LD_{50} > 5,000 mg/kg) and was practically non-toxic by dermal application (LD_{50} > 5,000 mg/kg). Tebufenozide Technical was not significantly toxic to rats after a 4-hr inhalation exposure with an LC_{50} value of 4.5 mg/L (highest attainable concentration), is not considered to be a primary eye irritant or a skin irritant and is not a dermal sensitizer. An acute neurotoxicity study in rats did not produce any neurotoxic or neuropathologic effects.

2. *Genotoxicity.* Tebufenozide technical was negative (non-mutagenic) in an Ames assay with and without hepatic enzyme activation and in a reverse mutation assay with E. *coli.* Tebufenozide technical was negative in a hypoxanthine guanine phophoribosyl transferase (HGPRT) gene mutation assay using Chinese hamster ovary (CHO) cells in culture when tested with and without hepatic enzyme activation. In isolated rat hepatocytes, tebufenozide technical did not induce unscheduled DNA synthesis (UDS) or repair when tested up to the maximum soluble concentration in culture medium. Tebufenozide did not produce chromosome effects *in vivo* using rat bone marrow cells or *in vitro* using Chinese hamster ovary cells (CHO). On the basis of the results from this battery of tests, it is concluded that tebufenozide is not mutagenic or genotoxic.

3. *Reproductive and developmental toxicity*— i. No Observable Effect Levels (NOELs) for developmental and maternal toxicity to tebufenozide were established at 1,000 mg/kg/day (Highest Dose Tested) in both the rat and rabbit. No signs of developmental toxicity were exhibited.

ii. In a 2–generation reproduction study in the rat, the reproductive/developmental toxicity NOEL of 12.1 mg/kg/day was 14-fold higher than the parental (systemic) toxicity NOEL 10 ppm 0.85 mg/kg/day. Equivocal reproductive effects were observed only at the 2,000 ppm dose.

iii. In a second rat reproduction study, the equivocal reproductive effects were not observed at 2,000 ppm (the NOEL equal to 149-195 mg/kg/day) and the NOEL for systemic toxicity was determined to be 25 ppm (1.9-2.3 mg/kg/day).

4. *Subchronic toxicity*— i. The NOEL in a 90–day rat feeding study was 200 ppm (13 mg/kg/day for males, 16 mg/kg/day for females). The Lowest Observed Effect Level (LOEL) was 2,000 ppm (133 mg/kg/day for males, 155 mg/kg/day for females). Decreased body weights in males and females was observed at the LOEL of 2,000 ppm. As part of this study, the potential for tebufenozide to produce subchronic neurotoxicity was investigated. Tebufenozide did not produce neurotoxic or neuropathologic effects when administered in the diets of rats for 3 months at concentrations up to and including the limit dose of 20,000 ppm (NOEL = 1,330 mg/kg/day for males, 1,650 mg/kg/day for females).

ii. In a 90–day feeding study with mice, the NOEL was 20 ppm (3.4 and 4.0 mg/kg/day for males and females, respectively). The LOEL was 200 ppm (35.3 and 44.7 mg/kg/day for males and females, respectively). Decreases in body weight gain were noted in male mice at the LOEL of 200 ppm.

iii. A 90–day dog feeding study gave a NOEL of 50 ppm (2.1 mg/kg/day for males and females). The LOEL was 500 ppm (20.1 and 21.4 mg/kg/day for males and females, respectively). At the LOEL, females exhibited a decrease in rate of weight gain and males presented an increased reticulocyte.

iv. A 10-week study was conducted in the dog to examine the reversibility of the effects on hematological parameters that were observed in other dietary studies with the dog. Tebufenozide was administered for 6 weeks in the diet to 4 male dogs at concentrations of either 0 or 1,500 ppm. After the 6th week, the dogs receiving treated feed were switched to the control diet for 4 weeks. Hematological parameters were measured in both groups prior to treatment, at the end of the 6–week treatment, after 2–weeks of recovery on the control diet and after 4–weeks of recovery on the control diet. All hematological parameters in the treated/recovery group were returned to control levels indicating that the effects of tebufenozide on the hemopoietic system are reversible in the dog.

v. In a 28-day dermal toxicity study in the rat, the NOEL was 1,000 mg/kg/day, the highest dose tested. Tebufenozide did not produce toxicity in the rat when administered dermally for 4–weeks at doses up to and including the limit dose of 1,000 mg/kg/day.

5. *Chronic toxicity*— i. A 1–year feeding study in dogs resulted in decreased red blood cells, hematocrit, and hemoglobin and increased Heinz bodies, reticulocytes, and platelets at the LOEL of 8.7 mg/kg/day. The NOEL in this study was 1.8 mg/kg/day.

ii. An 18-month mouse carcinogenicity study showed no signs of carcinogenicity at dosage levels up to and including 1,000 ppm, the highest dose tested.

iii. In a combined rat chronic/oncogenicity study, the NOEL for chronic toxicity was 100 ppm (4.8 and 6.1 mg/kg/day for males and females, respectively) and the LOEL was 1,000 ppm (48 and 61 mg/kg/day for males and females, respectively). No carcinogenicity was observed at the dosage levels up to 2,000 ppm (97 mg/kg/day and 125 mg/kg/day for males and females, respectively).

6. *Animal metabolism.* The adsorption, distribution, excretion and metabolism of tebufenozide in rats was investigated. Tebufenozide is partially absorbed, is rapidly excreted and does not accumulate in tissues. Although tebufenozide is mainly excreted unchanged, a number of polar metabolites were identified. These metabolites are products of oxidation of the benzylic ethyl or methyl side chains of the molecule. These metabolites were detected in plant and other animal (goat, hen, rat) metabolism studies.

VOL 63 ISS 18 JA 28 1998 UMI

7. *Metabolite toxicology.* Common metabolic pathways for tebufenozide have been identified in both plants (apple, beet, grape, and sugar) and animals (goat, hen, rat). The metabolic pathway common to both plants and animals involves oxidation of the alkyl substituents (ethyl and methyl groups) of the aromatic rings primarily at the benzylic positions. Extensive degradation and elimination of polar metabolites occurs in animals such that residue are unlikely to accumulate in humans or animals exposed to these residues through the diet.

8. *Endocrine disruption.* The toxicology profile of tebufenozide shows no evidence of physiological effects characteristic of the disruption of the hormone estrogen. Based on structure-activity information, tebufenozide is unlikely to exhibit estrogenic activity. Tebufenozide was not active in a direct in vitro estrogen binding assay. No indicators of estrogenic or other endocrine effects were observed in mammalian chronic studies or in mammalian and avian reproduction studies. Ecdysone has no known effects in vertebrates. Overall, the weight of evidence provides no indication that tebufenozide has endocrine activity in vertebrates.

C. Aggregate Exposure

1. *Dietary exposure—i. Food.* Tolerances for residues of tebufenozide are currently expressed as benzoic acid, 3,5-dimethyl-1-(1,1-dimethylethyl)-2(4-ethylbenzoyl) hydrazide. Tolerances currently exist for residues on apples at 1.0 ppm (import tolerance) and on walnuts at 0.1 ppm (see 40 CFR 180.482). In addition to this action, a request to establish a tolerance for pecans, other petitions are pending for the following tolerances: pome fruit, livestock commodities, wine grapes (import tolerance), cotton, the crop subgroups leafy greens, leaf petioles, head and stem Brassica and leafy Brassica greens, and kiwifruit (import tolerance).

ii. *Acute risk.* No appropriate acute dietary endpoint was identified by the Agency. This risk assessment is not required.

iii. *Chronic risk.* For chronic dietary risk assessment, the tolerance values are used and the assumption that all of these crops which are consumed in the U.S. will contain residues at the tolerance level. The theoretical maximum residue contribution (TMRC) using existing and future potential tolerances for tebufenozide on food crops is obtained by multiplying the tolerance level residues (existing and proposed) by the consumption data which estimates the amount of those food products consumed by various population subgroups and assuming that 100% of the food crops grown in the U.S. are treated with tebufenozide. The Theoretical Maximum Residue Contribution (TMRC) from current and future tolerances is calculated using the Dietary Exposure Evaluation Model (Version 5.03b, licensed by Novigen Sciences Inc.) which uses USDA food consumption data from the 1989-1992 survey. With the current and proposed uses of tebufenozide, the TMRC estimate represents 20.1% of the RfD for the U.S. population as a whole. The subgroup with the greatest chronic exposure is non-nursing infants (less than 1 year old), for which the TMRC estimate represents 52.0% of the RfD. Using anticipate residue levels for these crops utilizes 3.38% of the RfD for the U.S. population and 12.0% for non-nursing infants. The chronic dietary risks from these uses do not exceed EPA's level of concern.

3. *Drinking water.* An additional potential source of dietary exposure to residues of pesticides are residues in drinking water. Review of environmental fate data by the Environmental Fate and Effects Division concludes taht tebufenozide is moderately persistent to persistent and mobile, and could potentially leach to groundwater and runoff to surface water under certain environmental conditions. However, in terrestrial field dissipation studies, residues of tebufenozide and its soil metabolites showed no downward mobility and remained associated with the upper layers of soil. Foliar interception (up to 60% of the total dosage applied) by target crops reduces the ground level residues of tebufenozide. There is no established Maximum Concentration Level (MCL) for residues of tebufenozide in drinking water. No drinking water health advisory levels have been established for tebufenozide.

There are no available data to perform a quantitative drinking water risk assessment for tebufenozide at this time. However, in order to mitigate the potential for tebufenozide to leach into groundwater or runoff to surface water, precautionary language has been incorporated into the product label. Also, to the best of our knowledge, previous experience with more persistent and mobile pesticides for which there have been available data to perform quantitative risk assessments have demonstrated that drinking water exposure is typically a small percentage of the total exposure when compared to the total dietary exposure. This observation holds even for pesticides detected in wells and drinking water at levels nearing or exceeding established MCLs. Considering the precautionary language on the label and based on our knowledge of previous experience with persistent chemicals, significant exposure from residues of tebufenozide in drinking water is not anticipated.

4. *Non-dietary exposure.* Tebufenozide is not registered for either indoor or outdoor residential use. Non-occupational exposure to the general population is therefore not expected and not considered in aggregate exposure estimates.

D. Cumulative Effects

The potential for cumulative effects of tebufenozide with other substances that have a common mechanism of toxicity was considered. Tebufenozide belongs to the class of insecticide chemicals known as diacylhydrazines. The only other diacylhydrazine currently registered for non-food crop uses is halofenozide. Tebufenozide and halofenozide both produce a mild, reversible anemia following subchronic/chronic exposure at high doses; however, halofenozide also exhibits other patterns of toxicity (liver toxicity following subchronic exposure and developmental/systemic toxicity following acute exposure) which tebufenozide does not. Given the different spectrum of toxicity produced by tebufenozide, there is no reliable data at the molecular/mechanistic level which would indicate that toxic effects produced by tebufenozide would be cumulative with those of halofenozide (or any other chemical compound).

In addition to the observed differences in mammalian toxicity, tebufenozide also exhibits unique toxicity against target insect pests. Tebufenozide is an agonist of 20-hydroxyecdysone, the insect molting hormone, and interferes with the normal molting process in target lepidopteran species by interacting with ecdysone receptors from those species. Unlike other ecdysone agonists such as halofenozide, tebufenozide does not produces symptoms which may be indicative of systemic toxicity in beetle larvae (Coleopteran species). Tebufenozide has a different spectrum of activity than other ecdysone agonists. In contrast to the other agonists such as halofenozide which act mainly on coleopteran insects, tebufenozide is highly specific for lepidopteran insects.

Based on the overall pattern of toxicity produced by tebufenozide in mammalian and insect systems, the compound's toxicity appears to be distinct from that of other chemicals, including organochlorines, organophosphates, carbamates, pyrethroids, benzoylureas, and other diacylhydrazines. Thus, there is no evidence to date to suggest that cumulative effects of tebufenozide and other chemicals should be considered.

E. Safety Determination

1. *U.S. population.* Using the conservative exposure assumptions described above and taking into account the completeness and reliability of the toxicity data, the dietary exposure to tebufenozide from the current and future tolerances will utilize 20.1% of the RfD for the U.S. population and 52.0% for non-nursing infants under 1-year old. Using anticipate residue levels for these crops utilizes 3.38% of the RfD for the U.S. population and 12.0% for non-nursing infants. EPA generally has no concern for exposures below 100% of the RfD because the RfD represents the level at or below which daily aggregate dietary exposure over a lifetime will not pose appreciable risks to human health. Rohm and Haas concludes that there is a reasonable certainty that no harm will result from aggregate exposure to tebufenozide residues to the U.S. population and non-nursing infants.

2. *Infants and children.* In assessing the potential for additional sensitivity of infants and children to residues of tebufenozide, data from developmental toxicity studies in the rat and rabbit and two 2-generation reproduction studies in the rat are considered. The developmental toxicity studies are designed to evaluate adverse effects on the developing organism resulting from pesticide exposure during pre-natal development to one or both parents. Reproduction studies provide information relating to effects from exposure to the pesticide on the reproductive capability of mating animals and data on systemic toxicity. Developmental toxicity was not observed in developmental studies using rats and rabbits. The NOEL for developmental effects in both rats and rabbits was 1,000 mg/kg/day, which is the limit dose for testing in developmental studies.

In the 2-generation reproductive toxicity study in the rat, the reproductive/ developmental toxicity NOEL of 12.1 mg/kg/day was 14-fold higher than the parental (systemic) toxicity NOEL (0.85 mg/kg/day). The reproductive (pup) LOEL of 171.1 mg/kg/day was based on a slight increase in both generations in the number of pregnant females that either did not deliver or had difficulty and had to be sacrificed. In addition, the length of gestation increased and implantation sites decreased significantly in F1 dams. These effects were not replicated at the same dose in a second 2-generation rat reproduction study. In this second study, reproductive effects were not observed at 2,000 ppm (the NOEL equal to 149-195 mg/kg/day) and the NOEL for systemic toxicity was determined to be 25 ppm (1.9-2.3 mg/kg/day).

Because these reproductive effects occurred in the presence of parental (systemic) toxicity and were not replicated at the same doses in a second study, these data do not indicate an increased pre-natal or post-natal sensitivity to children and infants (that infants and children might be more sensitive than adults) to tebufenozide exposure. FFDCA section 408 provides that EPA shall apply an additional safety factor for infants and children in the case of threshold effects to account for pre- and post-natal toxicity and the completeness of the data base unless EPA concludes that a different margin of safety is appropriate. Based on current toxicological data discussed above, an additional uncertainty factor is not warranted and the RfD at 0.018 mg/kg/day is appropriate for assessing aggregate risk to infants and children. Rohm and Haas concludes that there is a reasonable certainty that no harm will occur to infants and children from aggregate exposure to residues of tebufenozide.

F. International Tolerances

There are no approved CODEX maximum residue levels (MRLs) established for residues of tebufenozide. (Joseph Tavano)

[FR Doc. 98-2088 Filed 1-27-98; 8:45 am]

BILLING CODE 6560-50-F

ENVIRONMENTAL PROTECTION AGENCY

[OPP-00518; FRL-5761-7]

Test Guidelines; Notice of Availability

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: EPA has established a unified library for Test Guidelines issued by the Office of Prevention, Pesticides and Toxic Substances (OPPTS), and is announcing the availability of final test guidelines for Series 835—Fate, Transport and Transformation. These final guidelines are for the Office of Pollution Prevention and Toxics (OPPT) and have been harmonized with test guidelines of the Organization for Economic Cooperation and Development (OECD). The goals of the project include the formulation of

Development (OECD). The draft guidelines were made available by notice in the **Federal Register** (61 FR 16486, April 15, 1996)(FRL-5363-1) and were peer reviewed at a Scientific Advisory Panel (SAP) meeting on May 30, 1996. These final guidelines incorporate changes recommended by the SAP and other changes resulting from public comment. This notice also describes the unified library of OPPTS Test Guidelines. The Agency issues Federal Register notices periodically as new test guidelines are added to the OPPTS unified library.

ADDRESSES: The guidelines are available from the U.S. Government Printing Office, Washington, DC 20402 on *The Federal Bulletin Board.* By modem dial (202) 512-1387, telnet and ftp: fedbbs.access.gpo.gov (IP 162.140.64.19), or call (202) 512-0132 for disks or paper copies. The guidelines are also available electronically in ASCII and PDF (portable document format) from the EPA's World Wide Web site (http://www.epa.gov/epahome/research.htm) under the heading "Researchers and Scientists/Test Methods and Guidelines/Harmonized Test Guidelines."

FOR FURTHER INFORMATION CONTACT: For general information: By mail: *Toxic Substances Control Act (TSCA) information*: Contact the TSCA Hotline at: TATS/7408, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Telephone number: (202) 554-1404; fax: (202) 554-5603, e-mail: TSCA-hotline@epamail.epa.gov.

Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) information: Contact the Communications Services Branch (7506C), Field and External Affairs Division, Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Telephone number: (703) 305-5017; fax: (703) 305-5558.

For technical questions only on Series 835 OPPT test guidelines: Robert Boethling, (202) 260-3912, or e-mail: boethling.bob@epamail.epa.gov.

SUPPLEMENTARY INFORMATION:

I. EPA's Process for Developing a Unified Library of Test Guidelines

EPA's Office of Prevention, Pesticides and Toxic Substances (OPPTS) has been engaged in a multi-year project to harmonize and/or update test guidelines among the Office of Pesticide Programs (OPP), the Office of Pollution Prevention and Toxics (OPPT), and the Organization for Economic Cooperation and Development (OECD). The goals of the project include the formulation of

VOL 63 ISS 18 JA 28 1998 UMI

harmonized OPP and OPPT guidelines for those in common between the two programs, the harmonization of OPPT and/or OPP guidelines with those of the OECD, the updating of any guidelines unique to OPP or OPPT programs, and the addition of several new guidelines.

Testing guidelines that are changed substantively in the harmonization process or through other updating/amending activities, or which are new (e.g., for a previously unaddressed testing endpoint) will be made available for public comment by notice in the **Federal Register**. Additionally, EPA submits substantively revised and new test guidelines to peer review by expert scientific panels. Guidelines which are reformatted but not changed in any substantive way are not made available for public comment or submitted to peer review.

All final guidelines will be made available through the GPO Electronic Bulletin Board and the Internet on the EPA World Wide Web home page as a unified library of OPPTS Test Guidelines for use by either EPA program office. Printed versions of the unified library of OPPTS test guidelines will also be available to the public through the GPO. For purposes of this **Federal Register** notice, "publication" of the unified library of guidelines generally describes the availability of these final guidelines through the GPO and Internet. Because harmonization and updating is an ongoing task that will periodically result in modified guidelines, some guidelines being made available via GPO and Internet will be revised in the future. These efforts will ensure that industry is provided with testing guidelines that are current.

The test guidelines appearing in the unified library will be given numerical designations that are different from the designations provided at 40 CFR parts 158, 795, 796, 797, 798, and 799. OPPTS test guidelines will be published in 10 disciplinary series as follows:

Series 810—Product Performance Test Guidelines
Series 830—Product Properties Test Guidelines
Series 835—Fate, Transport and Transformation Test Guidelines
Series 840—Spray Drift Test Guidelines
Series 850—Ecological Effects Test Guidelines
Series 860—Residue Chemistry Test Guidelines
Series 870—Health Effects Test Guidelines
Series 875—Occupational and Residential Exposure Test Guidelines
Series 880—Biochemicals Test Guidelines
Series 885—Microbial Pesticide Test Guidelines

The Agency issues **Federal Register** notices periodically announcing any new test guidelines added to the OPPTS unified library. As each set of guidelines is published, it will be accompanied by a Master List which cross references the new OPPTS guideline numbers to the original OPP and OPPT numbers.

II. Series 835 Changes

Significant changes to the Series 835 test guidelines include addition of a new guideline, Biodegradability in Sea Water, in OPPTS 835.3160; recommendation of the alkali addition method in the Sealed Vessel Carbon Dioxide Production Test in OPPTS 835.3120; clarification of guideline scope with respect to redox conditions and recommendation of field temperature incubation in the Sediment/Water Microcosm Biodegradation Test in OPPTS 835.3180; discussion of the importance of maintaining influent dissolved organic carbon (DOC) levels and addition of language to permit periodic wastage of sludge in the Porous Pot Test in OPPTS 835.3220; and discussion of evidence supporting the contention that treated (deactivated) sludge retains the characteristics of viable sludge in the Activated Sludge Sorption Isotherm Test in OPPTS 835.1110. In addition, test guideline OPPTS 835.3400, Anaerobic Biodegradability of Organic Chemicals, is retained despite several negative comments on the method. Major revisions to this protocol are presently being considered in several fora (ASTM; ISO; OECD) and EPA intends to revisit this topic when consensus is reached on certain technical issues. Explicit test requirements for pesticide registration are set out in 40 CFR part 158 which refers to specific guidelines by guideline number. Studies initiated 45 days or more after final publication should be performed in accordance with the revised guidelines.

III. Public Record

A detailed description of the response to comments and the changes to each guideline are available under docket control number OPP–00518 in the Public Docket and Freedom of Information Section, Office of Pesticide Programs, Rm. 1132, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA; telephone 703–305–5805, or by mail: Public Docket and Freedom of Information Section, Office of Pesticide Programs, Field Operations Division (7506C), Environmental Protection Agency, 401 M Street, S.W., Washington, DC 20460.

IV. Notice of Availability of Final Test Guidelines

This notice announces the availability of final test guidelines for OPPT in the 835 Series. The following is the list of guidelines being made available at this time.

Series 835—Fate, Transport and Transformation Test Guidelines

OPPTS Number	Name	Existing Numbers			EPA Pub. no.
		OTS	OPP	OECD	712–C–
	Group A—Laboratory Transport Test Guidelines.				
835.1110	Activated sludge sorption isotherm	none	none	none	98–298
835.1210	Soil thin layer chromatography	796.2700	none	none	98–047
835.1220	Sediment and soil adsorption/desorption isotherm	796.2750	none	106	98–048
	Group B—Laboratory Abiotic Transformation Test Guidelines.				
835.2110	Hydrolysis as a function of pH	796.3500	none	111	98–057
835.2130	Hydrolysis as a function of pH and temperature	796.3510	none	none	98–059
835.2210	Direct photolysis rate in water by sunlight	796.3700	none	none	98–060
835.2310	Maximum direct photolysis rate in air from UV/visible spectroscopy	796.3800	none	none	98–066
	Group C—Laboratory Biological Transformation Test Guidelines.				
835.3100	Aerobic aquatic biodegradation	796.3100	none	none	98–075

Series 835—Fate, Transport and Transformation Test Guidelines—Continued

OPPTS Number	Name	Existing Numbers			EPA Pub. no.
		OTS	OPP	OECD	712–C–
835.3110	Ready biodegradability	796.3180, .3200, .3220, .3240, .3260	none	301	98–076
835.3120	Sealed-vessel carbon dioxide production test	none	none	none	98–311
835.3160	Biodegradability in sea water	none	none	306	98–351
835.3170	Shake flask die-away test	none	none	none	98–297
835.3180	Sediment/water microcosm biodegradation test	none	none	none	98–083
835.3200	Zahn-Wellens/EMPA test	796.3360	none	302B	98–084
835.3210	Modified SCAS test	796.3340	none	302A	98–085
835.3220	Porous pot test	none	none	none	98–301
835.3300	Soil biodegradation	796.3400	none	304A	98–088
835.3400	Anaerobic biodegradability of organic chemicals	796.3140	none	none	98–090
	Group E—Transformation Chemical-Specific Test Guidelines.				
835.5045	Modified SCAS test for insoluble and volatile chemicals	795.45	none	none	98–097
835.5154	Anaerobic biodegradation in the subsurface	795.54	none	none	98–098
835.5270	Indirect photolysis screening test: Sunlight photolysis in waters containing dissolved humic substances	795.70	none	none	98–099

List of Subjects

Environmental Protection, Test guidelines.

Dated: January 8, 1998.

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection Submitted to OMB for Review and Approval

January 16, 1998.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection, as required by the Paperwork Reduction Act of 1995, Public Law 104–13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act that does not display a valid control number. Comments should address: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written comments should be submitted on or before February 27, 1998. OMB Notification of Action is due on or before March 30, 1998. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all comments to Judy Boley, Federal Communications, Room 234, 1919 M St., NW., Washington, DC 20554 or via internet to jboley@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collections contact Judy Boley at 202–418–0214 or via internet at jboley@fcc.gov.

SUPPLEMENTARY INFORMATION: On October 17, 1997, the Commission released a Report and Order and Second Further Notice of Proposed Rulemaking, FCC 97–376, which addresses rules and policies concerning cable inside wiring. Among other things, this rulemaking amends the Commission's regulations relating to the disposition of cable home wiring and related issues including the sharing of molding, the demarcation point for multiple dwelling unit buildings ("MDUs"), loop-through cable wiring configurations, customer access to cable home wiring before termination of service, and signal leakage.

OMB Approval Number: 3060–0692.

Title: Home Wiring Provisions.

Type of Review: Revision of a currently approved collection.

Respondents: Business and other for-profit entities.

Number of Respondents: 30,500 (20,500 multichannel video program distributors and 10,000 multiple dwelling unit building owners).

Estimated Time Per Response: 5 minutes–20 hours.

Total Annual Burden to Respondents: 46,114 hours, calculated as follows: This collection (3060–0692) accounts for all information collection requirements that may come into play during the disposition of cable home wiring in single dwelling units, as well as the disposition of home run wiring and cable home wiring in MDUs. All multichannel video programming distributors ("MVPDs"), both cable and non-cable alike, are now subject to these disposition rules. Pursuant to the Paperwork Reduction Act, when modifying only portions of an information collection, agencies are still obligated to put forth the entire collection for public comment.

This information collection now accounts for the information collection requirement stated in 47 CFR 76.613,

VOL 63 ISS 18 JA 28 1998 UMI

where MVPDs causing harmful signal interference may be required by the Commission's engineer in charge (EIC) to prepare and submit a report regarding the cause(s) of the interference, corrective measures planned or taken, and the efficacy of the remedial measures. Through the course of this rulemaking proceeding, the Commission identified this collection as not having previously been reported to OMB for approval. We estimate that no more than 10 interference reports will be submitted annually to the Commission's EIC, each having an average burden of 2 hours to prepare. (10 reports×2 hours = 20 hours). 47 CFR 76.620 applies the Commission's signal leakage rules to all non-cable MVPDs. Our rules require that each cable system perform an independent signal leakage test annually, therefore, non-cable MVPDs will now be subject to the same requirement. We recognize, however, that immediate compliance with these requirements may present hardships to existing non-cable MVPDs not previously subject to such rules. We will allow a five-year transition period from the effective date of these rules to afford non-cable MVPDs time to comply with our signal leakage rules other than § 76.613. The transition period will apply only to systems of those non-cable MVPDs that have been substantially built as of January 1, 1998. Considering non-cable MVPD systems that will be built as of January 1, 1998, we estimate that 500 new entities will be subject to signal leakage filing requirements, with an estimated burden of 20 hours per entity. (500 systems×20 hours = 10,000 hours). 47 CFR 76.802, Disposition of Cable Home Wiring, gives individual video service subscribers in single unit dwellings and MDUs the opportunity to purchase their cable home wiring at replacement cost upon voluntary termination of service. In calculating hour burdens for notifying individual subscribers of their purchase rights, we make the following assumptions: There are approximately 20,000 MVPDs serving approximately 72 million subscribers in the United States. The average rate of churn (subscriber termination) for all MVPDs is estimated to be 1% per month, or 12% per year. MVPDs own the home wiring in 50% of the occurrences of voluntary subscriber termination and subscribers or property owners already have gained ownership of the wiring in the other 50% of occurrences (e.g., where the MVPD has charged the subscriber for the wiring upon installation, has treated the wiring as belonging to the subscriber for tax purposes, or where state and/or local law treats cable home wiring as a fixture). Where MVPDs own the wiring, we estimate that they intend to actually remove the wiring 5% of the time, thus initiating the disclosure requirement. We believe in most cases that MVPDs will choose to abandon the home wiring because the cost and effort required to remove the wiring generally outweigh its value. The burden to disclose the information at the time of termination will vary depending on the manner of disclosure, e.g., by telephone, customer visit or registered mail. Virtually all voluntary service terminations are done by telephone. The estimated average time consumed in the process of the MVPD's disclosure and subscriber's election is 5 minutes (.083 hours). Estimated annual number of occurrences is 72,000,000×12%×50%×5%=216,000. (216,000×.083 hours=17,928 hours).

In addition, 47 CFR 76.802 states that if a subscriber in an MDU declines to purchase the wiring, the MDU owner or alternative provider (where permitted by the MDU owner) may purchase the home wiring where reasonable advance notice has been provided to the incumbent. According to the Statistical Abstracts of the United States, 1995 at 733 Table No. 1224, over 28 million people resided in MDUs with three or more units in 1993. We therefore estimate that there are currently 30 million MDU residents and that MDUs house an average of 50 residents, and so we estimate that there are approximately 600,000 MDUs in the United States. We estimate that 2,000 MDU owners will provide advance notice to the incumbent that the MDU owner or alternative provider (where permitted by the MDU owner) will purchase the home wiring where a terminating individual subscriber declines. The estimated average time for MDU owners to provide such notice is estimated to be 15 minutes (.25 hours). The estimated average time consumed in the process of the MVPD's subsequent disclosure and the MDU owner or alternative provider's election is 5 minutes (.083 hours). Estimated annual time consumed is 2,000 notifications×.333 hours=666 hours. 47 CFR 76.802 also states that, to inform subscribers of per-foot replacement costs, MVPDs may develop replacement cost schedules based on readily available information; if the MVPD chooses to develop such schedules, it must place them in a public file available for public inspection during regular business hours. We estimate that 50% of MVPDs will develop such cost schedules to place in their public files. Virtually all individual subscribers terminate service via telephone, and few subscribers are anticipated to review cost schedules on public file. The annual recordkeeping burden for these cost schedules is estimated to be 0.5 hours per MVPD. (20,000 MVPDs×50%×0.5 hours=5,000 hours). 47 CFR 76.804 Disposition of Home Run Wiring. We estimate the burden for notification and election requirements for building-by-building and unit-by-unit disposition of home run wiring as described below. Note that these requirements apply only when an MVPD owns the home run wiring in an MDU and does not (or will not at the conclusion of the notice period) have a legally enforceable right to remain on the premises against the wishes of the entity that owns or controls the common areas of the MDU or have a legally enforceable right to maintain any particular home run wire dedicated to a particular unit on the premises against the MDU owner's wishes. We use the term "MDU owner" to include whatever entity owns or controls the common areas of an apartment building, condominium or cooperative. For building-by-building disposition of home run wiring, the MDU owner gives the incumbent service provider a minimum of 90 days' written notice that its access to the entire building will be terminated. The incumbent then has 30 days to elect what it will do with the home run wiring. Where parties negotiate a price for the wiring and are unable to agree on a price, the incumbent service provider must elect among abandonment, removal of the wiring, or arbitration for a price determination. Also, regarding cable home wiring, when the MDU owner notifies the incumbent service provider that its access to the building will be terminated, the incumbent provider must, within 30 days of the initial notice and in accordance with our home wiring rules, (1) offer to sell to the MDU owner any home wiring within the individual dwelling units which the incumbent provider owns and intends to remove, and (2) provide the MDU owner with the total per-foot replacement cost of such home wiring. The MDU owner must then notify the incumbent provider as to whether the MDU owner or an alternative provider intends to purchase the home wiring not later than 30 days before the incumbent's access to the building will be terminated. For unit-by-unit disposition of home run wiring, an MDU owner must provide at least 60 days' written notice to the incumbent MVPD that it intends to permit multiple MVPDs to compete for the right to use the individual home run wires dedicated to each unit. The incumbent service provider then has 30 days to provide the MDU owner with a written election as to whether, for all of the incumbent's home run wires dedicated to individual subscribers who may later choose the alternative provider's service, it will remove the wiring, abandon the wiring, or sell the wiring to the MDU owner. In other words, the incumbent service provider will be required to make a single election for how it will handle the disposition of individual home run wires whenever a subscriber wishes to switch service providers; that election will then be implemented each time an individual subscriber switches service providers. Where parties negotiate a price for the wiring and are unable to agree on a price, the incumbent service provider must elect among abandonment, removal of the wiring, or arbitration for a price determination. The MDU owner also must provide reasonable advance notice to the incumbent provider that it will purchase, or that it will allow an alternative provider to purchase, the cable home wiring when a terminating individual subscriber declines. If the alternative provider is permitted to purchase the wiring, it will be required to make a similar election during the initial 30-day notice period for each subscriber who switches back from the alternative provider to the incumbent MVPD. According to the Statistical Abstracts of the United States, 1995 at 733 Table No. 1224, over 28 million people resided in MDUs with three or more units in 1993. We therefore estimate that there are currently 30 million MDU residents and that MDUs house an average of 50 residents, and so we estimate that there are approximately 600,000 MDUs in the United States. In many instances, incumbent service providers may no longer own the home run wiring or may continue to have a legally enforceable right to remain on the premises. Also, MDU owners may forego the notice and election processes for various other reasons, e.g., they have no interest in purchasing the home run or cable home wiring. We estimate that there will be approximately 12,500 notices and 12,500 elections made on an annual basis. The number of notices accounts for the occasions when the MDU owner simultaneously notifies the incumbent provider that: (1) It is invoking the home run wiring disposition procedures, and (2) whether the MDU owner or alternative provider intends to purchase the cable home wiring. It also accounts for those occasions when the MDU owner makes a separate notification regarding the purchase of cable home wiring. The number of elections accounts for instances when the incumbent elects to sell the wiring but the parties are unable to agree on a price, therefore necessitating a second election. We assume all notifications and elections (except when an individual subscriber is terminating service) will be in writing and take an average burden of 30 minutes (0.5 hours) to prepare. (25,000 notifications and elections×0.5 hours=12,500 hours).

Total Cost to Respondents: Total Annual Cost to Respondents: $37,510, estimated as follows: Under the annual operation and maintenance costs category, we estimate that stationery and postage costs for interference reports submitted to the Commission pursuant to § 76.613 to be $1 per report. (10 reports×$1=$10). We estimate stationery and postage costs for signal leakage filings to be $1 per filing. (500 filings×$1=$500). We estimate that 50% of the 20,000 MVPDs will annually develop cost schedules. We estimate recordkeeping expenses for these schedules to be $1 per MVPD. (20,000×50%×$1=$10,000). We estimate stationery and postage costs for the various disposition notifications and elections to be $1 per occurrence. (27,000 advance notices and notifications and elections×$1=$27,000). There are no estimated capital and start-up costs.

Needs and Uses: The various notification and election requirements in this collection (3060–0692) are set forth in order to promote competition and consumer choice by minimizing any potential disruption in service to a subscriber switching video providers.

Federal Communications Commission.

Magalie Roman Salas,

Secretary.

BILLING CODE 6712–10–P

FEDERAL COMMUNICATIONS COMMISSION

Sunshine Act Meeting; Additional Item To Be Considered at Open Meeting Thursday, January 29, 1998

January 23, 1998.

The Federal Communications Commission will consider an additional item on the subject listed below at the Open Meeting scheduled for 9:30 a.m., Thursday, January 29, 1998, at 1919 M Street, N.W., Washington, D.C. See meeting notice published on January 27, 1998.

Item No., Bureau and Subject

4—Office of Engineering and Technology—Title: Advanced Television Systems and Their Impact upon the Existing Television Broadcast Service (MM Docket No. 87–268). Summary: The Commission will consider petitions for reconsideration filed in response to the Commission's Sixth Report and Order regarding allotment of channels for digital television.

The prompt and orderly conduct of the Commission business requires that less than 7-days notice be given consideration of this additional item.

Action by the Commission January 23, 1998, Chairman Kennard and Commissioners Ness, Furchtgott-Roth, Powell and Tristani voting to consider this item.

Additional information concerning this meeting may be obtained from Maureen Peratino or David Fiske, Office of Public Affairs, telephone number (202) 418–0500.

Copies of materials adopted at this meeting can be purchased from the FCC's duplicating contractor, International Transcription Services, Inc. (ITS, Inc.) at (202) 857–3800 or fax (202) 857–3805 and 857–3184. These copies are available in paper format and alternative media which includes, large print/type; digital disk; and audio tape. ITS may be reached by e-mail: its__inc@ix.netcom.com. Their Internet address is http://www.itsi.com.

This meeting can be viewed over George Mason University's Capitol Connection. For information on this service call (703) 993–3100. The audio portion of the meeting will be broadcast live on the Internet via the FCC's Internet audio broadcast page at <http://www.fcc.gov/realaudio/>. The meeting can also be heard via telephone, for a fee, from National Narrowcast Network, telephone (202) 966–2211 or fax (202) 966–1770; and from Conference Call USA (available only outside the Washington, D.C. metropolitan area), telephone 1–800–962–0044. Audio and video tapes of this meeting can be purchased from Infocus, 341 Victory Drive, Herndon, VA 20170, telephone (703) 834–0100; fax number (703) 834–0111.

Federal Communications Commission.

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA–1195–DR]

Florida; Amendment to Notice of a Major Disaster Declaration

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster for the State of Florida, (FEMA–1195–DR), dated January 6, 1998, and related determinations.

EFFECTIVE DATE: January 14, 1998.

FOR FURTHER INFORMATION CONTACT: Madge Dale, Response and Recovery Directorate, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–3260.

SUPPLEMENTARY INFORMATION: The notice of a major disaster for the State of Florida, is hereby amended to include the following areas among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of January 6, 1998:

Citrus, Lake, Orange and Sumter Counties for Individual Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Dennis H. Kwiatkowski,

Deputy Associate Director, Response and Recovery Directorate.

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA–1195–DR]

Florida; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Florida (FEMA–1195–DR), dated January 6, 1998, and related determinations.

EFFECTIVE DATE: January 6, 1998.

FOR FURTHER INFORMATION CONTACT: Madge Dale, Response and Recovery Directorate, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–3260.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated January 6, 1998, the President declared a major disaster under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*), as follows:

I have determined that the damage in certain areas of the State of Florida, resulting from severe storms, high winds, tornadoes, and flooding beginning on December 25, 1997, and continuing, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, Public Law 93–288 as amended, ("the Stafford Act"). I, therefore, declare that such a major disaster exists in the State of Florida.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Individual Assistance and Hazard Mitigation in the designated areas and any other forms of assistance under the Stafford Act you may deem appropriate. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Public Assistance and Hazard Mitigation will be limited to 75 percent of the total eligible costs.

The time period prescribed for the implementation of section 310(a), Priority to Certain Applications for Public Facility and Public Housing Assistance, 42 U.S.C. 5153, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint Paul Fay of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the State of Florida to have been affected adversely by this declared major disaster:

Hernando, Hillsborough, Osceola, and Polk Counties for Individual Assistance.

All counties within the State of Florida are eligible to apply for assistance under the Hazard Mitigation Grant Program.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

James L. Witt,

Director.

BILLING CODE 6718–02–P

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA–1198–DR]

Maine; Amendment to Notice of a Major Disaster Declaration

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster for the State of Maine, (FEMA–1198–DR), dated January 13, 1998, and related determinations.

EFFECTIVE DATE: January 15, 1998.

FOR FURTHER INFORMATION CONTACT: Madge Dale, Response and Recovery Directorate, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–3260.

SUPPLEMENTARY INFORMATION: The notice of a major disaster for the State of Maine, is hereby amended to include Individual Assistance in the following areas among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of January 13, 1998:

The counties of Androscoggin, Cumberland, Franklin, Hancock, Kennebec, Knox, Lincoln, Penobscot, Piscataquis, Oxford, Sagadahoc, Somerset, Waldo, Washington, and York for Individual Assistance (already designated for Public Assistance).

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Catherine H. Light,

Deputy Associate Director, Response and Recovery Directorate.

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA–1198–DR]

Maine; Amendment to Notice of a Major Disaster Declaration

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster for the State of Maine, (FEMA–1198–DR), dated January 13, 1998, and related determinations.

EFFECTIVE DATE: January 15, 1998.

FOR FURTHER INFORMATION CONTACT: Madge Dale, Response and Recovery Directorate, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–3260.

SUPPLEMENTARY INFORMATION: The notice of a major disaster for the State of Maine, is hereby amended to include the following area among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of January 13, 1998:

Aroostook County for Individual Assistance and Public Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Dennis H. Kwiatkowski,

Deputy Associate Director, Response and Recovery Directorate.

BILLING CODE 6718–02–P

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA–1196–DR]

New York; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of New York (FEMA–1196–DR), dated January 10, 1998, and related determinations.

EFFECTIVE DATE: January 10, 1998.

FOR FURTHER INFORMATION CONTACT: Madge Dale, Response and Recovery Directorate, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–3260.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated January 10, 1998, the President declared a major disaster under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*), as follows:

I have determined that the damage in certain areas of the State of New York, resulting from severe winter and ice storms, high winds, and flooding beginning on January 5, 1998, and continuing, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, P.L. 93–288 as amended, ("the Stafford Act"). I, therefore, declare that such a major disaster exists in the State of New York.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Individual Assistance and Hazard Mitigation in the designated areas. Further, you are authorized to provide reimbursement for debris removal and emergency protective measures under the Public Assistance program in the designated areas. Other forms of assistance may be added at a later date, as you deem appropriate. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Public Assistance and Hazard Mitigation will be limited to 75 percent of the total eligible costs.

The time period prescribed for the implementation of section 310(a), Priority to Certain Applications for Public Facility and Public Housing Assistance, 42 U.S.C. 5153, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint Barbara Russell of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the State of New York to have been affected adversely by this declared major disaster:

Clinton, Essex, Franklin, Jefferson, and St. Lawrence Counties for Individual Assistance and Categories A and B under the Public Assistance program.

All counties within the State of New York are eligible to apply for assistance under the Hazard Mitigation Grant Program.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Dated: January 13, 1998.

James L. Witt,

Director.

BILLING CODE 6718–02–P

FEDERAL MARITIME COMMISSION

Notice of Agreement(s) Filed

The Commission hereby gives notice of the filing of the following agreement(s) under the Shipping Act of 1984.

Interested parties can review or obtain copies of agreements at the Washington, DC offices of the Commission, 800 North Capitol Street, N.W., Room 962. Interested parties may submit comments on an agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days of the date this notice appears in the **Federal Register**.

Agreement No.: 203–011279–006.

Title: The Latin America Agreement.

Parties: The Members of the following: Central America Discussion Agreement; Southeastern Caribbean Discussion Agreement; Hispaniola Discussion Agreement; U.S. Jamaica Discussion Agreement; Venezuela American Maritime Association; Caribbean Shipowners' Association; Aruba Bonaire Curacao Liner Association; Inter-American Freight Conference; Venezuelan Discussion Agreement; and Puerto Rico/Caribbean Discussion Agreement.

Synopsis: The proposed modification changes the name of the Agreement from the "Western Hemisphere Discussion Agreement" to the "Latin America Agreement", as well as making membership changes to the list of members of the Central America Discussion Agreement and the Inter-American Freight Conference.

Agreement No.: 203–011452–010

Title: Trans-Pacific Policing Agreement

Parties: American President Lines, Ltd.; Cho Yang Line; China Ocean Shipping Company; DSR-Senator Joint Service; Evergreen Marine Corp.; Hanjin Shipping Co., Ltd.; Hapag-Lloyd Container Linie GmbH; Hyundai Merchant Marine Co., Ltd.; Kawasaki Kisen Kaisha, Ltd.; A.P. Moller-Maersk Line; Mtsui O.S.K. Lines, Ltd.; Neptune Orient Lines, Ltd.; Nippon Yusen Kaisha Line; Orient Overseas Container Line, Inc.; P&O Nedlloyd Limited; P&O Nedlloyd Lijnen, B.V.; Sea-Land Service, Inc.; and Wilhelmsen Lines AS, Yang Ming Marine Transport Corp.

Synopsis: The proposed amendment would expand the scope of the Agreement's policing program to include rates, charges, terms, and condition established pursuant to Agreement No. 203–011325 (the Westbound Transpacific Stabilization Agreement) for wastepaper and metal scrap. It also deletes Transportation Maritima Mexicana S.A. de C.V. as a party to the Agreement.

Agreement No.: 232–011606.

Title: The COSCON/KL Slot Exchange Agreement.

Parties: COSCO Container Lines, Kawasaki Kisen Kaisha, Ltd.

Synopsis: The proposed Agreement would permit the parties to charter space to one another and to agree upon the deployment and utilization of vessels in the trade between United States Pacific Coast ports and ports in Asia, and inland points in the U.S. and Asia served via such ports.

Dated: January 22, 1998.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act. Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than February 23, 1998.

A. Federal Reserve Bank of Cleveland (Jeffery Hirsch, Banking Supervisor) 1455 East Sixth Street, Cleveland, Ohio 44101-2566:

1. First Capital Bancshares, Inc., Chillicothe, Ohio; to become a bank holding company by acquiring 100 percent of the voting shares of Citizens National Bank, Chillicothe, Ohio.

B. Federal Reserve Bank of Richmond (A. Linwood Gill III, Assistant Vice President) 701 East Byrd Street, Richmond, Virginia 23261-4528:

1. First Union Corporation, Charlotte, North Carolina; to acquire 100 percent of the voting shares and thereby merge with CoreStates Financial Corp., Philadelphia, Pennsylvania, and thereby indirectly acquire CoreStates Bank, N.A., Philadelphia, Pennsylvania, and CoreStates Bank of Delaware, N.A., Wilmington, Delaware.

In connection with this application, Applicant also has applied to acquire Electronic Payment Services, Inc., Wilmington, Delaware, and thereby engage in providing data processing and transmission services to retail merchants using point-of-sale terminals and to banks who are members of its automatic teller machine (ATM) network. Electronic Payment Services, Inc., also provides electronic benefits transfer services, stored value card services, electronic data interchange services, and data processing for ATMs to dispense tickets, gift certificates, prepaid telephone cards and other documents, pursuant to § 225.28(b)(14) of the Board's Regulation Y; Congress Financial Corporation, New York, New York, and thereby engage in factoring services, asset based lending, and commercial finance, pursuant to § 225.28(b)(1) of the Board's Regulation Y; CoreStates Community Development Corporation, Inc., Philadelphia, Pennsylvania, and thereby engage in investments to promote community welfare and engage in acquiring, rehabilitating, and selling residential real estate to former homeless women, pursuant to § 225.28(b)(12) of the Board's Regulation Y; CoreStates Securities Corporation, Philadelphia, Pennsylvania, and thereby engage in securities brokerage activities, pursuant to §§ 225.28(b)(6) and (b)(7) of the Board's Regulation Y; and in underwriting and dealing in, to a limited extent, certain municipal revenue bonds, 1-4 family mortgage-related securities, consumer receivable-related securities, and commercial paper (*See Citicorp*, 73 Fed. Res. Bull. 473 (1987)); providing financial and investment advisory services, pursuant to § 225.28(b)(6) of the Board's Regulation Y; buying and selling all types of securities on order of customers as a riskless principal, pursuant to § 225.28(b)(7)(ii) of the Board's Regulation Y; acting as agent in the private placement of all types of securities, pursuant to § 225.28(b)(7)(iii) of the Board's Regulation Y; providing other transactional services, pursuant to § 225.28(b)(7)(v) of the Board's Regulation Y; and providing investing and trading services, pursuant to § 225.28(b)(8)(ii) of the Board's Regulation Y; McGlinn Capital Management, Inc., Reading, Pennsylvania, and thereby engage in investment advisory services, pursuant to § 225.28(b)(6) of the Board's Regulation Y; Meridian Asset Management, Inc., Valley Forge, Pennsylvania, and thereby engage in non-fiduciary custodial and agency services, and trust services, pursuant to §§ 225.28(b)(5) and (b)(6) of the Board's Regulation Y; Meridian Securities, Inc., Reading, Pennsylvania, and thereby engage in securities brokerage activities, pursuant to § 225.28(b)(7) of the Board's Regulation Y; Pennco Life Insurance Company, Phoenix, Arizona, and thereby engage in underwriting credit life, health, and accident insurance for loans made by affiliates, pursuant to § 225.28(b)(11) of the Board's Regulation Y; Meridian Life Insurance Company, Reading, Pennsylvania, and thereby engage in underwriting credit life, health, and accident insurance for loans made by affiliates, pursuant to § 225.28(b)(11) of the Board's Regulation Y; and Princeton Life Insurance Company, Lancaster, Pennsylvania, and thereby engage in underwriting credit life, health, and accident insurance for loans made by affiliates, pursuant to § 225.28(b)(11) of the Board's Regulation Y.

C. Federal Reserve Bank of Chicago (Philip Jackson, Applications Officer) 230 South LaSalle Street, Chicago, Illinois 60690-1413:

1. Ohnward Bancshares, Inc., Maquoketa, Iowa; to acquire 100 percent of the voting shares of Gateway State Bank, Clinton, Iowa.

D. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63102-2034:

1. Countryside Bancshares, Inc., Republic, Missouri; to become a bank holding company by acquiring 100 percent of the voting shares of Countryside Bank (in organization), Republic, Missouri.

E. Federal Reserve Bank of Kansas City (D. Michael Manies, Assistant Vice President) 925 Grand Avenue, Kansas City, Missouri 64198-0001:

1. Marshall Community Bancshares, Inc., Marshall, Missouri; to become a bank holding company by acquiring 100 percent of the voting shares of Community Bank of Marshall, Marshall, Missouri.

F. Federal Reserve Bank of Dallas (Genie D. Short, Vice President) 2200 North Pearl Street, Dallas, Texas 75201-2272:

1. The Community Group, Inc., Dallas, Texas, and The Delaware Community Group, Inc., Wilmington, Delaware; to become bank holding companies by acquiring 100 percent of the voting shares of United Community Group, N.A., Highland Village, Texas.

G. Federal Reserve Bank of San Francisco (Maria Villanueva, Manager of Analytical Support, Consumer Regulation Group) 101 Market Street, San Francisco, California 94105-1579:

1. Busby Holdings, Inc., Los Angeles, California; to become a bank holding company by acquiring 59.5 percent of the voting shares of Founders National Bank of Los Angeles, Los Angeles, California. Comments regarding this application must be received not later than February 20, 1998.

Board of Governors of the Federal Reserve System, January 23, 1998.

Jennifer J. Johnson,

Deputy Secretary of the Board.

BILLING CODE 6210–01–F

FEDERAL RESERVE SYSTEM

Notice of Proposals to Engage in Permissible Nonbanking Activities or to Acquire Companies that are Engaged in Permissible Nonbanking Activities

The companies listed in this notice have given notice under section 4 of the Bank Holding Company Act (12 U.S.C. 1843) (BHC Act) and Regulation Y, (12 CFR Part 225) to engage *de novo*, or to acquire or control voting securities or assets of a company that engages either directly or through a subsidiary or other company, in a nonbanking activity that is listed in § 225.28 of Regulation Y (12 CFR 225.28) or that the Board has determined by Order to be closely related to banking and permissible for bank holding companies. Unless otherwise noted, these activities will be conducted throughout the United States.

Each notice is available for inspection at the Federal Reserve Bank indicated. The notice also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether the proposal complies with the standards of section 4 of the BHC Act.

Unless otherwise noted, comments regarding the applications must be

VOL 63 ISS 18 JA 28 1998 UMI

received at the Reserve Bank indicated or the offices of the Board of Governors not later than February 23, 1998.

A. Federal Reserve Bank of Philadelphia (Michael E. Collins, Senior Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105-1521:

1. Commerce Bancorp, Inc., Cherry Hill, New Jersey; to acquire A.H. Williams & Co., Inc., Philadelphia, Pennsylvania, and thereby engage in the following: underwriting and dealing in municipal revenue bonds, private ownership industrial development bonds issued for traditional government services, mortgage-backed securities, commercial paper, and consumer receivable-related securities. *See Citicorp*, 73 Fed. Res. Bull. 473 (1987); *Chemical New York Corporation*, 73 Fed. Res. Bull. 731 (1987); *Crestar Financial Corporation*, 83 Fed. Res. Bull. 512 (1997); activities that are usual in connection with making, acquiring, brokering, or servicing loans or other extensions of credit, pursuant to § 225.28(b)(2) of the Board's Regulation Y; leasing personal or real property or acting as agent, broker, or adviser in leasing such property, pursuant to § 225.28(b)(3) of the Board's Regulation Y; acting as investment or financial advisor, pursuant to § 225.28(b)(6) of the Board's Regulation Y; providing agency transactional services for customer investments, pursuant to § 225.28(b)(7) of the Board's Regulation Y; underwriting and dealing in bank-eligible securities, pursuant to § 225.28(b)(8)(i) of the Board's Regulation Y; engaging as principal in investment and trading activities, pursuant to § 225.28(b)(8)(ii) of the Board's Regulation Y; and providing management consulting and employee benefits counseling services, pursuant to § 225.28(b)(9) of the Board's Regulation Y.

B. Federal Reserve Bank of Richmond (A. Linwood Gill III, Assistant Vice President) 701 East Byrd Street, Richmond, Virginia 23261-4528:

1. One Valley Bancorp, Inc., Charleston, West Virginia; to acquire FFVA Financial Corporation, Lynchburg, Virginia, and thereby indirectly acquire its subsidiary, First Federal Savings Bank of Lynchburg, Lynchburg, Virginia, and thereby engage in operating a savings and loan association, pursuant to § 225.28(b)(4)(ii) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, January 23, 1998.

Jennifer J. Johnson,

Deputy Secretary of the Board.

BILLING CODE 6210–01–F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

National Committee on Vital and Health Statistics: Meetings

Pursuant to the Federal Advisory Committee Act, the Department of Health and Human Services announces the following advisory committee meeting.

Name: National Committee on Vital and Health Statistics (NCVHS), Subcommittee on Health Data Needs, Standards, and Security.

Times and Dates: 9:00 a.m.–5:00 p.m., February 9, 1998. 9:00 a.m.–5:00 p.m., February 10, 1998.

Place: Room 303A, Hubert H. Humphrey Building, 200 Independence Avenue, SW, Washington, D.C. 20201.

Status: Open.

Purpose: Under the Administrative Simplification provisions of Public Law 104–191, the Health Insurance Portability and Accountability Act of 1996 (HIPAA), the Secretary of Health and Human Services is required to adopt standards for specified transactions to enable health information to be exchanged electronically. The law requires that, within 24 months of adoption, all health plans, health care clearinghouses, and health care providers who choose to conduct these transactions electronically must comply with these standards. The law also requires the Secretary to adopt a number of supporting standards including standards for code sets and classifications systems. The Secretary is required to consult with the National Committee on Vital and Health Statistics (NCVHS) in complying with these provisions. The NCVHS is the Department's federal advisory committee on health data, privacy and health information policy.

The NCVHS already has provided recommendations to HHS relating to most of the transaction and supporting standards, and proposed regulations adopting those standards are being prepared by HHS for public review and comment in the **Federal Register**. HIPAA allowed an additional twelve months for adoption of the standard for claims attachments. To assist in the development of the NCVHS recommendations to HHS relating to the claims attachment standards, the NCVHS Subcommittee on Health Data Needs, Standards, and Security has scheduled a public meeting on February 9–10, 1998. At the meeting, the Subcommittee will obtain the perspectives, concerns and recommendations of interested and affected parties relating to this standard. In addition, the Subcommittee will review and discuss its overall work plan for the year, including medical classification issues and activities relating to population based-data.

Notice: In the interest of security, the Department has instituted stringent procedures for entrance to the Hubert H. Humphrey building by non-government employees. Thus, persons without a government identification card may need to have the guard call for an escort to the meeting.

Contact Person for More Information: Substantive program information as well as summaries of the meeting and a roster of committee members may be obtained from Bill Braithwaite, lead Subcommittee staff, Office of the Assistant Secretary for Planning and Evaluation, DHHS, Room 440–D, Humphrey Building, 200 Independence Avenue S.W., Washington, D.C. 20201, telephone (202) 260–0546, or Marjorie S. Greenberg, Executive Secretary, NCVHS, NCHS, CDC, Room 1100, Presidential Building, 6525 Belcrest Road, Hyattsville, Maryland 20782, telephone (301) 436–7050. Information also is available on the NCVHS home page of the HHS website: http://aspe.os.dhhs.gov/ncvhs/, where the agenda for the meeting will be posted when available.

Dated: January 21, 1998.

James Scanlon,

Director, Division of Data Policy, Office of the Assistant Secretary for Planning and Evaluation.

BILLING CODE 4151–04–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Health Resources and Service Administration; Statement of Delegation of Authority

Notice is hereby given that I have delegated to the Administrator of the Health Resources and Services Administration (HRSA), with authority to redelegate, all authorities vested in the Secretary of Health and Human Services under Title XXVI of the Public Health Service Act, Public Law 101–381, The Ryan White Comprehensive AIDS Resources Emergency Act of 1990, as amended by Public Law 104–146, as amended hereafter, pertaining to the HIV Health Care Services Program, as follows:

1. Part A (Title I of the CARE Act and Section 2601–07 of the PHS Act)—Emergency Relief for Areas with Substantial Need for Services;

2. Part B (Title II of the CARE Act and Sections 2611–21 of the PHS Act)—Care Grant Program to States and Territories;

3. Part C (Title III of the CARE Act and Sections 2651–54 of the PHS Act)—Early Intervention Services at community health clinics;

4. Part D (Title IV of the CARE Act and Section 2671 of the PHS Act)—Grants for Coordinated Services and Access to Research for Women, Infants, Children and Youth;

5. Part F.I., Section 2691 of the PHS Act—Special Projects of National Significance (SPNS);

6. Part F.II(a)., Section 2692(a) of the PHS Act—AIDS Education and Training Centers (AETC);

7. Part F.II.(b)., Section 2692(b) of the PHS Act—Dental Schools Reimbursement Program.

This delegation supersedes the delegation memorandum from the Assistant Secretary for Health to the HRSA Administrator, dated May 24, 1991.

This delegation is effective upon date of signature. In addition, I hereby affirm and ratify any actions taken by the HRSA Administrator or any subordinates which, in effect, involved the exercise of the authorities delegated herein prior to the effective date of the delegation.

Dated: January 20, 1998.

Donna E. Shalala,

Secretary.

BILLING CODE 4160–15–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Advisory Committee on Immunization Practices: Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Centers for Disease Control and Prevention (CDC) announces the following committee meeting.

Name: Advisory Committee on Immunization Practices (ACIP).

Times and Dates: 8:30 a.m.–5:15 p.m., February 11, 1998; 8:30 a.m.–1:15 p.m., February 12, 1998.

Place: CDC, Auditorium B, Building 2, 1600 Clifton Road, NE, Atlanta, Georgia 30333.

Status: Open to the public, limited only by the space available.

Purpose: The Committee is charged with advising the Director, CDC, on the appropriate uses of immunizing agents. In addition, under 42 U.S.C. 1396s, the Committee is mandated to establish and periodically review and, as appropriate, revise the list of vaccines for administration to vaccine-eligible children through the Vaccines for Children (VFC) program, along with schedules regarding the appropriate periodicity, dosage, and contraindications applicable to the vaccines.

Matters To Be Discussed: Agenda items will include updates from the National Center for Infectious Diseases; the National Immunization Program; the Vaccine Injury Compensation Program; the National Vaccine Program; update on influenza A(H5N1): epidemiologic and virologic surveillance and present status of vaccine development; update on influenza surveillance—U.S. and worldwide; influenza vaccination and Guillain Barre syndrome: update and proposed changes to ACIP recommendations; proposed changes to the 1998–1999 ACIP recommendations for prevention and control of influenza; immunization of bone marrow transplant recipients recommendations on the use of Rotashield® (rotavirus vaccine) as part of the routine childhood immunization schedule; report of work group on computerization of ACIP recommendations; ACIP combination vaccines recommendation; comprehensive resolutions for the Vaccines for Children (VFC) Program; vaccine identification standards initiative; and alopecia associated with hepatitis B vaccination. Other matters of relevance among the committee's objectives may be discussed.

Agenda items are subject to change as priorities dictate.

Contact Person for More Information: Gloria A. Kovach, Committee Management Specialist, CDC, 1600 Clifton Road, NE, M/S D–50, Atlanta, Georgia 30333, telephone 404/639–7250.

Dated: January 21, 1998.

Carolyn J. Russell,

Director, Management Analysis and Services Office, Centers for Disease Control and Prevention (CDC).

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Advisory Committees; Notice of Meetings

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing a tentative schedule of forthcoming meetings of its public advisory committees for 1998. At the request of the Commissioner of Food and Drugs (the Commissioner), the Institute of Medicine (the IOM) conducted a study of the use of FDA's advisory committees. The IOM recommended that the agency publish an annual tentative schedule of its meetings in the **Federal Register**. In response to that recommendation, FDA is publishing its annual tentative schedule of meetings for 1998.

FOR FURTHER INFORMATION CONTACT: Donna M. Combs, Committee Management Office (HFA–306), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–827–4820.

SUPPLEMENTARY INFORMATION: The IOM, at the request of the Commissioner, undertook a study of the use of FDA's advisory committees. In its final report, the IOM recommended that FDA adopt a policy of publishing an advance yearly schedule of its upcoming public advisory committee meetings in the **Federal Register**. FDA has implemented this recommendation. A tentative schedule of forthcoming meetings will be published annually in the **Federal Register**. The annual publication of tentatively scheduled advisory committee meetings will provide both advisory committee members and the public with the opportunity, in advance, to schedule attendance at FDA's upcoming advisory committee meetings. The schedule is tentative and amendments to this notice will not be published in the **Federal Register**. FDA will publish a **Federal Register** notice at least 15 days in advance of each upcoming advisory committee meeting, announcing the meeting (21 CFR 14.20).

The following list announces FDA's tentatively scheduled advisory committee meetings for 1998:

Committee Name	Dates of Meetings	Information-Line Code
OFFICE OF THE COMMISSIONER		
Science Board to the Food and Drug Administration	May 19 September 15	12603
CENTER FOR BIOLOGICS EVALUATION AND RESEARCH		
Allergenic Products Advisory Committee	March 23–24 September 14–15	12388
Biological Response Modifiers Advisory Committee	March 23–24	12389

VOL 63 ISS 18 JA 28 1998 UMI

Food and Drug Administration

[Docket No. 98D–0021]

Draft Guidance for Industry; Container and Closure Integrity Testing in Lieu of Sterility Testing as a Component of the Stability Protocol for Sterile Products; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of the draft guidance entitled "Guidance for Industry: Container and Closure Integrity Testing *in Lieu* of Sterility Testing as a Component of the Stability Protocol for Sterile Products." The draft guidance is intended to provide recommendations and offer alternative methods for sterility testing to confirm the integrity of container and closure systems for sterile biological products, human and veterinary drugs, and medical devices. The draft guidance applies only to the replacement of the sterility test with an appropriate container and closure integrity test in the stability protocol, and it is not offered as a replacement for sterility testing for product release.

DATES: Written comments may be provided at any time, however, to ensure comments are considered for the next revision they should be submitted by March 30, 1998.

ADDRESSES: Submit written comments on the draft guidance to the Dockets Management Branch (HFA–305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1–23, Rockville, MD 20857. Submit written requests for single copies of the draft guidance entitled "Guidance for Industry: Container and Closure Integrity Testing *in Lieu* of Sterility Testing as a Component of the Stability Protocol for Sterile Products" to the Office of Communication, Training, and Manufacturers Assistance (HFM–40), Center for Biologics Evaluation and Research, Food and Drug Administration, 1401 Rockville Pike, Rockville, MD 20852–1448. Send one self-addressed adhesive label to assist that office in processing your requests. The document may also be obtained by mail by calling the CBER Voice Information System at 1–800–835–4709 or 301–827–1800, or by fax by calling the FAX Information System at 1–888–CBER–FAX or 301–827–3844. See the SUPPLEMENTARY INFORMATION section for electronic access to the draft guidance.

FOR FURTHER INFORMATION CONTACT: Valerie A. Butler, Center for Biologics Evaluation and Research (HFM–17), Food and Drug Administration, 1401 Rockville Pike, suite 200N, Rockville, MD 20852–1448, 301–827–6210.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance entitled "Guidance for Industry: Container and Closure Integrity Testing *in Lieu* of Sterility Testing as a Component of the Stability Protocol for Sterile Products." The draft guidance provides general information on procedures and practices that should be considered when a manufacturer selects alternative methods to confirm sterility during stability studies of sterile biological products, human and veterinary drugs, and medical devices.

All sterile products are required to have adequate container and closure integrity and to remain free from contamination throughout the product's entire dating period. As a consequence of the limitations of sterility testing, FDA has determined that alternative methods are available that may more reliably confirm the integrity of the container and closure system in the final form throughout the entire dating period.

The draft guidance was prepared jointly by the following Centers: Center for Biologics Evaluation and Research (CBER), Center for Drug Evaluation and Research (CDER), Center for Veterinary Medicine (CVM), and Center for Devices and Radiological Health (CDRH). At the request of CBER's Stability and Formulation Committee, representatives from the Centers met on May 19, 1994, to discuss sterility testing as a component of the stability protocol. The ability of containers/packaging to maintain sterility should be proven for all sterile products.

As with other guidance documents, FDA does not intend this document to be all-inclusive and cautions that not all information may be applicable to all situations. The document is intended to provide information and does not set forth requirements. Alternative approaches may be warranted in specific situations, and certain aspects may not be applicable to all situations. If a manufacturer believes that the procedure described in the draft guidance is inapplicable to a particular method and other procedures are appropriate for FDA's consideration, the manufacturer may wish to discuss the matter further with the agency to prevent expenditure of money and effort on activities that later may be determined to be unacceptable by FDA. FDA will continue to review alternative methods on a case-by-case basis.

The draft guidance represents the agency's current thinking on container and closure integrity testing during stability monitoring for sterile products. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statute, regulations, or both. The draft guidance document is being distributed for comment purposes only and is not intended for implementation at this time.

II. Request for Comments

Interested persons may, at any time, submit written comments to the Dockets Management Branch (address above) regarding this draft guidance document. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments and requests for copies are to be identified with the docket number found in the brackets in the heading of this document. A copy of the draft guidance and received comments are available for public examination in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

III. Electronic Access

In order to receive the "Guidance for Industry: Container and Closure Integrity Testing *in Lieu* of Sterility Testing as a Component of the Stability Protocol for Sterile Products" via your fax machine, call the FAX Information System at 1–888–CBER–FAX or 301–827–3844.

Persons with access to the Internet may obtain the draft guidance document by using the World Wide Web (WWW). For WWW access, connect to CBER at "http://www.fda.gov/cber/guidelines.htm". Received comments will be considered in determining whether further revision of the draft guidance document is warranted.

Dated: January 21, 1998.

William K. Hubbard,

Associate Commissioner for Policy Coordination.

National Institutes of Health

Government-Owned Inventions; Availability for Licensing

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The inventions listed below are owned by agencies of the U.S. Government and are available for licensing in the U.S. in accordance with 35 U.S.C. 207 to achieve expeditious commercialization of results of federally-funded research and development. Foreign patent applications are filed on selected inventions to extend market coverage for companies and may also be available for licensing.

ADDRESSES: Licensing information and copies of the U.S. patent applications listed below may be obtained by writing to the indicated licensing contact at the Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, Maryland 20852–3804; *telephone:* 301/496–7057; *Fax:* 301/402–0220. A signed Confidential Disclosure Agreement will be required to receive copies of the patent applications.

Novel Attenuated Strains Mycobacterium Tuberculosis

CE Barry, Y. Yuan (NIAID).

Serial No.: 60/025,199 filed 10 July 97.

Licensing Contact: Carol Salata, 301/496–7735 ext 232.

This invention provides for novel attenuated strains of *Mycobacterium tuberculosis* and *M. bovis*. Attenuation is achieved by down-regulating the expression of the α-crystallin heat shock protein gene ("acr gene"). This gene is essential for virulence of the organism. Since this strain is isogenic with virulent *M. tuberculosis* but for this deletion, the full complement of antigens remains present and the organism is viable in vitro. The invention provides for vaccines and methods of vaccinating mammals for protection against *Mycobacterium sp.* that cause tuberculosis.

Method of Promoting Tumor Necrosis Using MIG

G Tosato (FDA), J Farber (NIAID), C Sgardari (FDA).

Serial No.: 08/850,914 filed 2 May 97.

Licensing Contact: Jaconda Wagner, 301/496–7735 ext 284.

Monokine induced by IFN–γ (Mig), which is structurally related to interferon-inducible protein 10 (IP–10), has been shown to exhibit antitumor activity. Mig is a member of the α chemokine family. Members of this chemokine family, PF4, PBP, CTAP–III βTG, NAP–2, IL–8 GROα, GROβ, GROγ, and IP–10, have been shown to act as an angiogenic or angiostatic factor. This invention relates to the use of Mig to promote the death of tumor tissue. It also relates to a method of inhibiting angiogenesis at a tumor site using Mig.

This research has been published in Blood 1997 Apr 15;89(8):2635–43 and J Leukoc Biol 1997 Mar;61(3):246–57.

A related case is also available for licensing: Serial No. 08/455,079 filed 31 May 95 entitled "Interferon-Inducible 10 (IP–10) is a Potent Inhibitor of Angiogenesis"; inventors are G Tosato, AL Angiolillo, and C Sgardari.

Formation of Human Bone In Vivo

PG Robey (NIDR), P Bianco (Universita dell Aquilla), Sa Kuznetsov (NIDR), PH Krebsback (NIDR), DW Rowe (University of Connecticut.

Serial No.: 08/798, 715 filed 12 Feb. 97.

Licensing Contact: Jaconda Wagner, 301/496–7735 ext 284.

This invention provides a model for studying human bone metabolism *in*

VOL 63 ISS 18 JA 28 1998 UMI

vivo. The model system can be used to screen compounds which inhibit or stimulate bone formation. A protocol using marrow stromal fibroblasts is also presented. Use of the protocol results in the formation of self-maintained human bone which supports hematopoiesis. The marrow stromal fibroblasts combined with the described delivery vehicles can be implanted into humans to augment bone implants or to repair bone defects.

This research has been published in J Bone Miner Res 1997 Sep;12(9):1335–47 and Transplantation 1997 Apr 27;63(8):1059–69.

Synthesis and Purification of Hepatitis C Virus Like Particles In Vitro

TJ Liang and TF Baumert (NIDDK).
Serial No.: 60/030,238 filed 8 Nov 96; PCT/US97/05096 filed 25 Mar. 97.
Licensing Contact: Carol Salata, 301/496–7735 ext 232.

Hepatitis C virus (HCV) is a major causative agent of posttransfusion and community-acquired hepatitis worldwide. Analysis of the structural features of HCV has been hampered by the inability to propagate the virus efficiently in cultural cells and the lack of a convenient animal model. This invention discloses the production and purification of HCV-like particles in eukaryotic cells. Infection of insect cells with a recombinant baculovirus containing the cDNA for the HCV structural proteins resulted in the formation of HCV-like particles in cytoplasmic cisternae of the insect cells. Sucrose gradient purification HCV-like particles exhibited similar biophysical properties as putative HCV virions. HCV-like particles, purified in large quantities, may be useful in HCV vaccine development or in diagnostic kits.

An Enzyme-Linked Immunosorbent Assay (ELISA) to Detect Antibodies to a Nonstructural Protein of Hepatitis A Virus (HAV)

RH Purcell, T Schultheiss, D Stewart, S Emerson (NIAID).
Serial No.: 60/013, 333 filed 13 Mar. 96; PCT/US97/03428 filed 13 Mar. 97.
Licensing Contact: George Keller, 301/496–7735 ext 246.

The current invention embodies an assay which can differentiate between an individual who has been vaccinated against Hepatitis A Virus (HAV), and one who has actually been infected with the virus. HAV infection results in the production of antibodies against both structural and nonstructural proteins of the virus. Inactivated HAV vaccines, which are commonly used for immunization against HAV, cause the production of antibodies against the structural proteins. Assays currently in use for determining exposure to HAV measure only antibodies to structural proteins, and therefore are incapable of differentiating between individuals who have been infected with HAV and those who have merely been immunized with the inactivated virus.

The assay embodied in the current invention is capable of detecting antibodies to the 3C proteinase, which is a nonstructural protein of HAV. This assay, which utilizes an ELISA for the detection of such antibodies, should represent a significant improvement over assays which are currently available.

Restriction Display (RD–PCR) of Differentially Expressed mRNAs

JN Weinstein, J. Buolamwini (NCI).
Serial No.: 60/011, 379 filed 09 Feb 96; PCT/US97/02009 filed 7 Feb. 97.
Licensing Contact: J. Peter Kim, 301/496–7056 ext 264.

This invention provides a kit and methods for detecting gene expression in cells by reverse transcribing mRNA molecules into cDNA, and selectively amplifying a subset of the cDNA by a polymerase chain reaction (PCR) to present a two-dimensional display of the fragments or for cloning into a vector using restriction enzyme recognition sites added during the PCR. In one aspect of this invention, only cDNA corresponding to the 3′ end of the mRNA is amplified and displayed or cloned. In another aspect of the invention, cDNA corresponding to the entire mRNA molecule is amplified for display or cloning. The method and kit may be useful in characterizing cells based on their mRNA content, representing expressed genes, and discovering therapeutics that alter cellular gene expression by characterizing cells of different types under a variety of physiological conditions. In addition to drug discovery, this approach may be used whenever expression of mRNA is to be assessed, for example, in studies of malignant transformation, carcinogenesis, immune activation, and developmental biology.

Selective Elimination of T-Cells that Recognize Specific Preselected Targets

A Rosenberg (FDA).
Serial No.: 60/002, 964 filed 30 Aug. 95; PCT filed 30 /Aug. 96.
Licensing Contact: Jaconda Wagner, 301/496–7735 ext 284

The invention relates to methods and compositions for the elimination of T cells that recognize specific preselected targets which can be used to threat autoimmune diseases and graft rejection.

The invention provides a method for selectively inhibiting or killing T cells that recognize a specific preselected target molecule and also for modified killer cells that bear a signal transduction molecule to which is attached the preselected target molecule. Recognition of the preselected molecule by a T cell activates the killer cell which then kills or inhibits the T cell. Where the preselected molecule is an extracellular domain of an MHC from a xenograft or an allograft, treatment of the graft recipient with the modified killer T cells delays or inhibits graft rejection. Similarly, where the preselected molecule is an MHC that binds the antigenic determinant of the autoimmune disease, treatment of the organism with the modified T cells mitigates the autoimmune response directed against the antigenic determinant.

This research was published in Transpl Immunol 1993; 1(2):93–9.

Dated: January 16, 1998.

Barbara M. McGarey,

Deputy Director, Office of Technology Transfer.

Notice of Receipt of Application for Endangered Species Permit

AGENCY: Fish and Wildlife Service, Interior.
ACTION: Notice of receipt.

The following applicant has applied for a permit to conduct certain activities with an endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*):

PRT–838253

Applicant: New York State Department of Environmental Conservation, Albany, New York.

The applicant requests authorization to take (harm and/or harass during management of habitat and monitoring of species) the Karner blue butterfly (*Lycaeides melissa samuelis*) throughout Albany, Schenectady, Saratoga, Warren,

Erie, and Oneida Counties of New York for the purpose of enhancement and survival of the species.

Written data or comments should be submitted to the Regional Permits Coordinator, U.S. Fish and Wildlife Service, 300 Westgate Center Drive, Hadley, Massachusetts 01035 and must be received within 30 days of the date of this publication.

Documents and other information submitted with this application are available for review by any party who submits a written request for a copy of such documents to the following office within 30 days of the date of publication of this notice: U.S. Fish and Wildlife Service, 300 Westgate Center Drive, Hadley, Massachusetts 01035, Attention: Diane Lynch, Regional Permits Coordinator. *Telephone:* (413) 253–8628; *FAX:* (413) 253–8482.

Dated: January 22, 1998.

Bureau of Land Management

[AK–962–1410–00–P; F–14943–B]

Notice for Publication; Alaska Native Claims Selection

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of Sec. 14(a) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1613(a), will be issued to Tanacross Incorporated for 10.69 acres. The lands involved are in the vicinity of Tok, Alaska.

Copper River Meridian, Alaska

T. 18 N., R. 13 E.,
Sec. 18, lots 1 and 2 of Block 5 embraced in the North Addition of Tok Alaska Townsite subdivision.

A notice of the decision will be published once a week, for four (4) consecutive weeks, in the *Fairbanks Daily News-Miner.* Copies of the decision may be obtained by contacting the Alaska State Office of the Bureau of Land Management, 222 West Seventh Avenue, #13, Anchorage, Alaska 99513–7599 ((907) 271–5960).

Any party claiming a property interest which is adversely affected by the decision, an agency of the Federal government or regional corporation, shall have until February 27, 1998 to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management at the address identified above, where the requirements for filing an appeal may be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR part 4, subpart E, shall be deemed to have waived their rights.

Patricia K. Underwood,
Land Law Examiner, ANCSA Team Branch of 962 Adjudication.

Northeast National Petroleum Reserve-Alaska Draft Integrated Activity Plan/ Environmental Impact Statement

AGENCY: Bureau of Land Management, Interior.
ACTION: Notice.

SUMMARY: The Bureau of Land Management announces a 30-day extension of the public comment period for the Northeast National Petroleum Reserve-Alaska Draft Integrated Activity Plan/Environmental Impact Statement (IAP/EIS).

DATE: Written comment must be submitted or postmarked no later than March 12, 1998.

ADDRESSES: Comments on the document should be addressed to: NPR-A Planning Team, Bureau of Land Management, Alaska State Office (930), 222 West 7th Avenue, Anchorage, Alaska 99513–7599. Comments can also be sent to the NPR–A home page (http://aurora.ak.blm.gov/npra/).

FOR FURTHER INFORMATION CONTACT: Gene Terland (907–271–3344; gterland@ak.blm.gov) or Jim Ducker (907–271–3369; jducker@ak.blm.gov). They can be reached by mail at the Bureau of Land Management (930), Alaska Sate Office, 222 West 7th Avenue, Anchorage, Alaska 99513–7599.

SUPPLEMENTAL INFORMATION: The Bureau of Land Management published a notice of availability for the IAP/EIS on December 12, 1997 (62 FR 65440). That notice indicates that the public comment period for the document ends February 10, 1998. The Bureau of Land Management has received requests from the public that the comment period be extended. This extension to March 12, 1998, responds to those requests.

Date: January 22, 1998.
Sally Wisely,
Associate State Director.

In 1916, human remains representing two individuals from the Kamehameha School grounds, Oahu were donated to the Bishop Museum by Ralph J. Borden. No known individuals were identified. No associated funerary objects are present.

In 1916, human remains representing one individual from Waikiki, Oahu were donated to the Bishop Museum by the City and County Medical Examiner. No known individual was identified. No associated funerary objects are present.

In 1916, human remains representing one individual from Manoa, Oahu were donated to the Bishop Museum by Fred P. Pierce. No known individual was identified. No associated funerary objects are present.

In 1917, human remains representing one individual from Honolulu, Oahu were donated to the Bishop Museum by Gerrit P. Wilder. No known individual was identified. No associated funerary objects are present.

In 1920, human remains representing one individual from Punchbowl, Oahu were donated to the Bishop Museum by Malcolm Perez. No known individual was identified. No associated funerary objects are present.

In 1922, human remains representing two individuals from Honolulu, Oahu were donated to the Bishop Museum by Charles A. McWayne. No known individuals were identified. No associated funerary objects are present.

In 1922, human remains representing two individuals from Manoa, Oahu were donated to the Bishop Museum by Mrs. E.A. Fennel. No known individuals were identified. No associated funerary objects are present.

In 1923, human remains representing one individual from the Ainahau district, Waikiki, Oahu were donated to the Bishop Museum by the Hawaiian Dredging Company. No known individual was identified. No associated funerary objects are present.

In 1923, human remains representing five individuals from Helumoa, Waikiki, Oahu were collected by Kenneth P. Emory. Museum information indicates they were victims of the 1853 smallpox epidemic. No known individuals were identified. No associated funerary objects are present.

In 1923, human remains representing 36 individuals from a cave in Nuuanu Valley, Oahu were collected by Kenneth P. Emory. No known individuals were identified. The sixteen associated funerary objects include a mirror, combs, and clothing.

In 1924, human remains representing eight individuals from Kahuku, Oahu were donated to the Bishop Museum by Kenneth P. Emory and R.T. Aitken. No known individuals were identified. No associated funerary objects are present.

In 1924, human remains representing 33 individuals from Kawailoa, Oahu were donated to the Bishop Museum by Kenneth P. Emory and Ronald von Holt. Museum information indicates these remains were found on a Hawaiian Pineapple Company road. No known individuals were identified. The nine associated funerary objects include buttons and earrings.

In 1924, human remains representing 36 individuals from Kawailoa, Oahu were donated to the Bishop Museum by Kenneth P. Emory and Ronald von Holt. No known individuals were identified. The two associated funerary objects are parts of a canoe coffin.

In 1924, human remains representing two individuals from Manoa, Oahu were donated to the Bishop Museum by Mrs. E.A. Fennel. No known individuals were identified. No associated funerary objects are present.

In 1924, human remains representing one individual from Nuuanu, Oahu were donated to the Bishop Museum by Hans G. Hornbostel. No known individual was identified. The one associated funerary objects is a shell.

In 1925, human remains representing one individual from the beach at Waianae, Oahu were donated to the Bishop Museum by T.J. Simpson. No known individual was identified. No associated funerary objects are present.

In 1925, human remains representing three individuals from Moiliili, Oahu were donated to the Bishop Museum by John F.G. Stokes and H.S. Palmer. No known individuals were identified. The one associated funerary object is a basalt flake.

In 1925, human remains representing thirteen individuals from Moiliili, Oahu were donated to the Bishop Museum by E.S.C. Handy. No known individuals were identified. The five associated funerary objects include small mammal bones.

In 1926, human remains representing one individual from Waikiki, Oahu were donated to the Bishop Museum by Joseph R. Carriera. Museum information indicates these remains were found during house construction. No known individual was identified. No associated funerary objects are present.

In 1926, human remains representing six individuals from Makiki, Oahu were donated to the Bishop Museum by Charles A. McWayne. No known individuals were identified. No associated funerary objects are present.

In 1926, human remains representing 16 individuals from Bishop Estate land in Kalihi, Oahu were donated to the Bishop Museum by Kilmer O. Moe and John F.G. Stokes. No known individuals were identified. The six associated funerary objects include basalt, cloth fragments, a mat fragment, and a wood fragment.

In 1926, human remains representing 20 individuals from a cave at Maunalua, Oahu were donated to the Bishop Museum by Kilmer O. Moe. No known individuals were identified. No associated funerary objects are present.

In 1926, human remains representing 28 individuals from Maunalua, Oahu were donated to the Bishop Museum by Kilmer O. Moe. No known individuals were identified. No associated funerary objects are present.

In 1926, human remains representing two individuals from Kailua, Oahu were donated to the Bishop Museum by Kenneth P. Emory. No known individuals were identified. No associated funerary objects are present.

In 1927, human remains representing one individual from Waikiki, Oahu were collected by C.C. Hartwell and acquired by the Bishop Museum. No known individual was identified. No associated funerary objects are present.

In 1927, human remains representing one individual from Lanikai, Oahu were donated to the Bishop Museum by Medford R. Kellum. Museum documentation indicates the remains were in a bundle at a depth of 5–1/2 feet. No known individual was identified. No associated funerary objects are present.

In 1927, human remains representing 22 individuals from Waialae Golf Course grounds, Oahu were donated to the Bishop Museum by the Bishop Estate. No known individuals were identified. No associated funerary objects are present.

In 1928, human remains representing three individuals from Nuuanu, Oahu were donated by Mrs. George Sherman. No known individual was identified. The one associated funerary object is a stick.

In 1928, human remains representing one individual from Hahaione Valley, Maunalua, Oahu were collected by John McCombs and acquired by the Bishop Museum. No known individual was identified. No associated funerary objects are present.

In 1928, human remains representing one individual from Lanikai, Oahu were collected by Kenneth Emory and acquired by the Bishop Museum. No known individual was identified. No associated funerary objects are present.

In 1929, human remains representing four individuals from Honolulu, Oahu were donated to the Bishop Museum by Chester R. Clark. No known individuals were identified. The one associated funerary object is a canine skull.

In 1929, human remains representing one individual from Waialae Iki, Oahu were donated to the Bishop Museum by John McCombs. No known individual was identified. No associated funerary objects are present.

In 1930, human remains representing three individuals from Kamoku Gulch, Waimea, Oahu were collected by J. Gilbert McAllister and donated to the Bishop Museum. No known individuals were identified. No associated funerary objects are present.

In 1930, human remains representing three individuals from a shallow shelter in the Kamilonui Valley, Oahu were collected by J. Gilbert McAllister and acquired by the Bishop Museum. No known individuals were identified. No associated funerary objects are present.

In 1931, human remains representing one individual from a cave at Black Point, Oahu were donated to the Bishop Museum by Jens M. Ostergaard. No known individual was identified. No associated funerary objects are present.

In 1931, human remains representing two individuals from Manoa, Oahu were donated to the Bishop Museum by Mr. and Mrs. George C. Cantlay. No known individuals were identified. No associated funerary objects are present.

In 1931, human remains representing one individual from Kahala, Oahu were donated to the Bishop Museum by John McCombs on behalf of Bishop Estate. Museum documentation indicates these remains were found during construction of a water pipe trench. No known individual was identified. No associated funerary objects are present.

In 1932, human remains representing one individual from Honolulu, Oahu were donated to the Bishop Museum by the Hawaiian Sugar Planters Association Experiment Station. No known individual was identified. No associated funerary objects are present.

In 1932, human remains representing one individual from Makiki, Oahu were acquired by the Bishop Museum. Museum documentation indicates these remains were found during house construction and collected by Edwin H. Bryan and Kenneth P. Emory. No known individual was identified. No associated funerary objects are present.

In 1933, human remains representing three individuals from stone pits at Ewa, Oahu were collected by J.W. Barrington and Edwin H. Bryan and acquired by the Bishop Museum. No known individuals were identified. No associated funerary objects are present.

In 1933, human remains representing five individuals from the beach at Kawailoa, Oahu were collected by Edwin H. Bryan and Kenneth P. Emory and acquired by the Bishop Museum. No known individuals were identified. No associated funerary objects are present.

In 1933, human remains representing one individual from Honolulu, Oahu were donated to the Bishop Museum by John T. Waterhouse. No known individual was identified. No associated funerary objects are present.

In 1933, human remains representing one individual from Kalama, Kailua, Oahu were donated to the Bishop Museum by Frederic C. Scribner. No known individual was identified. No associated funerary objects are present.

In 1936, human remains representing two individuals from a cave on a pipeline at Wailupe, Oahu were collected by Kenneth P. Emory and acquired by the Bishop Museum. No known individuals were identified. No associated funerary objects are present.

In 1937, human remains representing four individuals from Waialae Kahala, Oahu were donated to the Bishop Museum by John McCombs of Bishop Estate. Museum documentation indicates these remains were found in three feet of sand and may be from the 1853 smallpox epidemic. No known individuals were identified. No associated funerary objects are present.

In 1938, human remains representing six individuals from Honouliuli, Ewa, Oahu were collected by Kenneth P. Emory and William A. Lessa and acquired by the Bishop Museum. Museum documentation indicates these remains were in a shallow crypt burial one mile from the coast. No known individuals were identified. No associated funerary objects are present.

In 1939, human remains representing two individuals from Kahala, Oahu were donated to the Bishop Museum by B. Kanakanui Palmer. No known individuals were identified. No associated funerary objects are present.

In 1939, human remains representing one individual from Oahu were collected by Keith K. Jones and acquired by the Bishop Museum. No known individual was identified. No associated funerary objects are present.

In 1940, human remains representing one individual from Manoa, Oahu were collected by Joel M. Brooks and acquired by the Bishop Museum. No known individual was identified. No associated funerary objects are present.

In 1940, human remains representing two individuals from Waialae were donated to the Bishop Museum by John McCombs on behalf of the Bishop Estate. No known individuals were identified. The associated funerary object is a fish bone.

In 1941, human remains representing seven individuals from Pearl City, Oahu were donated to the Bishop Museum by Dr. and Mrs. Homer Hayes. No known individuals were identified. The associated funerary object is a stone.

In 1942, human remains representing two individuals from Kualakai, Ewa Beach, Oahu were donated to the Bishop Museum by an unknown donor. No known individuals were identified. No associated funerary objects are present.

In 1946, human remains representing one individual from "Waialee" Beach, Oahu were donated to the Bishop Museum by an unknown donor. No

known individual was identified. No associated funerary objects are present.

In 1947, human remains representing two individuals from Kailua, Oahu were donated to the Bishop Museum by Father Gay. No known individuals were identified. No associated funerary objects are present.

In 1948, human remains representing two individuals from Makiki, Oahu were donated to the Bishop Museum by Any Greenwell. No known individuals were identified. The six associated funerary object include glass, ivory and stone beads, shell ornaments, and a bone handle.

In 1948, human remains representing one individual from a cave at Waialua, Oahu were donated to the Bishop Museum by Charlotte Hall. No known individual was identified. No associated funerary objects are present.

In 1948, human remains representing two individuals from Sunset Beach, Oahu were donated to the Bishop Museum by R.P. Franklin. No known individuals were identified. No associated funerary objects are present.

In 1949, human remains representing two individuals from Palolo, Oahu were donated to the Bishop Museum by George M. Pacheco. No known individuals were identified. No associated funerary objects are present. Based on wood fragments and nails found at the site, these remains appear to have been interred in a coffin.

In 1949, human remains representing one individual from Mokuleia, Oahu were received by the Bishop Museum from Otto Degener. No known individual was identified. No associated funerary objects are present.

In 1950, human remains representing two individuals from Sunset Beach, Oahu were donated to the Bishop Museum by Colonel Oliver R. Franklin. No known individuals were identified. No associated funerary objects are present.

In 1950, human remains representing three individuals recovered from Diamond Head, Oahu during property excavation were donated to the Bishop Museum by Kenneth Murphy. No known individuals were identified. No associated funerary objects are present.

In 1950, human remains representing one individual from a cave on Hawaiiloa Ridge, Oahu were donated to the Bishop Museum by Everett E. Carlson. No known individual was identified. No associated funerary objects are present. Donor information indicates these remains were contained in a canoe and box coffin. These objects were not included in the donation.

In 1950, human remains representing two individuals from Kailua, Oahu were donated to the Bishop Museum by Dr. Harold L. Houvener. No known indivduals were identified. No associated funerary objects are present.

In 1950, human remains representing two individuals from Honolulu, Oahu were donated to the Bishop Museum by Tommy Giles. No known individuals were identified. The one associated funerary object is a butchered cow bone.

In 1950, human remains representing five individuals from Kuliouou Valley were donated to the Bishop Museum by an unknown donor. No known individuals were identified. The two associated funerary objects are turtle bones.

In 1950, human remains representing one individual from Niu, Oahu were donated to the Bishop Museum by Walter Johnson. No known individual was identified. No associated funerary objects are present.

In 1951, human remains representing fourteen individuals from Kahala, Oahu were collected by Mary Stacey and donated to the Bishop Museum. These remains were encountered during the laying of a sewer line. No known individuals were identified. No associated funerary objects are present.

In 1951, human remains representing one individual from Windward Oahu were donated to the Bishop Museum by an unknown donor. No known individual was identified. No associated funerary objects are present.

In 1951, human remains representing one individual from Wailupe Valley, Oahu were donated to the Bishop Museum by Mrs. George Whisenand. These remains were removed from a small burial cave found by neighborhood children. No known individual was identified. The six associated funerary objects include pieces of tapa, a bone whistle, matting, a comb, a pipe, and cordage.

In 1952, human remains representing one individual from Kahala, Oahu were collected by George F. Arnemann and donated to the Bishop Museum. No known individual was identified. No associated funerary objects are present.

In 1952, human remains representing 56 individuals from Kailua, Oahu were collected by Kenneth P. Emory and donated to the Bishop Museum. These human remains were recovered during construction of a subdivision. No known individuals were identified. No associated funerary objects are present.

In 1952, human remains representing 23 individuals from Kaneohe Bay, Oahu were donated to the Bishop Museum by Kenneth P. Emory. These human remains were collected by Dr. Emory and a University of Hawaii archaeology class. No known individuals were identified. The three associated funerary objects include cloth, shell, and a fish bone.

In 1952, human remains representing 18 individuals from Kailua, Oahu were donated to the Bishop Museum by Dorothy Barrere and Catherine Summers. No known individuals were identified. No associated funerary objects are present.

In 1952, human remains representing one individual from Nuuanu, Oahu were donated to the Bishop Museum by Dr. Howard H. Honda. No known individual was identified. No associated funerary objects are present.

In 1953, human remains representing two individuals from Kailua, Oahu were donated to the Bishop Museum by Dorothy Barrere. No known individuals were identified. No associated funerary objects are present.

In 1953, human remains representing seven individuals from Kailua, Oahu were donated to the Bishop Museum by Catherine Summers. No known individuals were identified. The four associated funerary objects are botanics, metal fragments, and glass beads.

In 1953, human remains representing four individuals from Kailua, Oahu were donated to the Bishop Museum by Mr. and Mrs. Thomas Dewey. These human remains were recovered as a result of bulldozing activity. No known individuals were identified. No associated funerary objects are present.

In 1953, human remains representing one individual from Honolulu, Oahu were donated to the Bishop Museum by Ichiro Oyeda. No known individual was identified. No associated funerary objects are present.

In 1954, human remains representing five individuals from Manoa Valley, Oahu were donated to the Bishop Museum by Edwin H. Bryan, Jr.. These human remains were found in a cave by two boys, and donor information indicates coffin material and post-contact artifacts were seen in the cave. No known individuals were identified. The three associated funerary objects are cloth, an iron implement, and a coffin fragment.

In 1954, human remains representing one individual from Kailua, Oahu were donated to the Bishop Museum by W.E. Thompson. These human remains were recovered as a result of house construction. No known individual was identified. No associated funerary objects are present.

In 1954, human remains representing two individuals from the bank of Kawainui Canal, Kailua, Oahu donated to the Bishop Museum by Catherine Summers. No known individuals were identified. No associated funerary objects are present.

In 1954, human remains representing one individual from Palolo Valley, Oahu were donated to the Bishop Museum by Rev. Floyd Sullivan, who collected the remains 30–40 years prior to the donation. No known individual was identified. No associated funerary objects are present.

In 1955, human remains representing four individuals from Lanikai, Oahu were donated to the Bishop Museum by Robert Creps. No known individuals were identified. No associated funerary objects are present.

In 1955, human remains representing one individual from Tantalus, Oahu were donated to the Bishop Museum by an unknown person. No known individual was identified. No associated funerary objects are present.

In 1955, human remains representing two individuals from Waikiki, Oahu were donated to the Bishop Museum by an unknown person. No known individuals were identified. No associated funerary objects are present.

In 1955, human remains representing one individual from Oahu were donated to the Bishop Museum by Dr. Howard H. Honda. No known individual was identified. No associated funerary objects are present.

In 1955, human remains representing one individual from Wailupe, Oahu were donated to the Bishop Museum by E.B. Kudlich. No known individual was identified. No associated funerary objects are present.

In 1956, human remains representing 32 individuals from Pupukea, Oahu were donated to the Bishop Museum by Fred Shimote. These human remains were recovered from a reburial pit. No known individuals were identified. No associated funerary objects are present.

In 1956, human remains representing 17 individuals from Kailua, Oahu were donated to the Bishop Museum by Kenneth P. Emory. These human remains were collected by Kenneth P. Emory and assistants. The one associated funerary object is a turtle bone.

In 1956, human remains representing 26 individuals from Wailupe Valley, Oahu were donated to the Bishop Museum by Lawrence P. Richards. No known individuals were identified. The one associated funerary object is a glass bead.

In 1957, human remains representing nine individuals from Waikiki, Oahu were donated to the Bishop Museum by G.D. Center. No known individuals were identified. The one associated funerary object is a canine bone.

In 1958, human remains representing three individuals from Kuliouou Valley, Oahu were donated to the Bishop Museum by Mrs. Ernest Dias. Donor information indicates these human remains were recovered from a walled cave. No known individuals were identified. No associated funerary objects are present.

In 1958, human remains representing ten individuals from Kailua, Oahu were donated to the Bishop Museum by Arthur M. Tavares. No known individuals were identified. No associated funerary objects are present.

In 1959, human remains representing two individuals from Kalihi Valley, Oahu were donated to the Bishop Museum by Lino Patubo, Jr.. Donor information indicates these human remains were found near a small cave. No known individuals were identified. No associated funerary objects are present.

In 1959, human remains representing seven individuals from Ewa, Oahu were donated to the Bishop Museum by the Anthropology Club of the University of Hawaii. Donor information indicates these remains were recovered from Standard Oil Refinery land. No known individuals were identified. The one associated funerary object is decayed wood.

In 1959, human remains representing one individual from Niu Valley, Oahu were donated to the Bishop Museum by R. Smith. Donor information indicates these human remains were found in a cave. No known individual was identified. No associated funerary objects are present.

In 1960, human remains representing one individual from Kalihi Valley, Oahu were donated to the Bishop Museum by Manuel Diaz, Charles Kahunanui, and Randy Babino. No known individual was identified. No associated funerary objects are present.

In 1960, human remains representing one individual from Kawailoa Valley, Oahu were donated to the Bishop Museum by A. Anderson. No known individual was identified. The four associated funerary objects include tapa, sticks, kukui nuts, and fibers.

In 1961, human remains representing one individual from Kailua, Oahu were collected and donated to the Bishop Museum by Chet Gorman. Donor information indicates these human remains were recovered from the west bank of Kaelepulu Stream after exposure by bulldozing. No known individual was identified. No associated funerary objects are present.

In 1961, human remains representing one individual from Waikiki, Oahu were collected and donated to the Bishop Museum by Chet Gorman. No known individual was identified. The three associated funerary objects include two glass bottles, and a kukui nut.

In 1961, human remains representing seven individuals from Kaluanui Ridge, Oahu were donated to the Bishop Museum by Marimari Kellum. No known individuals were identified. The one associated funerary object is a drilled dog tooth.

In 1962, human remains representing one individual from Waikiki, Oahu were donated to the Bishop Museum by David Jackson Engineering Equipment Company. No known individual was identified. The one associated funerary object is a piece of metal.

In 1962, human remains representing one individual from Kailua, Oahu were collected and donated to the Bishop Museum by Robert N. Bowen. Donor information indicates these human remains were recovered from the west bank of Kaelepulu Stream. No known individual was identified. The three associated funerary objects include a basalt flake, sand, and a shell.

In 1962, human remains representing one individual from Waialae-Kahala were collected and donated to the Bishop Museum by Robert N. Bowen. No known individual was identified. The one associated funerary object is a piece of coral.

In 1963, human remains representing five individuals from Waikiki, Oahu were donated to the Bishop Museum by W.T. Chang contractors. No known individuals were identified. No associated funerary objects are present.

In 1963, human remains representing 96 individuals from Waikiki, Oahu were collected and donated to the Bishop Museum by Robert N. Bowen. No known individuals were identified. The 17 associated funerary objects include coral, shells, a soil sample, a glass jar, sand and charcoal samples, and bovine bones.

In 1963, human remains representing one individual from Kailua, Oahu were collected and donated to the Bishop Museum by Robert N. Bowen. Donor information indicates these human remains were collected from a bank on the Kaelepulu stream. No known individual was identified. No associated funerary objects are present.

In 1963, human remains representing three individuals from Waialae Golf Course, Oahu were collected and donated to the Bishop Museum by Robert N. Bowen. No known individuals were identified. The three associated funerary objects include a piece of basalt, a piece of coral, and whale tooth beads.

In 1964, human remains representing three individuals from Maili Beach Park, Oahu were collected and donated to the Bishop Museum by Robert N. Bowen. No known individuals were identified. The nine associated funerary objects include a soil sample, a botanical sample, a wood fragment, nails, sand, and metal fragments.

In 1964, human remains representing one individual from Kailua, Oahu were donated to the Bishop Museum by Homer Hayes. No known individual was identified. No associated funerary objects are present.

In 1964, human remains representing four individuals from Waikiki, Oahu were collected and donated to the Bishop Museum by Lloyd J. Soehren. No known individuals were identified. No associated funerary objects are present.

In 1964, human remains representing seven individual from Dillingham, Oahu were donated to the Bishop Museum by an unknown person. No known individuals were identified. No associated funerary objects are present.

In 1964, human remains representing one individual from St. Louis Heights, Oahu were donated to the Bishop Museum by Glenn Shiroma. No known individual was identified. No associated funerary objects are present.

In 1964, human remains representing one individual from Kailua, Oahu were donated to the Bishop Museum by Allan M. Anderson. No known individual was identified. No associated funerary objects are present.

In 1965, human remains representing one individual from Black Point, Oahu were donated to the Bishop Museum by George Kuprash. Donor information indicates these human remains were recovered during house construction. No known individual was identified. The one associated funerary object is a soil sample.

In 1965, human remains representing one individual from Makapuu Beach, Oahu were donated to the Bishop Museum by John Wolfe. No known individual was identified. No associated funerary objects are present.

In 1965, human remains representing one individual from Kahala, Oahu were donated to the Bishop Museum by Barbara Walker. No known individual was identified. The seven associated funerary objects include basalt stones, coral, fishbone, and shell.

In 1965, human remains representing 43 individuals from Palolo Valley, Oahu were donated to the Bishop Museum by Hiram Teshima. No known individuals were identified. The eight associated funerary objects include a gourd fragment, a bird beak, lauhala pieces, rat bones, and a coconut.

In 1965, human remains representing one individual from Kahuku, Oahu were collected and donated to the Bishop Museum by Robert N. Bowen. No known individual was identified. No associated funerary objects are present.

In 1965, human remains representing nine individuals from Manoa Valley, Oahu were donated to the Bishop Museum by Joseph Backus. Donor information indicates these human remains were removed from a cave. No known individuals were identified. The nine associated funerary objects include a wood pipe, a bone comb, nails, a button, glass beads, and kukui nuts.

In 1965, human remains representing two individuals from Kaneohe Bay, Oahu were donated to the Bishop Museum by L.D. Ackerman. No known individuals were identified. The one associated funerary object is a rabbit skull.

In 1966, human remains representing 32 individuals from Kahala cemetary, Oahu were collected and donated to the Bishop Museum by Robert N. Bowen and Lloyd J. Soehren. Donor information indicates these human remains were collected during construction activity. No known individuals were identified. The 189 associated funerary objects include coins, rings, glass beads, pottery, pipes, cloth, and thimbles.

In 1966, human remains representing one individual from Kahala, Oahu were donated to the Bishop Museum by Lloyd J. Soehren. No known individual was identified. No associated funerary objects are present.

In 1966, human remains representing two individuals from Aina Haina, Oahu were collected and donated to the Bishop Museum by Lloyd J. Soehren. Donor information indicates these human remains were removed from a small cave. No known individuals were identified. No associated funerary objects are present.

In 1966, human remains representing one individual from Kahala, Oahu were collected and donated to the Bishop Museum by Robert N. Bowen. Donor information indicates these human remains were recovered during construction activity. No known individual was identified. No associated funerary objects are present.

In 1966, human remains representing one individual from Kailua, Oahu were donated to the Bishop Museum by an unknown person. Information with these human remains indicates they were recovered by a construction crew. No known individual was identified. No associated funerary objects are present.

In 1966, human remains representing one individual from Makiki Heights, Oahu were donated to the Bishop Museum by George Santana and Milburn Halemanu. No known individual was identified. No associated funerary objects are present.

In 1966, human remains representing one individual from Kawailoa, Oahu were donated to the Bishop Museum by P. Crooks. No known individual was identified. No associated funerary objects are present.

In 1967, human remains representing one individual from Waikiki, Oahu were collected and donated to the Bishop Museum by Lloyd J. Soehren. No known individual was identified. The one associated funerary object is a shell.

In 1967, human remains representing one individual from Waimea Valley, Oahu were donated to the Bishop Museum by T. Foss. No known individual was identified. No associated funerary objects are present.

In 1969, human remains representing one individual from Laie, Oahu were donated to the Bishop Museum by Hal H. Hunter. Donor information indicates these human remains were recovered from an eroding sand dune. No known individual was identified. No associated funerary objects are present.

In 1969, human remains representing four individuals from Kahuku, Oahu were donated to the Bishop Museum by Sidney Kim-Han of the Honolulu Police Department. Donor information indicates these human remains were recovered from the ocean side of the Kahuku rubbish dump. No known individuals were identified. No associated funerary objects are present.

In 1969, human remains representing one individual from Haleiwa, Oahu were donated to the Bishop Museum by Frank O. Hay, Jr.. Donor information indicates these human remains were washed out by oceanwaves at the site. No known individual was identified. The one associated funerary object is a rock.

In 1969, human remains representing one individual from Kaneaki Heiau, Makaha, Oahu were accessioned by the Bishop Museum. These human remains were collected by Edmund Ladd and Russ Apple and are associated with Bishop Museum Archaeology project 012. No known individual was identified. No associated funerary objects are present.

In 1970, human remains representing eight individuals from Waikiki, Oahu were donated to the Bishop Museum by the Sheraton Hawaii Corp. Donor information indicates these human remains were recovered during excavations for tank construction. No known individuals were identified. No associated funerary objects are present.

In 1971, human remains representing 11 individuals from Kaalakei Ridge, Oahu were recovered from a cave by Patrick C. McCoy during Bishop Museum Archaeology Project 045. No known individuals were identified. No associated funerary objects are present.

In 1972, human remains representing three individuals from the north shore of Oahu were donated to the Bishop Museum by Dr. James Thoene. Donor information indicates Dr. Thoene received these human remains from a transient. No known individuals were identified. The three associated funerary objects include a stick, cordage, and basalt.

In 1972, human remains representing one individual from Kuliouou, Oahu were donated to the Bishop Museum by Roxanne Grigalot. No known individual was identified. No associated funerary objects are present.

In 1972, human remains representing two individuals from Haiku Valley, Oahu were collected and donated to the Bishop Museum by Robert Quick. Donor information indicates these human remains were recovered during bulldozing activity. No known individuals were identified. No associated funerary objects are present.

In 1972, human remains representing five individuals from Kahuku, Oahu were donated to the Bishop Museum by D. Yuen. No known individuals were identified. The one associated funerary object is a bird bone.

In 1974, human remains representing one individual from Oahu were donated to the Bishop Museum by Dr. Kam Chun. Donor information indicates Dr. Chun received these human remains in 1927 from a naval officer at the Wailupe Naval Station. The exact provenance of these human remains is unknown. No known individual was identified. No associated funerary objects are present.

In 1974, human remains representing four individuals from Kailua were donated to the Bishop Museum by Gene Hunter. No known individuals were identified. No associated funerary objects are present.

In 1975, human remains representing one individual from an unspecified location on Oahu were donated to the Bishop Musem by Beth Cutting. Donor information indicates these human remains were purchased from an antique shop. No known individual was identified. No associated funerary objects are present.

In 1975, human remains representing one individual from Kaneohe were recovered during Bishop Museum Archaeology Project 60 and 138 by Patrick C. McCoy, Aki Sinoto, Ranjit Cooray, Patrick Kirch, and Paul Rosendahl. No known individual was identified. No associated funerary objects are present.

In 1977, human remains representing one individual from Laie, Oahu were donated to the Bishop Museum by Aki Sinoto. No known individual was identified. The one associated funerary object is a canine bone.

In 1978, human remains representing two individuals from Kahuku, Oahu were donated to the Bishop Museum by the Honolulu Police Department. No known individuals were identified. The one associated funerary object is fish bone.

In 1979, human remains representing three individuals from Makiki, Oahu were recovered by Eric Komori during the Bishop Museum Archaeology Project 222. Project documentation indicates these human remains were recovered from the former Hawaii Sugar Planters Association Experiment Station. No known individuals were identified. The one associated funerary object is glass bead.

In 1980, human remains representing two individuals from Honolulu, Oahu were donated to the Bishop Museum by Royal Queen Emma Partners. No known individuals were identified. No associated funerary objects are present.

In 1980, human remains representing one individual from Laie, Oahu were donated to the Bishop Museum by the Honolulu Police Department. Donor information indicates these human remains were recovered from a sand burial. No known individual was identified. No associated funerary objects are present.

In 1980, human remains representing nine individuals from Honouliuli, Oahu were collected and donated to the Bishop Museum by Robert Albert, Douglas Borthwick, and William Folk. Donor information indicates these human remains were recovered from coral sinkholes. No known individuals were identified. No associated funerary objects are present.

In 1981, human remains representing five individuals from the Yokohama Bay area, Oahu were donated to the Bishop Museum by Officer Louis Souza of the Honolulu Police Department. Donor information indicates these human remains were found in a cave by hikers. No known individuals were identified. No associated funerary objects are present.

In 1981, human remains representing eight individuals from Waikiki, Oahu were collected and donated to the Bishop Museum by Bertell Davis. No known individuals were identified. No associated funerary objects are present.

In 1982, human remains representing one individual from Kailua Beach, Oahu were donated to the Bishop Museum by Mrs. Faye Myers. No known individual was identified. The three associated funerary objects include a turtle bone, a stone, and a nail.

In 1982, human remains representing one individual from Kailua, Oahu were donated to the Bishop Museum by Ray H. Greenfield. No known individual was identified. No associated funerary objects are present.

In 1982, human remains representing three individuals from Anahulu, Waialua, Oahu were collected and donated to the Bishop Museum by Arthur Saxe. No known individuals were identified. The three associated funerary objects include kapa, cordage, and a kukui nut.

In 1983, human remains representing four individuals from Kaneohe or Kahaluu, Oahu were donated to the Bishop Museum by Ray H. Greenfield. Donor information indicates that Mr. Greenfield collected the human remains in c. 1963, but could not remember the specific location. No known individuals were identified. No associated funerary objects are present.

In 1984, human remains representing two individuals from Kawailoa were recovered by Anne M. Garland during Bishop Museum Archaeology Project 324. No known individuals were identified. No associated funerary objects are present.

In 1984, human remains representing two individuals from Waimea, Oahu were donated to the Bishop Museum by an unknown person. No known individuals were identfied. No associated funerary objects are present.

In 1985, human remains representing two individuals from Waikalua-loko, Kaneohe, Oahu were recovered by Stephan Clark and Mary Riford during Bishop Museum Archaeology Project 347. No known individuals were identified. The two associated funerary objects are basalt cobbles.

In 1986, human remains representing two individuals from Kahala, Oahu were collected and donated to the Bishop Museum by Toni Han and Wendall Kim. Donor information indicates these human remains were recovered during a gardening project. No known individuals were identified. The five asssociated funerary objects are shell, glass fragments, metal fragments, and a porcine bone.

In 1986, human remains representing one individual from Queen's Beach, Oahu were collected and donated to the Bishop Museum by Toni Han and Aki Sinoto. No known individual was

identified. The two associated funerary objects are a penny, and a bovine bone.

In 1987, human remains representing one individual from Makaha, Oahu were recovered by Eric Komori during Bishop Museum Archaeology Project 382. No known individual was identified. No associated funerary objects are present.

In 1989, human remains representing one individual from Kahuku, Oahu were collected and donated to the Bishop Museum by Paul Cleghorn. Donor information indicates these human remains were recovered during construction activity. No known individual was identified. The one associated funerary object is a shell.

In 1990, human remains representing one individual from the Sunset Beach area were donated to the Bishop Museum by Douglas M. Hawkins. Donor information indicates these human remains were collected in 1957. No known individual was identified. No associated funerary objects are present.

In 1995, human remains representing one individual from Oahu were donated to the Bishop Museum by Christopher A. Hays. Donor information indicates the donor's father removed these human remains from a burial cave at some time during 1963–1966. No known individual was identified. No associated funerary objects are present.

In 1995, human remains representing one individual from Waianae, Oahu were found in the collections of the Bishop Museum. Information with the remains indicates they were acquired from Dr. C.P. Hoyt at an unknown date. No known individual was identified. No associated funerary objects are present.

In 1995, human remains representing one individual from Kahuku, Oahu were found in the collections of the Bishop Museum. Information with the remains indicates they were acquired from Aki Sinoto and Eric Komori at an unknown date. No known individual was identified. The three associated funerary objects are porcine bone, shell, wood fragments.

In 1995, human remains representing one individual from Nuuanu Valley, Oahu were found in the collections of the Bishop Museum. No acquisition date or donor has been identified. No known individual was identified. No associated funerary objects are present.

In 1995, human remains representing 11 individuals from Kalihi Valley and Manoa Valley, Oahu were found in the collections of the Bishop Museum. Information with these human remains indicates they were donated in 1916 by a Mr. Olsen. No known individuals were identified. No associated funerary objects are present.

In 1995, human remains representing one individual from Kailua, Oahu were found in the collections of the Bishop Museum. Information with these human remains indicates they were donated circa 1938 from a Dr. Dudley. No known individual was identified. No associated funerary objects are present.

In 1995, human remains representing eight individuals from Kuliouou, Oahu were found in the collections of the Bishop Museum. Information with these human remains indicates they were collected by Kenneth P. Emory, acquisition date unknown. No known individuals were identified. No associated funerary objects are present.

In 1996, human remains representing one individual from Waikiki, Oahu were found in the collections of the Bishop Museum. Information with the remains indicates they were acquired during the early 1900s from an unknown donor. No known individual was identified. No associated funerary objects are present.

In 1996, human remains representing one individual from Kaneohe, Oahu were donated to the Bishop Museum by Nicolas Fern. No known individual was identified. No associated funerary objects are present.

In 1996, human remains representing one individual from Kuliouou were found in the collections of the Bishop Museum. Information with these remains indicates they were donated in 1956 by Kenneth P. Emory. No known individual was identified. No associated funerary objects are present.

In 1996, human remains representing one individual from Oahu were found in the collections of the Bishop Museum. No further information is available. No known individual was identified. No associated funerary objects are present.

In 1996, human remains representing one individual from Maunalua, Oahu were found in the collections of the Bishop Museum. Information with the remains indicates they were donated by Kenneth P. Emory at an unknown date. No known individual was identified. No associated funerary objects are present.

Based on the style and type of associated funerary objects, manner of interments, and recovery locations, the human remains listed above have been determined to be Native Hawaiian. In consultation with Native Hawaiian organizations, the Bishop Museum decided that no attempt would be made to determine the age of the human remains.

Based on the above mentioned information, officials of the Bishop Museum have determined that, pursuant to 43 CFR 10.2 (d)(1), the human remains listed above represent the physical remains of 953 individuals of Native American ancestry. Officials of the Bishop Museum have also determined that, pursuant to 43 CFR 10.2 (d)(2), the 357 objects listed above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony. Lastly, officials of the Bishop Museum have determined that, pursuant to 43 CFR 10.2 (e), there is a relationship of shared group identity which can be reasonably traced between these Native American human remains and associated funerary objects and the Adminstrator of the Island Burial Councils, Alu Like, Hawaiian Civic Club of Honolulu, Daughters and Sons of Hawaiian Warriors, Hui Malama I Na Kupuna O Hawai'i Nei, Ka Lahui Hawai'i, Kamehameha Schools/Bishop Estate, Nahoa 'Olelo O Kamehameha Society, the Oahu Burial Council, the Office of Hawaiian Affairs, and Royal Order of Kamehameha I.

This notice has been sent to officials of Adminstrator of the Island Burial Councils, Alu Like, Hawaiian Civic Club of Honolulu, Daughters and Sons of Hawaiian Warriors, Hui Malama I Na Kupuna O Hawai'i Nei, Ka Lahui Hawai'i, Kamehameha Schools/Bishop Estate, Nahoa 'Olelo O Kamehameha Society, the Oahu Burial Council, the Office of Hawaiian Affairs, and Royal Order of Kamehameha I. Representatives of any other Native Hawaiian organization that believes itself to be culturally affiliated with these human remains and associated funerary objects should contact Janet Ness, Registrar, Bernice Pauahi Bishop Museum, 1525 Bernice Street, Honolulu, HI 96817; telephone: (808) 848–4105; before February 27, 1998. Repatriation of the human remains and associated funerary objects to the culturally affiliated Native Hawaiian organizations may begin after that date if no additional claimants come forward.

Dated: January 20, 1998.

Francis P. McManamon,

Departmental Consulting Archeologist, Manager, Archeologist and Ethnography Program.

BILLING CODE 4310–70–F

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Inventory Completion for Native American Human Remains and Associated Funerary Objects from Maine in the Possession of the Department of Anthropology, University of Maine, Orono, ME

AGENCY: National Park Service.

ACTION: Notice.

Notice is hereby given in accordance with provisions of the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003 (d), of the completion of an inventory of human remains and associated funerary objects from Maine in the possession of the Department of Anthropology, University of Maine, Orono, ME.

A detailed assessment of the human remains was made by University of Maine professional staff and a consulting forensic anthropologist in consultation with representatives of the Aroostook Band of MicMacs, Houlton Band of Maliseets, Passamaquoddy Tribe, and the Penobscot Indian Nation.

Prior to 1966, human remains representing one individual were uncovered at Benton Falls, ME during a mill foundation excavation. These human remains were donated to the Department of Anthropology, University of Maine by an unknown person. No known individual was identified. The three associated funerary objects are tubular copper beads.

Based on the associated funerary objects, this individual has been determined to be Native American. The copper beads also appear to be from the historic period (post–1600 AD). Because these human remains are likely from the post-contact period (post–1600 A.D.) and historical documents place the Wabanaki in Maine during this time, these human remains are affiliated with the Micmac, Malecite, Passamaquoddy, Penobscot present-day tribes.

In 1968, human remains representing one individual were recovered from the Hathaway site (91–1), Passadumkeag, ME during an archaeological excavation conducted by Dr. Dean Snow and sponsored by the University of Maine and the National Science Foundation. No known individual was identified. No associated funerary objects were present.

Archaeological evidence based on the material culture of Maine indicates that the Ceramic Period (c. 1,000 B.C. to the contact period) "is the prehistory of those Algonkian speakers known generally as the Wabenakis; including the Micmac, Malecite, Passamaquoddy, [and] Penobscot." A radiocarbon date of 200+/–80 A.D. from charcoal near the human remains dates these remains to well within the Ceramic Period considered ancestral to the present-day tribes of Maine.

During the 1960s, human remains representing one individual were donated to the University of Maine by the Portland Society of Natural History. In 1930, these human remains were recovered during streetcar track construction in Waterville, ME. No known individuals were identified. No associated funerary objects are present.

Based on dental morphology, this individual has been determined to be Native American. Published reports of the excavation indicated there was red-stained sand in association with these human remains (the sand was not recovered). Based on the state of preservation and the lack of red staining on these human remains, the date of burial has been estimated to be from the Ceramic into the Historic period (c. 1,000 B.C. to post–1600 A.D.). Archaeological evidence based on the material culture of Maine indicates that the Ceramic Period (c. 1,000 B.C. to the contact period) "is the prehistory of those Algonkian speakers known generally as the Wabenakis; including the Micmac, Malecite, Passamaquoddy, [and] Penobscot."

During the 1960s, human remains representing one individual were donated to the University of Maine by the Portland National History Society. No known individual was identified. No associated funerary objects are present.

Information accompanying these human remains indicate they were recovered from Rogers (possibly Roques or Rogues) Island. No further information is available. Based on the state of preservation of the remains and coastal location of the site, a shell midden context for these human remains is likely. Interment in shell middens is commonly associated with the Ceramic period. Archaeological evidence based on the material culture of Maine indicates that the Ceramic Period (c. 1,000 B.C. to the contact period) "is the prehistory of those Algonkian speakers known generally as the Wabenakis; including the Micmac, Malecite, Passamaquoddy, [and] Penobscot."

During the 1960s, human remains representing one individual were donated to the Department of Anthropology, University of Maine by the Portland Natural History Society. No known individual was identified. No associated funerary objects are present.

Information accompanying these human remains indicates that they were acquired in 1924 by Mr. Samuel Hiscock of Round Pond, ME from a "workman" digging in the Damariscotta Oyster Shell Heaps, ME. This information also suggests there may have been some Ceramic period objects with the human remains which were not included in the donation. Archaeological evidence based on the material culture of the Damariscotta Shell Heaps indicates that the Ceramic Period (c. 1,000 B.C. to the contact period) "is the prehistory of those Algonkian speakers known generally as the Wabenakis; including the Micmac, Malecite, Passamaquoddy, [and] Penobscot."

During the 1960s, human remains representing two individuals from Cape Elizabeth and South Freeport, ME were donated to the Department of Anthropology, University of Maine by the Portland Natural History Society. No known individuals were identified. No associated funerary objects are present.

Information with these human remains indicates they were removed from Cape Elizabeth, ME and donated to the Portland Natural History Society in 1955 by Mr. and Mrs. Rogerson of Portland, ME; and a Mr. Randall donated additional human remains from South Freeport, ME. These human remains were not cataloged by the Portland Natural History Society, and have been co-mingled so that it is not possible to separate them by locality. Based on dental morphology, these human remains have been determined to be Native American. Based on the recovery of these human remains from the bases of eroded banks and the state of preservation of the remains, the date of burial has been estimated to be from the Ceramic into the Historic period (c. 1,000 B.C. to post–1600 A.D.). Archaeological evidence based on the material culture of Maine indicates that the Ceramic Period (c. 1,000 B.C. to the contact period) "is the prehistory of those Algonkian speakers known generally as the Wabenakis; including the Micmac, Malecite, Passamaquoddy, [and] Penobscot."

Prior to 1971, human remains representing one individual from "High Point", Hampden, ME were donated to the Department of Anthropology, possibly by Mr. Earl Banks. No known individual was identified. No funerary objects are present.

Based on the molar wear patterns present, this individual has been determined to be Native American. Although this exact site is unknown, the state of preservation of these human remains indicate that they are fairly recent, probably post-contact (c.1600).

VOL
63
ISS
18
JA

1998
UMI

Because these human remains are likely from the post-contact period (post–1600 A.D.) and historical documents place the Wabanaki in Maine during this time, these human remains are affiliated with the Micmac, Malecite, Passamaquoddy, Penobscot present-day tribes.

In 1973, human remains representing a minimum of one individual were recovered from a highly disturbed sand dune (71–2) in Farmington Falls, ME by unknown person(s) and have been curated at the Department of Anthropology, University of Maine, since that time. No known individual was identified. No associated funerary objects are present.

Based on the state of preservation, these human remains are believed to date from the Ceramic period into the contact period. Archaeological evidence based on the material culture of Maine indicates that the Ceramic Period (c. 1,000 B.C. to the contact period) "is the prehistory of those Algonkian speakers known generally as the Wabenakis; including the Micmac, Malecite, Passamaquoddy, [and] Penobscot."

In 1973, human remains representing two individuals were removed from Winnock's Neck (site 8–1), Scarboro, ME during investigations by amateur archeologists. These human remains and field notes pertaining to them were subsequently donated to the University of Maine by unknown individual(s). No known individuals were identified. No associated funerary objects are present.

The field notes accompanying these remains indicate they were recovered with three pottery sherds, indicating a likely Ceramic Period date for these human remains. Archaeological evidence based on the material culture of Maine indicates that the Ceramic Period (c. 1,000 B.C. to the contact period) "is the prehistory of those Algonkian speakers known generally as the Wabenakis; including the Micmac, Malecite, Passamaquoddy, [and] Penobscot."

In 1984, human remains representing a minimum of one individual from the Todd site (17–11) Bremem, ME were recovered by a University of Maine research team. No known individual was identified. No associated funerary objects are present.

The Todd site (17–11) has been identified as a shell midden dating to the late Ceramic period (post 1000 A.D.). Archaeological evidence based on the material culture of Maine indicates that the Ceramic Period (c. 1,000 B.C. to the contact period) "is the prehistory of those Algonkian speakers known generally as the Wabenakis; including the Micmac, Malecite, Passamaquoddy, [and] Penobscot."

In 1989, human remains representing a minimum of nine individuals were recovered from the Eddington Bend site (74–8), Eddington, ME during a FERC-required recovery excavation by University of Maine personnel. No known individuals were identified. No associated funerary objects were recoverable.

Based on dental morphology, these individuals have been determined to be Native American. Based on the presence of a highly oxidized and unrecoverable piece of iron in the pit feature with the human remains and apparent iron or steel tool cut marks on the bones, these human remains probably date to the post-contact period. Because these human remains are likely from the post-contact period (post–1600 A.D.) and historical documents place the Wabanaki in Maine during this time, these human remains are affiliated with the Micmac, Malecite, Passamaquoddy, Penobscot present-day tribes.

Based on the above mentioned information, officials of the Department of Anthropology, University of Maine have determined that, pursuant to 43 CFR 10.2 (d)(1), the human remains listed above represent the physical remains of a minimum of 21 individuals of Native American ancestry. Officials of the Department of Anthropology, University of Maine have also determined that, pursuant to 25 U.S.C. 3001 (3)(A), the three objects listed above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony. Lastly, officials of the Department of Anthropology, University of Maine have determined that, pursuant to 43 CFR 10.2 (e), there is a relationship of shared group identity which can be reasonably traced between these Native American human remains and associated funerary objects and the Aroostook Band of MicMacs, Houlton Band of Maliseets, Passamaquoddy Tribe, and the Penobscot Indian Nation.

This notice has been sent to officials of the Aroostook Band of MicMacs, Houlton Band of Maliseets, Passamaquoddy Tribe, and the Penobscot Indian Nation. Representatives of any other Indian tribe that believes itself to be culturally affiliated with these human remains and associated funerary objects should contact Dr. David Sanger, Department of Anthropology, University of Maine, Orono, ME 04469; telephone: (207) 581–1894, before February 27, 1998. Repatriation of the human remains and associated funerary objects to the culturally affiliated tribes may begin after that date if no additional claimants come forward.

Dated: January 15, 1998.

Francis P. McManamon,

Departmental Consulting Archeologist, Manager, Archeology and Ethnography Program.

BILLING CODE 4310–70–F

DEPARTMENT OF JUSTICE

President's Advisory Board on Race; Meetings

ACTION: President's Advisory Board on Race and related meetings.

SUMMARY: The President's Advisory Board on Race will meet on February 10 and 11, 1998 in the San Francisco Bay area. On February 10, Advisory Board members will visit sites in the area where organizations are having success at addressing issues relating to poverty and race. At approximately 6:00 p.m., there will be a community forum in San Jose at a site to be determined. The purpose of the forum is to provide an opportunity for residents from the community to raise issues of general concern in the areas of race and racial reconciliation.

On February 11, the Advisory Board will meet in San Jose at a site to be determined to discuss issues relating to race and poverty. The meeting will include panel discussions with national experts, as well as individuals with local and regional expertise. The meeting will include time for questions from the public.

The public is welcome to attend the community forum and the Advisory Board meeting on a first-come, first-seated basis. Members of the public may also submit to the contact person, any time before or after the meeting, written statements to the Board. Written comments may be submitted by mail, telegram, facsimile, or electronic mail, and should contain the writer's name, address and commercial, government, or organizational affiliation, if any. The address of the President's Initiative on Race is 750 17th Street, NW., Washington, D.C. 20503. The electronic mail address is http://www.whitehouse/gov/Initiatives/OneAmerica.

FOR FURTHER INFORMATION: Contact our main office number, (202) 395–1010, for the exact time and location of the meetings. Other comments or questions regarding this meeting may be directed to Randy D. Ayers, (202) 395–1020.

Dated: January 23, 1998.

Randy Ayers,

Executive Officer.

BILLING CODE 4410–AR–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Clean Water Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that a consent decree in *United States* v. *John L. Conner, Jr., et al.*, Civil Action No. B–C–97–85 (E.D. Ark.), was lodged with the United States District Court for the Eastern District of Arkansas on December 19, 1997.

The proposed consent decree would resolve the United States' allegations in the above-referenced enforcement action that Defendants have violated Sections 301 and 404 of the Clean Water Act, 33 U.S.C. 1311 and 1344, by unlawfully discharging dredged or fill material into approximately 70 acres of waters of the United States at twelve different sites in Jackson, Woodruff and Lawrence Counties.

The proposed consent decree would require Defendants: (1) To pay a $400,000 civil penalty; (2) to restore the three largest violation sites, which total approximately 50 acres; (30) to create approximately 85 acres of wetlands; and (4) to preserve 100 acres of forested land, 95 of which are currently wetlands. The decree would also permanently enjoin Defendants from discharging dredged or fill materials into waters of the United States without an applicable permit.

The Department of Justice will accept written comments relating to the proposed consent decree for thirty (30) days from the date of publication of this notice. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, U.S. Department of Justice, Attention: Wendy L. Blake, Environmental Defense Section, P.O. Box 23986, Washington, D.C. 20026–3986, and should refer to *United States* v. *Conner et al.*, DJ Reference No. 90–5–1–4–385.

The proposed consent decree may be examined at either the Clerk's Office, United States District Court, Eastern District of Arkansas, Room 402, 600 West Capitol Street, Little Rock, Arkansas, or at the Consent Decree Library, 1120 G Street, NW., 4th Floor, Washington, D.C. 20005. Requests for a copy of the consent decree may be mailed to the Consent Decree Library at the above address and must include a check in the amount of $20.25.

Letitia J. Grishaw,

Chief, Environmental Defense Section, Environment and Natural Resources Division, United States Department of Justice.

BILLING CODE 4410–15–M

DEPARTMENT OF LABOR

Office of the Secretary

Submission for OMB Review; Comment Request

January 22, 1998.

The Department of Labor (DOL) has submitted the following public information collection requests (ICRs) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. Chapter 35). A copy of each individual ICR, with applicable supporting documentation, may be obtained by calling the Department of Labor, Departmental Clearance Officer, Todd, R. Owen ([202] 219–5096 ext. 143) or by E-Mail to Owen-Todd@dol.gov. Individuals who use a telecommunications device for the deaf (TTY/TDD) may call [202] 219–4720 between 1:00 p.m. and 4:00 p.m. Eastern time, Monday–Friday.

Comments should be sent to Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for BLS, DM, ESA, ETA, MSHA, OSHA, PWBA, or VETS, Office of Management and Budget, Room 10235, Washington, DC 20503 ([202] 395–7316), within 30 days from the date of this publication in the **Federal Register**. The OMB is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Agency: Employment and Training Administration.

Title: Administrative Procedures—20 CFR 601 including Form MA 8–7.

OMB Number: 1205–0222 (Extension).

Frequency: As needed.

Affected Public: State or local governments.

Number of Respondents: 53.

Estimated Time Per Respondent: 1 hour.

Total Burden Hours: 53.

Total Annualized capital/startup costs: 0.

Total annual costs (operating/maintaining systems or purchasing services): 0.

Description: Administrative Procedures—20 CFR 601 requires States to submit copies of their unemployment compensation laws for approval by the Secretary of Labor, as well as all relevant State materials which allow the Secretary to make findings required by the Internal Revenue Code, Social Security Act and Wagner-Peyser Act.

Agency: Employment Training Administration.

Title: Lifelong Learning Demonstration Follow-up Survey.

OMB Number: 1205–0NEW.

Frequency: One-Time.

Affected Public: Individuals.

Number of Respondents: 4,000.

Estimated Time Per Respondent: 35 minutes.

Total Burden Hours: 2,333.

Total Annualized capital/startup costs: 0.

Total annual costs (operating/maintaining systems or purchasing services): 0.

Description: The Lifelong Learning demonstration provided randomly-selected adult workers in the Greater Baltimore area with comprehensive information about post-secondary education and training opportunities and streamlined referrals of interested workers educational institutions. The results of this data collection will be used by both DOL and Education to evaluate the Demonstration, to inform future public information campaigns on lifelong learning, and provide useful information for other ETA and Education programs affecting the education and training of adults in the U.S. work force.

Agency: Employment Standards Administration.

Title: Request from Claimant for Information on Earnings, Dual Benefits, Dependents, and Third Party Settlements (Form CA–1032).

OMB Number: 1215–0151 (Extension).

VOL 63 ISS 18 JA 28 1998 UMI

Frequency: Annually.
Affected Public: Individuals or Households.
Number of Respondents: 50,000.
Estimated Time Per Respondent: 20 minutes.
Total Burden Hours: 16,667.
Total Annualized capital/startup costs: 0.
Total annual costs (operating/maintaining systems or purchasing services): $16,000.
Description: The Federal Employees' Compensation Act (FECA) provides for the collection of information from claimants, receiving continuing compensation on the periodic disability rolls. This form is used to obtain necessary information from claimants receiving compensation for an extended period of time. This information is necessary to ensure that compensation being paid is correct.

Agency: Employment Standards Administration.
Title: Application for Farm Labor Contractor and Farm Labor Contractor Employee Certificates of Registration (Form WH–530 replacing current forms WH–510 and WH–512).
OMB Number: 1215–0037 (Extension).
Frequency: Biennially.
Affected Public: Individuals or households; business or other for-profit; farms.
Number of Respondents: 7,500.
Estimated Time Per Respondent: 30 minutes.
Total Burden Hours: 3,750.
Total Annualized capital/startup costs: $1,560.
Total annual costs (operating/maintaining systems or purchasing services): 0.
Description: The Migrant and Seasonal Agricultural Worker Protection Act provides that no individual may perform farm labor contracting activities without a certificate of registration. Form WH–530 is the application form which provides the Department of Labor with the information necessary to issue certificates specifying the farm labor contracting activities are authorized.

Agency: Occupational Safety and Health Administration.
Title: Voluntary Protection Program (VPP) Information Collection.
OMB Number: 1218–ONEW.
Frequency: On Occasion.
Affected Public: Applicants to the Voluntary Protection Program.
Number of Respondents: 90 to 100 per year.
Estimated Time Per Respondent: 200 hours.
Total Burden Hours: 18,000.
Total Annualized capital/startup costs: 0.
Total annual costs (operating/maintaining systems or purchasing services): 0.
Description: The information collection is necessary to determine if the applicant has a safety and health program that should qualify for participation in one of OSHA's Voluntary Protection Programs.

Todd R. Owen,
Departmental Clearance Officer.

Investigations Regarding Certifications of Eligibility to Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Acting Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Acting Director, Office of Trade Adjustment Assistance, at the address shown below, not later than February 9, 1998.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Acting Director, Office of Trade Adjustment Assistance, at the address shown below, not later than February 9, 1998.

The petitions filed in this case are available for inspection at the Office of the Acting Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Signed at Washington, D.C., this 5th day of January, 1998.

Grant D. Beale,
Acting Director, Office of Trade Adjustment Assistance.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 98-007]

Privacy Act; Annual Notice and Amendment to Systems of Records

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Annual Notice and Amendment of Systems of Records.

SUMMARY: Each Federal agency is required by the Privacy Act of 1974, 5 U.S.C. 552a, to publish a description of the systems of records it maintains containing personal information when a system is substantially revised, deleted, or created. In this notice, NASA provides the required information on all 20 of its previously-noticed systems of records, is deleting from its inventory two systems of records no longer being created or maintained, is renaming an existing system and adding a new routine use which is required by the Personal Responsibility and Work Opportunity Reconciliation Act, and is making several revisions to these existing systems of records to provide editorial and organizational changes to NASA's Systems of Records which were last published in the **Federal Register** on October 10, 1984. The systems of records which are being abolished are entitled "53BHTR—Wallops Flight Facility Base Housing Tenant Records," and "73FHAP—WSTF Federal Housing Administration (FHA) 809 Housing Program—NARA," and were previously published in the **Federal Register** on October 10, 1984 (49 FR 39742). The records described in these two existing systems of records will be maintained in accordance with NASA's Records Retention Schedules and will be destroyed accordingly. The system previously identified as "NASA 10PAYS—Payroll Systems," has been renamed as "NASA 10NPPS—NASA Personal and Payroll System," and was previously published in the **Federal Register** on October 10, 1984 (49 FR 39742). We invite public comment on this publication.

EFFECTIVE DATE: Janaury 28, 1998. Comments are invited but must be received in writing on or before February 27, 1998.

ADDRESSES: Chief Information Office, Code AO, NASA Headquarters, Washington, DC 20546–0001.

FOR FURTHER INFORMATION CONTACT: Donald J. Andreotta, 202–358–1367, or Adria A. Lipka, 202–358–1372.

SUPPLEMENTARY INFORMATION: NASA currently maintains 20 systems of records under the Privacy Act. Each system is described and published below in its entirety, as amended.

Donald J. Andreotta,

NASA Privacy Officer.

Crewmembers of NASA aircraft.

CATEGORIES OF RECORDS IN THE SYSTEM:

System contains: (1) Record of qualification, experience, and currency, e.g., flight hours (day, night, and instrument), types of approaches and landings, crew position, type of aircraft, flight check ratings and related examination results, training performed and medical records; (2) flight itineraries and passenger manifests; and (3) biographical information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2473 and 44 U.S.C. 3101.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information contained in this system of records is used within NASA for: Evaluation of crewmember performance by supervisory flight operations personnel and staff; by the individuals whose records are maintained; on occasion by flight operations and safety survey teams; and accident reporting and investigating, including mishap and collateral reports and investigations. In addition to the internal uses of the information contained in this system of records, the following are routine uses outside of NASA: (1) In cases of accident investigations, including mishap and collateral investigations, access to this system of records may be granted to Federal or local agencies such as Department of Defense, Federal Aviation Administration, National Transportation Safety Board, or foreign governments, but may not be released to the public except pursuant to NASA regulations (see (3) below); (2) To other agencies, companies, or governments requesting qualifications of crewmembers prior to authorization to participate in their flight programs; or to other agencies, companies, or governments whose crewmembers may participate in NASA's flight programs; (3) public or press releases either by prior approval of the individual, or in case of public release of information from mishap or collateral investigation reports, pursuant to NASA regulations; and (4) Standard routine uses 1 through 4 inclusive as set forth in Appendix B.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper or hard-copy documents and magnetic media.

RETRIEVABILITY:

Records are indexed by name or aircraft number.

SAFEGUARDS:

Records are protected in accordance with the requirements and procedures which appear at 14 CFR part 1212.

RETENTION AND DISPOSAL:

Records are maintained and destroyed in accordance with NASA Records Retention Schedules, Schedule 8 (UFI 8650).

SYSTEM MANAGER(S) AND ADDRESS:

Director, Aircraft Management Office, Location 1.

Subsystem Managers: Chief, Ames Research Aircraft Operations Division, Location 2; Chief, Dryden Research Aircraft Operations Division, Location 3; Head, Aeronautical Programs Branch, Location 4; Chief, Aircraft Operations Division, Location 5; Chief, Aircraft Operations Office, Location 6; Chief, Flight Operations and Support Division, Location 7; Chief, Aircraft Operations Branch, Location 8; Chief, Aircraft Operations, Location 9; Chief, Contract Management, Location 10; Aircraft Management Officer, Location 11 (Locations are set forth in Appendix A).

NOTIFICATION PROCEDURE:

Information may be obtained from the cognizant system or subsystem manager listed above.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to: Address stated in the Notification Section above.

CONTESTING RECORD PROCEDURES:

The NASA regulations for access to records and for contesting contents and appealing initial determinations by the individual concerned appear at 14 CFR part 1212.

RECORD SOURCE CATEGORIES:

Individuals, training schools or instructors, medical units or doctors.

NASA 10BRPA

SYSTEM NAME:

Biographical Records for Public Affairs.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Locations 1 through 9 inclusive and Location 11, as set forth in Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Principal and prominent management and staff officials, program and project managers, scientists, engineers, speakers, other selected employees involved in newsworthy activities, and other participants in Agency programs.

CATEGORIES OF RECORDS IN THE SYSTEM:

Current biographical information about the individuals with a recent photograph when available. Data items are those generally required by NASA or the news media in preparing news or feature stories about the individual and/or the individual's activity with NASA.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2473 and 44 U.S.C. 3101.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information contained in this system of records is compiled, updated, and maintained at NASA Centers for ready reference material and for immediate availability when required by the news media for news stories about the individual generally involving participation in a major NASA activity.

The data serves as background information about the individual and is used within NASA to prepare public appearance announcements of key officials, speaking engagements, special appointments, participation in professional societies, etc.; to write news stories about special achievements, awards, participation in major NASA activities, programs, etc.; and to prepare responses to inquiries submitted to the Public Affairs Division from the news media.

Users are the staff members of the public information office within each Office of Public Affairs.

In addition to the internal uses of the information contained in this system of records, the following are routine uses outside of NASA: These records are made available to professional societies, civic clubs, industrial and other organizations, news media representatives, researchers, authors, Congress, other agencies and other members of the public in connection with NASA public affairs activities.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper or hard-copy documents and electronic media.

RETRIEVABILITY:

Records are indexed by name.

SAFEGUARDS:

Since the records are a matter of public information, no safeguard requirements are necessary.

RETENTION AND DISPOSAL:

Records are maintained and destroyed in accordance with NASA Records Retention Schedules, Schedule 1.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, NASA Newsroom, Public Affairs Division, Location 1.

Subsystem Managers: Public Information Officer, Location 2; Public Affairs Officer at Locations 3 through 9 and Location 11 as set forth in Appendix A.

NOTIFICATION PROCEDURE:

An individual desiring to find out if a Biographical System of Records contains a record pertaining to him/her should call, write, or visit the Public Affairs Office at the appropriate NASA location.

RECORD ACCESS PROCEDURES:

An individual may request access to his/her record by calling, writing, or visiting the Public Affairs Office at the appropriate NASA locations. Individuals may examine or obtain a copy of their biographical record at any time.

CONTESTING RECORD PROCEDURES:

The information in the record was provided voluntarily by the individual with the understanding that the information will be used for public release. The individual is at liberty at any time to revise, update, add, or delete information in his/her biographical record to his/her own satisfaction.

RECORD SOURCE CATEGORIES:

Information in the biography of an individual in the system of records is provided voluntarily by the individual generally with the aid of a form questionnaire.

NASA 10EEOR

SYSTEM NAME:

Equal Opportunity Records.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Locations 1 through 9 and Location 11 as set forth in Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former employees and applicants for employment.

CATEGORIES OR RECORDS IN THE SYSTEM:

(1) Complaints and (2) applications.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2473; 44 U.S.C. 3101; Executive Order 11478, dated August 8, 1969; EEOC Regulations; 29 CFR part 1614; MSPB Regulations; 5 CFR parts 1200–1202.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information contained in this system of records is used within NASA to process complaints of alleged

VOL
63
ISS
18
JA
28
1998
UMI

discrimination, including investigations, hearings, and appeals; to maintain active discrimination complaints files; and to retain inactive discrimination complaints files.

In addition to the internal uses of the information contained in this system of records, the following are routine uses outside of NASA: (1) Disclosures to the Equal Employment Opportunity Commission and the Merit Systems Protection Board to facilitate their processing of discrimination complaints, including investigations, hearings, and reviews on appeals; (2) Responses to other Federal agencies and other organizations having legal and administrative responsibilities related to the NASA Equal Employment Opportunity Programs and to individuals in the record; (3) Disclosures may be made to a Congressional office from the record of an individual in response to a written inquiry from the Congressional office made at the request of that individual; and (4) Standard routine uses 1 through 4 inclusive as set forth in Appendix B.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper or hard-copy documents and electronic media.

RETRIEVABILITY:

These records are indexed by name.

SAFEGUARDS:

Records are locked in file cabinets or in secured rooms with access limited to those whose official duties require access. Electronic data are maintained within locked areas in disk form.

RETENTION AND DISPOSAL:

Records are maintained and destroyed in accordance with NASA Records Retention Schedules, Schedule 3.

SYSTEM MANAGER(S) AND ADDRESS:

Associate Administrator for Equal Opportunity Programs, Location 1.

Subsystem Managers: Equal Opportunity Officer, Locations 1 and 11; Head, Equal Opportunity Programs Office, Location 4; Director of Equality Opportunity Programs at Locations 5 and 6; Locations are as set forth in Appendix A.

NOTIFICATION PROCEDURE:

Information may be obtained from the cognizant system or subsystem manager listed above.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to the same address as stated in the notification section above.

CONTESTING RECORD PROCEDURES:

The NASA regulations for access to records and for contesting contents and appealing initial determinations by the individual concerned appear at 14 CFR part 1212.

RECORD SOURCE CATEGORIES:

Current and former employees, applicants, NASA Center Equal Employment Opportunity (EEO) officers, complainants, EEO counselors, EEO investigators, EEOC complaints examiners, Merit System Protection Board officials, complaints coordinators, Associate Administrator for Equal Opportunity Programs.

NASA 10ERMS

SYSTEM NAME:

Executive Resources Management System.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Location 1, as set forth in Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Approximately 2,000 individuals with experience and education unique to the NASA mission in the technical and administrative fields who are considered to be candidates for key positions within NASA.

CATEGORIES OF RECORDS IN THE SYSTEM:

Biographical data, education, training, work experience, and career interests.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2473; 44 U.S.C. 3101; 5 U.S.C. 4103; 5 U.S.C. 3396.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information contained in this system of records is used within NASA for the identification of replacement candidates. In addition to the internal uses of the information contained in this system of records, the following are routine uses outside of NASA: (1) Disclosures may be made to organizations or individuals having contract, legal, administrative, or cooperative relationships with NASA, including labor unions, academic organizations, governmental organizations, nonprofit organizations, and contractors; and to organizations or individuals seeking or having available a service or other benefit or advantage. The purpose of such disclosures is to satisfy a need or needs, further cooperative relationships, offer information, or respond to a request; (2) Statistical or data presentations may be made to governmental or other organizations or individuals having need of information about individuals in the records; (3) Responses may be made to other Federal agencies, and other organizations having legal or administrative responsibilities related to programs and individuals in the records; (4) Disclosure may be made to a Congressional office from the record of an individual in response to a written inquiry from the Congressional office made at the request of that individual; and (5) Standard routine uses 1 through 4 inclusive as set forth in Appendix B.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper or hard-copy documents and magnetic media.

RETRIEVABILITY:

The records are indexed by Social Security Number.

SAFEGUARDS:

Records are protected in accordance with the requirements and procedures which appear in NASA regulations at 14 CFR part 1212.

RETENTION AND DISPOSAL:

Records will be maintained in accordance with NASA Records Retention Schedules, Schedule 3.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Training and Development Division, Location 1.

Subsystem Managers: None.

NOTIFICATION PROCEDURE:

Information may be obtained from the System Manager only.

RECORDS ACCESS PROCEDURES:

Requests from individuals should be addressed to the same address stated in the notification section above.

CONTESTING RECORD PROCEDURES:

The NASA regulations pertaining to access to records and for contesting contents and appealing initial determinations by the individual concerned are set forth in 14 CFR part 1212.

RECORD SOURCE CATEGORIES:

Individuals to whom the records pertain, NASA employees, other Federal employees, other organizations and individuals, and NASA personnel records.

NASA 10GMVP

SYSTEM NAME:

Government Motor Vehicle Operators Permit Records.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Locations 1 through 8 and 10 through 14 as set forth in Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

NASA employees, contractor employees, other Federal and State Government employees. Location 8 does not maintain records on contractor employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, home address, Social Security Number, physical description of individual, physical condition of individual, traffic record.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2473; 44 U.S.C. 3101; 41 CFR subpart 101–38.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information contained in this system of records is used within NASA for the purpose of identifying and checking the records of each applicant and issuing permits for operation of Government vehicles. In addition to the internal uses of the information contained in this system of records, the following are routine uses outside of NASA: (1) National Driver Register, Department of Transportation, where Form 1047 is received for review and check against driver's motor vehicle record, and (2) Standard routine uses 1 through 4 inclusive, as set forth in Appendix B.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OR RECORDS IN THE SYSTEM:

STORAGE:

Paper or hard-copy documents and electronic media.

RETRIEVABILITY:

Indexed by name.

SAFEGUARDS:

Records are kept in locked cabinets with access limited to those whose official duties require access. Room is locked during nonduty hours.

RETENTION AND DISPOSAL:

Records will be maintained in accordance with NASA Records Retention Schedules, Schedule fi.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Logistics Services Branch, Location 1.

Subsystem Managers; Chief, Security Branch, Location 2; Transportation Officer, Location 3; Chief, Logistics Management Division, Location 4; Chief, Transportation Branch, Location 5; Chief, Transportation Branch, Location 6; Chief, Logistics Management Division, Location 7; Transportation and Motor Vehicle Officer, Location 8; Director, Management Operations Office, Location 9; Chief, Installation Services Division, Location 11; Chief, Administration Office, Location 12; Chief, Maintenance and Administration Office, Location 13; Chief of Facilities, Location 14. Locations are as set forth in Appendix A.

NOTIFICATION PROCEDURE:

Information may be obtained from the cognizant system manager listed above.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to the same address as stated in the Notification Section above.

CONTESTING RECORD PROCEDURES:

The NASA regulations for access to records and for contesting contents and appealing initial determinations by the individual concerned appear at 14 CFR part 1212.

RECORD SOURCE CATEGORIES:

Individual NASA employees and individual contractor employees. Location 8 and 11 do not maintain records on contractor employees. Location 7 does not maintain records on Government motor vehicle operator permits.

NASA 10HABC

SYSTEM NAME:

History Archives Biographical Collection.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Locations 1 and 5 as set forth in Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who are of historical significance in aeronautics, astronautics, space science, and other concerns of NASA.

CATEGORIES OF RECORDS IN THE SYSTEM:

Biographical data; speeches and articles by an individual; correspondence, interviews, and various other tapes and transcripts of program activities.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2473 and 44 U.S.C. 3101.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information contained in this system of records is used within NASA for researching and writing official histories and answering queries from various NASA offices. In addition to the internal uses of the information contained in this system of records, the following are routine uses outside of NASA: Disclosure to scholars (historians and other disciplines), or any other interested individuals for research and to write dissertations, articles, and books, for Government, commercial and nonprofit publication or develop material for other media use.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper or hard-copy documents and electronic media.

RETRIEVABILITY:

The records are indexed by name.

SAFEGUARDS:

Because these records are archive material and, therefore, a matter of public information, there are no special safeguard procedures required.

RETENTION AND DISPOSAL:

Records are maintained in accordance with NASA Records Retention Schedules, Schedule 1.

SYSTEM MANAGER(S) AND ADDRESS:

Chief Historian, Location 1.

Subsystem Managers: JSC History Office Coordinator, Location 5; Public Affairs Officer, Location 11 (Locations are set forth in Appendix A).

NOTIFICATION PROCEDURE:

Information may be obtained from the cognizant system or subsystem manger listed above.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to same address as stated in the Notification Section above.

CONTESTING RECORD PROCEDURES:

The NASA regulations for access to records and for contesting contents and appealing initial determinations by the individual concerned appear at 14 CFR part 1212.

RECORD SOURCE CATEGORIES:

Press releases, newspapers, journals, and the individuals themselves and copies of internal Agency records.

VOL 63 ISS 18 JA 28 1998 UMI

NASA 10HERD

SYSTEM NAME:

Human Experimental and Research Data Records.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Locations 2, 3, 5, 6, and 9, as stated in Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who have been involved in space flight, aeronautical research flight, and/or participated in NASA tests or experimental or research programs; Civil Service employees, military, employees of other Government agencies, contractor employees, students, human subjects (volunteer or paid), and other volunteers on whom information is collected as part of an experiment or study.

CATEGORIES OF RECORDS IN THE SYSTEM:

Data obtained in the course of an experiment, test, or research medical data from inflight records, other information collected in connection with an experiment, text, or research.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2475 and 44 U.S.C. 3101.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

The information contained in this system of records is used by NASA for the purposes of evaluating new analytical techniques, equipment, and re-examining flight data for alternative interpretations, developing applications of experimental techniques or equipment, reviewing and improving operational procedures with respect to experimental protocols (both inflight and ground), life support system operating procedures, determining human engineering requirements, and carrying out other research.

In addition to the internal use of the information contained in this system of records, the following are routine uses outside of NASA: Disclosures to other individuals or organizations, including Federal, State, or local agencies, and nonprofit, educational, or private entities, who are participating in NASA programs or are otherwise furthering the understanding or application of biological, physiological, and behavioral phenomena as reflected in the data contained in this system of records; and the standard routine use 4 as set forth in Appendix B.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper of hard-copy documents, electronic media, micrographic media, photographs, or motion pictures film; and various medical recordings, such as, electrocardiograph tapes, stripcharts, and x-rays.

RETRIEVABILITY:

By name, experiment, or test; arbitrary experimental subject number; flight designation; or crew member designation on a particular space or aeronautical flight.

SAFEGUARDS:

Access is limited to Government personnel requiring access in the discharge of their duties, and to appropriate support contractor employees on a need-to-know basis. Computerized records are identified by code number and records are maintained in locked rooms or files. Records are protected in accordance with the requirements and procedures which appear in the NASA regulations set forth in 14 CFR part 1212.

RETENTION AND DISPOSAL:

Records are maintained in accordance with NASA Records Retention Schedules, Schedule 7.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Occupational Health Office, Location 1.

Subsystem Managers: Chief Engineer, Location 2; Director of Man/Systems Integration Division, Location 3; Assistant Director for Life Sciences, Space and Life Sciences Directorate, Location 5; Director, Biomedical Operations Office, Location 6; Director, Management Services Office, Location 9. Locations are as set forth in Appendix A.

NOTIFICATION PROCEDURE:

Information may be obtained from the system or subsystem manager named above.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to the same address as stated in the Notification Section above.

CONTESTING RECORD PROCEDURES:

The NASA regulations for access to records and for contesting and appealing initial determinations by the individual concerned appear at 14 CFR part 1212.

RECORD SOURCE CATEGORIES:

Experimental test subjects, physicians, principal investigators and other researchers, and previous experimental test or research records.

NASA 10HIMS

SYSTEMS NAME:

Health Information Management System.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

In Medical Clinics/Units and Environmental Health Offices at locations 1 through 14 inclusive as set forth in Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

NASA Civil Service employees and applicants; other Agency Civil Service and military employees working at NASA; visitors to NASA Centers; on-site contractor personnel who receive job related examinations, have mishaps or accidents, or come to clinic for emergency or first aid treatment; space flight personnel and their families.

CATEGORIES OF RECORDS IN THE SYSTEM:

General medical records of first aid, emergency treatment, examinations, exposures, and consultations.

Information resulting from physical examinations, laboratory and other tests, and medical history forms; treatment records; screening examination results; immunization records; administration of medications prescribed by private/personal physicians; statistical records; examination schedules; daily log of patients; correspondence; chemical, physical, and radiation exposure records; other environmental health data; alcohol/drug patient information; consultation records; Employee Assistance Program records; and health hazard and abatement data.

Astronauts and their families—more detailed and complex physical examinations.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2473; 44 U.S.C. 3101; Public Law 92–255.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information contained in this system of records is used within NASA for the following purposes: Reference by examining physicians in conduct of physical examinations; review by physicians, nurses, and other health care specialists in consideration of fitness for duty; evaluation for physical disability retirement; statistical data development; patient recall; in-space medical evaluation for astronauts; exposure data for radiation/toxic exposure limits, compliance, and examinations; consultations; evaluation of employees, applicants, and contractor employees for specialized or hazardous duties; accident reporting and investigating including mishap and collateral reports and investigations; and determining reliability pursuant to the Mission Critical Space Systems Personnel Reliability Program (14 CFR part 1214 subpart 1214.5).

In addition to the internal uses of the information contained in this system of records, the following are routine uses outside of NASA: (1) Referral to private physicians designated by the individual when requested in writing; (2) Patient referrals; (3) Referral to the Office of Personnel Management, Occupational Safety and Health Administration, and other Federal agencies as required in accordance with these special program responsibilities; (4) Referral of information to a non-NASA individual's employer; (5) Evaluation by medical consultants; (6) Disclosure to the employer of non-NASA personnel, information affecting the reliability of such officer or employee for purposes of the Mission Critical Space Systems Personnel Reliability Program; (7) Disclosure to non-NASA personnel performing research, studies, or other activities through arrangements or agreements with NASA and for mutual benefit; (8) Disclosure to the public of pre-space flight information having mission impact concerning an individual crewmember, limited to the crewmember's name and the fact that a medical condition exists; (9) Disclosure to the public of a summary of the space flight crew inflight information as it relates to mission impact, and limited to name, diagnosis, treatment, and prognosis; (10) During the time period following Shuttle landing and concluding with completion of the post-space flight return to duty medical evaluation, if a flight crewmember is for medical reasons unable to perform a scheduled public event, a disclosure to the public, limited to the crewmember's name and the fact that a medical condition exists; (11) Disclosure to the public of medical conditions arising from accidents, consistent with NASA regulations; and (12) Standard routine use 4 as set forth in Appendix B.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are in file folders, punch cards, electrocardiographic tapes, x-rays, microfiche, and electronic media. They are handled between NASA Centers by telecommunications.

RETRIEVABILITY:

By name, date of birth, and Social Security Number.

SAFEGUARDS:

Access limited to concerned medical environmental health personnel on a need-to-know basis. Computerized records are identified by code number and records are maintained in locked rooms or files. Records are protected in accordance with the requirements and procedures which appear in the NASA regulations at 14 CFR part 1212.

RETENTION AND DISPOSAL:

In accordance with Office of Personnel Management regulations and NASA Records Retention Schedules 1 and 8.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Occupational Health Office, Location 1.

Subsystem Managers: Medical Director or Medical Administrator or Safety and Health Coordinator at Locations 1 through 15 inclusive as set forth in Appendix A.

NOTIFICATION PROCEDURE:

Information may be obtained from the cognizant system or subsystem manager listed above.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to the same address as stated in the notification section above.

CONTESTING RECORD PROCEDURES:

The NASA regulations for access to records and for contesting contents and appealing initial determinations by the individual concerned appears in 14 CFR part 1212.

RECORD SOURCE CATEGORIES:

Individuals, physicians, and previous medical records of individuals.

NASA 10IGIC

SYSTEM NAME:

Inspector General Investigations Case Files.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Locations 1 through 11 as set forth in Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former employees of NASA, contractors, and subcontractors, and others whose actions have affected NASA.

CATEGORIES OF RECORDS IN THE SYSTEM:

Case files pertaining to matters including, but not limited to, the following classifications of cases: (1) Fraud against the Government; (2) Theft of Government property; (3) Bribery; (4) Lost or stolen lunar samples; (5) Misuse of Government property; (6) Conflict of interest; (7) Waiver of claim for overpayment of pay; (8) Leaks of Source Evaluation Board information; (9) Improper personal conduct; (10) Irregularities in awarding contracts; and (11) computer crimes.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2473; 44 U.S.C. 3101; 28 U.S.C. 535(b); 5 U.S.C. App.; 4 CFR part 91; Executive Order 11478.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information contained in this system of records is used within NASA for: (1) Providing management with information resulting from investigation(s) and other reports which will serve as a possible basis for appropriate administrative action or the establishment of NASA policy; (2) Providing the Administrator of NASA (or the Director, Office of Management and Budget, as appropriate) sufficient information to provide a basis for decisions concerning a request for waiver of claim in the case of an erroneous payment of pay.

In addition to the internal uses of the information contained in this system of records, the following are routine uses outside of NASA: (1) Responding to the White House regarding matters inquired of; (2) Disclosure to a Congressional office from the record of an individual in response to a written inquiry from the Congressional office made at the request of that individual; (3) Providing data to Federal intelligence elements; (4) Providing data to any source from which information is requested in the course of an investigation, to the extent necessary to identify the individual, inform the source of the nature and purpose of the investigation, and to identify the type of information requested; (5) Providing personal identifying data to Federal, State, local, or foreign law enforcement representatives seeking confirmation of identity of persons under investigation; (6) Disclosing, as necessary, to a contractor, subcontractor, or grantee firm or institution, to the extent that the disclosure is in NASA's interest and is relevant and necessary in order that the contractor, subcontractor, or grantee is able to take administrative or corrective action; (7) Standard routine uses 1

VOL 63 ISS 18 JA 28 1998 UMI

through 4 inclusive as set forth in Appendix B.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper or hard-copy documents and electronic media.

RETRIEVABILITY:

Information is retrieved by name of the individual.

SAFEGUARDS:

Information is kept in locked cabinets and in secured vault and computer rooms. Information stored on computers is on a restricted-access server and is password- and user id-protected. Access is limited to Inspector General personnel with a need-to-know.

RETENTION AND DISPOSAL:

Records are maintained and destroyed in accordance with NASA Records Retention Schedules, Schedule 9.

SYSTEM MANAGER(S) AND ADDRESS:

Assistant Inspector General for Investigations, Location 1.

Subsystem Managers: Special and Resident Agents in Charge, Locations 2, and 4 through 10 inclusive as set forth in Appendix A.

NOTIFICATION PROCEDURE:

None. System is exempt (see below).

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Exempt.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

(1) The Inspector General Investigations Case Files system of records is exempt from any part of the Privacy Act (5 U.S.C. 552a) EXCEPT the following subsections:

(b) relating to conditions of disclosure; (c) (1) and (2) relating to keeping and maintaining a disclosure accounting; (e)(4) (A) through (F) relating to publishing a system notice setting forth name, location, categories of individuals and records, routine uses, and policies regarding storage, retrievability, access controls, retention and disposal of the records; (e) (6), (7), (9), (10), and (11) relating to dissemination and maintenance of records; (i) relating to criminal penalties. This exemption applies to those records and information contained in the system of records pertaining to the enforcement of criminal laws.

(2) To the extent that there may exist noncriminal investigative files within this system of records, the Inspector General Investigations Case Files system of records is exempt from the following subsections of the Privacy Act (5 U.S.C. 552a): (c)(3) relating to access to disclosure accounting; (d) relating to access to reports, (e)(1) relating to the type of information maintained in the records; (e)(4) (G), (H), and (I) relating to publishing the system notice information as to agency procedures for access and amendment and information as to the categories of sources of records; and (f) relating to developing agency rules for gaining access and making corrections.

The determination to exempt this system of records has been made by the Administrator of NASA in accordance with 5 U.S.C. 552a (j) and (k) and subpart 5 of the NASA regulations appearing in 14 CFR part 1212, for the reason that a component of the Office of Inspector General, NASA, performs as its principal function activities pertaining to the enforcement of criminal laws, within the meaning of 5 U.S.C. 552a(j)(2).

NASA 10NPPS

SYSTEM NAME:

NASA Personnel and Payroll System (NPPS).

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Locations 1 through 9 inclusive and Location 11, as set forth in Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Present and former NASA employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

The date contained in this system of records includes payroll, employee leave, insurance, labor and human resource distribution and overtime information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2473; 44 U.S.C. 3101; 5 U.S.C. 5501 et seq.; 5 U.S.C. 6301 et seq.; General Accounting Office Policy and Procedures Manual for Guidance of Federal Agencies, Title 6; Treasury Fiscal Requirements Manual, Part III; and NASA Financial Management Manual, Sections 9300 and 9600.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information contained in this system of records is used within NASA for maintaining the payroll records and related areas.

In addition to the internal uses of the information contained in this system of records, the following are routine uses outside of NASA: (1) To furnish to a third party a verification of an employee's status upon written request of the employee; (2) To facilitate the verification of employee contributions and insurance data with carriers and collection agents; (3) To report to the Office of Personnel Management (a) withholdings of premiums for life insurance, health benefits, and retirements, and (b) separated employees subject to retirement; (4) To furnish the U.S. Treasury magnetic tape reports and/or electronic files on net pay, net savings allotments and bond transmittal pertaining to each employee; (5) To provide the Internal Revenue Service with detail of wages taxable under the Federal Insurance Contributions Act and to furnish a magnetic tape listing on Federal tax withholdings; (6) To furnish various financial institutions itemized listings of employee's pay and savings allotments transmitted to the institutions in accordance with employee requests; (7) To provide various Federal, State, and local taxing authorities itemized listings of withholdings for individual income taxes; (8) To respond to requests for State employment security agencies and the U.S. Department of Labor for employment, wage, and separation data on former employees for the purpose of determining eligibility for unemployment compensation; (9) To report to various Combined Federal Campaign offices total contributions withheld from employee wages; (10) To furnish leave balances and activity to the Office of Personnel Management upon request; (11) To furnish data to labor organizations in accordance with negotiated agreements; (12) To furnish pay data to the Department of State for certain NASA employees located outside the United States; (13) To furnish data to a consumer reporting agency or bureau, private collection contractor or debt collection center in accordance with section 3711 of Title 31; (14) To forward delinquent debts, and all relevant information related thereto, to the U.S. Department of Treasury, for collection, (15) To the Office of Child Support Enforcement, Administration for Children and Families, Department of Health and Human Services, National Directory of New Hires, part of the Federal Parent Locator Service (FPLS) and the Federal Tax Offset System, DHHS/OCSE No. 09–90–0074, for the purpose of locating individuals to establish paternity, establishing and modifying orders of child support, identifying sources of income, and for other child support enforcement actions as required by the Personal Responsibility and Work Opportunity Reconciliation Act (Pub. L. 104–193; and, (15) Standard routine uses 1 through 4 inclusive as set forth in Appendix B.

DISCLOSURE TO CONSUMER REPORTING AGENCIES OR PRIVATE COLLECTION CONTRACTOR:

Disclosure pursuant to 5 U.S.C. 552a(b): Disclosures may be made from this system to "consumer reporting agencies" as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)), or "private collection contractor" under the Federal Claims Collection Act of 1966 as amended by the Debt Collection Improvement Act of 1996 (31 U.S.C. 3701, et seq.).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper or hard-copy documents and electronic media.

RETRIEVABILITY:

Records are indexed by name and/or Social Security Number.

SAFEGUARDS:

Records are protected in accordance with the requirements and procedure which appear in the NASA regulations at 14 CFR part 1212.

RETENTION AND DISPOSAL:

Records are maintained and destroyed in accordance with NASA Records Retention Schedules, Schedule 3.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Financial Management Division, Office of the Chief Financial Officer, Location 1.

Subsystem Managers: Chief, Financial Management Division, Locations 2, 4, 5, 6, 7, and 8; Financial Management Officer, Location 3; Director, Financial Management Office, Location 9; Chief, Financial Management Office, Location 11. Locations are as set forth in Appendix A.

NOTIFICATION PROCEDURE:

Information may be obtained from the cognizant system or subsystem manager listed above.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to the same address as identified in the notification section above.

CONTESTING RECORD PROCEDURES:

The NASA regulations for access to records and for contesting contents and appealing initial determinations by the individual concerned appear at 14 CFR part 1212.

RECORD SOURCE CATEGORIES:

Individual on whom the record is maintained, personnel office(s), and the individual's supervisor.

NASA 10SCCF

SYSTEM NAME:

Standards of Conduct Counseling Case Files.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Location 1.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current, former, and prospective NASA employees, who have sought advice or have been counseled regarding conflict of interest requirements for Government employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Depending upon the nature of the problem, information collected may include employment history, financial data, and information concerning family members.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2473; 44 U.S.C. 3101; 18 U.S.C. 201, 203, 205, 207–209; 5 U.S.C. 7324–7327; 5 U.S.C. App.; 14 CFR 1207; 5 CFR 2634–2641; 5 CFR 6901; and, Executive Order 12674 as modified by Executive Order 12731.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information contained in the system of records is used within NASA for the purpose of counseling employees regarding conflict of interest problems. In addition to the internal uses of the information contained in this system of records, the following are routine uses outside of NASA: (1) Office of Personnel Management and Merit Systems Protection Board, for investigation of possible violations of standards of conduct which the agencies directly oversee; (2) Standard routine uses 1 through 4 inclusive as set forth in Appendix B.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are documentary and maintained in loose leaf binders or file folders.

RETRIEVABILITY:

By name of individual.

SAFEGUARDS:

Restricted access to a few authorized persons; stored in combination lock safe.

RETENTION AND DISPOSAL:

Records are maintained in accordance with NASA Records Retention Schedules, Schedule 1.

SYSTEM MANAGER(S) AND ADDRESS:

Assistant General Counsel for General Law, Code GG, Location 1, and Chief Counsel, Locations 2 through 11.

NOTIFICATION PROCEDURE:

Information may be obtained from the System Manager.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to the System Manager and must include employee's full name and NASA Center where employed.

CONTESTING RECORD PROCEDURES:

The NASA regulations and procedures for access to records and for contesting contents and appealing initial determinations by the individual concerned appear at 14 CFR part 1212.

RECORD SOURCE CATEGORIES:

Information collected directly from individual and from his/her official employment record.

NASA 10SECR

SYSTEM NAME:

Security Records System.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Locations 1 through 9, and Locations 11, 12, and 14 as set forth in Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees, applicants, NASA committee members, NASA consultants, NASA experts, NASA Resident Research Associates, guest workers, contractor employees, detailees, visitors, correspondents (written and telephonic), Faculty Fellows, sources of information.

CATEGORIES OF RECORDS IN THE SYSTEM:

Personnel Security Records, Criminal Matter Records, Traffic Management Records.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2451, et seq., the National Aeronautics and Space Act of 1958, as amended; Espionage and Information Control Statutes, 18 U.S.C. 793 through

VOL 63 ISS 18 JA 28 1998 UMI

799; Sabotage Statutes, 18 U.S.C. 2151 through 2157; Conspiracy Statute, 18 U.S.C. 371; 18 U.S.C. 202–208, and 3056; Internal Security Act of 1950, Atomic Energy Act of 1954, as amended; Executive Order 12958, as amended, Classified National Security Information; Executive Order 12968, as amended, Access to Classified Information; Executive Order 10865, Safeguarding Classified Information Within Industry; Executive Order 10450, Security Requirements for Government Employees; Public Law 81–733; Federal Property Management Regulation, 41 CFR Ch. 101; 14 CFR parts 1203 through 1203b; and 44 U.S.C. 3101.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Personnel Security Records: The information contained in this category of records is used within NASA for the purpose of granting security clearances; for determining qualifications, suitability, and loyalty to the United States Government; for determining qualifications for access to classified information, security areas, and NASA Centers, and for determining qualifications to travel to Communist controlled areas.

In addition to the internal uses of the information contained in this category of records, the following are routine uses outside of NASA: (1) To determine eligibility to perform classified visits to other Federal agencies and contractor facilities; (2) To provide data to Federal intelligence elements; (3) To provide data to any source from which information is requested in the source of an investigation, to the extent necessary to identify the individual, inform the source of the nature and purpose of the investigation, and to identify the type of information requested; (4) To provide a basis for determining preliminary visa eligibility; (5) To respond to White House inquiries; (6) Disclosures may be made to a Congressional office from the record of an individual in response to a written inquiry from the Congressional office made at the request of that individual; (7) To provide personal identifying data to Federal, State, local, or foreign law enforcement representatives seeking confirmation of identity of persons under investigation; (8) Disclosure to a NASA contractor, subcontractor, grantee, or other Government organization information developed in an investigation or administrative inquiry concerning a violation of a Federal or State statute or NASA regulation on the part of an officer or employee of the contractor, subcontractor, grantee, or other Government organization; (9) To provide relevant information to an internal or external organization or element thereof, conducting audit activities of a NASA contractor or subcontractor; (10) Disclosure to the employer of non-NASA personnel information affecting the reliability of such officer or employee for purposes of the Mission Critical Space Systems Personnel Reliability Program; and, (11) Standard routine uses 1 through 4 inclusive as set forth in Appendix B.

Criminal Matter Records: The information contained in this category of records is used within NASA for providing management with information which will serve as a possible basis for administrative action. In addition to the internal uses of the information contained in this category of records, the routine uses outside of NASA are: (1) To provide personal identifying data to Federal, State, local, or foreign law enforcement representatives seeking confirmation of identity of persons under investigation; (2) To provide a NASA contractor, subcontractor, grantee, or other Government organization information developed in an investigation or administrative inquiry concerning a violation of a Federal or State Statute or NASA regulation on the part of an officer or employee of the contractor, subcontractor, grantee, or other Government organization; and (3) Standard routine uses 1 through 4 inclusive as set forth in Appendix B.

Traffic Management Records: The information contained in this category of records is used within NASA to provide designated officials and employees with data concerning vehicle ownership, traffic accidents, violation of traffic laws, suspension of driving privileges, traffic control, vehicle parking, and car pools. In addition to the internal uses of the information contained in this category of records, the routine uses outside of NASA are: (1) To provide personal identifying data to Federal, State, local, or foreign law enforcement representatives seeking confirmation of identity of persons under investigation; (2) To provide a NASA contractor, subcontractor, grantee, or other Government organization information developed in an investigation or administrative inquiry concerning a violation of a Federal or State Statute or NASA regulation on the part of an officer or employee of the contractor, subcontractor, grantee, or other Government organization; and (3) Standard routine uses 1 through 4 inclusive as set forth in Appendix B.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper or hard-copy documents and electronic media.

RETRIEVABILITY:

Records are indexed by name, file number, organization, place of origin, badge number, decal number, date of event, space number, payroll number, and social security number.

SAFEGUARDS:

Access to Personnel Security Records is controlled by Government and selected contractor security personnel. However, access to information extracted from personnel security records or information to be inserted into personnel security records is controlled by either Government personnel or selected personnel of NASA contractor guard force or contractor personnel. Examples would be information required to prepare an identification badge and/or process a security clearance visitor request. Access to Criminal Matter Records is controlled by either Government personnel or selected personnel of NASA contractor guard forces.

After presenting proper identification and requesting a file or record, a person with a need-to-know and, if appropriate, a proper clearance may have access to a file or record only after it has been retrieved and approved for release by a NASA security representative. These records are secured in security storage equipment.

Traffic Management Records: Access to these records is controlled by either Government personnel or selected personnel of NASA contractor guard forces. Access to these records is permitted after a determination has been made that the requester has an official interest. These records are stored in locked containers.

RETENTION AND DISPOSAL:

Records will be maintained in accordance with NASA Records Retention Schedules, Schedule 1.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Security Management Office, Location 1.

Subsystem Managers: Chief, Security Branch, Locations 2, 4, and 5; Security Officer, Location 3, 8, and 11; Chief Protective Services Office, Location 6; Head, Security Services Branch, Location 7; Chief, Security Division, Location 9; Chief, Administration Officer, Location 12; Safety and Security Officer at Location 15. Locations are as set forth in Appendix A.

NOTIFICATION PROCEDURE:

Information may be obtained from the cognizant system of subsystem manager listed above. Requests must contain the following identifying data concerning the requester: First, middle, and last name; date of birth; social security number; period and place of employment with NASA, if applicable.

RECORD ACCESS PROCEDURES:

Personnel Security Records compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, Federal contracts, or access to classified information have been exempted by the Administrator under 5 U.S.C. 552a(k)(5) from the access provisions of the Act.

Criminal Matter Records compiled for civil or criminal law enforcement purposes have been exempted by the Administrator under 5 U.S.C. 552a(k)(2) from the access provisions of the Act.

Traffic Management Records: Requests from individuals should be addressed to the same address as stated in the Notification section above.

CONTESTING RECORD PROCEDURES:

For Personnel Security Records and Criminal Matters Records see Record Access Procedures, above. For Traffic Management Records, the NASA rules for access to records and for contesting contents and appealing initial determinations by the individual concerned appear in the NASA rules section of the **Federal Register**.

RECORD SOURCE CATEGORIES:

Personnel Security Records: Exempt.

Criminal Matter Records: Exempt.

Traffic Management Records: Employees, civil investigative agencies, civil law enforcement agencies, Federal and local judicial systems, medical records.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Personnel Security Records compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, Federal contracts, or access to classified information, but only to the extent that the disclosure of such material would reveal the identity of a confidential source, are exempt from the following sections of the Privacy Act of 1974, 5 U.S.C. 552a:

(c)(3) Relating to access to the disclosure accounting; (d) relating to access to the records; (e)(1) relating to the type of information maintained in the records; (e)(4) (G) (H) and (I) relating to publishing in the annual system notice information as to agency procedures for access and correction and information as to the categories of sources of records; and (f) relating to developing Agency rules for gaining access and making corrections.

The determination to exempt this portion of the Security Records System has been made by the Administrator of NASA in accordance with 5 U.S.C. 552a(k)(5) and Subpart 5 of the NASA regulations appearing in 14 CFR part 1212.

Criminal Matter Records to the extent they constitute investigatory material compiled for law enforcement purposes are exempt from the following sections of the Privacy Act of 1974, 5 U.S.C. 552a:

(c)(3) Relating to access to the disclosure accounting; (d) relating to access to the records; (e)(1) relating to the type of information maintained in the records; (e)(4) (G), (H), and (I) relating to publishing in the annual system notice information as to agency procedures for access and correction and information as to the categories of sources of records; and (f) relating to developing agency rules for gaining access and making corrections.

The determination to exempt this portion of the Security Records System has been made by the Administrator of NASA in accordance with 5 U.S.C. 552a(k)(2) and subpart 5 of the NASA regulations appearing in 14 CFR part 1212.

Records subject to the provisions of 5 U.S.C 552(b)(1), required by Executive order to be kept in the interest of national defense or foreign policy, are exempt from the following sections of the Privacy Act of 1974, 5 U.S.C. 552a:

(c)(3) Relating to access to the disclosure accounting; (d) relating to the access to the records; (e)(1) relating to the type of information maintained in the records; (e)(4) (G), (H), and (I) relating to publishing in the annual system notice information as to agency procedures for access and correction and information as to the categories of sources of records; and (f) relating to developing agency rules for gaining access and making corrections.

The determination to exempt this portion of the Security Records System has been made by the Administrator of NASA in accordance with 5 U.S.C. 552a(k)(1) and subpart 5 of the NASA regulations appearing in 14 CFR part 1212.

NASA 10SPER

SYSTEM NAME:

Special Personnel Records.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Locations 1 through 9 inclusive, and Location 11 as set forth in Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Candidates for and recipients of awards or NASA training; civilian and active duty military detailees to NASA; participants in enrollee programs; Faculty, Science, National Research Council and other Fellows, Associates and Guest Workers including those at NASA Centers but not on NASA rolls; NASA contract and grant awardees and their associates having access to NASA premises and records; individuals with interest in NASA matters including Advisory Committee Members; NASA employees and family members, prospective employees, and former employees; former and current participants in existing and future educational programs, including the Summer High School Apprenticeship Research Program (SHARP).

CATEGORIES OF RECORDS IN THE SYSTEM:

Special Program Files including: (1) Alien Scientist files; (2) Award files; (3) Counseling files, Life and Health Insurance, Retirement, Upward Mobility, and Work Injury Counseling files; (4) Military and Civilian Detailee files; (5) Personnel Development files such as nominations for and records of training or education, Upward Mobility Program files, Intern Program files, Apprentice files, and Enrollee Program files; (6) Special Employment files such as Federal Junior Fellowship Program files, Stay-in-School Program files, Summer Employment files, Worker-Trainee Opportunity Program files, NASA Executive Position files, Expert and Consultant files, and Cooperative Education Program files; and (7) Supervisory Appraisals under Competitive Placement Plan.

Correspondence and related information including: (1) Claims correspondence and records about insurance such as life, health, and travel; (2) Congressional and other Special Interest correspondence, including employment inquiries; (3) Correspondence and records concerning travel related to permanent change of address; (4) Debt complaint correspondence; (5) Employment interview records; (6) Information related to outside employment and activities of NASA employees; (7) Placement followups; (8) Preemployment inquiries and reference checks; (9) Preliminary records related to possible adverse actions; (10) Records related to reductions-in-force; (11) Records under Agency as well as

VOL 63 ISS 18 JA 28 1998 UMI

negotiated grievance procedures; (12) Separation information including exit interview records, death certificates, and other information concerning death, retirement records, and other information pertaining to separated employees; (13) Special planning analysis and administrative information; (14) Performance appraisal records; (15) Working papers for prospective or pending retirements.

Special Records and Rosters including: (1) Locator files, (2) Ranking lists of employees; (3) Repromotion candidate lists; (4) Retired military employee records; (5) Retiree records; (6) Followup records for educational programs, such as the Summer High School Apprenticeship Research Program (SHARP) an other existing or future programs.

Agencywide and Center automated personnel information. Rosters, applications, recommendations, assignment information and evaluations of Faculty, Science, National Research Council and other Fellows, Associates, and Guest Workers including those at NASA Centers but not on NASA rolls; also, information about NASA contract and grant awardees and their associates having access to NASA premises and records.

Information about members of advisory committees and similar organizations. All NASA-maintained information of the same types as, but not limited to, that information required in systems of records for which the Office of Personnel Management and other Federal personnel-related agencies publish Government wide Privacy Act Notices in the **Federal Register**.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2473; 44 U.S.C. 3101.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

The information contained in this system of records is used by officials and employees within NASA for preview, planning, review, and management decisions regarding personnel and activities related to the records.

In addition to the internal uses of the information contained in this system of records, the following are routine uses outside of NASA: (1) Disclosures may be made to organizations or individuals having contract, legal, administrative, or cooperative relationships with NASA, including labor unions, academic organizations, governmental organizations, nonprofit organizations, and contractors; and to organizations or individuals seeking or having available a service or other benefit or advantage. The purpose of such disclosures is to satisfy a need or needs, further cooperative relationships, offer information, or respond to a request; (2) Statistical or data presentations having need of information about individuals in the records; (3) Responses may be made to other Federal agencies and other organizations having legal or administrative responsibilities related to programs and individuals in the records; (4) Disclosure may be made to a Congressional office from the record of an individual in response to a written inquiry from the Congressional office made at the request of that individual; and (5) Standard routine uses 1 through 4 inclusive as set forth in Appendix B may also apply.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper or hard-copy documents and electronic media.

RETRIEVABILITY:

Records are indexed by any one or a combination of name, birth date, Social Security Number, or identification number.

SAFEGUARDS:

Records are protected in accordance with the requirements and procedures which appear in the NASA regulations at 14 CFR part 1212.

RETENTION AND DISPOSAL:

Records are maintained and destroyed in accordance with NASA Records Retention Schedules, Schedule 3.

SYSTEM MANAGER(S) AND ADDRESS:

Associate Administrator for Human Resources and Education, Location 1.

Subsystem Managers: Director, Personnel Division, Office of Inspector General, and Chief, Elementary and Secondary Programs Branch, Education Division, Location 1; Director of Personnel, Locations 1 through 4, 6, 8, and 9; Director of Human Resources, Location 5; Head, Office of Human Resources, Location 7; Human Resources Officer, Location 11. Locations are set forth in Appendix A.

NOTIFICATION PROCEDURE:

Apply to the System or Subsystem Manager at the appropriate location above. In addition to personal identification (name, Social Security Number, etc.), indicate the specific type of record, the appropriate date or period of time, and the specific kind of individual applying (e.g., employee, former employee, contractor employee, etc.).

RECORD ACCESS PROCEDURES:

Same as notification procedures above.

CONTESTING RECORD PROCEDURES:

The NASA regulations pertaining to access to records and for contesting contents and appealing initial determinations by individual concerned are set forth in 14 CFR part 1212.

NASA 10XROI

SYSTEM NAME:

Exchange Records on Individuals.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Locations, 6, 7, 8, and 9 as set forth in Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Present and former employees of, and applicants for employment, with NASA Exchanges, Recreational Associations, and Employers' Clubs at NASA Centers, and members of or participants in NASA Exchange activities, clubs and/or recreational associations. Individuals with active loans or charge accounts at one or more of the several organizations.

CATEGORIES OF RECORDS IN THE SYSTEM:

Exchange Employee's personnel and payroll records, including injury claims, unemployment claims, biographical data, performance evaluations, annual and sick leave records, membership and participation records on Exchange-sponsored activities, clubs and/or recreational associations, and all other employee records. Credit records on NASA employees with active accounts.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2473 and 44 U.S.C. 3101.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

The information contained in this system of records is used within NASA for (1) maintaining exchange employees' payroll, leave, and other records; (2) determining pay adjustment eligibility; (3) determining Federal, State, and City tax withholdings; (4) determining leave eligibility; (5) determining person to notify in emergency; (6) certification of unemployment or injury claims; (7) determining credit standing; and (8) determining eligibility for participation in Exchange-sponsored club or activities and/or admittance into Exchange facilities.

In addition to the internal uses of the information contained in this system of records, the following are routine uses outside of NASA: (1) To furnish a third party a verification of an employee's status upon written request of the employee; (2) To facilitate the verification of employee contributions for insurance data with carriers and collection agents; (3) To provide various Federal, State, and local taxing authorities itemized listing of withholdings for individual income taxers; (4) To respond to State employment compensation requests for wage and separation data on former employees; (5) To report previous job injuries to worker's compensation organizations; (6) For person to notify in an emergency; (7) To report unemployment record to appropriate State and local authorities; (8) When requested, provide other employers with work record; and (9) Standard routine uses 1 through 4 inclusive as set forth in Appendix B.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper or hard-copy documents and electronic media.

RETRIEVABILITY:

Records are indexed by name.

SAFEGUARDS:

Records are protected in accordance with the requirements and procedures which appear in the NASA regulations at 14 CFR part 1212.

RETENTION AND DISPOSAL:

Records are maintained and destroyed in accordance with NASA Records Retention Schedules, Schedule 9.

SYSTEMS MANAGER(S) AND ADDRESS:

NASA Comptroller, Location 1.

Subsystem Managers: Chairperson, Exchange Council, Location 6 and 7; Treasurer, NASA Exchange, Location 8; Exchange Operations Manager, Location 9; Manager, NASA Exchange, Location 11; Head, Administrative Management Branch, and Treasurer Wallops Exchange and Morale Association, Location 4. Locations are as set forth in Appendix A.

NOTIFICATION PROCEDURE:

Individuals may obtain information from the cognizant Subsystem Managers listed above.

RECORDS ACCESS PROCEDURE:

Requests from individuals should be directed to the same address as stated in the notification section above.

CONTESTING RECORD PROCEDURES:

The NASA rules for access to records and for contesting contents and appealing initial determinations by the individual concerned appear in the NASA rules section of the **Federal Register**.

RECORD SOURCE CATEGORIES:

Individual on whom the record is maintained and the individual's supervisor.

NASA 220RER

SYSTEM NAME:

LeRC Occupational Radiation Exposure Records.

SECURITY CLASSIFICATION;

None.

SYSTEM LOCATION:

Locations 8 and 13, as set forth in Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Present and former LeRC employees and contractor personnel who may be exposed to radiation.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, date of birth, exposure history, name of license holder, Social Security Number, employment, and training history.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2473; 44 U.S.C. 3101; 42 U.S.C. 2021, 2073, 2093, 2095, 2111, 2133, 2134, 2201; 10 CFR part 20.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

The information contained in this system of records is used within NASA to inform individuals of their radiation dosage.

In addition to the internal uses of the information contained in this system of records, the following are routine uses outside of NASA: (1) Standard routine uses 1 through 4 inclusive as set forth in Appendix B and (2) The Nuclear Regulatory Commission may inspect records pursuant to fulfilling their responsibilities in administering and issuing licenses to use radiation sources.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper or hard-copy documents and electronic media.

RETRIEVABILITY:

Records are indexed by name.

SAFEGUARDS:

Records are personally supervised during the day and locked in the office at night.

Records are protected in accordance with the requirements and procedures which appear in the NASA rules section of the **Federal Register**.

RETENTION AND DISPOSAL:

Records are maintained and destroyed in accordance with NASA Records Retention Schedules, Schedule 1.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Environmental Health, Location 8.

Subsystem Manager: Manager, Plum Brook Reactor Facility, Location 13. Locations are set forth in Appendix A.

NOTIFICATION PROCEDURE:

Individuals may obtain information from the cognizant System Manager or Subsystem Manager listed above.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

The NASA rules for access to records and for contesting contents and appealing initial determinations by the individual concerned appear in the NASA rules section of the **Federal Register**.

RECORD SOURCE CATEGORIES:

Individual is sole source.

NASA 51LISTS

SYSTEM NAME:

Locator and Information Services Tracking System (LISTS).

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Location 4 as set forth in Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All on-site and off-site NASA/GSFC civil servants and on-site and near-site contractors, tenants, and other guest workers possessing or requiring badge identifications.

CATEGORIES OF RECORDS IN THE SYSTEM:

In order to achieve the goal for LISTS of a comprehensive and accurate source of information for institutional services and planning, general, and personal information as noted below must be collected.

General information: (1) Last name; (2) First Name; (3) Middle Initial; (4) Nickname; (5) Title/Degree; (6) Position/Job Title; (7) Skill Classification; (8)

VOL 63 ISS 18 JA 28 1998 UMI

Administrative Level; (9) Organization Code; (10) Mail Code; (11) Telephone Extension; (12) Alternate Telephone Extension; (13) Building; (14) Room; (15) Use of Office Space; (16) Shift Worked; (17) Off-Site Telephone Number; (18) Off-Site Location; (19) Contract Number; (20) Authorization Type if NonContractor/Civil Servant; (21) and (22) Acronym of Contractor and/or Host Organization, and (23) Goddard Identification Number.

Personal information: (1) Social Security Number; (2) Birth Date; (3) Sex; (4) Citizenship; (5) If Not U.S. Citizen, Immigration Alien Number; (7) Street Residence; (7) City Residence; (8) County Residence; (9) State Residence; (10) Zip Code Residence; (11) Residence Telephone; (12) Name of Emergency Contact; (13) Relationship of Emergency Contact; (14) Telephone Number of Emergency Contact; (15) Address of Emergency Contact.

AUTHORITY FOR MAINTENANCE FOR THE SYSTEM:

5 U.S.C. 301; 42 U.S.C. 2473; 44 U.S.C. 3101.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The intended official uses of the privacy and personal information are: To assist the Security Office in issuing picture badge identifications and coordinating clearance requests; to establish for the library and authorization for use of its printed materials; to identify the listed emergency contact in case of an emergency to a Center employee or guest worker; and to provide a home address in case an employee or guest worker must be contacted during off hours or for official mailings to a home address.

Other official uses of the general (nonprivacy/personal) records are: To locate individuals working for or at the Goddard Space Flight Center; to improve services provided to the Center including mail room operations, space utilization, identification of potentially hazardous work environments, scheduling of annual physical examinations, and maintenance of electronic mail user identification names; and as a tool for performing short- and long-term institutional planning.

The information contained in this system of records is used by officials and employees within NASA for preview, planning, review, and management decisions regarding personnel and institutional services related to the records.

In addition to the internal uses of the information contained in this system of records, the following are routine uses outside of NASA: (1) Disclosures may be made to organizations or individuals having contract, legal, administrative, or cooperative relationships with NASA, including labor unions, academic organizations, governmental organizations, nonprofit organizations, and contractors; and to organizations or individuals seeking or having available a service or other benefit or advantage. The purpose of such disclosures is to satisfy a need or needs, further cooperative relationships, offer information, or respond to a request; (2) Statistical or data presentations may be made to governmental or other organizations or individuals having need of information about individuals in the records; (3) Disclosure may be made to a Congressional office from the record of an individual in response to written inquiry from the Congressional office made at the request of that individual; and (4) Standard routine uses 1 through 4 inclusive as set forth in Appendix B may also apply.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper or hard-copy documents and electronic media.

RETRIEVABILITY:

General fields are indexed by any one or combination of choices to authorized users. Personal fields are not retrievable except by designees in the Security and Library Offices and the System Manager. For the Library, the retrievability is for Social Security Number, immigration alien number, and name only.

SAFEGUARDS:

Records are protected in accordance with the requirements and procedures which appear in the NASA regulations at 14 CFR part 1212 and through the password and access protections built into the data base management software system.

RETENTION AND DISPOSAL:

Records are maintained and destroyed in accordance with NASA Records Retention Schedules, Schedule 1.

SYSTEM MANAGER(S) AND ADDRESS:

Head, Administrative Support Branch, Code 231.0, Logistics Management Division, Location 4 as set forth in Appendix A.

NOTIFICATION PROCEDURES:

Apply to the System Manager at the appropriate location above. In addition to personal identification (name, social security number, etc.), indicate the specific type of record, the appropriate date or period of time, and the specific kind of individual applying (current employee, former employee, civil servant, contractor, etc.).

RECORD ACCESS PROCEDURES:

Same as notification procedures above.

CONTESTING RECORD PROCEDURES:

The NASA regulations pertaining to access to records and for contesting contents and appealing initial determinations by the individual concerned are set forth in 14 CFR part 1212.

RECORD SOURCE CATEGORIES:

Individuals to whom the records pertain.

NASA 51RSCR

SYSTEM NAME:

GSFC Radiation Safety Committee Records.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Location 4 as set forth in Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Radiation users and custodians under GSFC cognizance.

CATEGORIES OF RECORDS IN THE SYSTEM:

Employment and training history.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2743; 44 U.S.C. 3101; USNRC License and GHB 1860.1, "Radiation Safety Handbook;" GHB 1860.2, "Radiation Safety Radio Frequency;" GHB 1860.3, "Radiation Safety Laser."

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information contained in this system of records is used within NASA for review and approval of custodians and users of ionizing and non-ionizing radiation by the Radiation Safety Committee. In addition to the internal uses of the information contained in this system of records, the following are routine uses outside NASA: (1) The Nuclear Regulatory Commission may inspect records pursuant to fulfilling their responsibilities in administering and issuing licenses to use radiation sources; (2) Occupational Safety and Health Administration (Federal and State) may inspect records pursuant to fulfilling their responsibilities under the Occupational Safety and Health laws;

(3) The Environmental Protection Agency may inspect records pursuant to fulfilling their responsibilities under the Environmental Protection laws and Executive order; (4) The Food and Drug Administration may inspect records pursuant to fulfilling their responsibilities respecting use of lasers and x-rays; (5) Standard routine uses 1 through 4 inclusive as set forth in Appendix B.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper or hard-copy documents and electronic media.

RETRIEVABILITY:

Records are indexed by name only.

SAFEGUARDS:

Records are located in locked metal file cabinets in a locked room with access limited to those whose official duties require access.

RETENTION AND DISPOSAL:

Records are maintained and destroyed in accordance with NASA Records Retention Schedules, Schedule 1.

SYSTEMS MANAGER(S) AND ADDRESS:

Chief, Health, Safety, and Security Office, Location 4 as set forth in Appendix A.

NOTIFICATION PROCEDURE:

Individauls may obtain information from the System Manager.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

The NASA regulations for access to records and for contesting contents and appealing initial determinations by the individual concerned appear at 14 CFR part 1212.

RECORD SOURCE CATEGORIES:

Employees.

NASA 72XOPR

SYSTEM NAME:

JSC Exchange Activities Records.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Location 4 as set forth in Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees and past employees of JSC Exchange Operations, applicants under the JSC Exchange Scholarship Program, and JSC employees or JSC contractor employees participating in sports or special activities sponsored by the Exchange.

CATEGORIES OF RECORDS IN THE SYSTEM:

For present and past employees of the JSC Exchange Operations, the system includes a variety of records relating to personnel actions and determinations made about an individual while employed by the NASA Exchange-JSC. These records contain information about an individual relating to birth date; social security number; home address and telephone number; marital status; references; veteran preference, tenure, handicap; position description, past and present salaries, payroll deductions, leave; letters of commendation and reprimand; adverse actions, charges and decisions on charges; notice of reduction-in-force; personnel actions, including but not limited to, appointment, reassignment, demotion, detail, promotion, transfer and separation; minority group; records relating to life insurance, health and retirement benefits; designation of beneficiary; training; performance ratings; physical examinations; criminal matters; data documenting the reasons for personnel actions or decisions made about an individual; awards; and other information relating to the status of the individual.

For successful applicants under the JSC Exchange Scholarship Program, the system contains information supplied by individual Center employees who have applied for an Exchange Scholarship for financial transactions or holdings, employment history, medical data, and other related information.

For participants in social or sports activities sponsored by the Exchange, information includes employees' or contractors' employee identification number, organization, location, telephone number, and other information directly related to status or interest in participation in such activities.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2473; 44 U.S.C. 3101; NASA Management Instruction 9050.6; Treasury Fiscal Requirement Manual, Part III, Payroll Deductions and Withholdings; and the Federal Personnel Manual.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information contained in this system of records is used within NASA for the following purposes: (1) With respect to past or present employees of the JSC Exchange Operations, information in the system is used to: (a) Pay employees and advise employees through Leave and Earnings Statements, (b) provide for promotion opportunities, disciplinary actions, staffing controls, budget requirements, employee fringe benefits, and other related personnel managerial purposes, and (c) submit reports in accordance with legal or policy directives and regulations to Center management and NASA Headquarters; (2) With respect to successful applicants under the JSC Scholarship Program, the information in the system is used to award scholarships to the sons and daughters of NASA–JSC employees, and (3) With respect to participants in the social or sports activities sponsored by the Exchange, the information maintained in the system is used to facilitate participation in such activities.

In addition to the internal uses of the information contained in this system of records, the following are routine uses outside of NASA for information maintained on JSC Exchange Operations employees only: (1) Provide information in accordance with legal or policy directives and regulations to the Internal Revenue Service, Department of Labor, Department of Commerce, Texas State Government Agencies, labor unions; (2) Provide information to insurance carriers with regard to worker's compensation, health and accident, and retirement insurance coverages; (3) Provide employment or credit information to other parties as requested by a current or former employee of the JSC Exchange Operations; and (4) Standard routine uses 1 through 4 inclusive as set forth in Appendix B.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS:

STORAGE:

Paper or hard-copy documents and electronic media.

RETRIEVABILITY:

For Exchange employees, records are maintained by name and filed as current or past employee. For Scholarship applicants, records are maintained by name. For participants in social or sports activities, records are maintained by name.

SAFEGUARDS:

Records are located in locked metal file cabinets with access limited to those whose official duties require access.

RETENTION AND DISPOSAL:

Records are maintained and destroyed in accordance with NASA Records Retention Schedules, Schedule 9.

VOL 63 ISS 18 JA 28 1998 UMI

SYSTEM MANAGER(S) AND ADDRESS:

Manager, Exchange Operations, NASA Exchange-JSC, Location 5, as set forth in Appendix A.

NOTIFICATION PROCEDURE:

Individuals may obtain information from the System Manager.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

The NASA regulations for access to records and for contesting contents and appealing initial determinations by the individual concerned appear in 14 CFR part 1212.

RECORD SOURCE CATEGORIES:

For employees of the JSC Exchange Operations, information is obtained from the individual employee, the employee references, insurance carriers, JSC Health Services Division, JSC Security, employment agencies, Texas Unemployment Commission, credit bureaus, and creditors.

With respect to the JSC Exchange Scholarship Program, the information is obtained from the parents or guardians of the scholarship participants.

For JSC employees and JSC contractor employees, participation in social or sports activities sponsored by the Exchange information is obtained from the individual participant.

NASA 76RTES

SYSTEM NAME:

KSC Radiation Training and Experience Summary.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Location 6 as set forth in Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Custodians and/or users of sources radiation (ionizing and non-ionizing). Applicable to all users or custodians at KSC and NASA or NASA contractor personnel at Cape Canaveral Air Force Station, Florida, or Vandenberg Air Force Base, California.

CATEGORIES OF RECORDS IN THE SYSTEM:

Individuals name and radiation-related training and experience.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2473; 44 U.S.C. 3101; 42 U.S.C. 2021, 2111, 2201, 2232, 2233, 10 CFR part 33 for Federal Licensee, and Florida Administrative Code, Chapter 10 D–56 for State Licensee.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information contained in this system of records is used within NASA to determine the suitability of individuals for specific assignments dealing with radiation and to preclude unnecessary exposure to self and others.

In addition to the internal uses of the information contained in this system of records, routine uses outside of NASA include (1) Disclosure to Air Force Radiation Protection Officers at Eastern Space and Missile Center, Patrick Air Force Base, Florida, and Vandenberg Air Force Base, California, to governmental and private license holders, and to NASA contractors using sources of radiation to facilitate protection of the individual and the public; (2) Standard routine uses 1 through 4 inclusive as set forth in Appendix B.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper or hard-copy documents and electronic media.

RETRIEVABILITY:

Records are indexed by name, program/project title. Use authorization number and/or license number as applicable.

SAFEGUARDS:

Records are personally supervised during the day and locked in the office at night. Records are protected in accordance with the requirements and procedures which appear in the applicable NASA regulations at 14 CFR part 1212.

RETENTION AND DISPOSAL:

Records are maintained and destroyed in accordance with NASA Records Retention Schedules, Schedule 1.

SYSTEM MANAGER(S) AND ADDRESS:

KSC Radiation Protection Officer, Location 6 as set forth in Appendix A.

NOTIFICATION PROCEDURE:

Individuals may obtain information from the System Manager.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

The NASA regulations for access to records and for contesting contents and appealing initial determinations by the individual concerned appear at 14 CFR part 1212.

RECORD SOURCE CATEGORIES:

Individual is sole source.

NASA 76STCS

SYSTEM NAME:

KSC Shuttle Training Certification and Record System (YC–04).

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Location 6 as set forth in Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

KSC Civil Service, KSC contractor, and Department of Defense personnel who have received systems, safety, reliability and quality assurance, and skills, training in support of KSC or Space Shuttle operations.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records of training attendance and certifications, including certifications of physical ability to perform hazardous tasks.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2473; 44 U.S.C. 3101.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information contained in this system of records is used within NASA to determine training needs, and the operational readiness of the work force, to provide data for badging and access control to hazardous areas or critical operations, to determine the size of individual protective equipment and to identify personnel with needed skill combinations. In addition to the internal uses of the information contained in the systems of records, the following are routine uses outside of NASA: (1) Disclosure is made of information on employees of KSC contractors to those contractor organizations and to the Base Operations Contractor, to facilitate the performance of the contracts. The Base Operations Contractor compiles these training records for KSC; (2) Standard routine uses 1 through 4 inclusive as set forth in Appendix B.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper or hard-copy documents and electronic media. All records for KSC are maintained by a NASA Contractor on computer tape with printouts made as required. Bar code readers are utilized for transfer of information on course attendees to a central processing unit by contractor personnel.

RETRIEVABILITY:

Indexed by Social Security Number, name, organization, and skill.

SAFEGUARDS:

These training records are maintained under administrative control of responsible organizations in areas that are locked when not in use. In addition, records are safeguarded in accordance with the requirements and procedures which appear in the NASA regulations at 14 CFR part 1212.

RETENTION AND DISPOSAL:

Records are maintained and destroyed in accordance with NASA Records Retention Schedules, Schedule 8.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Human Resources Development Branch, Location 6 as set forth in Appendix A.

NOTIFICATION PROCEDURE:

Individuals may obtain information from the System Manager.

RECORDS ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

The NASA regulations for access to records and for contesting contents and for appealing initial determinations by the individual concerned appear at 14 CFR part 1212.

RECORD SOURCE CATEGORIES:

Information is obtained from class input, rosters, operational records, reports of physical examination completions, and actions implemented by certifications boards.

NASA 76XRAD

SYSTEM NAME:

KSC USNRC Occupational External Radiation Exposure History for Nuclear Regulatory Commission Licenses.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Location 6 as set forth in Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

KSC civil servants and KSC contractor personnel who have received radiation exposure.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, date of birth, exposure history, name of license holder, Social Security Number.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 2473; 44 U.S.C. 3101; 42 U.S.C. 2021, 2073, 2093, 2095, 2111, 2133, 2134, and 2201; 10 CFR part 20 for Federal Licensee; and Florida Administrative Code, Chapter 10 D–56 for State Licensee.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information contained in this system of records is used within NASA to record exposure and to inform individuals of their approaching or exceeding radiation dose limits.

In addition to the internal uses of the information contained in this system of records, the following are routine uses outside of NASA: (1) Disclosure to Air Force Radiation Protection Offices at Eastern Space and Missile Center, Patrick Air Force Base, Florida, and Vandenberg Air Force Base, California, to governmental and private license holders, and to NASA contractors using radioactive materials or ionizing radiation producing devices to facilitate the protection of individuals; (2) Standard routine uses 1 through 4 inclusive as set forth in Appendix B.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper or hard-copy documents and electronic media.

RETRIEVABILITY:

Records are indexed by name in personnel dosimetry files.

SAFEGUARDS:

Records are personally supervised during the day and locked in the office at night. Records are protected in accordance with the requirements and procedures which appear in the NASA regulations at 14 CFR part 1212.

RETENTION AND DISPOSAL:

Records are maintained and destroyed in accordance with NASA Records Retention Schedules, Schedule 1.

SYSTEM MANAGER(S) AND ADDRESS:

KSC Radiation Protection Officer, Location 6 as set forth in Appendix A.

NOTIFICATION PROCEDURE:

Individuals may obtain information from the System Manager.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

The NASA regulations for access to records and for contesting contents and appealing initial determinations by the individual concerned appear at 14 CFR part 1212.

RECORD SOURCE CATEGORIES:

Individual is sole source.

APPENDIX A—LOCATION NUMBERS AND MAILING ADDRESSES OF NASA CENTERS AT WHICH RECORDS ARE LOCATED

Location 1

NASA Headquarters, National Aeronautics and Space Administration, Washington, DC 20546–0001

Location 2

Ames Research Center, National Aeronautics and Space Administration, Moffett Field, CA 94035–1000

Location 3

Dryden Flight Research Center, National Aeronautics and Space Administration, PO Box 273, Edwards, CA 93523–0273

Location 4

Goddard Space Flight Center, National Aeronautics and Space Administration, Greenbelt, MD 20771–0001

Location 5

Lyndon B. Johnson Space Center, National Aeronautics and Space Administration, Houston, TX 77058–3696

Location 6

John F. Kennedy Space Center, National Aeronautics and Space Administration, Kennedy Space Center, FL 32899–0001

Location 7

Langley Research Center, National Aeronautics and Space Administration, Hampton, VA 23681–0001

Location 8

Lewis Research Center, National Aeronautics and Space Administration, 21000 Brookpark Road, Cleveland, OH 44135–3191

Location 9

George C. Marshall Space Flight Center, National Aeronautics and Space Administration, Marshall Space Flight Center, AL 35812–0001

NASA Independent Verification and Validation Facility (NASA IV&V), 100 University Drive, Fairmont, WV 26554

VOL 63 ISS 18 JA 28 1998 UMI

Appendix B—Standard Routine Uses—NASA

The following routine uses of information contained in systems of records subject to the Privacy Act of 1974 are standard for many NASA systems. They are cited by reference in the paragraph "Routine uses of records maintained in the system, including categories of users and the purpose of such uses" of the **Federal Register** notice on those systems to which they apply.

Standard Routine Use No. 1—LAW ENFORCEMENT—In the event that this system of records indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule, or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, State, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation, or order issued pursuant thereto.

Standard Routine Use No. 2—DISCLOSURE WHEN REQUESTING INFORMATION—A record from this system of records may be disclosed as a 'routine use' to a Federal, State, or local agency maintaining civil, criminal, or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to an agency decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant, or other benefit.

Standard Routine Use No. 3—DISCLOSURE OF REQUESTED INFORMATION—A record from this system of records may be disclosed to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

Standard Routine Use No. 4—COURT OR OTHER FORMAL PROCEEDINGS—In the event there is a pending court or formal administrative proceeding, any records which are relevant to the proceeding may be disclosed to the Department of Justice or other agency for purposes of representing the Government, or in the course of presenting evidence, or they may be produced to parties or counsel involved in the proceeding in the course of pre-trial discovery.

BILLING CODE 7510–01–M

NATIONAL TRANSPORTATION SAFETY BOARD

Public Hearing on Korean Air Flight 801 Accident

In connection with its investigation of the accident involving Korean Air flight 801, a Boeing 747–300, in Agana, Guam, on August 6, 1997, the National Transportation Safety Board will convene a public hearing beginning at 9 a.m. local time on Tuesday, March 24, 1998, at the Hawaii Convention Center, 1833 Kalakua Avenue, Honolulu, Hawaii. For more information, contact the NTSB Major Investigations Division, telephone (202) 314–6310 or Paul Schlamm or Keith Holloway, NTSB Office of Public Affairs, telephone (202) 314–6100.

Dated: January 22, 1998.

Ray Smith,

Alternate Federal Register Liaison Officer.

BILLING CODE 7533–01–M

NUCLEAR REGULATORY COMMISSION

Application for a License to Export a Utilization Facility

Pursuant to 10 CFR 110.70 (b)(1) "Public notice of receipt of an application", please take notice that the Nuclear Regulatory Commission has received the following application for an export license. Copies of the application are on file in the Nuclear Regulatory Commission's Public Document Room located at 2120 L Street, N.W., Washington, D.C.

A request for a hearing or petition for leave to intervene may be filed within 30 days after publication of this notice in the **Federal Register**. Any request for hearing or petition for leave to intervene shall be served by the requestor or petitioner upon the applicant, the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555; the Secretary, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555; and the Executive Secretary, U.S. Department of State, Washington, D.C. 20520.

In its review of the application for a license to export a utilization facility as defined in 10 CFR Part 110 and noticed herein, the Commission does not evaluate the health, safety or environmental effects in the recipient nation of the facility to be exported. The information concerning the application follows.

Name of applicant, date of application, date received, application No.	Description of facility	End use	Country of destination
Combustion Engineering, Dec. 23, 1997, Dec. 31, 1997, XR165.	Two (2) Nuclear utilization facilities 1000MWE each.	Commercial operation of electricity	North Korea.

Dated this 21st day of January 1998 at Rockville, Maryland.

For the Nuclear Regulatory Commission.

Ronald D. Hauber,

Director, Division of Nonproliferation, Exports and Multilateral Relations, Office of International Programs.

[FR Doc. 98–2018 Filed 1–27–98; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on the Medical Uses of Isotopes: Meeting Notice

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Notice of meeting.

SUMMARY: The U.S. Nuclear Regulatory Commission will convene a meeting of a subcommittee of the Advisory Committee on the Medical Uses of Isotopes (ACMUI) on February 9 and 10, 1998. The meeting will take place at the address provided below. All sessions of the meeting will be open to the public.

Topic of discussion will be the proposed rule text for the revision of 10 CFR part 35 and associated guidance.

DATES: The meeting will begin at 8:00 a.m., on February 9 and 10, 1998.

ADDRESSES: U.S. Nuclear Regulatory Commission, Two White Flint North, 11545 Rockville Pike, Room T2B3, Rockville, MD 20852–2738.

FOR FURTHER INFORMATION, CONTACT: Patricia Vacherlon, U.S. Nuclear Regulatory Commission, Office of Nuclear Material Safety and Safeguards, MS T8F5, Washington, DC 20555, Telephone (301) 415–6376.

Conduct of the Meeting

Mr. Dennis Swanson will chair the meeting. Mr. Dennis Swanson will conduct the meeting in a manner that will facilitate the orderly conduct of business. The following procedures apply to public participation in the meeting:

1. Persons who wish to provide a written statement should submit a reproducible copy to Patricia Vacherlon (address listed previously), by February 2, 1998. Statements must pertain to the topics on the agenda for the meeting.

2. At the meeting, questions from members of the public will be permitted at the discretion of the Chairman.

3. The transcript and written comments will be available for inspection, and copying, for a fee, at the NRC Public Document Room, 2120 L Street, NW., Lower Level, Washington, DC 20555, telephone (202) 634–3273, on or about April 1, 1998. Minutes of the meeting will be available on or about May 1, 1998.

4. Seating for the public will be on a first-come, first-served basis.

This meeting will be held in accordance with the Atomic Energy Act of 1954, as amended (primarily Section 161a); the Federal Advisory Committee Act (5 U.S.C. App); and the Commission's regulations in Title 10, U.S. Code of Federal Regulations, part 7.

Dated: January 22, 1998.

Andrew L. Bates,

Advisory Committee Management Officer.

[FR Doc. 98–2019 Filed 1–27–98; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on the Medical Uses of Isotopes: Meeting Notice

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of meeting.

SUMMARY: The U.S. Nuclear Regulatory Commission will convene a meeting of the Advisory Committee on the Medical Uses of Isotopes (ACMUI) on March 1–2, 1998. The meeting will take place at the address provided below. All sessions of the meeting will be open to the public.

Topics of discussion will include: (1) An update on the revision of 10 CFR part 35 and associated activities to include a detailed discussion on the proposed rule text; (2) a discussion of the committee's response to the Commission's request for the ACMUI to take a focused look at revisions to part 35; (3) a discussion of the committee's response to the Commission's request for the ACMUI to identify criteria for evaluation of committee performance; (4) a discussion of the calibration and the correct use of Strontium-90 eye applicators; (5) a discussion of current training and experience requirements to conduct intravascular brachytherapy; (6) a discussion of previous ACMUI recommendations.

DATES: The meeting will begin at 8 a.m., on March 1 and 2, 1998.

ADDRESSES: U.S. Nuclear Regulatory Commission, Two White Flint North, 11545 Rockville Pike, Room T2B3, Rockville, MD 20852–2738.

FOR FURTHER INFORMATION, CONTACT: Patricia Vacherlon, U.S. Nuclear Regulatory Commission, Office of Nuclear Material Safety and Safeguards, MS T8F5, Washington, DC 20555, Telephone (301) 415–6376.

Conduct of the Meeting

Judith Ann Stitt, M.D., will chair the meeting. Dr. Stitt will conduct the meeting in a manner that will facilitate the orderly conduct of business. The following procedures apply to public participation in the meeting:

1. Persons who wish to provide a written statement should submit a reproducible copy to Patricia Vacherlon (address listed previously), by February 20, 1998. Statements must pertain to the topics on the agenda for the meeting.

2. At the meeting, questions from members of the public will be permitted at the discretion of the Chairman.

3. The transcript and written comments will be available for inspection, and copying, for a fee, at the NRC Public Document Room, 2120 L Street, N.W., Lower Level, Washington, DC 20555, telephone (202) 634–3273, on or about April 1, 1998. Minutes of the meeting will be available on or about May 1, 1998.

4. Seating for the public will be on a first-come, first-served basis.

This meeting will be held in accordance with the Atomic Energy Act of 1954, as amended (primarily Section 161a); the Federal Advisory Committee Act (5 U.S.C. App); and the Commission's regulations in Title 10, *Code of Federal Regulations*, Part 7.

Dated: January 23, 1998.

Andrew L. Bates,

Advisory Committee Management Officer.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

Public Workshop: Demonstrating Compliance With the Radiological Criteria for License Termination—Methods to Conduct a Final Status Survey and Dose Modeling

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of workshop.

SUMMARY: The NRC will hold a public workshop in Rockville, Maryland to receive input from licensees and the public on working papers on "Methods to Conduct a Final Status Survey," and "Dose Modeling." These working papers are being developed as part of a future Regulatory Guide. The Regulatory Guide is being written to describe an acceptable method to comply with the NRC's recent final rule on Radiological Criteria for License Termination (62 FR 39058; July 21, 1997). These working papers have received only limited NRC staff review or approval. The purpose of the workshop is to obtain comments, suggestions, and information from the public on the approach in the working papers so that a better Regulatory Guide can be developed. All interested licensees and members of the public are invited to attend this workshop.

DATES: The workshop will be held on February 18 and 19, 1998, beginning at 9 a.m. and ending at about 5 p.m. There is no pre-registration. Interested parties, unable to attend the workshop, are encouraged to provide written comments by March 13, 1998.

ADDRESSES: The public workshop will be held in the NRC's auditorium at Two White Flint North, 11545 Rockville Pike, Rockville, Maryland. Visitor parking around the NRC building is limited; however, the workshop site is located adjacent to the White Flint Station on the Metro Red Line. A transcript of this workshop will be available for inspection, and copying for a fee at the NRC Public Document Room, 2120 L Street, NW., Lower Level, Washington, DC 20555, on or about March 2, 1998.

Obtaining the Working Paper

Copies of the draft working papers to be discussed will be made available electronically, prior to the workshop, at the NRC Technical Conference Forum Website under the topic "Final Rule for License Termination" at http://techconf.llnl.gov/cgi-bin/topics or from the NRC's Public Document Room, 2120 L Street, NW., (Lower Level), Washington, DC 20555; telephone 202–634–3273; fax 202–634–3343. To view

VOL

the working papers at the Website, select "Final Rule on Radiological Criteria for License Termination," then select "Lic Term Document Library," then select "Regulatory Guide," and then select "Module C.2: Regulatory Position—Final Status Survey," or "Module C.1: Regulatory Position—Dose Modeling."

Meeting Agenda

9:00 Welcome and introduction

9:05 Presentation describing issues considered in developing the draft working paper

10:30 Break

10:45 Public comments on the draft working paper. Attendees will be asked for questions and comments on each section of the draft working paper.

12:00 Lunch

1:30 Continuation of public comments.

5:00 Adjourn

Submitting Written Comments

Comments may be posted electronically on the NRC Technical Conference Forum Website mentioned above. Comments submitted electronically can also be viewed at that Website. Comments may also be mailed to the Chief, Rules and Directives Branch, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

FOR FURTHER INFORMATION: For information or questions on meeting arrangements, contact Nina Barnett, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone 301–415–6187, fax 301–415–5385, E-mail: NMB@NRC.GOV. For technical information or questions, contact Stephen A. McGuire, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone 301–415–6204; fax: 301–415–5385; E-mail: SAM2@NRC.GOV.

Dated at Rockville, Maryland this 22nd day of January, 1998.

For the Nuclear Regulatory Commission.

Cheryl Trottier,

Chief, Radiation Protection and Health Effects Branch, Division of Regulatory Applications, RES.

[FR Doc. 98–2017 Filed 1–27–98; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

Biweekly Notice; Applications and Amendments to Facility Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law 97–415, the U.S. Nuclear Regulatory Commission (the Commission or NRC staff) is publishing this regular biweekly notice. Public Law 97–415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued from January 5, 1998, through January 15, 1998. The last biweekly notice was published on January 14, 1998 (63 FR 2271).

Notice of Consideration of Issuance of Amendments to Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

Written comments may be submitted by mail to the Chief, Rules and Directives Branch, Division of Administration Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room 6D22, Two White Flint North, 11545 Rockville Pike, Rockville, Maryland from 7:30 a.m. to 4:15 p.m. Federal workdays. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC. The filing of requests for a hearing and petitions for leave to intervene is discussed below.

By February 27, 1998, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC and at the local public document room for the particular facility involved. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or

petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of a hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemakings and Adjudications Staff, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for a hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room for the particular facility involved.

Carolina Power & Light Company, Docket No. 50–261, H.B. Robinson Steam Electric Plant, Unit No. 2, Darlington County, South Carolina

Date of amendment request: December 17, 1997.

Description of amendment request: The requested amendment revises Technical Specification Section 5.6.5, "Core Operating Limits Report (COLR)." The revisions add reference to an additional approved methodology for correlating departure from nucleate boiling (DNB) ratios. The added methodology is the Siemens Power Corporation Topical Report, EMF–92–153(P)(A), "HTP: Departure from Nucleate Boiling Correlation for High Thermal Performance Fuel."

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the change involve a significant increase in the probability or consequences of an accident previously evaluated?

The proposed change adds a methodology that has been previously reviewed and approved by the NRC for determining the DNB safety limit. The new methodology utilizes the High Thermal Performance (HTP) correlation developed by the fuel manufacturer, Siemens Power Corporation. The HTP correlation is empirically based and results in a DNB safety limit that corresponds to a 95% probability at a 95% confidence level that DNB will not occur. The DNB ratio safety limit is a conservative design value which is used as a basis for setting core safety limits. The DNB correlation is not assumed to be an initiator of analyzed events or transients, and use of the new DNB correlation will not alter assumptions relative to mitigation of accident or transient events. The proposed change has been confirmed to ensure that no previously evaluated accident or transient results in a DNB less than the DNB correlation safety limit. The HTP DNB correlation assures with high confidence that, for accidents and transients that do not result in a DNBR less than the HTP DNBR safety limit, departure from nucleate boiling and subsequent fuel overheat will not occur in HTP fuel.

Therefore, the proposed change does not involve any increase in the probability or consequences of an accident previously evaluated.

2. Does the change create the possibility of a new or different kind of accident from any accident previously evaluated?

The proposed change does not involve any physical alteration of plant systems, structures, or components or changes in parameters governing normal plant operation. The proposed change

VOL 63 ISS 18 JA 28 1998 UMI

will allow use of the new DNB correlation in like manner as the existing DNB correlation in the analysis of accidents and transients to assure that the acceptance criteria for current analyses are met. Therefore, the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does this change involve a significant reduction in a margin of safety?

The proposed change allows use of a DNB correlation that determines a safety limit that is slightly lower than the currently used DNB correlation. While the slightly lower DNB correlation safety limit allows a small increase in margin in analyzing accidents and transients, the change from the existing DNB correlation to the proposed DNB correlation is not directly comparable to the margin of safety. This is because the margin of safety for a particular accident or transient is that margin that results from the difference between the DNBR calculated for the particular accident or transient using the DNB correlation and the DNBR safety limit determined by the DNB correlation. Since both the safety limit and the accident or transient calculated DNB use the same DNB correlation, the margin of safety is consistently calculated and evaluated for acceptability. Since both the current and proposed DNB correlation closely approximate test data, and they still meet the 95/95 criterion, and the new DNB correlation does not result in a DNBR from an accident or transient less than the DNBR correlation safety limit, the proposed change does not result in a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Hartsville Memorial Library, 147 West College Avenue, Hartsville, South Carolina 29550.

Attorney for licensee: William D. Johnson, Vice President and Senior Counsel, Carolina Power & Light Company, Post Office Box 1551, Raleigh, North Carolina 27602.

NRC Project Director: Gordon E. Edison, Acting.

Consolidated Edison Company of New York, Docket No. 50–247, Indian Point Nuclear Generating Unit No. 2, Westchester County, New York

Date of amendment request: June 6, 1997, as supplemented September 25, 1997.

Description of amendment request: The proposed amendment would delete the requirement to sample the spray additive tank per Technical Specification (TS) Table 4.1–2, "Frequency for Sampling Tests," and delete the sodium hydroxide (NaOH) reference in TS Section 5.2.C.1. The request to delete the requirement and the reference was inadvertently omitted as part of the licensee's original submittal dated August 22, 1996, supplemented March 28, 1997, to eliminate the requirement for the NaOH containment spray additive and spray additive tank.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration. The NRC staff has reviewed the licensee's analysis against the standards of 10 CFR 50.92(c). The NRC staff's review is presented below:

(1) Does the proposed license amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response:

The request to remove the requirement for the spray additive tank was approved as part of Amendment No. 191 to Operating License No. DPR 26. By letter dated April 23, 1997, the Commission reviewed and approved the amendment request. However, Consolidated Edison failed to include the deletion of the requirement to sample the spray additive tank. The removal of the requirement for the spray additive tank has been analyzed and approved; therefore, there is no further basis for continued testing of the tank. Further, the deletion of the requirement would not involve a significant increase in the probability or consequences of an accident previously evaluated.

(2) Does the proposed license amendment create the possibility of a new or different kind of accident from any previously evaluated?

Response:

The proposed changes allow the containment safeguards to mitigate the consequences of a design basis LOCA [loss-of-coolant accident] in a manner equivalent to that previously approved. Therefore, the proposed changes do not create an accident or malfunction of safety equipment of a different type.

(3) Does the proposed amendment involve a significant reduction in margin of safety?

Response:

With the proposed changes, all of the safety criteria previously evaluated are still valid and remain conservative. Therefore, the proposed amendment does not involve a significant reduction in the margin of safety.

Based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York 10610.

Attorney for licensee: Brent L. Brandenburg, Esq., 4 Irving Place, New York, New York 10003.

NRC Project Director: S. Singh Bajwa, Director.

Duke Energy Corporation, et al., Docket Nos. 50–413 and 50–414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of amendment request: December 17, 1997.

Description of amendment request: The proposed amendments would revise Section 6.9.1.9 of the Technical Specifications (TS) to reference updated or recently approved topical reports, which contain methodologies used to calculate cycle-specific limits contained in the Core Operating Limits Report. These topical reports have all been previously approved by the staff under licensing actions separate from the current amendment request.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration. The NRC staff has reviewed the licensee's analysis against the standards of 10 CFR 50.92(c). The NRC staff's analysis is presented below.

1. Will the change involve a significant increase in the probability or consequences of an accident previously evaluated?

No. The proposed changes do not involve any modification to existing systems, components, operating limits, or operating procedure. Therefore, these proposed changes will have no impact on the consequences or probabilities of any previously evaluated accidents.

2. Will the change create the possibility of a new or different kind of accident from any accident previously evaluated?

No. No actual plant equipment or operating procedure will be affected by the proposed changes. Hence, no new equipment failure modes or accidents from those previously evaluated will be created.

3. Will the change involve a significant reduction in a margin of safety?

No. Margin of safety is associated with confidence in the design and operation of the plant. The proposed changes to the TS do not involve any change to plant design or operation. Thus, the margin of safety previously analyzed and evaluated is maintained.

Based on this analysis, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina 29730.

Attorney for licensee: Mr. Paul R. Newton, Legal Department (PB05E), Duke Energy Corporation, 422 South Church Street, Charlotte, North Carolina 28242–0001.

NRC Project Director: Herbert N. Berkow.

Duke Energy Corporation, Docket Nos. 50–369 and 50–370, McGuire Nuclear Station, Units 1 and 2, Mecklenburg County, North Carolina

Date of amendment request: December 17, 1997.

Description of amendment request: The proposed amendments would revise Section 6.9.1.9 of the Technical Specifications (TS) to reference updated or recently approved topical reports, which contain methodologies used to calculate cycle-specific limits contained in the Core Operating Limits Report. These topical reports have all been previously approved by the staff under licensing actions separate from the current amendment request.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration. The NRC staff has reviewed the licensee's analysis against the standards of 10 CFR 50.92(c). The NRC staff's analysis is presented below.

1. Will the change involve a significant increase in the probability or consequences of an accident previously evaluated?

No. The proposed changes do not involve any modification to existing systems, components, operating limits, or operating procedure. Therefore, these proposed changes will have no impact on the consequences or probabilities of any previously evaluated accidents.

2. Will the change create the possibility of a new or different kind of accident from any accident previously evaluated?

No. No actual plant equipment or operating procedure will be affected by the proposed changes. Hence, no new equipment failure modes or accidents from those previously evaluated will be created.

3. Will the change involve a significant reduction in a margin of safety?

No. Margin of safety is associated with confidence in the design and operation of the plant. The proposed changes to the TS do not involve any change to plant design or operation. Thus, the margin of safety previously analyzed and evaluated is maintained.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: J. Murrey Atkins Library, University of North Carolina at Charlotte, 9201 University City Boulevard, North Carolina.

Attorney for licensee: Mr. Albert Carr, Duke Energy Corporation, 422 South Church Street, Charlotte, North Carolina.

Entergy Operations, Inc., Docket No. 50–368, Arkansas Nuclear One, Unit No. 2, Pope County, Arkansas

Date of amendment request: September 23, 1997.

Description of amendment request: The proposed amendment changes the Reactor Protective System and Engineering Safety Actuation System trip set point and allowable values for steam generator low pressure. The proposed amendment also relocates the RPS and ESFAS response time tables from the Technical Specifications to the Safety Analysis Report.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does Not Involve a Significant Increase in the Probability or Consequences of and Accident Previously Evaluated.

The proposed changes included in this amendment request do not affect the accident initiators in any of the accidents previously evaluated. The proposed trip setpoints and allowable values for Steam Generator Pressure—Low are being reduced by this proposed amendment request. This change is necessary to increase the operating margin between the full power steam generator pressure and these setpoints. The change should reduce the probability of an inadvertent Main Steam Isolation Signal (MSIS) from occurring at power since it will increase the operating space between the operating pressure and the setpoints. Therefore, this amendment request will not increase the probability of any accident previously evaluated.

The secondary system pipe break safety analyses were reanalyzed for the Steam Generator Pressure—Low setpoint reduction effort. This effort included the removal of unnecessary analysis conservatisms resulting in a significant reduction in the associated setpoints. The proposed changes do not involve any change to the configuration or method of operation of any plant equipment used to mitigate the consequences of an accident. The previously evaluated accidents which were determined to be impacted by this setpoint change were evaluated with no significant increase in the consequences.

This amendment request contains the relocation of the Reactor Protective System (RPS) and Engineered Safety Features Actuation System (ESFAS) response time information from the Technical Specifications (TS) to the Safety Analysis Report. This proposed change adopts the TS "line-item improvement" as recommended in NRC Generic Letter 93–08, "Relocation of Technical Specification Tables of Instrument Response Time Limits," dated December 29, 1993. The NRC has concluded that 10 CFR 50.36 does not require the response time tables to be retained in TSs and has issued Generic Letter 93–08 as a line item improvement to allow their removal. Response time testing will still be required by the ANO–2 TS after the relocation of the associated response time information in this amendment request. Relocating the response time information for the RPS and ESFAS from the TS to the SAR will not alter these surveillance requirements. Therefore, the relocated response time portion of this amendment request is considered administrative in nature and will not affect the probability or consequences of any accident previously evaluated.

Therefore, this change does *not* involve a significant increase in the

VOL 63 ISS 18 JA 28 1998 UMI

probability or consequences of any accident previously evaluated.

2. Does Not Create the Possibility of a New or Different Kind of Accident from and Previously Evaluated.

The proposed changes do not involve any physical modifications (i.e., new systems, new components, etc.) to the plant. The proposed changes do not involve any change to the configuration or method of operation of any plant equipment used to mitigate the consequences of an accident. The results of the accident reanalyzes suggest no different phenomena or plant behavior than previously considered. The Steam Generator Pressure Low setpoint change does not create any new or different system actuations or interactions than evaluated previously. The relocated response time portion of this amendment request is considered administrative in nature and is not considered an accident initiator. Therefore, this change does *not* create the possibility of a new or different kind of accident from any previously evaluated.

3. Does Not Involve a Significant Reduction in the Margin of Safety.

The accidents which were determined to be impacted by the Steam Generator Pressure Low setpoint change were evaluated to ensure acceptable results are maintained. The instrument error calculations supporting the lower Steam Generator Pressure Low setpoint and allowable values will ensure the present accident analysis assumptions are still maintained. The methodology used to determine the instrument loop errors and uncertainties is the same as that used in previous amendment requests that have been reviewed and approved by the NRC. Based on these evaluations, the proposed changes do *not* involve a significant reduction in a margin of safety.

Therefore, based upon the reasoning presented above and the previous discussion of the amendment request, Entergy Operations has determined that the reauested chance does not involve a significant hazards consideration.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Tomlinson Library, Arkansas Tech University, Russellville, AR 72801.

NRC Project Director: John Hannon.

Entergy Operations, Inc., Docket No. 50–368, Arkansas Nuclear One, Unit No. 2, Pope County, Arkansas

Date of amendment request: September 23, 1997.

Description of amendment request: The proposed amendment reduces the minimum primary system flow that is specified in the technical specifications to reflect the effects of increased primary system resistance caused by steam generator tube plugging.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does Not Involve a Significant Increase in the Probability or Consequences of an Accident Previously Evaluated.

Entergy Operations is proposing a change to the Technical Specifications for Arkansas Nuclear One—Unit 2 (ANO–2) to accommodate a larger number of plugged steam generator tubes. The proposed amendment request will revise the Technical Specifications to conservatively account for the reduced reactor coolant system (RCS) flow effects of plugging up to 30 percent of the tubes in either steam generator. This change will reduce the minimum RCS total flow rate from 120.4×10^6 lbm/hr to 108.4×10^6 lbm/hr until the steam generators are replaced. The steam generators are currently scheduled for replacement during the fall of the year 2000. After the steam generators are replaced, the minimum RCS flow will then return to the current value of 120.4×10^6 lbm/hr.

The tube plugs that are installed in the steam generators are passive components by nature. This amendment request does not change the type of plugs which may be installed in the steam generators nor does it change the criteria for plugging steam generator tubes. Reducing the minimum required RCS flow does not change the plant's required mode of operation or modify any active component. Therefore, this amendment request will not significantly increase the probability of the occurrence of a previously evaluated accident.

The installation of steam generator tube plugs removes the affected tube from service thus reducing the heat transfer surface area and increasing the steam generator primary side flow resistance. The increased flow resistance in the affected steam generator leads to a reduction in the RCS flow available for core cooling. The reduced RCS flow rate and heat transfer surface area resulted in a change in several primary and secondary parameters that required reanalysis. The ANO–2 accident reanalyses supporting the additional steam generator tube plugging and the reduction in RCS flow have been completed.

The Design Basis Accidents (DBAs) affected by these changes were reanalyzed to determine if the effects of increased steam generator tube plugging and the reduced RCS flow could result in exceeding the acceptance criteria applicable to each of these events. It was determined that the DBA acceptance criteria would *not* be exceeded as a result of increased steam generator tube plugging and reduction in the minimum RCS flow rate.

Based on the results of the analysis, it is concluded that the emergency core cooling system design satisfies the acceptance criteria of 10 CFR 50.46(b) for a spectrum of small break and large break loss of coolant accidents (LOCAs). The specified acceptable fuel design limits (SAFDLs) and the RCS pressure boundary limits also are not violated. The fuel and core performance were also determined to remain within acceptable limits. Primary and secondary system pressures remain below their respective pressure limits.

Analyses and evaluations of the DBAs have been performed demonstrating that the NRC acceptance criteria for these events are met. The revised analyses and evaluations consider reduced RCS flow, increased RCS temperatures, and increased steam generator tube plugging conditions. Although the offsite dose during a steam generator tube rupture event could increase, the results remain well within 10 CFR [Part] 100 limits. Therefore, the consequences of a previously evaluated accident are not significantly increased.

Therefore, this change does *not* involve a significant increase in the probability or consequences of any accident previously evaluated.

2. Does Not Create the Possibility of a New or Different Kind of Accident from any Previously Evaluated.

The proposed amendment reduces the minimum RCS total flow to account for the effects of steam generator tube plugging. This amendment request will not change the modes of operation defined in the Technical Specifications. This change does not add any new equipment, modify any interfaces with any existing equipment, change the equipment's function, or the method of operating the equipment. The proposed change does not change plant conditions in a manner which could affect other plant components. Reactor core, RCS, and steam generator parameters remain within appropriate design limits during normal operation. The proposed change could not cause any existing equipment to become an accident initiator. Therefore, this change does *not* create the possibility of a new or different kind of accident from any previously evaluated.

3. Does Not Involve a Significant Reduction in the Margin of Safety.

The margins of safety associated with this change are defined in the fuel and core related analyses, and in each of the transient and accident analyses affected by the reduced RCS flow. An evaluation of the affected analyses confirmed that the established acceptance criteria for specified acceptable fuel design limits, primary and secondary system over-pressurization, and the acceptance criteria for the emergency core cooling systems have been satisfied by this license amendment request. The evaluation concludes that, when considering the proposed Limiting Conditions for Operation for the minimum RCS total flow rate, all applicable acceptance criteria limits are met. The margins of safety associated with the transient and accident analyses affected by this change will not be significantly reduced. Therefore, this change does *not* involve a significant reduction in the margin of safety.

Therefore, based upon the reasoning presented above and the previous discussion of the amendment request, Entergy Operations has determined that the requested change does *not* involve a significant hazards consideration.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

GPU Nuclear Corporation, et al., Docket No. 50–219, Oyster Creek Nuclear Generating Station, Ocean County, New Jersey

Date of amendment request: December 10, 1997.

Description of amendment request: To clarify certain sections of the Technical Specifications (TSs) and Bases which have been demonstrated to be unclear or conflicting. Administrative changes include TS 2.3 Bases, Table 3.1.1.G.1, Table 3.1.1.M.2, Section 4.3.C, and Section 6.1.1. Technical changes include Table 3.3.3, note b, Section 3.4 Bases, Section 3.8 Bases and Section 4.5 Bases.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

With respect to the administrative changes, they are typical of the example I.c.2.e.i in 51 FR 7744 and therefore, they do not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated; or

2. Create the possibility of a new or different kind of accident from any accident previously evaluated; or

3. Involve a significant reduction in the margin of safety; in that they are purely administrative changes to achieve consistency or correct an error in the TS.

With respect to technical change, Table 3.1.1, note b:

1. Involve a siginificant increase in the probability or consequences of an accident previously evaluated; (or)

The proposed change would restore the original value of less than 600 psig. This lower value would not increase the probability of any accident as it provides a more conservative level below which protection can be bypassed.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated; (or)

The proposed change would restore the original value of less than 600 psig. The setpoint of a bypass cannot create a different kind of accident, it can only affect the severity.

3. Involve a significant reduction in a margin of safety; As the requested change lowers the bypass setpoint, the margin of safety will be increased.

With respect to Section 3.4 Bases:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated; (or)

The proposed change to the Bases removes a possible area of confusion from the [TS], and updates the Bases to reflect the results of newer, approved methodologies. Therefore, no change to any probability calculation occurs.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated; (or)

The proposed change addresses an existing accident (Small Break LOCA) and removes outdated and possibly confusing information. Therefore, no new or different kind of accident is created.

3. Involve a significant reduction in a margin of safety;

The proposed change does not change the way the plant is operated or the way design Bases are maintained. It only removes an outdated and possibly confusing paragraph from the Bases, therefore, no margin of safety is affected.

With respect to Section 3.8 Bases:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated; (or)

The Isolation Condenser Radiation Monitors had no impact o[n] the operation of any plant system. Additionally, the monitors were not relied upon for any post accident evaluations. They were removed from the plant using the 10 CFR 50.59 process. As this request updates the [TS] Bases to reflect the plant as currently configured, no impact on the probability or consequences of any previously evaluated accident is possible.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated; (or)

The Isolation Condenser Radiation Monitors had no impact o[n] the operation of any plant system. Additionally, the monitors were not relied upon for any post accident evaluations. They were removed from the plant using the 10 CFR 50.59 process. As this request updates the [TS] Bases to reflect the plant as currently configured, no new or different kind of accident is created.

3. Involve a significant reduction in a margin of safety;

The Isolation Condenser Radiation Monitors had no impact o[n] the operation of any plant system. Additionally, the monitors were not relied upon for any post accident evaluations. They were removed from the plant using the 10 CFR 50.59 process. As this request updates the [TS] Bases to reflect the plant as currently configured, no reduction in any margin of safety can occur.

With respect to Section 4.5 Bases:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated; (or)

No change to any procedure, nor any modification to any system is requested. The same surveillance will be performed at the same frequency. Only the brand of chemical used to perform the surveillance will be affected. As an equivalent chemical will be selected, no increase in the probability or consequences of an accident previously evaluated can be created.

VOL 63 ISS 18 JA 28 1998 UMI

2. Create the possibility of a new or different kind of accident from any accident previously evaluated; (or)

No change to any procedure, nor any modification to any system is requested. The same surveillance will be performed at the same frequency. Only the brand of chemical used to perform the surveillance will be affected. As an equivalent chemical will be selected, no new or different kind of accident previously evaluated can be created.

3. Involve a significant reduction in the margin of safety;

No change to any procedure, nor any modification to any system is requested. The same surveillance will be performed at the same frequency. Only the brand of chemical used to perform the surveillance will be affected. As an equivalent chemical will be selected, no margin of safety can be affected.

The staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Ocean County Library, Reference Department, 101 Washington Street, Toms River, NJ 08753.

NRC Project Director: Ronald B. Eaton.

IES Utilities Inc., Docket No. 50–331, Duane Arnold Energy Center, Linn County, Iowa

Date of amendment requests: October 3, 1997.

Description of amendment requests: The proposed amendment would revise the Operating License to allow the start of core offload as soon as 60 hours after shutdown instead of the 120 hours currently specified.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed Operating License Amendment will not significantly increase the probability or consequences of any previously evaluated accidents.

The proposed change will allow initiation of core offload earlier after shutdown than is currently allowed. Thermal-hydraulic analysis shows that maximum bulk SFP, local water, and fuel clad temperatures will remain within acceptable limits and, in fact, do not exceed those previously reviewed and approved for Amendment 195.

Thermal-hydraulic analysis shows the minimum time to action is calculated at 4.5 hours versus 5.5 hours previously reviewed and approved for Amendment 195. In the event of a loss of forced cooling with cask pit isolation gate failure event, the DAEC will use Emergency Service Water (ESW), a Seismic Category I system, to provide makeup to the SFP. It is estimated to take no more than 2 hours to provide ESW makeup to the SFP, therefore the minimum time to action of 4.5 hours is sufficient time to prevent uncovering the fuel in the SFP.

The DAEC design basis refueling accident, as discussed in Section 15.10.2 of the Updated Final Safety Analysis Report, assumes a twenty-four hour decay time before core offload begins. The proposed change does not adversely affect that accident analysis.

Therefore, the proposed change will not result in an increase in probability or consequences of an accident previously evaluated.

2. The proposed changes will not create a new or different kind of accident from those previously evaluated.

Thermal-hydraulic analysis shows that the proposed change will not result in maximum bulk SFP, local water, or fuel clad temperatures which would initiate bulk pool boiling, challenge fuel rod integrity or jeopardize the structural integrity of the pool.

As stated above, the minimum time to action of 4.5 hours allows sufficient time to provide ESW makeup to the SFP. Therefore, this change does not create the possibility of a new or different type of accident.

3. The proposed change will not result in a significant reduction in any margin of safety.

This change will not result in maximum bulk SFP, local water, and fuel clad temperatures in excess of those previously evaluated and accepted per Amendment 195. The thermal-hydraulic analysis for Case C does show a reduction in the minimum time to action by one hour. However, 4.5 hours does provide sufficient time to provide ESW makeup to the SFP as this task is estimated to require no more than 2 hours. Furthermore, this change does not result in any change to the Technical Specifications. Therefore, this change does not result in a significant reduction in a margin of safety.

Based upon the above, we have determined that the proposed amendment will not involve a significant hazards consideration.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment requests involve no significant hazards consideration.

Local Public Document Room location: Cedar Rapids Public Library, 500 First Street, SE., Cedar Rapids, Iowa 52401.

Niagara Mohawk Power Corporation, Docket No. 50–410, Nine Mile Point Nuclear Station, Unit 2, Oswego County, New York

Date of amendment request: December 15, 1997.

Description of amendment request: The proposed amendment would revise Technical Specifications (TSs) 2.1 and 3/4.4.1 to change the safety limit minimum critical power ratio (MCPR) for the upcoming fuel operating cycle (Cycle 7) from 1.07 to 1.09 for two recirculation loop operation and from 1.08 to 1.10 for single loop operation. An obsolete footnote in TS 3/4.4.1, which states that "the MCPR Safety Limit of 1.07 will be used through the first operating cycle," would be deleted. The associated Bases 2.1 would be changed to (1) reflect the new MCPR values, (2) delete certain details (including Bases Table B2.1.2–1, "Uncertainties Used in the Determination of the Fuel Cladding Safety Limit," and Bases Table B2.1.2–2, "Nominal Values of Parameters Used in the Statistical Analysis of Fuel Cladding Integrity Safety Limit,") and (3) substitute for the deleted detail a reference to General Electric Standard Application for Reactor Fuel (GESTAR II), NEDE–24011–P–A, and to the cycle-specific analysis. The TS Index would be changed to reflect deletion of Bases Tables B2.1.2–1 and B2.1.2–2.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The operation of Nine Mile Point Unit 2, in accordance with the proposed amendment, will not involve a significant increase in the probability or consequences of an accident previously evaluated.

The derivation of the revised Safety Limit MCPR was performed using the NRC approved methodology in GESTAR II. The Safety Limit MCPR is a TS numerical value that cannot initiate an event. Maintaining compliance with this limit will assure that 99.9 percent of the fuel rods will not experience transition boiling during transient events. The deletion of the footnote that is no longer necessary and the revision to the Bases information are administrative only. Thus, the margin of safety to fuel cladding failure due to insufficient cladding heat transfer during transient events is not reduced. Therefore, this change will not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

NRC Project Director: S. Singh Bajwa.

Northeast Nuclear Energy Company, et al., Docket No. 50–336, Millstone Nuclear Power Station, Unit No. 2, New London County, Connecticut

Date of amendment request: November 13, 1997.

Description of amendment request: The proposed amendment would change the Technical Specifications (TSs) to (1) modify the low temperature overpressure protection (LTOP) requirements; (2) modify the reactor coolant system (RCS) heatup and cooldown limits; and (3) make changes to correct various items based on the licensee's review of the current TSs. The supporting TS Bases sections would also be changed to reflect the proposed TS changes.

The affected TSs are: TS 3.1.2.1, "Flow Paths—Shutdown;" TS 3.1.2.2, "Flow Paths—Operating;" TS 3.1.2.3, "Charging Pump—Shutdown;" TS 3.1.2.4, "Charging Pumps—Operating;" TS 3.1.2.5, "Boric Acid Pumps—Shutdown;" TS 3.1.2.6, "Boric Acid Pumps—Operating;" TS 3.1.2.8, "Borated Water Sources—Operating;" TS 3.4.1.3, "Coolant Loops and Coolant Circulation—Shutdown;" TS 3.4.3, "Relief Valves;" TS 3.4.9.1, "Reactor Coolant System;" TS 3.4.9.2, "Pressurizer;" TS 3.4.9.3, "Overpressure Protection Systems;" TS 3.5.3, "ECCS Subsystems—T_{avg} < 300 °F;" and TS 3.10.3, "Pressure/Temperature Limitation—Reactor Criticality."

The November 13, 1997, submittal provides specific details related to each of the proposed changes.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated.

Each of the proposed changes have been grouped together, as appropriate, to address this criteria.

HPSI Pump Not Required To Be Operable In Modes 5 and 6. The proposed change to only require one charging pump to be operable in Modes 5 and 6, instead of the current requirement for one charging pump and one high pressure safety injection pump (HPSI) pump to be operable, will result in sufficient, but not excessive, Reactor Coolant System (RCS) makeup capability. When the plant is in Mode 5 or 6 there are two major factors to consider with respect to the number of RCS makeup pumps required to be operable. If too many RCS makeup pumps are required, an inadvertent start of these pumps can result in a mass addition transient beyond the capacity of the Low Temperature Overpressure Protection (LTOP) System. This may result in an RCS pressure increase that exceeds the 10CFR50 Appendix G pressure/temperature limits. Compliance with the mass input and venting restrictions contained in the proposed Technical Specification 3.4.9.3 will ensure the Appendix G limits are not exceeded.

The minimum number of RCS makeup pumps required to be operable in Modes 5 and 6 ensures sufficient makeup capability is available for RCS inventory control and RCS boration requirements. RCS inventory control is necessary in Modes 5 and 6 to ensure sufficient water is available for core cooling. A rapid loss of RCS inventory due to catastrophic pipe failures is unlikely in Modes 5 and 6 due to the reduced RCS pressure and temperature. An inventory loss is more likely to occur due to small system component failures or during infrequently performed evolutions, such as reduced inventory operation. This type of inventory loss will occur at a slower rate. Plant operators will have time to perform the necessary actions to mitigate the event. Reliance on automatic operation of the Emergency Core Cooling System is not necessary and Technical Specifications do not require automatic actuation by the Engineered Safety Features Actuation System to be operable in Mode 4 or below. Operator action is sufficient to mitigate a loss of RCS inventory in Mode 4 or below, provided sufficient

VOL 63 ISS 18 JA 28 1998 UMI

RCS makeup capability is available. Plant procedures and shutdown risk management will provide adequate administrative control to ensure sufficient RCS makeup capability is available, or that contingency plans have been developed.

The minimum number of RCS makeup pumps required to be operable in Modes 5 and 6 ensures sufficient makeup capability is available for RCS boration requirements. The RCS is required to be borated to a sufficient boron concentration to ensure the Technical Specification Shutdown Margin (SDM) requirements are met. The appropriate SDM requirements must be met before entry is allowed into Mode 5 or 6. RCS boron concentration is increased to establish the required SDM. This is normally accomplished by adding borated water to the RCS during plant cooldown to compensate for the contraction of the RCS inventory. The proposed change will restrict the number of pumps available, which will increase the time required to adequately borate the RCS. However, the change will not affect the ability to add boric acid to the RCS.

Even though the proposed change will remove the Technical Specification requirement for an operable HPSI pump in Modes 5 and 6, sufficient RCS makeup capability will be available to meet RCS boration and inventory requirements. Therefore, the proposed change will not result in a significant increase in the probability or consequences of an accident previously evaluated.

LTOP Mass Input and Vent Size Requirements. The proposed changes to the RCS venting requirements currently contained in Technical Specification 3.4.9.3, and the RCS makeup requirements that will be relocated to Technical Specification 3.4.9.3 are necessary to be consistent with the new LTOP analysis. These changes will ensure the 10CFR50 Appendix G limits are not exceeded.

The proposed changes to the mass input restrictions will still allow two charging pumps and one HPSI pump to be capable of injecting into the RCS when the RCS is operating in Mode 4 [less than or equal to] 275 °F. This combination will be allowed in Mode 5 until RCS temperature is [less than or equal to] 190 °F. When RCS cold leg temperature is at or below 190 °F only one charging pump will be allowed to be capable of injecting into the RCS. This restriction will continue to apply until the RCS is vented through a passive vent [greater than or equal to] 2.2 in ^{2}. If this passive vent size is established, two charging pumps and one HPSI pump are allowed to be capable of injecting.

The passive vent required if one or two power operated relief valves (PORVs) are inoperable (Technical Specification Action Statements (TSASs) a, b, and c) will be changed from 2.8 in ^{2} or 1.4 in ^{2} to 2.2 in ^{2}. A passive vent of 1.4 in ^{2} is equivalent to the vent area of one PORV. Since the LTOP analysis assumes 2 operable PORVs initially, and then one PORV fails to actuate, RCS overpressure protection will be ensured by a passive vent of 1.4 in ^{2}. However, a passive vent is established by removing a pressurizer PORV or the pressurizer manway, the normal vent path. The value of 2.2 in ^{2} is the minimum size of vent that will ensure RCS pressure remains [less than or equal to] 300 psia, which is more conservative than the Appendix G limits. This vent size will also ensure that RCS pressure does not exceed the SDC System design pressure. In addition, this is the size of vent that will satisfy Technical Specification 3.4.9.1 to allow a 50 °F/hr cooldown rate below 190 °F.

TSAS d will be added to address excessive pumping capacity. The required completion time of "immediate" reflects the importance of this restriction, and is consistent with current Technical Specification requirements (Technical Specification 3.1.2.3 TSAS b and Technical Specification 3.5.3 TSAS c) for this situation.

These proposed changes are all more restrictive than the previous requirements, except for allowing 2 charging pumps and one HPSI in Mode 5 between 200 °F and 190 °F, and requiring a vent of 2.2 in ^{2} instead of 2.8 in ^{2} when two PORVs are inoperable. However, the proposed mass input and venting restrictions are consistent with the new LTOP analysis. This analysis has demonstrated that with the proposed restrictions the required LTOP system will provide adequate protection for RCS overpressurization transients. Therefore, the proposed changes will not result in a significant increase in the probability or consequences of an accident previously evaluated.

Increase in Technical Specification Applicability. The applicability of Technical Specification 3.4.9.3 will be expanded to include all of Mode 5, and Mode 6 until the reactor vessel head is removed. The current applicability is limited in Modes 5 and 6 to when the RCS is not vented through a vent [greater than or equal to] 2.8 in ^{2}. Expanding the applicability will ensure an LTOP System is in place, except when RCS pressurization is not possible (reactor vessel head removed). This will ensure the 10 CFR 50 Appendix G limits are not exceeded.

The applicability of Technical Specification 3.4.9.1 will be expanded. The current applicability is Modes 1 through 5. However, concern for non-ductile failure of the reactor vessel and flange applies at all times, not just in Modes 1 through 5. Therefore, the applicability will be expanded. Increasing the applicability of Technical Specification 3.4.9.1 will place additional restrictions on the plant. However, these additional restrictions will ensure the integrity of the RCS, in particular the reactor pressure vessel, is maintained. Therefore, the RCS will continue to function as designed.

These more restrictive changes will not result in a significant increase in the probability or consequences of an accident previously evaluated.

LTOP PORV Setpoint Change. The required PORV actuation setpoint will be reduced from [less than or equal to] 450 psig to [less than or equal to] 415 psia (400 psig). The 50 psi setpoint reduction (pressure units have also been changed to agree with control room indication) will cause the PORVs to actuate earlier during an LTOP transient to prevent an RCS overpressurization. It is a more restrictive change that is consistent with the new LTOP analysis.

PORV actuation at the proposed setpoint, in combination with the proposed mass input restrictions, will ensure the 10 CFR 50 Appendix G limits are not exceeded. Therefore, the proposed change will not result in a significant increase in the probability or consequences of an accident previously evaluated.

RCP Start Criteria. The requirements to start the first reactor coolant pump (RCP), when RCS temperature is [less than or equal to] 275 °F, will be modified. The new criteria will ensure that starting an RCP will not result in an energy addition transient that could exceed the capability of the steam bubble in the pressurizer to mitigate the event. (No credit for PORV actuation during this energy addition transient was assumed in the new LTOP analysis.) This will ensure that the 10 CFR 50 Appendix G limits are not exceeded.

The proposed RCP restrictions are consistent with the new LTOP analysis. This analysis has demonstrated that with the proposed restrictions the pressurizer will provide adequate protection for RCS overpressurization transients. Therefore, the proposed changes will not result in a significant increase in the probability or consequences of an accident previously evaluated.

Boron Dilution Analysis. The analysis of the boron dilution event contained in the Millstone Unit No. 2 FSAR [Final Safety Analysis Report] Section 14.4.6 assumes that dilution flow rate is limited to 88 gpm in Modes 4, 5, and 6. Since the charging pumps are the assumed dilution source, no more than two charging pumps can be injecting for this assumption to remain valid. This results in a Technical Specification requirement that no more than two charging pumps can be operable when the RCS is in Mode 4 or below (< 300 °F). This requirement will be modified by replacing the word "operable" with "capable of injecting into the RCS." This more accurately addresses the boron dilution analysis restriction of limiting the dilution flow to two charging pumps since an inoperable pump can still inject into the RCS. This change is consistent with the boron dilution accident analysis. The boron dilution analysis further assumes that if this dilution flow rate restriction is met, there will be sufficient time for the operators to recognize and terminate the dilution before a complete loss of shutdown margin occurs. Operator action to restore shutdown margin by boration is not assumed.

The proposed changes will not affect the current Technical Specification restriction that no more than two charging pumps can be capable of injecting into the RCS (operable) when the RCS is below 300 °F. However, no corresponding action statement currently exists in Technical Specification 3.1.2.4 to provide guidance if this requirement is not met. The addition of the proposed action statement to Technical Specification 3.1.2.4 will require immediate action to correct this situation. This is consistent with other current Technical Specification requirements (Technical Specification 3.1.2.3 TSAS b and Technical Specification 3.5.3 TSAS c) that address excessive RCS makeup capacity. Therefore, the proposed changes will not result in a significant increase in the probability or consequences of an accident previously evaluated.

RCS Pressure/Temperature and Heatup/Cooldown Limit Changes. The proposed changes to the heatup and cooldown rates are a result of the new analysis of the RCS pressure/temperature and heatup/cooldown limits. These changes will provide flexibility during plant heatup and cooldown, and especially during equipment manipulations such as securing RCPs, swapping shutdown cooling (SDC) heat exchangers, and initiating SDC.

Figure 3.4.2 will be replaced by two curves, Figures 3.4–2a and 3.4–2b. Each figure will contain the minimum flange boltup temperature and the minimum temperature for criticality. The heatup figure (Figure 3.4–2a) will also contain the inservice leak and hydrostatic testing limits. The temperature change limits will be contained in the new Table 3.4–2, instead of in the LCO [limiting condition for operation]. The new limits will use cold leg temperature instead of average temperature to determine when to change rates. There should be little difference between these two temperatures, and cold leg indication is directly available to the control room operators.

The proposed curves and rates are based on indicated cold leg temperature. This parameter, which is the best available indication of reactor vessel downcomer temperature, will normally be monitored by using either RCS cold leg temperature indication or SDC return temperature. Plant conditions will determine which one is the appropriate indication to use. Actual RCS cold leg temperature will be used if any RCP is operating or natural circulation is occurring. Otherwise, SDC return temperature will be used.

RCP restrictions, assumed in the development of the heatup and cooldown curves, will be added to the curves. Most of the RCP restrictions already exist either in other Technical Specifications or in plant procedures. Two new RCP restrictions will be added to Technical Specifications. The restriction of no more than three RCPs until RCS temperature is above 500 °F already exists in plant procedures, but it will be added to Technical Specifications. The restriction of no more than two RCPs when RCS temperature is below 200 °F already exists in Technical Specifications (3.4.1.4). The RCP restriction of no RCPs below 150 °F during plant cooldown will be added to Technical Specifications. This restriction will have no effect on plant operations because RCPs will normally be secured when cooling down below 150 °F to minimize heat input.

The inservice leak and hydrostatic testing temperature change limit currently specified in Technical Specification 3.4.9.1.c will be relocated to Table 3.4–2. The wording will be modified (clarification only) to specify the limit also applies for one hour prior to the start of inservice leak and hydrostatic testing. This is necessary since the development of the inservice leak and hydrostatic testing test curve assumes isothermal conditions. The wording will also be modified to specify the restrictions apply during testing above the heatup curve instead of above system design pressure. This type of testing is not performed above system design pressure.

The 50 °F/hr cooldown rate and curve will normally be used when the RCS is <190 °F and an RCS vent of >2.2 in ^{2} has been established. This curve and rate may also be used when RCS cold leg temperature is below 230 °F to demonstrate compliance with Appendix G limits when unanticipated temperature excursions occur.

The current action statements of Technical Specification 3.4.9.1 will be separated by Mode and will be modified. Similar changes will be made to the action statements of Technical Specification 3.4.9.2. A time limit of 72 hours will be placed on the performance of the engineering evaluation. If this evaluation is not performed in this time period, or the evaluation does not allow continued operation, the plant will be required to enter Mode 5 ([less than or equal to] 200 °F), instead of the current requirement to be <200 °F. This slight relaxation will have no significant impact on plant operations because plant temperature is not normally maintained at the mode change temperature limit.

The required RCS pressure will be reduced from 500 psia to 300 psia. This is closer to the actual plant conditions established in Mode 5. The required RCS pressure will be reduced from 500 psig to 500 psia for the Pressurizer, Technical Specification 3.4.9.2. The change in units is consistent with plant instrumentation. Establishing a lower RCS pressure is more conservative because it will result in less pressure stress on either the reactor vessel or the pressurizer.

In other than Modes 1 through 4, immediate action will be required for limit restoration. Violation of these limits is typically more severe when the RCS is cold (<200 °F), therefore an immediate response is appropriate. A time limit of prior to entering Mode 4 will be placed on the performance of the engineering evaluation. This will prevent plant startup until the evaluation has determined that the RCS is acceptable for continued operation.

The frequency of surveillance requirements 4.4.9.1.c, 4.4.9.2, 4.10.3.1 will be increased from once per hour to once per 30 minutes. This more restrictive change will provide the plant operators with earlier indication that a limit may be exceeded, so that action can be taken to prevent exceeding the limit. The proposed changes to the RCS

VOL 63 ISS 18 JA 28 1998 UMI

pressure/temperature limits and temperature change rates are based on the new analysis. This analysis uses standard approved methods that ensure the margins of safety required by 10 CFR 50, Appendix G are maintained. The other changes discussed are more restrictive enhancements to Technical Specification requirements. Therefore, the proposed changes will not result in a significant increase in the probability or consequences of an accident previously evaluated.

Other Changes. The scope of the action statement for Technical Specification 3.1.2.6 will be expanded to cover all three flowpaths identified in Technical Specification 3.1.2.2.a. The intent of the current wording is to address all flowpaths. These minor wording changes will meet this intent.

Clarification will be added to SR 4.1.2.8.d to be consistent with SR 4.1.2.7.c. The clarification will allow the boric acid storage tank (BAST) temperature to be verified by checking the ambient air temperature.

A note will be added to Technical Specification 3.4.3 TSAS a to allow the block valve(s) to be cycled during plant cooldown when the block valve(s) is(are) closed due to inoperable PORV(s). The footnote will allow the PORV block valve(s) to be cycled during a plant cooldown to prevent thermal binding. This will ensure the associated block valve(s) can be opened to allow the PORV(s) which is(are) inoperable, can be manually cycled if necessary. Therefore, the PORV block valve(s) will be able to function as designed.

The wording of Technical Specification 3.4.3 Action Statement d will be revised to state what action should be performed, and to remove specific details on how to perform the required action. This does not change the intent of the action statement. Therefore, the pressurizer PORVs will continue to function as designed.

An action statement will be added to Technical Specification 3.4.9.3 to provide an exception to Technical Specification 3.0.4 requirements. This is necessary to allow a plant cooldown to MODE 5 if one or both PORVs are inoperable. MODE 5 conditions may be necessary to repair the PORV(s).

A footnote will be added to Technical Specification 3.5.3 to allow entry into Mode 4 without an operable high pressure safety injection pump. This new footnote will allow the plant to enter Mode 4 where this specification is applicable without any operable HPSI pumps. However, this condition will only be allowed for a very short time period, one hour. The proposed change to Technical Specification 3.4.9.3 will allow a HPSI pump to be operable above 190 °F. However, the 10 °F range before Mode 4 is reached may not allow sufficient time to ensure a HPSI pump is operable. Adding this note will provide the operating crew sufficient time to make an orderly transition into Mode 4. This condition will only be allowed for one hour, which fs the same time allowed by the first part of TSAS a for an inoperable HPSI pump.

The LTOP requirements currently contained in Technical Specifications 3.1.2.3 and 3.5.3 will be relocated to the LTOP Technical Specification 3.4.9.3. Relocating requirements within Technical Specifications will not change the technical content of the requirement.

Various redundant or outdated Technical Specification requirements will be eliminated and references will be adjusted to reflect the proposed changes. Removal of redundant or outdated requirements from Technical Specifications and adjustments to references to other requirements will not impact any technical requirements.

Minor wording changes have been made to many of the Technical Specifications contained in this license amendment request. These changes do not change any technical aspect of the Technical Specification affected. They are editorial changes only.

The proposed changes do not alter the way any structure, system, or component functions. There will be no effect on equipment important to safety. Therefore, the proposed changes will not result in a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes have no effect on any of the design basis accidents previously evaluated. Therefore, the license amendment request does not impact the probability of an accident previously evaluated nor does it involve a significant increase in the consequences of an accident previously evaluated.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed changes will not alter the plant configuration (no new or different type of equipment will be installed) or require any new or unusual operator actions. They do not alter the way any structure, system, or component functions and do not alter the manner in which the plant is operated. The proposed changes do not introduce any new failure modes. Therefore, the proposed changes will not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Involve a significant reduction in a margin of safety.

The proposed changes will modify the LTOP requirements, RCS pressure/temperature limits, and the RCS heatup and cooldown limits. The majority of the proposed changes are being made as a result of the new pressure/temperature and LTOP analyses performed. The new pressure/temperature curves and heatup and cooldown rates were developed in accordance with the requirements and methods described in 10 CFR 50 Appendix G and are consistent with the criteria contained in the Standard Review Plan Section 5.3.2. The new LTOP mass input and RCP starting restrictions and LTOP PORV setpoints are consistent with the criteria contained in the Standard Review Plan Section 5.2.2. Additional changes have been proposed to correct various items identified during the review of the Millstone Unit No. 2 Technical Specifications. The proposed changes do not change the requirements to maintain RCS pressure and temperature within the requirements defined in Technical Specifications. This will ensure the integrity of the reactor vessel is maintained during all aspects of plant operation. Therefore, there is no significant effect on the probability or consequences of any accident previously evaluated and no significant impact on offsite doses associated with previously evaluated accidents. This License Amendment Request does not result in a reduction of the margin of safety as defined in the Bases for the Technical Specifications addressed by the proposed changes.

The NRC has provided guidance concerning the application of standards in 10 CFR 50.92 by providing certain examples (March 6, 1986, 51 FR 7751) of amendments that are considered not likely to involve an SHC [significant hazards consideration]. The changes proposed herein to correct terminology, numbering, references, and relocating requirements within Technical Specifications are enveloped by example (i), a purely administrative change to Technical Specifications. The more restrictive changes proposed herein that are based on the new analyses performed and the more restrictive enhancements are enveloped by example (ii), a change that constitutes an additional limitation, restriction, or control not presently included in Technical Specifications. All other changes proposed herein are not enveloped by a specific example.

As described above, this License Amendment Request does not impact the probability of an accident previously evaluated, does not involve a significant increase in the consequences of an accident previously evaluated, does not create the possibility of a new or different kind of accident from any accident previously evaluated, and does not result in a significant reduction in a margin of safety. Therefore, NNECO [Northeast Nuclear Energy Company] has concluded that the proposed changes do not involve an SHC.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Learning Resources Center, Three Rivers Community-Technical College, 574 New London Turnpike, Norwich, Connecticut, and the Waterford Library, ATTN: Vince Juliano, 49 Rope Ferry Road, Waterford, Connecticut.

NRC Deputy Director: Phillip F. McKee.

Northeast Nuclear Energy Company, et al., Docket No. 50–336, Millstone Nuclear Power Station, Unit No. 2, New London County, Connecticut.

Date of amendment request: December 8, 1997.

Description of amendment request: The proposed amendment would change the Technical Specifications (TSs) to resolve several compliance issues. The proposed changes would (1) correct the wording and the formula in TS Definition 1.18 "Azimuthal Power Tilt—T_q;" (2) correct the wording in TS 4.1.1.1.2 "Reactivity Control Systems Shutdown Margin—T_{avg} [less than or equal to] 200 °F;" (3) correct the mode applicability from Mode 3 to Modes 1 and 2 in TS 3.1.3.4 "Reactivity Control Systems—Rod Drop Time;" (4) correct the terminology used to refer to the power dependent insertion limit alarm in TS 4.1.3.6 "Reactivity Control Systems—Regulating CEA [Control Element Assembly] Insertion Limits;" (5) add a footnote for Mode 4 operability requirement clarification to TS 3.5.3 "Emergency Core Cooling Systems, ECCS Subsystems—T_{avg} <300 °F;" (6) correct the wording, frequency, and reference number for the surveillance requirements in TS 3.6.3.2 "Containment Systems Containment Ventilation System;" (7) correct the nomenclature used for the A.C. busses in TSs 3.8.2.1 and 3.8.2.1A "Onsite Power Distribution Systems A.C. Distribution—Operating;" (8) correct TS Bases by modifing the applicable sections to reflect the proposed changes; (9) delete the word "original" from the statement "original design provision" in Design Features Section—TSs 5.1.3 "Flood Control," 5.2.3 "Penetrations," 5.3.2 "Control Element Assemblies," and 5.7.1 "Seismic Classification;" and (10) delete Design Features Section—TS 5.9 "Shoreline Protection."

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed change in the wording and associated formula of Technical Specifications Definition 1.18 will ensure the calculated value of Azimuthal Power Tilt (T_q) used to verify compliance with Technical Specification 3.2.4 is associated with the quadrant of highest power production with respect to the average of the four quadrants, instead of the quadrant that deviates the most (increases or decreases) from the average of the four quadrants. This is consistent with the method by which power distribution factors are calculated and applied in the accident analysis and how the Core Power Distribution Monitoring System calculates T_q. The proposed change will not alter the way T_q is calculated by the Core Power Distribution Monitoring System, nor will it alter any of the power distribution assumptions used in the accident analysis. Therefore, this change will not significantly increase the probability or consequences of an accident previously evaluated.

Surveillance Requirement (SR) 4.1.1.1.2 requires that the difference between predicted and measured core reactivity values be maintained within [plus or minus] 1.0% [delta]k/k, and that an adjustment be made between the measured and predicted core reactivity conditions prior to exceeding 60 EFPD [effective full power days] following a refueling outage. The proposed change will not affect the requirement to maintain predicted and measured core reactivity values within [plus or minus] 1.0% [delta]k/k. However, it will no longer be necessary to make an adjustment prior to exceeding 60 EFPD provided the [plus or minus] 1.0% [delta]k/k requirement is met. Historically, this difference has been small at Millstone Unit No. 2 (less than approximately [plus or minus] 1.0% [delta]k/k) and an adjustment has not been necessary to ensure the [plus or minus] 1.0% [delta]k/k requirement is met. The fact that no adjustment (normalization) will be necessary when reactivity differences are small will not affect the ability to identify reactivity anomalies. Therefore, this change will not significantly increase the probability or consequences of an accident previously evaluated.

The proposed change to Technical Specification 3.1.3.4 will change the applicability from Mode 3 to Modes 1 and 2. This is necessary to allow performance of SR 4.1.3.4 at the conditions in the accident analysis, and also specified in the [Limiting] Condition [for] Operation (LCO). CEA [Control Element Assembly] drop time is important for the mitigation of accidents that are initiated while the reactor is critical. To ensure the CEA drop time assumed in the accident analysis is valid, it is necessary to verify CEA drop time with plant conditions consistent with those expected when the reactor is critical. This proposed change will allow this verification, and thereby ensure the CEAs will function as designed to mitigate design basis accidents. Therefore, this change will not significantly increase the probability or consequences of an accident previously evaluated.

The proposed change to SR 4.1.3.6 will modify the terminology used to refer to the power dependent insertion limit (PDIL) alarm to agree with plant terminology. This change will not alter equipment operation or any technical aspect of the SR. The information added to the Bases will specify what equipment provides the PDIL alarm. These changes will eliminate any confusion with alarm terminology. Therefore, this change will not significantly increase the probability or consequences of an accident previously evaluated.

Technical Specification 3.5.3 requires an operable flowpath capable of taking a suction from the refueling water storage tank (RWST) on a safety injection actuation signal (SIAS), and automatically transferring suction to the containment sump on a sump recirculation actuation signal (SRAS) in Mode 4. In Mode 4, the automatic SIAS generated by low pressurizer pressure and high containment pressure, and the automatic SRAS generated by low RWST level, are not required to be operable. Automatic actuation in Mode 4 is not required because adequate time is available for plant operators to evaluate plant conditions and respond by manually operating engineered safety

VOL 63 ISS 18 JA 28 1998 UMI

features components. Since the manual actuation (trip pushbuttons) portions of the safety injection and sump recirculation actuation signal generation are required to be operable in Mode 4, credit can be taken for remote manual operation to generate the SIAS and SRAS which will position all components to the required accident position. The proposed change to Technical Specification 3.5.3 will add a footnote (***) to explain how these requirements are met in Mode 4. This change will not reduce operability or surveillance requirements for the Emergency Core Cooling System (ECCS) subsystem required to be operable by Technical Specification 3.5.3. The ECCS will continue to function as designed to mitigate design basis accidents. Therefore, this change will not significantly increase the probability or consequences of an accident previously evaluated.

The proposed change to Technical Specification 3.6.3.2 will revise the wording of the LCO and SR by changing "locked closed" to "sealed closed," and deleting the requirement to be electrically deactivated. The action statement will also be revised to reflect these proposed changes. These changes will not affect the requirement for the containment purge valves to be closed in Modes 1 through 4. Therefore, the proposed changes will not significantly increase the probability or consequences of an accident previously evaluated.

The proposed change to SR 4.6.1.7 will change the surveillance frequency from "prior to each reactor startup" to "at least once per 31 days." This change, which will require the surveillance to be performed more often (assuming a normal plant startup sequence) will provide additional assurance that the containment purge valves are sealed closed. In addition, this change will ensure consistency between the SR and the applicability of this specification, and also with the requirements to verify containment integrity in accordance with Technical Specification 3.6.1.1. Therefore, the proposed change will not significantly increase the probability or consequences of an accident previously evaluated.

The change in numbering of SR 4.6.1.7 to SR 4.6.3.2 is an administrative change only. It will not affect any technical aspect of the SR. Therefore, the proposed change will not significantly increase the probability or consequences of an accident previously evaluated.

The proposed changes to Technical Specifications 3.8.2.1 and 3.8.2.1A will modify the nomenclature used to refer to the vital A.C. buses to be consistent with the terminology used by Operations Department personnel and the nomenclature contained in their procedures. These changes will not alter equipment operation or any technical aspects of these specifications. These proposed changes are administrative changes only. The A.C. buses will continue to function as designed to mitigate design basis accidents. Therefore, these changes will not significantly increase the probability or consequences of an accident previously evaluated.

The proposed changes to Technical Specifications 5.1.3, 5.2.3, 5.3.2, and 5.7.1 will remove the word "original." Reference to original design is not appropriate since these items can be changed by approved processes. However, these changes will still require the items addressed by these specifications to be designed and maintained in accordance with the Final Safety Analysis Report (FSAR). The proposed changes have no affect on the current approved plant design. Therefore, these changes will not significantly increase the probability or consequences of an accident previously evaluated.

Technical Specification 5.9 will be deleted. The required provisions for shoreline protection have been completed, and this Technical Specification is no longer necessary. The removal of this outdated specification will not impact any current requirements. Therefore, this change will not significantly increase the probability or consequences of an accident previously evaluated.

The proposed changes do not alter how any structure, system, or component functions. There will be no effect on equipment important to safety. The proposed changes have no effect on any of the design basis accidents previously evaluated. Therefore, this License Amendment Request does not impact the probability of an accident previously evaluated, nor does it involve a significant increase in the consequences of an accident previously evaluated.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed changes do not alter the plant configuration (no new or different type of equipment will be installed) or require any new or unusual operator actions. They do not alter the way any structure, system, or component functions and do not alter the manner in which the plant is operated. The proposed changes do not introduce any new failure modes. Therefore, the proposed changes will not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Involve a significant reduction in a margin of safety.

The proposed change to the definition of T_q will make the Technical Specification definition consistent with the approved calculation methodology. This will ensure the core power distribution is consistent with accident analysis assumptions. The proposed change to the wording of SR 4.1.1.1.2 will not affect the acceptance criteria of [plus or minus] 1.0% [delta]k/k, which ensures the accident analysis accurately reflects core reactivity conditions. The proposed change in the applicability of Technical Specification 3.1.3.4 will allow verification of CEA drop time at plant conditions assumed in the accident analysis. This will ensure the CEAs will function as assumed. The proposed change to SR 4.1.3.6 will modify the terminology used to refer to the PDIL alarm to agree with plant terminology. This change will not alter equipment operation or any technical aspect of the SR. Adding the footnote to Technical Specification 3.5.3 will not change any technical aspects of this specification. One ECCS subsystem will be available for accident mitigation. The wording of Technical Specification 3.6.3.2 will not affect the requirement for the containment purge valves to be closed in Modes 1 through 4. The proposed change in the frequency of performance for SR 4.6.1.7 will provide greater assurance that the containment purge valves are closed to prevent the potential release of radioactive material through these penetrations during accident conditions. The proposed changes in terminology in Technical Specifications 3.8.2.1 and 3.8.2.1A will not change any technical requirements for the equipment covered. The equipment will still function as assumed. Modifying the Bases of Technical Specifications are necessary to be consistent with the proposed changes will not change any requirements of these specifications. The modification to Technical Specifications 5.1.3, 5.2.3, 5.3.2, and 5.7.1 will not affect the requirement to maintain these items in accordance with requirements contained in the FSAR. Deleting Technical Specification 5.9 will not affect any requirements since the requirements contained in this specification have already been completed.

The proposed changes do not affect any of the assumptions used in the accident analysis, nor do they affect any operability requirements for equipment important to plant safety. Therefore, these proposed changes will not result in a significant reduction in the margin of safety as defined in the Bases for Technical Specifications covered in this License Amendment Request.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Learning Resources Center, Three Rivers Community-Technical College, 574 New London Turnpike, Norwich, Connecticut, and the Waterford Library, ATTN: Vince Juliano, 49 Rope Ferry Road, Waterford, Connecticut.

NRC Deputy Director: Phillip F. McKee.

Power Authority of the State of New York, Docket No. 50–333, James A. FitzPatrick Nuclear Power Plant, Oswego County, New York

Date of amendment request: December 12, 1997.

Description of amendment request: The proposed amendment would revise the facility Technical Specifications (TSs) regarding normal working hours of plant staff to provide for shift duration of 12 hours. It would also revise the TSs to maintain existing "once per shift" surveillance requirements at 8-hour intervals.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

Does the proposed licensing amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response:

Establishing operating personnel work hours at "a normal 8 to 12 hour day, nominal 40-hour week" allows normal plant operations to be managed more effectively and does not adversely affect performance of operating personnel. Overtime remains controlled by site administrative procedures in accordance with NRC Policy Statement on working hours (Generic Letter 82–12). If 8 hour shifts are maintained in part or whole, then acceptable levels of performance from operating personnel is assured through effective control of shift turnovers and plant activities. No physical plant modifications are involved and none of the precursors of previously evaluated accidents are affected. Therefore, this change will not involve a significant increase in the probability or consequences of an accident previously evaluated.

Editorial changes clarify sections 6.2.2.6.b. and 6.2.2.6.c. without changing the intent or meaning. [...] Changes to sections 4.5.F.3., 4.5.F.4., 4.5 Bases, and 4.7.A.7.a. do not change the intent or meaning of the Technical Specifications, do not change operating procedures, and are consistent with surveillance requirements. [Therefore, the proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.]

Does the proposed license amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Establishing operating personnel work hours at "a normal 8 to 12 hour day, nominal 40-hour week" allows normal plant operation to be managed more effectively and does not adversely affect performance of operating personnel. If 8 hour shifts are maintained in part or whole, then acceptable levels of performance from operating personnel is assured through effective control of shift turnovers and plant activities. Overtime remains controlled by site administrative procedures in accordance with the NRC Policy Statement on working hours (Generic Letter 82–12). No physical modification of the plant is involved. As such, the change does not introduce any new failure modes or conditions that may create a new or different accident. Therefore, plant operation in accordance with the proposed amendment will not create the possibility of a new or different kind of accident from any previously evaluated.

Editorial changes clarify sections 6.2.2.6.b. and 6.2.2.6.c. without changing the intent or meaning. [* * *] Changes to sections 4.5.F.3., 4.5.F.4., 4.5 BASES, and 4.7.A.7.a. do not change the intent or meaning of the Technical Specifications or operating procedures. All previously performed functions are being maintained.

Therefore, the changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

Does the proposed amendment involve a significant reduction in a margin of safety?

Establishing operating personnel work hours at "a normal 8 to 12 hour day, nominal 40-hour week" allows normal plant operations to be managed more effectively and does not adversely affect performance of operating personnel. If 8 hour shifts are maintained in part or whole, then acceptable levels of performance from operating personnel is assured through effective control of shift turnovers and plant activities. Overtime remains controlled by site administrative procedures in accordance with the NRC Policy Statement on working hours (Generic Letter 82–12). The proposed change involves no physical modification of the plant, or alterations to any accident or transient analysis. [* * *] Therefore, the change does not involve any significant reduction in a margin of safety.

Editorial changes clarify sections 6.2.2.6.b. and 6.2.2.6.c. without changing the intent or meaning. [* * *] Changes to sections 4.5.F.3., 4.5.F.4., 4.5 BASES, 4.7.A.7.a. do not change the intent or meaning of the Technical Specifications or operating procedures.

All previously performed functions are being maintained. Therefore, the changes do not involve any significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13126.

Attorney for licensee: Mr. David E. Blabey, 1633 Broadway, New York, New York 10019.

NRC Project Director: S. Singh Bajwa, Director.

Public Service Electric & Gas Company, Docket No. 50–354, Hope Creek Generating Station, Salem County, New Jersey

Date of amendment request: December 19, 1997.

Description of amendment request: The proposed amendment would revise the Hope Creek Generating Station (HCGS) Technical Specifications (TS) to incorporate changes that reflect the completion of the Salt Drift Monitoring Program.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the

VOL 63 ISS 18 JA 28 1998 UMI

issue of no significant hazards consideration, which is presented below:

1. The proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

The changes, which update the Terrestrial Ecology Monitoring Program status, are administrative in nature and in no way affect the initial conditions, assumptions, or conclusions of the Hope Creek Generating Station accident analyses. In addition, the proposed changes would not affect the operation or performance of any equipment assumed in the accident analyses. Based on the above information, we conclude that the proposed changes would not significantly increase the probability or consequences of an accident previously evaluated.

2. The proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

As previously stated, the proposed changes are administrative in nature and in no way impact or alter the configuration or operation of the facilities and create no new modes of operation. PSE&G therefore concludes that the proposed changes would not create the possibility of a new or different kind of accident.

3. The proposed changes do not involve a significant reduction in a margin of safety.

The changes are administrative in nature and in no way affect plant or equipment operation or the accident analysis. PSE&G therefore concludes that the proposed changes would not result in a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Pennsville Public Library, 190 S. Broadway, Pennsville, NJ 08070.

Attorney for licensee: Jeffrie J. Keenan, Esquire, Nuclear Business Unit—N21, P.O. Box 236, Hancocks Bridge, NJ 08038.

NRC Project Director: John F. Stolz.

Public Service Electric & Gas Company, Docket Nos. 50–272 and 50–311, Salem Nuclear Generating Station, Unit Nos. 1 and 2, Salem County, New Jersey

Date of amendment request: November 14, 1997.

Description of amendment request: The proposed amendments would revise the Technical Specifications (TSs) to provide surveillance requirements for the service water accumulator vessels. Specifically, surveillance requirements are provided for vessel level, pressure and temperature, and discharge valve response time. The surveillance requirements are included in TS 3/4.6.1.1 and 3/4.6.2.3, and the applicable Bases sections are expanded to provide supporting information.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes provide surveillance requirements for the Service Water (SW) accumulator tank level, pressure and temperature parameters and the discharge valve response time test. Supporting information is included in the Bases section of the applicable technical specifications. The SW accumulator tank and discharge valve design has been reviewed and approved by the NRC staff as documented in NRC Safety Evaluation Report (SER) dated June 19, 1997. The proposed surveillance requirements do not alter the design as reviewed by the NRC staff. The addition of tank parameter surveillance requirements to the technical specifications does not alter the physical plant arrangement or the installed monitoring instrumentation. The proposed addition of tank discharge valve response time surveillance requirements to the technical specifications does not alter the method of performing these surveillance requirements.

Therefore the proposed changes do not increase the probability of an accident. The surveillance requirements provide additional controls for ensuring the SW accumulator tank and discharge valves will be maintained within the design parameters assumed in the safety analysis. This provides added assurance that the accumulator tanks and discharge valves will be capable of performing their required design function during accident conditions. There is no change to the performance requirements of these components in preventing two phase flow conditions and water column separation waterhammer vulnerabilities identified in GL [Generic Letter] 96–06. Therefore, the proposed changes do not involve an increase in the consequences of an accident previously evaluated.

2. The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed changes provide surveillance requirements for Service Water Accumulator tank level, pressure and temperature and discharge valve time response. Supporting information is included in the Bases section of the applicable technical specifications. The SW accumulator tank and discharge valve design has been reviewed and approved by the NRC staff as documented in NRC Safety Evaluation Report (SER) dated June 19, 1997. The proposed surveillance requirements do not alter the plant configuration. Installed instrumentation will be used to accomplish the tank surveillance requirements. The current plant installation also provides for completion of the discharge valve response time surveillance utilizing test equipment in accordance with plant procedures and configurations. Therefore the performance of these surveillance requirements does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The Service Water Accumulator Vessels and discharge valves were installed to address the Generic Letter 96–06 issues of column separation waterhammer and two phase flow in the containment fan coil unit (CFCU) piping during an accident involving loss of offsite power. This design has been reviewed and approved by the NRC staff as documented in NRC Safety Evaluation Report (SER) dated June 19, 1997. The proposed surveillance requirements do not alter the design as reviewed by the NRC staff. By providing added assurance that these components are capable of performing their specified safety function as assumed in the safety analysis, the additional surveillance requirements assure system operability to further minimize the possibility of waterhammer and two phase flow in the CFCU piping during accident conditions. The proposal therefore minimizes the possibility of a new or different kind of accident from those previously evaluated accidents.

3. The proposed change does not involve a significant reduction in a margin of safety.

The additional surveillances provide added assurance that the margin of safety assumed in the containment integrity and containment cooling technical specification will be maintained. The additional surveillance requirements further ensure that in the event the SW accumulator vessels are out of specification or the discharge valves do not meet their response time requirements, corrective actions will be completed in accordance with the existing containment integrity technical specification allowed outage time to restore containment integrity. The surveillance requirements further ensure that in the event the SW accumulator vessel or discharge valves do not meet these requirements, corrective actions will be completed in accordance with the containment cooling technical specification allowed outage time to restore the full complement of containment fan coil units to operability. Since the proposal maintains the margin of safety provided in the containment integrity and containment cooling technical specification, there is no reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Salem Free Public Library, 112 West Broadway, Salem, NJ 08079.

Attorney for licensee: Jeffrie J. Keenan, Esquire, Nuclear Business Unit—N21, P.O. Box 236, Hancocks Bridge, NJ 08038.

NRC Project Director: John F. Stolz.

Southern California Edison Company, et al., Docket Nos. 50–361 and 50–362, San Onofre Nuclear Generating Station, Unit Nos. 2 and 3, San Diego County, California

Date of amendment requests: September 16, 1997.

Description of amendment requests: The licensee proposes to revise Technical Specification (TS) 3.4.13, "RCS Operational Leakage," TS 5.5.2.11, "Steam Generator (SG) Tube Surveillance Program," and TS 5.7.2, "Special Reports." The proposed change is to allow steam generator tube repair using ASEA Brown Boveri/Combustion Engineering (ABB/CE) leak tight sleeving as an alternative steam generator tube repair to plugging.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The supporting technical evaluation and safety evaluation for the ASEA Brown Boveri/Combustion Engineering (ABB/CE) leak tight sleeves demonstrate that the sleeve configuration will provide steam generator (SG) tube structural and leakage integrity under normal operating and accident conditions. The sleeve configurations have been designed and analyzed in accordance with the requirements of the ASME Code. Mechanical testing has shown that the sleeve and sleeve joints provide margin above acceptance limits. Ultrasonic Testing (UT) is used to verify the leak tightness of the weld above the tubesheet. Testing has demonstrated the leak tightness of the hardroll joint due to the reinforcing effect of the tubesheet. Tests have demonstrated that tube collapse will not occur due to postulated Loss of Coolant Accident (LOCA) loadings.

A new, more conservative, Technical Specification (TS) SG tube leakage rate requirement is introduced by this change. Accident analysis assumptions remain unchanged in the event that significant leakage does occur from the sleeve joint or that the sleeve assembly ruptures. Any leakage through the sleeve assembly is fully bounded by the existing SG tube rupture analysis included in the San Onofre Nuclear Generating Station (SONGS) Updated Final Safety Analysis Report. Reactor coolant flow reduction from sleeving is addressed by a ratio of number of tubes sleeved to equal a plugged tube. The proposed sleeving repair process does not adversely impact any other previously evaluated design basis accidents.

Therefore, proposed changes do not involve a significant increase in the probability or consequences of an accident.

2. The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

Installation of the sleeves does not introduce any significant changes to the plant design basis. The use of a sleeve to span the area of degradation of the SG tube restores the structural and leakage integrity of the tubing to meet the original design bases. Stress and fatigue analysis of the sleeve assembly shows that the requirements of the ASME Code are met. Mechanical testing has demonstrated that margin exists above the design criteria. Any hypothetical accident as a result of any degradation in the sleeved tube would be bounded by the existing tube rupture accident analysis.

Therefore, the operation of the facility in accordance with proposed changes does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. The proposed change does not involve a significant reduction in a margin of safety.

The use of sleeves to repair degraded SG tubing has been demonstrated to maintain the integrity of the tube bundle commensurate with the requirements of the ASME Code and draft Regulatory Guide (RG) 1.121 and to maintain the primary to secondary pressure boundary under normal and postulated accident conditions. The safety factors used in the verification of the strength of the sleeve assembly are consistent with the safety factors in the ASME Boiler and Pressure Vessel Code used in SG design. The operational and faulted condition stresses and cumulative usage factors are bounded by the ASME Code requirements. The sleeve assembly has been verified by testing to prevent both tube pullout and significant leakage during normal and postulated accident conditions. A test program was conducted to ensure the lower hardrolled joint design was leak tight and capable of withstanding the design loads. The primary coolant pressure boundary of the sleeve assembly will be periodically inspected by Non-Destructive Examination to identify sleeve degradation due to operation.

Installation of the sleeves will decrease the number of tubes which must be taken out of service due to plugging. There is a small amount of primary coolant flow reduction due to the sleeve for which the equivalent sleeve to plug ratio is assigned based on sleeve length. The ratio is used to assess the final equivalent plugging percentage as an input to other safety analyses. The sleeve maintains the design basis requirements for the SG tubing.

Therefore, operation of the facility with the proposed changes will not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment requests involve no significant hazards consideration.

Company, P. O. Box 800, Rosemead, California 91770.

NRC Project Director: William H. Bateman.

Southern California Edison Company, et al., Docket Nos. 50–361 and 50–362, San Onofre Nuclear Generating Station, Unit Nos. 2 and 3, San Diego County, California

Date of amendment requests: October 17, 1997.

Description of amendment requests: The licensee proposes to amend the licenses for SONGS Units 2 and 3 to revise the Final Safety Analysis Report (FSAR) to permit digital radiation monitor installation for both trains supplying the containment purge isolation signal, and permit digital radiation monitor installation for both trains supplying the control room isolation signal.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed change is required to permit using digital radiation monitors as input to both trains of the Control Room Isolation Signal (CRIS), and to both trains of the Containment Purge Isolation Signal (CPIS). These changes will allow replacement of the remaining safety related obsolete radiation monitor equipment to address spare parts and equipment availability issues. The new containment airborne radiation digital monitor will have the same basic architecture as the existing analog system, and serves to perform the same function. In addition, the digital radiation monitors are expected to be more reliable than the existing equipment which is of an analog design.

Furthermore, defense-in-depth equipment is available that either provides, or allows for, actions to mitigate the release of offsite and Control Room doses to within existing licensing limits based on realistic event input assumptions. Analyses show that if "realistic" input assumptions are utilized and reasonable operator actions are allowed, then acceptable dose consequences result both to the general public offsite, and to the Control Room operators.

Therefore, the proposed change will not involve a significant increase in the probability or consequences of any accident previously evaluated.

2. The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed change will permit upgrading the existing analog radiation monitors with upgraded digital radiation monitors. Replacement of an analog system to a predominantly digital system, uses software algorithms to perform the required functions. A satisfactory software verification and validation (V&V) report, including continued software change control procedures, provides assurance that a software common mode failure is not likely.

In addition, the design, installation, testing, maintenance, and operation of the affected equipment will assure that no new or different kinds of accidents will be created. The ESFAS radiation monitors involved are portions of systems that respond to accidents. They can not, by their actions or inactions, create a new or different accident from any accident previously evaluated.

Therefore, the proposed change will not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. The proposed change does not involve a significant reduction in a margin of safety.

The CRIS and CPIS Radiation Monitor Systems provide an accident mitigation function for offsite doses (10 CFR 100) and Control Room doses (10 CFR 50 Appendix A, General Design Criteria 19). A change in the margin of safety is introduced due to the possibility of a software common mode failure in redundant equipment simultaneously affecting equipment performing a different function.

This change is not a significant reduction in the margin of safety, however, due to the following:

(1) A probabilistic risk analysis has determined that the availability of the affected radiation monitors, including software, should be better than the existing equipment based on industry data to date,

(2) The software V&V and preoperational testing to be performed will provide assurance of system operation, and

(3) The combined occurrence of a software common mode failure that simultaneously causes failure of all available ESFAS radiation monitors concurrent with a design bases accident is very unlikely.

In the unlikely event of a software common mode failure that causes all ESFAS radiation monitors to be inoperable concurrent with a design bases accident, analyses show that if "realistic" input assumptions are utilized and reasonable operator actions are allowed, then acceptable dose consequences result both to the general public offsite, and to the Control Room operators.

Therefore, the proposed change will not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment requests involve no significant hazards consideration.

Local Public Document Room location: Main Library, University of California, Irvine, California 92713.

Attorney for licensee: T. E. Oubre, Esquire, Southern California Edison Company, P. O. Box 800, Rosemead, California 91770.

NRC Project Director: William H. Bateman.

Southern Nuclear Operating Company, Inc., Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Docket Nos. 50–321 and 50–366, Edwin I. Hatch Nuclear Plant, Units 1 and 2, Appling County, Georgia

Date of amendment request: December 18, 1997.

Description of amendment request: The proposed amendments would modify or delete obsolete conditions from the Unit 1 and Unit 2 Operating Licenses. The changes are editorial or administrative in nature.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration which is presented below:

1. The proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes either remove or modify provisions in the Plant Hatch Unit 1 and Unit 2 Operating Licenses that have been completed or are otherwise obsolete. Certain Surveillance Requirements (SRs) that were either added or modified at the time of Improved Technical Specifications (ITS) implementation were listed in the Operating Licenses with a schedule for performance. With the exception of Unit 1 SR 3.8.1.18, all SRs are deleted from the Operating Licenses, because they have since been performed according to schedule, and will henceforth be performed in accordance with the Technical Specifications.

A requirement for submittal of the Unit 1 inservice inspection plan for the recirculation and residual heat removal systems' piping is deleted due to completion of the activity.

Two exemptions granted at Unit 2 startup are deleted due to completion of the required activities associated with the exemptions. These were seismic qualification demonstration for the Unit 2 reactor protection system power supply and completion of the long-term BWR [boiling water reactor] Owner's Group Mark I containment program.

A requirement to conduct the Unit 2 Initial Test Program according to the requirements in Chapter 14 of the Final Safety Analysis Report without major changes is deleted due to completion of the activity. A condition relating to environmental protection is deleted from the Unit 2 Operating License, since it was superseded by the Environmental Protection Plan (Nonradiological), Appendix B to the Operating Licenses. Attachment 2, Items To Be Completed Prior To Opening Main Steam Isolation Valves, is deleted due to completion of the activities.

The proposed changes discussed above are strictly administrative/editorial and do not affect the operation or function of any plant system, component, or structure. Therefore, the proposed changes do not increase the probability of occurrence or the consequences of a previously evaluated accident.

2. The proposed changes do not create the possibility of a new and different type of accident from any previously evaluated.

The proposed administrative/editorial changes do not alter the operation of any plant system or equipment and do not introduce a new mode of operation. Thus, the proposed changes cannot create a new accident initiating mechanism. Therefore, the proposed changes do not create the possibility of a new and different type of accident from any previously evaluated.

3. The proposed changes do not involve a significant reduction in the margin of safety.

Since the proposed changes are strictly administrative/editorial and do not involve any physical or procedural changes to the plant, the margin of safety, as defined in the bases for any Technical Specification is not affected by the proposed changes.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Appling County Public Library, 301 City Hall Drive, Baxley, Georgia.

Attorney for licensee: Ernest L. Blake, Jr., Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC.

NRC Project Director: Herbert N. Berkow.

STP Nuclear Operating Company, Docket Nos. 50–498 and 50–499, South Texas Project, Units 1 and 2, Matagorda County, Texas

Date of amendment request: December 17, 1997.

Description of amendment request: The proposed amendment would extend the surveillance interval of the containment spray system nozzle air flow test from five years to ten years.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

A. Operation of the facility in accordance with the proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed change does not result in any hardware changes. The Containment Spray system trains or nozzles are not assumed to be the initiators of any analyzed events. Extending the surveillance interval for performing the Containment Spray system nozzle air flow test from five to ten years does not represent a significant increase in the probability of an accident. The Containment Spray system nozzles are not precursors to any accident analyses.

The Containment Spray system trains and nozzles function to mitigate the consequences of an analyzed event by providing spray flow to containment during an accident. The proposed change still provides assurance that the Containment Spray system nozzles will be maintained operable due to the passive nature of the design, the materials of construction, and the low-stress non-wetted environment. The extension of the surveillance interval does not significantly increase the probability or consequences of an accident since the nozzle will still be OPERABLE between surveillance tests.

B. Operation of the facility in accordance with the proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed change does not necessitate a physical alteration of the plant or changes in parameters governing normal plant operation. No new or different types of equipment will be installed. The proposed change will still ensure Containment Spray system nozzle OPERABILITY is adequately maintained.

C. Operation of the facility in accordance with the proposed amendment does not involve a significant reduction in a margin of safety.

The increased interval between the Containment Spray system nozzle air flow test is acceptable due to the passive design of the nozzles and industry operating experience as detailed in NURG–1366. The increased interval is considered acceptable for maintaining nozzle OPERABILITY. The Containment Spray system, including the nozzles, will continue to provide their required safety function with the increase from five to ten years between inspections.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the request for amendments involves no significant hazards consideration.

Local Public Document Room location: Wharton County Junior College, J.M. Hodges Learning Center, 911 Boling Highway, Wharton, TX 77488.

Attorney for licensee: Jack R. Newman, Esq., Morgan, Lewis & Bockius, 1800 M Street, N.W., Washington, DC 20036–5869.

NRC Project Director: John Hannon.

STP Nuclear Operating Company, Docket Nos. 50–498 and 50–499, South Texas Project, Units 1 and 2, Matagorda County, Texas

Date of amendment request: December 31, 1997.

Description of amendment request: The proposed amendment would revise Technical Specifications 2.1 (Safety Limits), 2.2 (Limiting Safety System Settings), and 3/4.2.5 (Departure from Nucleate Boiling Parameters) by including alternate operating criteria to allow continued plant operation with a reduced measured reactor coolant system flow rate, if necessary.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards

VOL 63 ISS 18 JA 28 1998 UMI

consideration, which is presented below:

(1) Does the proposed license amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

The affected Reactor Protection System functions will continue to provide their current safety function under alternate operating criteria for reduced measured Reactor Coolant System flow conditions. The OT Delta-T [Overtemperature Delta-T], OP Delta-T [Overpower Delta-T], and f(Delta-I) [a function of the indicated difference between top and bottom detectors of the power-range neutron ion chambers] safety-analysis reactor trip setpoints have been recalculated to appropriately reflect the reduced flow conditions. In doing so, the difference, or margins, between the nominal and maximum values of the reference trip setpoints (*i.e.*, K1, and K4 for the OT Delta-T and the OP Delta-T setpoints, respectively) have been maintained so that the Total Allowance remains unchanged and, therefore, the instrument accuracy uncertainties are unaffected.

Furthermore, implementation of the provisions for reduced measure Reactor Coolant System flow under alternate operating criteria for the South Texas Project Technical Specifications does not increase the probability or consequences of an accident previously evaluated in the UFSAR [Updated Final Safety Analysis Report]. This change cannot directly initiate an accident. The consequences of accidents previously evaluated in the UFSAR are unaffected by this proposed change because no change to any equipment response or accident mitigation scenario has resulted. There are no additional challenges to fission product barrier integrity. Therefore, the probability of an accident previously evaluated has not been increased.

(2) Does the proposed license amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

No new failure mechanisms or accident scenarios or limiting single failures are introduced as a result of this proposed change. Operation of the plant will be consistent with that previously modeled. All of the accident analyses previously evaluated in the UFSAR for South Texas Project Units 1 and 2 have been evaluated to support alternate operating condition with a 3 percent reduction in the minimum measured Reactor Coolant System flow. The new nominal Reactor Coolant System operating conditions supported by these evaluations have been determined. Revised Core Thermal Safety Limits have been established and will be incorporated into the Technical Specifications for the 3 percent Reactor Coolant System measured flow reduction; and, the OT Delta-T and OP Delta-T setpoints are re-calculated based on the new Safety Analysis Limits, appropriate for the reduced flow operation. These reactor protection system functions affected by the change in operating conditions will, therefore, continue to provide an appropriate response equivalent to current safety analysis modeling. The proposed Technical Specification amendment does not challenge the performance or integrity of safety-related systems. The possibility of a new or different kind of accident, therefore, is not created.

(3) Does the proposed amendment involve a significant reduction in a margin of safety?

The modification will have no effect on the availability, operability, or performance of the South Texas Project safety-related systems and components. This is based on: the evaluation performed of all accidents previously evaluated in the UFSAR for operation of South Texas Project Units 1 and 2 at reduced Reactor Coolant System flow conditions; establishment of revised Core Thermal Safety Limits that are reflected in the proposed Technical Specification applicable for the 3 percent Reactor Coolant System flow reduction; and, the appropriately re-calculated OT Delta-T and OP Delta-T setpoints, also applicable for these reduced flow conditions. Allowing provision for these alternate operating criteria does not prevent inspections or surveillance required by the Technical Specifications. The margin of safety associated with the acceptance criteria for any accident is unchanged, and therefore, the proposed modification will not reduce the margin of safety as defined in the Bases of the South Texas Project Technical Specifications.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the request for amendments involves no significant hazards consideration.

Local Public Document Room location: Wharton County Junior College, J.M. Hodges Learning Center, 911 Boling Highway, Wharton, TX 77488.

Attorney for licensee: Jack R. Newman, Esq., Morgan, Lewis & Bockius, 1800 M Street, N.W., Washington, DC 20036–5869.

NRC Project Director: John N. Hannon.

The Cleveland Electric Illuminating Company, Centerior Service Company, Duquesne Light Company, Ohio Edison Company, Pennsylvania Power Company, Toledo Edison Company, Docket No. 50–440, Perry Nuclear Power Plant, Unit 1, Lake County, Ohio

Date of amendment request: December 23, 1997.

Description of amendment request: The license amendment request proposes changes to technical specification surveillances to remove the requirements related to accelerated testing of the standby emergency diesel generators, consistent with the recommendations in NRC Generic Letter 94–01, "Removal of Accelerated Testing and Special Reporting Requirements for Emergency Diesel Generators."

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration which is presented below:

1. The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes do not significantly increase the probability of occurrence of a previously evaluated accident because the standby diesel generators (including the High Pressure Core Spray [HPCS] diesel generator) are not initiators of previously evaluated accidents. The standby diesel generators mitigate the consequences of previously evaluated accidents involving a loss of offsite power. The Perry Nuclear Power Plant (PNPP) program developed to meet the Maintenance Rule (10 CFR 50.65) will continue to ensure the diesel generators perform their function when called upon. The change to the surveillance frequency does not affect the design of the diesel generators, the operational characteristics of the diesel generators, the interfaces between the diesel generators and other plant systems, the function, or the reliability of the diesel generators. Thus, the diesel generators will be capable of performing their accident mitigation function, there is no impact to the radiological consequences of any accident analysis, and the probability and consequences of previously evaluated accidents are not increased by this activity.

2. The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed activity involves a change to the frequency for specific technical specification surveillance requirements. No physical or operational changes to the diesel generators or supporting systems are made by this activity. Since the proposed changes do not involve a change to the plant design or operation and thus no new system interactions are created by this change, these changes do not produce any parameters or conditions that could contribute to the initiation of accidents different from those already evaluated in the Updated Safety Analysis Report. The proposed changes only address the methods used to ensure diesel generator reliability. Thus, the proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. The proposed change does not involve a significant reduction in a margin of safety.

The proposed changes involve the methods used to ensure diesel generator performance and reliability. No changes, other than to frequency, are made to Technical Specification Surveillance Requirements 3.8.1.2 and 3.8.1.3. The NRC, in Generic Letter 94–01, has acknowledged the acceptability of the use of the Maintenance Rule program for the diesel generators to ensure diesel generator performance in lieu of accelerated testing. These proposed changes do not involve a change to the plant design or operation, and thus do not affect the design of the diesel generators, the operational characteristics of the diesel generator, the interfaces between the diesel generators and other plant systems, or the function or reliability of the diesel generators. Because the diesel generator performance and reliability will continue to be ensured by the diesel generator program to meet the Maintenance Rule, the proposed changes do not result in a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Perry Public Library, 3753 Main Street, Perry, OH 44081.

Attorney for licensee: Jay Silberg, Esq., Shaw, Pittman, Potts & Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: Richard P. Savio.

Toledo Edison Company, Centerior Service Company, and The Cleveland Electric Illuminating Company, Docket No. 50–346, Davis-Besse Nuclear Power Station, Unit 1, Ottawa County, Ohio

Date of amendment request: December 23, 1997.

Description of amendment request: The proposed amendment would change Technical Specification (TS) Section 4.4.5, "Reactor Coolant System—Steam Generators—Surveillance Requirements (SRs)." SR 4.4.5.8 would be modified to provide flexibility in the scheduling of steam generator inspections during refueling outages.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensees have provided their analysis of the issue of no significant hazards consideration, which is presented below:

The Davis-Besse Nuclear Power Station has reviewed the proposed changes and determined that a significant hazards consideration does not exist because operation of the Davis-Besse Nuclear Power Station, Unit No. 1, in accordance with these changes would:

1a. Not involve a significant increase in the probability of an accident previously evaluated because no change is being made to any accident initiator. No previously analyzed accident scenario is changed, and initiating conditions and assumptions remain as previously analyzed. The proposed change to Technical Specification (TS) Surveillance Requirement (SR) 4.4.5.8, to allow performance of required visual inspections of the secured internal auxiliary feedwater header, header to shroud attachment welds, and the external header thermal sleeves during the third period of the ten-year Inservice Inspection Interval, does not affect any Updated Safety Analysis Report (USAR) accident initiators. These inspections will continue to take place at a prescribed time interval scheduled similar to American Society of Mechanical Engineers (ASME) Boiler and Pressure Vessel Code Section XI components. Therefore, it can be concluded that the proposed change does not involve a significant increase in the probability of an accident previously evaluated.

1b. Not involve a significant increase in the consequences of an accident previously evaluated because the proposed change does not affect accident conditions or assumptions used in evaluating the radiological consequences of an accident. The proposed change does not alter the source term, containment isolation or allowable radiological releases.

2. Not create the possibility of a new or different kind of accident from any accident previously evaluated because the proposed change does not alter the way the plant is operated, and no new or different failure modes have been defined for any plant system or component important to safety, nor has any limiting single failure been identified as a result of the proposed changes.

These inspections were established to ensure that there are no new failure mechanisms resulting from these components. These inspections will continue to take place in the third period of each inservice inspection interval. No new or different types of failures or accident initiators are introduced by the proposed changes.

3. Not involve a significant reduction in a margin of safety because visual inspections will be performed on a prescribed frequency that is consistent with the schedules established for ASME Code components in accordance with ASME Code Section XI.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: University of Toledo, William Carlson Library, Government Documents Collection, 2801 West Bancroft Avenue, Toledo, OH 43606.

Toledo Edison Company, Centerior Service Company, and The Cleveland Electric Illuminating Company, Docket No. 50–346, Davis-Besse Nuclear Power Station, Unit 1, Ottawa County, Ohio

Date of amendment request: December 23, 1997.

Description of amendment request: The proposed amendment would revise Technical Specification (TS) Section 1.0, "Definitions," to clarify the meaning of core alteration; would relocate TS Section 3/4.9.5, "Refueling Operations—Communications," and the associated bases to the Technical Requirements Manual; and would add TS Section 3.0.6 and the associated bases to address the return to service of inoperable equipment.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensees have provided their analysis of the issue of no significant hazards

VOL
63
ISS
18
JA
28
1998
UMI

consideration, which is presented below:

The Davis-Besse Nuclear Power Station (DBNPS) has reviewed the proposed changes and determined that a significant hazards consideration does not exist because operation of the Davis-Besse Nuclear Power Station, Unit Number 1, in accordance with these changes would:

1a. Not involve a significant increase in the probability of an accident previously evaluated because the probability of previously analyzed accidents is not affected by the criteria in the core alteration definition (Technical Specification (TS) 1.12). Nor do these changes, the proposed relocation of the refueling communications TS 3/4.9.5 and Bases to the DBNPS Updated Safety Analysis Report (USAR) Technical Requirements Manual (TRM), or the proposed addition of new TS 3.0.6 and Bases regarding return to service of inoperable equipment, affect any accident initiator, or assumption made in any safety analysis. The proposed changes are administrative in nature and are consistent with NUREG–1430, Revision 1, "Standard Technical Specifications, Babcock and Wilcox Plants," dated April 1995, as modified by a pending NUREG–1430 change approved by the NRC, Technical Specification Task Force (TSTF) Standard Technical Specification Change Traveler Number 165.

1b. Not involve a significant increase in the consequences of an accident previously evaluated because the proposed changes do not affect accident conditions or assumptions used in evaluating the radiological consequences of an accident. The proposed changes do not significantly alter the source term, containment isolation, or allowable radiological releases.

2. Not create the possibility of a new or different kind of accident from any accident previously evaluated because the proposed changes do not change the way the plant is operated. No new or different types of failures or accident initiators are introduced by the proposed changes.

3. Not involve a significant reduction in a margin of safety because no inputs into the calculation of any Technical Specification Safety Limit, Limiting Safety System Settings, Technical Specification Limiting Condition for Operation, or other previously defined margins for any structure, system, or component important to safety are being affected by the proposed changes.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: University of Toledo, William Carlson Library, Government Documents Collection, 2801 West Bancroft Avenue, Toledo, OH.

Attorney for licensee: Jack Newman, Al Gutterman, Morgan, Lewis & Brockius, 1800 M Street, NW., Washington, DC 20036–5869.

NRC Acting Project Director: Richard P. Savio.

Yankee Atomic Electric Company, Docket No. 50–029, Yankee Nuclear Power Station, Franklin County, Massachusetts

Date of amendment request: December 18, 1997.

Description of amendment request: By letter dated May 15, 1997, the licensee submitted a License Termination Plan. The NRC previously published a notice dated August 14, 1997, in the **Federal Register** (62 FR 43559) advising of receipt of the Plan. The proposed request is for a license amendment approving the Plan for the Yankee Nuclear Power Station.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

The proposed change will not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated. Accident analyses are included in the approved Decommissioning Plan and incorporated into the FSAR. All decommissioning and fuel storage activities described in the License Termination Plan are consistent with those in the approved Decommissioning Plan. No systems, structures, or components that could initiate or be required to mitigate the consequences of an accident are affected by the proposed change in any way not previously evaluated in the approved Decommissioning Plan. Therefore, the proposed change is administrative in nature and does not involve an increase in the probability or consequences of an accident previously evaluated.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated. Accident analyses are included in the approved Decommissioning Plan and are incorporated into the FSAR. All decommissioning and fuel storage activities described in the License Termination Plan are consistent with those in the approved Decommissioning Plan. The proposed change does not affect plant systems, structures, or components in any way not previously evaluated in the approved Decommissioning Plan, and no new or different failure modes will be created. Therefore, the proposed change is administrative in nature and does not create the possibility of a new or different kind of accident from any previously evaluated.

3. Involve a significant reduction in a margin of safety. Approval of the License Termination Plan by license amendment is administrative in nature since all decommissioning and fuel storage activities described in the License Termination Plan are consistent with those in the approved Decommissioning Plan. Therefore, the proposed change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Greenfield Community College, 1 College Drive, Greenfield, Massachusetts 01301.

Notice of Issuance of Amendments to Facility Operating Licenses

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing in connection with these actions was published in the **Federal Register** as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action, see (1) the applications for amendment, (2) the amendment, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment as indicated. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document rooms for the particular facilities involved.

Baltimore Gas and Electric Company, Docket Nos. 50–317 and 50–318, Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, Calvert County, Maryland

Date of application for amendments: October 2, 1997.

Brief description of amendments: The amendment changes the Calvert Cliffs Unit 1 Technical Specification Requirements 4.8.1.1.2.a.5, 4.8.1.1.2.d.4, and 4.8.1.1.2.d.5. Baltimore Gas and Electric Company is planning to modify existing 1B emergency diesel generator (EDG) to increase its rated continuous capacity from 2700 kW to 3000 kW by increasing the mechanical capacity of the engine. The change revises the above surveillance requirements to reflect the new electrical capacity of 1B EDG.

Date of issuance: January 5, 1998.

Effective date: As of the date of issuance to be implemented within 30 days.

Amendment No.: 224.

Facility Operating License Nos. DPR–53 and DPR–69: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register**: November 5, 1997 (62 FR 59913).

The Commission's related evaluation of these amendments is contained in a Safety Evaluation dated January 5, 1998.

No significant hazards consideration comments received: No.

Local Public Document Room location: Calvert County Library, Prince Frederick, Maryland 20678.

Entergy Operations, Inc., Docket No. 50–382, Waterford Steam Electric Station, Unit 3, St. Charles Parish, Louisiana

Date of amendment request: September 25, 1997.

Brief description of amendment: The amendment changes the Technical Specifications (TSs) by modifying the Limiting Condition for Operation (LCO) 3.6.1.2 (Containment Leakage), the associated action, and Surveillance Requirement (SR) 4.6.1.2 for Waterford Steam Electric Station, Unit 3 (Waterford 3). The air lock door seal leakage rate acceptance criteria in TS 6.15 is being changed from $0.01L_a$ to $0.005L_a$. TS 6.15 is also being modified to make the terms used in the Containment Leakage Rate Testing Program consistent with terms used in the TS.

Date of issuance: January 15, 1998.

Effective date: January 15, 1998.

Amendment No.: 138.

Facility Operating License No. NPF–38: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register**: October 22, 1997 (62 FR 54872).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated January 15, 1998.

No significant hazards consideration comments received: No.

Local Public Document Room location: University of New Orleans Library, Louisiana Collection, Lakefront, New Orleans, LA 70122.

GPU Nuclear Corporation, et al., Docket No. 50–219, Oyster Creek Nuclear Generating Station, Ocean County, New Jersey

Date of application for amendment: October 10, 1997.

Brief description of amendment: The amendment revises the Oyster Creek Nuclear Generating Station (OCNGS) operating license and technical specifications to reflect the registered trade name of "GPU Energy" under which the owner of OCNGS now does business and to reflect the change of the legal name of the operator of OCNGS from GPU Nuclear Corporation to GPU Nuclear, Inc. In addition, two minor editorial corrections associated with the name change are included in the amendment.

Date of issuance: January 14, 1998.

Effective date: As of the date of issuance, with full implementation within 30 days.

Amendment No.: 194.

Facility Operating License No. DPR–16: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register**: November 5, 1997 (62 FR 59915). The Commission's related evaluation of this amendment is contained in a Safety Evaluation dated January 14, 1998.

No significant hazards consideration comments received: No.

Local Public Document Room location: Ocean County Library, Reference Department, 101 Washington Street, Toms River, NJ 08753.

Indiana Michigan Power Company, Docket Nos. 50–315 and 50–316, Donald C. Cook Nuclear Plant, Units 1 and 2, Berrien County, Michigan

Date of application for amendments: October 8, 1997, and October 21, 1997.

Brief description of amendments: The amendments increase both the minimum required ice mass per ice basket and the total minimum required ice mass in the ice condenser, and change the bases for the technical specifications.

Date of issuance: January 2, 1998.

Effective date: January 2, 1998, with full implementation within 45 days.

Amendment Nos.: 220 and 204.

Facility Operating License Nos. DPR–58 and DPR–74: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register**: October 22, 1997 (62 FR 54863).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated January 2, 1998.

No significant hazards consideration comments received: No.

Local Public Document Room location: Maud Preston Palenske Memorial Library, 500 Market Street, St. Joseph, MI 49085

Northeast Nuclear Energy Company, et al., Docket No. 50–423, Millstone Nuclear Power Station, Unit No. 3, New London County, Connecticut

Date of application for amendment: October 15, 1997.

Brief description of amendment: Technical Specification Surveillances 4.1.2.3.1, 4.1.2.4.1, 4.5.2, 4.6.2.1, and 4.6.2.2 require the recirculation spray, quench spray, residual heat removal, centrifugal charging, and safety injection pumps to be tested on a periodic basis and after modifications that alter subsystem flow characteristics. The amendment replaces the specific surveillance pump pressure with a statement that the test be conducted in accordance with Specification 4.0.5, Inservice Testing Program. The

VOL 63 ISS 18 JA 28 1998 UMI

amendment also decreases the required individual safety injection and centrifugal charging pump injection line flow rates, increases the allowed individual safety injection pump runout flow rate, and makes editorial changes to the surveillances.

Date of issuance: December 24, 1997.

Effective date: As of the date of issuance, to be implemented within 60 days.

Amendment No.: 155.

Facility Operating License No. NPF–49: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register**: November 5, 1997 (62 FR 59918).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated December 24, 1997.

No significant hazards consideration comments received: No.

Local Public Document Room location: Learning Resources Center, Three Rivers Community-Technical College, 574 New London Turnpike, Norwich, Connecticut 06360, and the Waterford Library, ATTN: Vince Juliano, 49 Rope Ferry Road, Waterford, Connecticut 06385.

Public Service Electric & Gas Company, Docket Nos. 50–272 and 50–311, Salem Nuclear Generating Station, Unit Nos. 1 and 2, Salem County, New Jersey

Date of application for amendments: November 4, 1997.

Brief description of amendments: These amendments revise Technical Specification 3/4.8.1 on the emergency diesel generators to (1) delete the 18-month surveillance requirements 4.8.1.1.2.d.1 and (2) eliminate the accelerated testing requirement of Table 4.8–1.

Date of issuance: January 8, 1998.

Effective date: As of the date of issuance, to be implemented within 60 days.

Amendment Nos.: 203 and 185.

Facility Operating License Nos. DPR–70 and DPR–75: The amendments revised the Technical Specifications.

Date of initial notice in **Federal Register**: December 3, 1997 (62 FR 63982).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated January 8, 1998.

No significant hazards consideration comments received: No.

Local Public Document Room location: Salem Free Public Library, 112 West Broadway, Salem, NJ 08079.

Tennessee Valley Authority, Docket No. 50–327, Sequoyah Nuclear Plant, Unit 1, Hamilton County, Tennessee

Date of application for amendments: November 21, 1997 (TS 97–05).

Brief description of amendments: The amendments change the Technical Specifications (TS) to allow a one-time provision for testing power-operated relief valves in Mode 5.

Date of issuance: January 13, 1998.

Effective date: January 13, 1998.

Amendment No.: 230.

Facility Operating License Nos. DPR–77 and DPR–79: Amendments revise the TS.

PEACE CORPS

Information Collection Requests Under OMB Review

ACTION: Notice of public use form review request to the Office of Management and Budget.

SUMMARY: Pursuant to the Paperwork Reduction Act of 1981 (44 USC, Chapter 35), the Peace Corps is requesting emergency approval and clearance from the Office of Management and Budget for use of the Peace Corps Day Brochure/Form to be used by the World Wise Schools program. A copy of the information collection may be obtained from Monica Fitzgerald, Office of World Wise Schools, Peace Corps, 1990 K St., NW, Washington, DC 20525. Ms. Fitzgerald may be called at (202) 606–9498. Peace Corps invites comments on whether the proposed collection of information is necessary for proper performance of the functions of the Peace Corps, including whether the information will have practical use; the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Comments on this form should be addressed to Victoria Becker Wassmer, Desk Officer, Office of Management and Budget, NEOB, Washington, DC 20503.

Information Collection Abstract

Title: Peace Corps Day Brochure/Form.

Need for and use of the Information: This form is completed voluntarily by Returned Peace Corps Volunteers and educators throughout the country. This information will be used by WWS to identify individuals interested in participating in the Peace Corps's annual Peace Corps Day program. Enrollment in this program also fulfills the third goal of Peace Corps as required by Congressional legislation and to enhance the Office of World Wise Schools global education program.

Respondents: Returned Peace Corps Volunteers and educators throughout the public and private school systems in the United States.

Respondents obligation to reply: Voluntary.

Burden on the Public:

a. Annual reporting burden: 4,750 hrs.

b. Annual record keeping burden: 0 hrs.

c. Estimated average burden per response: 3 min.

d. Frequency of response: annually.

e. Estimated number of likely respondents: 95,000.

f. Estimated cost to respondents: $0.79.

This notice is issued in Washington, DC on January 23, 1998.

Bessy Kong,

Acting Associate Director for Management.

BILLING CODE 6051–01–M

PENSION BENEFIT GUARANTY CORPORATION

Submission of Information Collection for OMB Review; Comment Request; Allocating Unfunded Vested Benefits

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of request for extension of OMB approval.

SUMMARY: The Pension Benefit Guaranty Corporation ("PBGC") is requesting that the Office of Management and Budget ("OMB") extend approval, under the Paperwork Reduction Act, of a collection of information in its regulation on Allocating Unfunded Vested Benefits (29 CFR part 4211) (OMB control number 1212–0035). This notice informs the public of the PBGC's request and solicits public comment on the collection of information.

DATES: Comments should be submitted by February 27, 1998.

ADDRESSES: Comments should be mailed to the Office of Information and Regulatory Affairs of the Office of Management and Budget, Attention: Desk Officer for Pension Benefit Guaranty Corporation, Washington, DC 20503. Copies of the request for extension (including the collection of information) are available from the Communications and Public Affairs Department of the Pension Benefit Guaranty Corporation, suite 240, 1200 K Street, NW., Washington, DC 20005–4026, between 9 a.m. and 4 p.m. on business days.

FOR FURTHER INFORMATION CONTACT: Deborah C. Murphy, Attorney, Office of the General Counsel, Pension Benefit Guaranty Corporation, 1200 K Street, NW., Washington, DC 20005–4026, 202–326–4024. (For TTY/TDD users, call the Federal relay service toll-free at 1–800–877–8339 and ask to be connected to 202–326–4024.)

SUPPLEMENTARY INFORMATION: The PBGC administers the pension plan termination insurance programs under Title IV of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). Section 4211(c)(5)(A) of ERISA requires the PBGC to prescribe by regulation a procedure whereby multiemployer pension plans can change the way they allocate unfunded vested benefits to withdrawing employers, subject to PBGC approval. Approval of a change is to be based on a determination that the change will not significantly increase the risk of loss to plan participants or the PBGC.

The PBGC's regulation on Allocating Unfunded Vested Benefits (29 CFR part 4211) includes, in § 4211.22, rules for requesting the PBGC's approval of an amendment to a plan's allocation method. Section 4211.22(d) prescribes information that the PBGC needs to identify the plan and evaluate the risk of loss, if any, posed by the amendment (and, hence, determine whether it should approve the amendment). Section 4211.22(e) requires the submission of other information that the PBGC may need to review the amendment. (The regulation may be accessed on the PBGC's home page at http://www.pbgc.gov.)

The collection of information under the regulation has been approved by OMB under control number 1212–0035. The PBGC is requesting that OMB extend its approval for three years. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The PBGC estimates that it receives five submissions from plan sponsors annually under the regulation; that virtually all submissions are prepared by outside consultants; that the total annual hour burden of engaging the services of such consultants is one hour; and that the total annual cost burden of having the submissions prepared is $1,575.

Issued in Washington, DC, this 23d day of January 1998.

David M. Strauss,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708–01–P

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 23005; 812–10514]

Merrill Lynch & Co., Inc., et al.; Notice of Application

January 21, 1998.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application under section 6(c) of the Investment Company Act of 1940 (the "Act") for an exemption from all provisions of the Act.

SUMMARY OF THE APPLICATION: Applicants request an order to permit Merrill Lynch Preferred Funding I, L.P. (the "First Partnership") and Merrill Lynch Preferred Capital Trust I (the "First Trust") to sell securities and use the proceeds to finance the business activities of its parent company, Merrill Lynch & Co., Inc. ("ML & Co."), and companies controlled by ML & Co.

APPLICANTS: ML & Co., the First Trust, and the First Partnership.

FILING DATES: The application was filed on January 28, 1997. Applicants have agreed to file an amendment, the substance of which is incorporated in this notice, during the notice period.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on February 11, 1998, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, N.W., Washington, D.C. 20549. Applicants, World Financial Center, North Tower, 250 Vesey Street, New York, NY 10281–1318.

FOR FURTHER INFORMATION CONTACT: Kathleen L. Knisely, Staff Attorney, at (202) 942–0517, or Christine Y. Greenlees, Branch Chief, at (202) 942–0564 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch, 450 Fifth Street, N.W., Washington, D.C. 20549 (tel. 202–942–8090).

Applicants' Representations

1. ML & Co. is a company incorporated under Delaware law. It is a holding company that, through its subsidiaries, provides investment, financing, insurance, and related services on a global basis. Its principal subsidiary, Merrill Lynch, Pierce, Fenner & Smith Incorporated, is a leading broker-dealer, investment banking firm, and underwriter. Other subsidiaries provide a variety of financial services on a global basis, including broker-dealer services, swap activities, futures activities, banking, investment banking, consumer and mortgage lending, real estate activities, and asset management. Applicants state that ML & Co. is primarily engaged in the business of a holding company, and does not hold more than 40% of its assets in "investment securities," as defined in section 3(a)(2) of the Act.

2. ML & Co. has formed a two-tier structure, consisting of the First Trust and the First Partnership, to provide financing to itself and entities controlled by ML & Co. ("Controlled Companies"). To provide additional financing, ML & Co. proposes to form one or more two-tier structures

VOL 63 ISS 18 JA 28 1998 UMI

substantially similar to the First Trust and First Partnership [1] as well as one or more finance subsidiaries that differ in structure (each, an "Other Finance Subsidiary").

3. Each Trust will be a statutory business trust organized under the laws of Delaware or another jurisdiction. Each Partnership will be a limited partnership organized under the laws of Delaware or another jurisdiction. The general partner interests in the Partnership (the "General Partner Interests") will be owned by ML & Co. and/or one or more Controlled Companies, which will be the sole general partners of the Partnership (the "General Partners").

4. Each Trust will issue common securities ("Trust Common Securities") and preferred securities ("Trust Preferred Securities"). The Trust Common Securities will represent undivided beneficial interests in the assets of the Trust and will be owned by ML & Co. and/or one or more of its Controlled Companies. The Trust Preferred Securities will represent preferred undivided beneficial interests in the assets of the Trust and will entitle the holders to receive cumulative cash distributions accumulating from the date of original issuance and payable quarterly in arrears at a specified rate, as well as a specified amount on liquidation of the Trust, if, as, and when the Trust has funds available for payment. The distribution rate and payment dates on the Trust Preferred Securities will correspond to the distribution rate and payment dates for the Partnership Preferred Securities (as defined below) which, as described below, generally will be the only assets of the Trust.

5. Each Partnership will sell the General Partner Interests and limited partnership interests (the "Partnership Preferred Securities"). The Partnership Preferred Securities will provide essentially for the same distributions and liquidation payments as the Trust Preferred Securities. The funds for distributions on the Partnership Preferred Securities will come primarily from payments made to the Partnership by ML & Co. and/or its Controlled Companies.

6. Each Trust will use all of the proceeds of its offering of Trust Preferred Securities to purchase the Partnership Preferred Securities. The Trust will not invest or make loans to any other company. Each Partnership will make investments in or loans to ML & Co. and/or its Controlled Companies of at least 85% of any cash or cash equivalent raised or to be raised from the sale of the Partnership Preferred Securities, within six months of the receipt of such cash or cash equivalents. Applicants anticipate that substantially all of the proceeds from the sale of the Partnership Preferred Securities (and indirectly, from the sale of the Trust Preferred Securities), together with the capital contribution from the General Partners, will be used by the Partnership to purchase debentures or equity securities of ML & Co. and/or one or more of its Controlled Companies.

7. Amounts that are not loaned to ML & Co. and/or its Controlled Companies will consist of: (i) interest and dividends receivable from such investments and loans, cash on hand and demand deposits, time deposits and certificates of deposit, in no case having a maturity of greater than nine months; (ii) United States government securities; (iii) repurchase agreements having a maturity of no greater than nine months with respect to United States government securities; and (iv) other debt securities (*e.g.*, commercial paper) which arise out of current transactions, and which have maturities at the time of issuance not exceeding nine months.

8. The payment of distributions by the Trust or the Partnership and the payments on liquidation of the Trust or the Partnership will be guaranteed on a subordinated basis by ML & Co. (the "Guarantee").[2] If ML & Co. fails to make a guarantee payment, a holder of either Trust Preferred Securities or Partnership Preferred Securities may institute directly a proceeding against ML & Co. for enforcement of the payment without first proceeding against any other entity.

Applicants' Legal Analysis

1. Applicants request an order pursuant to section 6(c) of the Act granting an exemption from all provisions of the Act for the Trust, the Partnership, and the Other Finance Subsidiaries.[3] Applicants state that rule 3a–5 under the Act provides an exemption from the definition of investment company for certain companies organized primarily to finance the business operations of their parent companies or companies controlled by their parent companies.

2. Rule 3a–5(b)(3)(i) in relevant part defines a "company controlled by the parent company" to be a corporation, partnership, or joint venture that is not considered an investment company under section 3(a) or that is excepted or exempted by order from the definition of investment company by section 3(b) or by the rules and regulations under section 3(a). Certain of the Controlled Companies do not fit within the definition of "companies controlled by the parent company" because they derive their non-investment company status from section 3(c)(2), 3(c)(3), 3(c)(4), 3(c)(5), or 3(c)(6) of the Act. None of the Controlled Companies which will receive loans from the Partnership or the Other Finance Subsidiary will be relying on section 3(c)(1), 3(c)(5)(C), or 3(c)(7) of the Act.

3. Applicants state that none of the Controlled Companies engage primarily in investment company activities. In addition, if ML & Co. or the Controlled Companies were themselves to issue the securities that are to be issued by the Trust or the Partnership and use the proceeds for their own purposes, they would not be subject to regulation under the Act. While ML & Co. has chosen to use the Trust, the Partnership, and the Other Finance Subsidiaries as financing vehicles, the Guarantee ensures that holders of Trust Preferred Securities will have direct recourse against ML & Co.

4. Section 6(c) of the Act permits the SEC to exempt any person or class of persons from any provision of the Act or from any rule under the Act, if such exemption is necessary or appropriate in the public interest, consistent with the protection of investors, and consistent with the purposes fairly intended by the policy and provisions of the Act. Applicants submit that the relief requested satisfies the section 6(c) standard.

Applicants' Condition

Applicants agree that the order granting the requested relief will be subject to the following condition:

Applicants will comply with all of the provisions of rule 3a–5 under the Act, except that the Controlled Companies will not meet the portion of the definition of "company controlled by a parent company" in rule 3a–5(b)(3)(i) solely because they are excluded from the definition of investment company under section 3(c)(2), 3(c)(3), 3(c)(4), 3(c)(5), or 3(c)(6) of the Act, provided that any such entity excluded from the definition of investment company under section 3(c)(5) of the Act will fall within section 3(c)(5)(A) or section 3(c)(5)(B) solely by reason of its holdings of accounts receivable of either their own customers or of the customers of other ML & Co. subsidiaries, or by reason of loans made by it to such subsidiaries or customers, provided, further, that any such entity excluded from the definition of investment company under section 3(c)(6) of the Act will not be engaged primarily, directly, or through majority-owned subsidiaries in one or more of the businesses described in section 3(c)(5) of the Act (except as permitted in this condition).

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[File No. 500–1]

Struthers Industries, Inc.; Order of Suspension of Trading

United States of America Before the Securities and Exchange Commission

January 26, 1998.

On January 9, 1998, the Securities and Exchange Commission (the "Commission") ordered a 10 day suspension in trading in Struthers Industries, Inc. ("Struthers") because of questions regarding the accuracy of statements, and material omissions, concerning, among other things, (1) the value of certain broadcast licenses in which Struthers claims to have an ownership interest, (2) the presence of or potential for a recapitalization which will enable Struthers to pursue its business plan, and (3) the resignation of Struthers' auditors.

It appears to the Commission that there is a further lack of current and accurate information concerning the securities of Struthers because of separate and additional questions regarding the accuracy of statements and material omissions in a press release issued by Struthers on or about January 12, 1998 to the effect that, among other things:

(1) Struthers continues to work closely with representatives of its former auditor, BDO Seidman, to resolve the "disagreement with the SEC" over the value of the IVDS licenses Struthers holds under contract; and

(2) Struthers' former auditor strongly believes that Struthers has fairly and accurately valued these licenses.

The Commission is of the opinion that the public interest and the protection of investors require a second suspension of trading in the securities of the above listed company.

Therefore, it is ordered, pursuant to Section 12(k) of the Securities Exchange Act of 1934, that trading in the above listed company is suspended for the period from 9:30 a.m. EST, January 26, 1998 through 11:59 p.m. EST, on February 6, 1998.

By the Commission.

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–39550; File No. SR–NASD–96–51]

Self-Regulatory Organizations; National Association of Securities Dealers, Inc.; Order Approving Proposed Rule Change and Notice of Filing and Order Granting Accelerated Approval to Amendment Nos. 2, 3, and 4 to the Proposed Rule Change Relating to NASD Rule 11890 Regarding Clearly Erroneous Transactions

January 14, 1998.

On December 17, 1996, the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission ("SEC" or "Commission") a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Exchange Act") [1] and Rule 19b–4 thereunder.[2] On January 17, 1997, the NASD filed Amendment No. 1 to the proposed rule change.[3] Notice of the proposed rule change and Amendment No. 1 thereto, including the substance of the proposal, were published for comment in the **Federal Register**.[4] No comments were received. On March 11, 1997, August 13, 1997, and January 5, 1998, the NASD, through its wholly owned subsidiary, The Nasdaq Stock Market, Inc. ("Nasdaq"), submitted to the Commission Amendment Nos. 2,[5] 3,[6] and 4 [7] respectively, to the proposed rule change. The Commission is hereby approving the proposed rule change, including Amendment 1 to the proposal. In addition, the Commission is publishing this notice to solicit

comments from interested persons on Amendment Nos. 2, 3, and 4 to the proposed rule change and is approving those amendments on an accelerated basis.

I. Description of Rule Changes

A. Background

In April 1990, the SEC approved an NASD proposal to add Section 70 to the Uniform Practice Code (now NASD Rule 11890) to permit the NASD to declare clearly erroneous transactions null and void if they arise out of the use or operation of any automated quotation, execution, or communication system owned or operated by the NASD. Previously, the NASD had no authority to cancel a transaction, even if one or more terms of the transaction clearly was in error. As described in Nasdaq's filing, one of the catalysts for adopting Rule 11890 was a member's complaint concerning a transaction executed over SelectNet. The transaction was ten points away from the inside quotation, which the member argued was clearly an error, but the contra party refused to cancel the transaction. NASD Rule 11890 gives Nasdaq the ability to resolve disputes involving obvious errors in an expeditious manner, akin to an exchange floor governor ruling.[8]

B. Current Procedures

NASD Rule 11890 governs the review and resolution of clearly erroneous transaction complaints. Currently, the rule permits the NASD to declare any transaction arising out of the use or operation of any automated quotation, execution, or communication system owned or operated by the NASD or any subsidiary thereof, null and void when there is an obvious error in any term, such as price, number of shares or other unit of trading, or identification of the security. The rule also sets forth procedures for declaring a transaction null and void.

Under NASD Rule 11890(b)(1), a member or person associated with a member seeking to have a transaction declared null and void must notify an officer of the NASD designated by the President of the transaction during Nasdaq's operating hours on the same business day the transaction occurs, and provide such official with all facts and information necessary for a determination. The rule requires the complainant to confirm in writing any information communicated orally. Each member and/or person associated with a member involved in the transaction must provide the NASD with any information requested to resolve the matter on a timely basis.

Under NASD Rule 11890(b)(2), the designated officer must then review the information submitted and determine whether the transaction is clearly erroneous and detrimental to the maintenance of a fair and orderly market and the protection of investors and the public interest. The official may decline to act on a disputed transaction if he or she believes that action is unnecessary or inappropriate. Under NASD Rule 11890(b)(3), if either party wishes to appeal the staff determination, it may seek review by the Market Operations Review Committee ("MORC").

While the current procedures have served as a vehicle to cancel erroneous transactions, experience has shown that NASD Rule 11890 can be improved to enhance the fairness and expediency with which clearly erroneous transaction complaints are resolved. Experience with the Rule also has revealed shortcomings in the scope of Nasdaq's authority to take action with respect to clearly erroneous transactions. In particular, there have been instances in the past where it would have been appropriate for NASDAQ to declare a series of transactions clearly erroneous even through the parties to the transactions were unaware of any error and therefore were not in a position to bring the error to Nasdaq's attention. The proposed changes to NASD Rule 11890 are intended to eliminate these shortcomings and to provide Nasdaq with additional capabilities to resolve clearly erroneous transactions.

C. Proposed Amendments

The proposed amendments provide greater specificity and flexibility regarding declarations of clearly erroneous transactions. As explained in more detail below, the proposed amendments would:

(1) Provide Nasdaq officials the authority to effciently and expeditiously nullify or modify the price and size of clearly erroneous transactions (currently, Nasdaq officials may only nullify, affirm, or decline to act with respect to an allegedly clearly erroneous transaction) (NASD Rule 11890(a)(2));

(2) Shorten the time period in which parties may submit clearly erroneous transaction complaints from any time the same day to within 30 minutes of the disputed transaction (NASD Rule 11890(b)(1));

(3) Clarify the procedures by which the parties to an allegedly clearly erroneous transaction may submit written information concerning the transaction (NASD Rule 11890(b)(2)–(4));

(4) Provide Nasdaq officials the requisite authority to cancel or modify clearly erroneous transactions on their own motion during system disruptions or malfunctions in the use or operation of any automated quotation, execution, or communication system owned or operated by Nasdaq and approved by the Commission (NASD Rule 11890(c));

(5) Prohibit a member from withdrawing a clearly erroneous transaction complaint unless the other party to the transaction agrees to withdraw the matter (NASD Rule 11890(b)(5));

(6) Shorten the time period to appeal a clearly erroneous transaction determination from four "market" hours to 30 minutes (NASD Rule 11890(d)(1)); and

(7) Clarify that an appeal of a clearly erroneous transaction determination does not operate as a stay of the determination (NASD Rule 11890(d)(1)).

Under the proposed rule change, a complainant seeking to have a transaction reviewed must submit a written complaint to Nasdaq Market Operations: (1) By 10:30 a.m., Eastern Time, for transactions occurring prior to 10:00 a.m.; or (2) within 30 minutes of the transaction for transactions occurring on or after 10:00 a.m.[9] Once a complaint is received, the complainant has up to 30 minutes, or such longer period as specified by Nasdaq staff, to submit any supporting written information concerning the complaint necessary for a determination.[10] The counterparty to the transaction would be verbally notified of the complaint by Nasdaq staff and would have up to 30 minutes, or such longer period as specified by Nasdaq staff, to submit any supporting written information concerning the complaint necessary for a determination. Either party to a disputed transaction may request the written information provided by the other party. Once a party to a disputed transaction communicates that it does not intend to submit any further information concerning a complaint, the party may not thereafter provide additional information unless requested to do so by Nasdaq staff.[11] If both parties to a disputed transaction indicate that they have no further information to provide concerning the complaint before their respective 30-minute periods have elapsed, the matter would be immediately presented by a Nasdaq officer for a determination.

Under the proposed rule change, the President of Nasdaq would designate officers of Nasdaq who would have the authority to review any transaction arising out of the use or operation of any automated quotation, execution, or communication system owned or operated by Nasdaq and approved by the Commission.[12] A Nasdaq officer would review the transactions with a view toward maintaining a fair and orderly market and protecting investors and the public interest. Based upon this review, the officer would (1) Decline to act on a disputed transaction if the officer believes the transaction under dispute is not clearly erroneous, or (2) declare the transaction null and void or modify one or more terms of the transaction if the officer determines that the transaction is clearly erroneous.

With respect to the modification of transactions, the Nasdaq officer may adjust any of the terms of a disputed transaction (*e.g.*, price, number of shares or other unit of trading, or identification of the security) to achieve an equitable rectification of the error that would place the parties to the transaction in the same position or as close as possible to the same position as they would have been in had the error not occurred. After making a determination with respect to a particular transaction or group of transactions, Nasdaq would promptly provide oral notification of that determination to the parties and thereafter issue a written confirmation of the determination.[13] Under the proposal, once a party has applied to Nasdaq for review, the transaction would be reviewed and a determination rendered, unless both parties to the transaction agree to withdraw the application for review prior to a decision being rendered.[14]

The proposed rule change also would provide Nasdaq with the authority and procedures to review transactions executed during system disruptions or malfunctions in the use or operation of any automated quotation, execution or communication system owned or operated by Nasdaq and approved by the Commission.[15] In such an event, Nasdaq, acting through an officer designated by the President of Nasdaq, may, on its own motion, declare the transactions null and void or modify the terms of the transactions.[16] The proposed rule provides that in the absence of extraordinary circumstances, a Nasdaq officer must take action within 30 minutes of detection of the clearly erroneous transactions, but by no later than 6:00 p.m., Eastern Time, on the next trading day following the date of the transactions at issue. When Nasdaq takes action under these circumstances, the member firms involved in the transactions would be notified as soon as practicable and have a right to appeal such action.

Finally, the NASD proposal changes the process by which a Nasdaq officer's determination is appealed. Under the proposal, a member or person associated with a member may appeal a determination to the MORC, provided that such an appeal is made in writing within 30 minutes after the member or person associated with a member receives verbal notification of such determination.[17] An exception exists for circumstances where Nasdaq notifies the parties of action taken pursuant to paragraph (c) (*i.e.*, in cases of system disruptions or malfunctions) after 4:00 p.m. Under these circumstances, either party has until 9:30 a.m. the next trading day to appeal after the member or person associated with a member receives verbal notification of such determination. Once a written appeal has been received, the counterparty to the transaction would be notified of the appeal[18] and both parties would be permitted to submit any additional supporting written information until the time the appeal is considered by the MORC. Either party to a disputed transaction may request the written information provided by the other party during the appeal process. An appeal to the MORC would not operate as a stay of the determination. Once a party has appealed a determination to the MORC, the determination would be reviewed and a decision rendered. Upon consideration of the record and after such hearings as it may in its discretion order, the MORC would affirm, modify, reverse, or remand the determination of the designated Nasdaq officer. Under the proposal, any adverse determination by a Nasdaq officer or any adverse decision by the MORC would be rendered without prejudice as to the rights of the parties to the transaction to submit their dispute to arbitration.[19]

II. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning Amendment Nos. 2, 3, and 4. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to File No. SR–NASD–96–51 and should be submitted by February 18, 1998.

[8] *See, e.g.*, New York Stock Exchange Rule 75.

[9] Proposed NASD Rule 11890(b)(1).

[10] Proposed NASD Rule 11890(b)(2).

[11] Proposed NASD Rule 11890(b)(3).

[12] Proposed NASD Rule 11890(a)(2). According to the NASD, officers of Nasdaq are designated by the President of Nasdaq based on the breadth and depth of their experience regarding Nasdaq's rules and market procedures. Alfred Berkeley, Nasdaq's President, has designated, in addition to himself, the following senior officers of Nasdaq as having the authority to act under Rule 11890(a)(2) and 11890(c): John T. Wall, Executive Vice President; John Hickey, Executive Vice President; Glen Shipway, Senior Vice President; Sherman W. Broka, Senior Vice President; Mark DeNat, Vice President; Donald Bosic, Vice President; Beth Weimer, Vice President; William Wlcek, Vice President; Richard Gonzales, Vice President; Richard Bayha, Vice President; and Robert E. Aber, Vice President and General Counsel. According to the NASD, these officers are the only officers that are authorized to declare a transaction clearly erroneous. A list of these designated officers would be maintained by Nasdaq Market Operations and the NASD's Corporate Secretary. *See* Amendment No. 2.

[13] The NASD has represented to the Commission that Nasdaq officers will render a decision based upon the record as soon as possible under the circumstances. According to the NASD, currently, in almost all cases, the officer makes a decision on the same day the transaction occurred. The NASD indicated that a matter is not handled on the transaction date only where the complaint was filed late in the day (*i.e.*, after 5:00 p.m.) and the necessary information cannot be obtained the same day. The NASD explained that, generally, a decision is made within an hour of the final submission from a party except where a particular transaction involves complexities that require the staff to take additional time to verify facts provided by the parties. *See* Amendment No. 2.

[14] Proposed NASD Rule 11890(b)(5).

[15] Proposed NASD Rule 11890(c).

[16] The officials who have the authority to review transactions on their own motion would be the same officials who have the authority to review transactions submitted by a member's complaint. *See* Amendment No. 2 and note 12, above.

[17] Proposed NASD Rule 11890(d).

[18] As soon as Nasdaq obtains a written appeal from a party, Nasdaq would notify the other party to the transaction of the appeal. *See* Amendment No. 2, and note 5, above.

[19] *See* Proposed NASD Rule 11890(d)(2). In Amendment No. 4, Nasdaq clarified the ability of parties to seek arbitration: With respect to the ability of a party to submit a dispute to arbitration without prejudice notwithstanding an adverse decision by a Nasdaq officer or the Committee [*i.e.*, the MORC], as set forth in paragraph (d)(2) [of proposed NASD Rule 11890], it should be made clear that this rule does not prevent such party from seeking arbitration either before any such decision is rendered, or in the absence of a determination altogether.

VOL 63 ISS 18 JA 28 1998 UMI

III. Discussion

The Commission finds the proposed rule change, by helping to ensure that clearly erroneous transactions are quickly corrected or nullified and properly reported to the public, is consistent with the Exchange Act and in particular with Sections 15A(b)(6) and 11A(a)(1)(C) of the Exchange Act. Among other things, Section 15A(b)(6) requires that the rules of a national securities association be designed to remove impediments to and perfect the mechanism of a free and open market and a national market system and in general to protect investors and the public interest. Section 15A(b)(6) also provides that the rules of the association not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. Section 11A(a)(1)(C) provides that, among other things, it is in the public interest to assure the availability to brokers, dealers, and investors of information with respect to quotations for and transactions in securities.

In the proposed rule change, the NASD provides greater specificity in the procedures for resolving clearly erroneous transactions and greater flexibility to Nasdaq officials to remedy such errors expeditiously. The Commission believes that the amendments to the NASD's procedures to review these transactions should benefit market participants by promoting fair and efficient resolution of disputes involving clearly erroneous transactions. In addition, the proposed rule change—in particular the provision for appeal to the MORC—addresses concerns raised by the Commission in its August 8, 1996, Report Pursuant to Section 21(a) of the Securities Exchange Act of 1934 Regarding the NASD and The Nasdaq Stock Market regarding the fairness of the clearly erroneous review process. The NASD believes, and the Commission agrees, that with these amendments the process for resolving clearly erroneous transaction complaints would become fairer and more efficient. In this regard, the proposal is consistent with Exchange Act Section 15A(b)(6) because it helps to ensure that NASD Rule 11890 does not permit unfair discrimination between customers, issuers, brokers, or dealers.

Further, it is important for the proper functioning of the securities markets that investors be able to rely on reported transactions as accurately reflecting the current state of the market and actual executions. When clearly erroneous transactions are publicly reported, it is important that, whenever possible,[20] Nasdaq correct these clear errors and correct the inaccurate information that was disseminated in the market about these transactions as quickly as possible.

For the foregoing reasons, the Commission finds that the proposed rule change is consistent with the requirements of the Exchange Act and the rules and regulations thereunder applicable to national securities association and, in particular, the requirements of Sections 15A(b)(6) and 11A(a)(1)(c) and the rules and regulations thereunder.[21]

Finally, the Commission finds good cause for approving Amendment No. 2, 3, and 4 to the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof. The Exchange's proposal was published in the**Federal Register** for the full statutory period.[22] Amendment Nos. 2, 3, and 4 are technical amendments that clarify the operation of the rule to enhance market participants' comprehension and compliance with these procedures. The Amendments do not diminish the rights of any prospective party with respect to resolving clearly erroneous transactions. Consequently, the Commission finds that there is good cause, consistent with the Exchange Act, to accelerate approval of Amendment Nos. 2, 3, and 4.

IV. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Exchange Act,[23] that the proposed rule change (SR–NASD–96–51) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[24]

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 98–1975 Filed 1–27–98; 8:45 am]

BILLING CODE 8010–01–M

[20] Regarding the transparency of voided or modified clearly erroneous transactions, Nasdaq represented to the Division of Market Regulation that whenever possible within the constraints of Nasdaq's systems, Nasdaq will endeavor to ensure that the tape and historical record will be corrected as soon as possible. Given that allegedly clearly erroneous trades will now be brought to Nasdaq's attention within 30 minutes rather than within four hours as was previously the case, it will be significantly less likely that transactions voided or modified as clearly erroneous will not be corrected on the tape or historical record. Nasdaq also represented that in 1997, when the time period was still four hours, clearly erroneous transactions that were modified or voided were almost always corrected on the tape or historical record. Conversation between Andrew S. Margolin, Office of the General Counsel, Nasdaq, and Jeffrey R. Schwartz, Special Counsel, Division of Market Regulation, SEC, January 8, 1998.

[21] In approving this rule, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. The proposed rule change likely will enhance the efficiency and fairness of the process by which clearly erroneous transactions are modified or nullified. The proposal also should increase the accuracy of transaction reports disseminated to the public. The net effect of approving the proposed rule change will be positive. 15 U.S.C. § 78c(f).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–39563; File No. SR–NSCC–97–14]

Self-Regulatory Organizations; National Securities Clearing Corporation; Notice of Filing of a Proposed Rule Change to Modify NSCC's Procedures Regarding its Trade Comparision Service

January 20, 1998.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on December 9, 1997, the National Securities Clearing Corporation ("NSCC") filed with the Securities and Exchange Commission ("Commisssion") the proposed rule change (File No. SR–NSCC–97–14) as described in Items I, II, and III below, which items have been prepared primarily by NSCC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change will modify NSCC's procedures regarding its trade comparison system for over-the-counter ("OTC") securities.

II. Self-Regulatory Organizations's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NSCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. NSCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.[2]

[1] 15 U.S.C. 78s(b)(1).

[2] The Commission has modified the text of the summaries submitted by NSCC.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The proposed rule change will modify NSCC's procedures regarding its trade comparison service. The proposed rule change will discontinue the following instructions: the "delete of original trade input,"[3] the "demand withold,"[4] and the "demand as of."[5] Such instructions are used very infrequently by NSCC members due to the growth of automated processing systems. Their elimination will result in reduced costs to members.

Additionally, the change will eliminate the ability to submit an advisory listing after the first day after trade date ("T+1") for original input and as of trades.[6] This change results from extremely limited acceptances of advisories of T+2 and will also reduce costs.

Under the third change, the supplemental contract lists and the added trade contract lists will no longer carry forward totals. The supplemental contract lists show all compared trades resulting from adjustments submitted on T+1. The added trade contract lists show trades that are compared on T+2 and thereafter. NSCC has been advised that due to the increasingly automated processing environment, totalled information is no longer necessary. This will reduce computer processing time and therefore will also diminish production costs. These modifications are scheduled to take place in April of 1998.

NSCC believes that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder since it will facilitate the prompt and accurate clearance and settlement of securities transactions and, in general, will protect investors and the public interest.

(B) Self-Regulatory Organization's Statement on Burden on Competition

NSCC does not believe that the proposed rule change will have an impact on or impose a burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments relating to the proposed rule change have been solicited or received. NSCC will notify the Commission of any written comments received by NSCC.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within thirty-five days of the date of publication of this notice in the **Federal Register** or within such longer period: (i) As the Commission may designate up to ninety days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding; or (ii) as to which NSCC consents, the Commission will:

(A) By order approve such proposed rule change; or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of such filing will also be available for inspection and copying at the principal office of NSCC. All submissions should refer to the file number SR–NSCC–97–14 and should be submitted by February 28, 1998.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[7]

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 98–1976 Filed 1–27–98; 8:45 am]

BILLING CODE 8010–01–M

[3] NSCC members use the delete of original trade input to delete any item for which the comparison process resulted in an uncompared trade.

[4] The demand withhold service deletes previously compared OTC transactions which have been canceled by mutual agreement of the buyer and the seller.

[5] OTC trade data submitted by members which is uncompared may be resubmitted through the demand as of service.

[6] Advisory listings indicate trades which were submitted by another party against the member but which did not match any trade the member submitted.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–39564; File No. SR–NYSE–97–30]

Self-Regulatory Organizations; New York Stock Exchange, Inc.; Order Granting Approval to Proposed Rule Change and Notice of Filing and Order Granting Accelerated Approval of Amendment No. 1 to Proposed Rule Change To Amend and To Make Permanent the Allocation Policy and Procedures Pilot Program

January 20, 1998.

I. Introduction

On October 20, 1997, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") submitted to the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend and to obtain permanent approval of the Exchange's Allocation Policy and Procedures pilot program.

The proposed rule change was published for comment in the **Federal Register** on November 7, 1997.[3] No comments were received on the proposal. On January 2, 1998, the NYSE submitted Amendment No. 1 to the proposed rule change.[4] This order approves the proposed rule change and approves Amendment No. 1 on an accelerated basis.

II. Background and Description of the Proposal

The Exchange's Allocation Policy and Procedures ("Policy") are intended: (1) to ensure that securities are allocated in an equitable and fair manner and that all specialist units have a fair opportunity for allocations based on established criteria and procedures; (2) to provide an incentive for ongoing enhancement of performance by

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 39288 (October 30, 1997) 62 FR 60297.

[4] *See* Letter from Agnes M. Gautier, Vice President, Market Surveillance, NYSE to Sharon Lawson, Senior Special Counsel, Division of Market Regulation ("Division"), Commission, dated December 26, 1997 ("Amendment No. 1"). In Amendment No. 1, the NYSE clarified the proposal with respect to: (1) Exchange representation at interviews between specialist units and listing companies; (2) Exchange review of written materials supplied by specialist units to listing companies; and (3) specialist unit contact with a listing company. In addition, Amendment No. 1 deletes the sentence inviting listing companies to express in a letter sent to the Exchange's Allocation Committee any preference not to be traded by specialist units which trade the stock of the listing companies' competitors.

VOL 63 ISS 18 JA 28 1998 UMI

specialist units; (3) to provide the best possible match between specialist unit and security; and (4) to contribute to the strength of the specialist system. On February 28, 1997, the Exchange proposed to change the Policy to allow greater listing company input. On March 7, 1997, the Commission approved the proposal as a seven-month pilot program, effective until October 7, 1997.[5] Subsequently, the Commission has approved two extensions of the Exchange's pilot program; the current extension expires January 16, 1998.[6]

Under the pilot program, listing companies may: (1) Have the Allocation Committee select their specialist unit ("Option 1"); or (2) make the final selection of a specialist unit from among a group of three of five specialist units selected by the Allocation Committee ("Option 2"). In either case, the listing company may submit a generic letter to the Allocation Committee which may describe desired general characteristics of a specialist unit, but may not mention particular specialist units. Under Option 2, the listing company meets, either in person or by teleconference, with the specialist units selected by the Allocation Committee within two business days after their selection. The listing company must make its decision as to a specialist unit by the next business day.

The Exchange is proposing several changes to the Policy in addition to requesting permanent approval of the pilot permitting Option 2. First, when the listing company selects Option 2, currently the Allocation Committee will select a group of three, four or five units that are the most qualified specialist units among the units that apply. It is proposed that if three units are selected, the Allocation Committee may select an alternate specialist unit to be among the group of units that a company may interview in the event a unit is eliminated. A specialist unit could be eliminated if it cannot meet with the listing company at the appointed time. A unit chosen as an alternate will be informed of its status as such. Currently, the policy is silent regarding this procedure.

Second, the Exchange is proposing several changes covering contacts between specialist units and listing companies. The NYSE is proposing to codify in its Policy its prohibition on contact between listing companies and specialist units from the time allocation applications are solicited until Allocation Committee meetings. The current Policy is silent regarding contact between listing companies and specialist units. However, the NYSE's Information Memo No. 97–13 states that once allocation applications are distributed, the Exchange expects that specialist units will have no contact with the listing companies. The proposed change would codify this existing restriction into the Policy itself.[7]

The proposal also would allow specialist units to provide written material to Exchange staff from the time of selection of an interviewing pool to no later than two hours before the scheduled interview. Exchange staff would provide the written material to the listing company on the day of the interview. The proposal further would require written material to be limited to information pertaining to the specialist unit, and would not permit any reference to another specialist unit or units, except overall floorwide statistics. In addition, the amended proposal would require periodic, random reviews of such material by Exchange staff after the allocation process has been completed. The NYSE represents that it will take appropriate regulatory action should problems with the written materials provided to listing companies be disclosed.[8]

Under the terms of the proposal, a specialist unit may not supply information at the interview [9] concerning another specialist unit or units either orally or in writing, except it may refer to overall floorwide statistics. The proposal would permit any information contained in Exchange documents to be provided by the unit orally or in writing on the unit's letterhead. Following its interview, the proposal would prohibit a specialist unit from having any contact with listing company and any follow-up questions by the company regarding publicly available information on a unit would be required to be sent to the Exchange. If the Exchange approves, a response would be provided. The proposal provides that the specialist units in the group of units interviewed would be advised of such requests.

Third, under the Policy, the listing company's letters to the Allocation Committee can describe characteristics that focus on the specialist unit rather than the listing company. According to the NYSE, letters which describe the listing company are more helpful to the Allocation Committee in assessing the type of specialist unit that would be appropriate for the company. Therefore, the Exchange proposes to change the Policy to require that any letter submitted by the listing company to the Allocation Committee focus on the history and background of the company and its industry; how the company historically has funded its operations; characteristics of its shareholder base and any unusual trading patterns that may result therefrom; and any public information regarding the company's plans for the future. The letter may also include the company's specific views on being traded by a specialist unit with experience in trading in its industry or country.[10]

Fourth, under the current policys within two business days after the selection of a group of specialist units by the Allocation Committee, the listing company must meet with the specialist unit's representative. In addition, the listing company must select its specialist unit within one business day of the interview. The Exchange believes that these time frames have been, at times, too compressed for company travel arrangements or preparation by the specialist units. Accordingly, the NYSE is proposing to amend this portion of the policy to permit the listed company to meet with the selected group of specialist units' representatives up until the close of business on the last Exchange business day of the week in which the selection of the group was

[5] *See* Securities Exchange Act Release No. 38372, 62 FR 13421 (March 21, 1997) (notice of filing and immediate effectiveness of File No. SR–NYSE–97–04). On April 16, 1997, the Exchange filed another proposed change to its Policy not covered under the pilot program. *See* Securities Exchange Act Release No. 38828 (July 9, 1997) 62 FR 39043 (July 21, 1997) (order approving File No. SR–NYSE–97–12).

[6] *See* Securities Exchange Act Release Nos. 39206 (October 6, 1997) 62 FR 53679 (October 15, 1997) (notice of filing and order granting accelerated approval of File No. SR–NYSE–97–27); and 39368 (November 26, 1997) 62 FR 64613 (December 8, 1997) (notice of filing and immediate effectiveness of File No. SR–NYSE–97–32).

[7] The current Policy does require specialist units to describe in their allocation applications any contacts with the listing company with regard to its prospective listing on the Exchange within six months prior to the date that allocation applications are solicited. According to the NYSE, such contacts are among the factors considered by the Allocation Committee in allocating a stock to a specialist unit or selecting a unit to be interviewed by the listing company. *See* Amendment No. 1, *supra* note 4.

[8] *See* Amendment No. 1 *supra* note 4.

[9] According to the NYSE, staff of its Listing Department will continue to attend interviews between listing companies and specialist units. In addition, Exchange Regulatory staff will randomly attend interviews for two listings each month and conduct meetings with members of the Exchange's Listings staff to educate them on regulatory issues. *See* Amendment No. 1, *supra* note 4.

[10] The NYSE also proposed to amend the Policy to invite a listing company to include in its letter any preference that its stock not be traded by specialist units which trade competitors' stock. In Amendment No. 1, the NYSE deleted all reference to any preferences the listing company may have with respect to the units trading competitors' stock. Listing companies will not, however, be prohibited from stating such a preference in letters sent to the Allocation Committee. *See* Amendment No. 1, *supra* note 4.

made by the Allocation Committee. Further, the amended proposal provides that as soon as practicable, following its meeting with representatives of the specialist units, the listing company would be required to select its specialist unit. If a listing company meets with any of its specialist units on the last Exchange business day of the week, it would be required to make its decision on that day.

Fifth, the Policy currently permits telephone interviews at the request of a listing company. According to the NYSE, in-person interviews have been shown to be more effective. Therefore, under the proposal, telephone interviews would not be permitted for domestic listing companies, unless approved by the Exchange for compelling circumstances. Telephone interviews would continue to be permitted for non-U.S. listing companies.

Finally, the NYSE is proposing to change the Policy concerning spin-offs and related companies. Under the proposed revisions to the Policy, a listing company that is a spin-off or related company may choose to stay with the specialist unit registered in the related listed company. Currently, situations in which a listing company is a spin-off of or related to a listed company are handled as new listings, with allocation open to all specialist units. Under the terms of the proposal, if a listing company that is a spin-off or related company chooses to have the Allocation Committee select its specialist, the listing company may request, and the Allocation Committee will honor, that it not be traded by the unit that trades the related listed company. Alternatively, the proposal would permit the listing company to choose Option 2 and request that the Allocation Committee include or exclude the specialist unit registered in the related listed stock from the pool of specialist units.[11]

III. Discussion

The Commission finds that the proposed rule change, as amended, is consistent with the requirements of Section 6 of the Act [12] and the rules and regulations thereunder applicable to a national securities exchange.[13] The Commission believes that the proposed rule change is consistent with and furthers the objectives of Section 6(b)(5) of the Act [14] in that it is designed to perfect the mechanism of a free and open market and to protect investors and the public interest.

From the outset, the Commission has had two primary concerns relating to the Exchange's pilot program: (1) whether the resulting allocations would be based on objective factors, such as specialist performance, or influenced by such factors as promotional efforts of specialist units; and (2) whether this new procedure would create the appearance of impropriety between the specialist and the listing company and thereby undermine public confidence in the integrity of the marketplace. The Commission approved the new procedures as a pilot program to give the NYSE time to gain experience with the new procedures and to allow both the Exchange and the Commission additional time to evaluate the merits of the program.

After assessing the results of the NYSE's pilot program, the Commission has determined to approve on a permanent basis the proposed changes to the Policy. The Commission notes that there is no evidence of any problems with the pilot program during its ten months of operation and the Commission believes that the Exchange is applying the established criteria appropriately. In addition, the Commission believes that the proposed amendments implement and enforce safeguards which should ensure that inappropriate or prohibited relationships between specialist units and listing companies do not develop.

Specifically, the Commission believes that it is appropriate to continue to permit listing companies to have the choice to have greater input in the selection of the specialist unit that will trade the companies' stock. The Commission notes that listing companies retain the right to request the Allocation Committee to select a specialist unit on their behalf based on the criteria specified in the Policy.[15] The Commission further notes that under Option 2, where a listing company has the opportunity to select its own specialist unit, it must do so from a group of three to five units that are selected by the Allocation Committee as the most qualified specialist units among the units that apply based on the criteria in the Policy.[16] Because under either Option, the allocation criteria, which focuses primarily on specialist performance, must be applied by the Allocation Committee, the Commission believes that the allocation process will continue to ensure that the best qualified and performing units will be rewarded with allocations.

Second, the NYSE's proposal contains several safeguards to ensure the continued integrity of the allocation process and that contacts between specialists and listing companies are appropriately monitored when Option 2 is used. In this regard, the NYSE's proposal codifies in its Policy its prohibition on contact between listing companies and specialist units from the time allocation applications are solicited until Allocation Committee meetings. This should help to maintain the integrity of the allocation process and ensure that inappropriate contacts and solicitations are not permitted. The Commission also notes that the current Policy requires specialist units to disclose all contacts with the listing company within six months of the date that allocation applications are solicited. The Commission believes that it is appropriate for the Allocation Committee, in allocating a stock to a specialist unit or selecting units to be interviewed by the listing company, to consider prior contacts between the listing company and the specialist units as a factor in the decisionmaking process.[17]

The Commission further believes that the provisions of the proposal restricting written material to information pertaining to the specialist unit, except overall floorwide statistics, is reasonable as it allows specialist units to provide evidence of their own perceived strengths and historical performance, and will help to prevent unsubstantiated claims against other units also competing for the allocation. The NYSE has stated that it will randomly review the written materials supplied by specialist units to listing companies after the allocation process

[11] This is similar to the Policy's current approach to relisting and listed company mergers.

[12] 15 U.S.C. 78f.

[13] In approving this rule, the Commission notes that it has considered the proposed rule's impact on efficiency, competition, and capital formation. 15 U.S.C. 78c(f).

[14] 15 U.S.C. 78f(b)(5).

[15] Under the Policy, the Allocation Committee is required to base allocation decisions on: (1) the results of the Specialist Performance Evaluation Questionnaire ("SPEQ"); (2) objective performance measures; and (3) the Allocation Committee's expert professional judgment in considering the SPEQ, objective measures of performance, and other enumerated criteria, such as professional judgment, listing company input, allocations received, capital deficiency, disciplinary actions, justifiable complaints and foreign listing considerations. The SPEQ includes several facets, including ratings in the current quarter, improved ratings, and ratings over time. Objective measures of performance considered by the Allocation Committee include dealer participation rates, stabilization, capital utilization, and near neighbor analysis, as well as timeliness of regular openings, promptness in seeking Floor official approval of non-regulatory delayed openings, timelessness of DOT turnaround, and response to administrative messages.

[16] *Id.*

[17] *See* Amendment No. 1, *supra* note 4.

VOL 63 ISS 18 JA 28 1998 UMI

has been completed to discover any inaccuracies in the material.[18] While the Commission believes that prior review by Exchange staff of all written materials provided to listing companies would help to ensure that information provided by specialist units is not false, misleading, or ambiguous, we note that specialists are still under a duty to ensure that their statements, both oral and written, are not misleading or false. In light of the NYSE's representations that appropriate regulatory action will be taken in the event that any problems are discovered, the Commission believes that it is reasonable for the NYSE to initially start with a random review by Exchange staff of written material provided to listing companies by specialist units after the allocation process has been completed.[19] If such reviews disclose problems with communications, we would expect the NYSE to consider replacing its review process with a more comprehensive one to be conducted prior to the allocation.

In addition, the NYSE represents that all interviews between specialist units and listing companies will continue to be attended by staff of the Exchange's Listing Department. Moreover, members of the Exchange's Regulatory staff will randomly attend interviews for two listings each month and conduct meetings with members of the Exchange's Listings staff to educate them on regulatory issues. The Commission believes that the proposed procedures, without placing too great of an administrative burden on the Exchange's Regulatory staff, should ensure that any specialist units making inappropriate remarks to listing companies at interviews will be subject to appropriate regulatory action.

Third, the Commission notes, as described above, that the proposal would change the requirements for listing company letters submitted to the Allocation Committee. Instead of requiring such letters to describe the desired characteristics of the specialist unit, the Policy would be amended to require such letters to contain detailed information regarding the background and operations of the listing company and its industry. The Commission agrees with the NYSE that specific information about the listing company may better assist the Allocation Committee in selecting the appropriate specialist unit(s). The Policy also will continue to prohibit the listing company from identifying a specific specialist unit in its letter to the Allocation Committee. These requirements together should ensure that the Allocation Committee will be able to select the most qualified units based on the allocation criteria. Accordingly, the Commission finds that the proposed provisions relating to the company's letter are consistent with the Act.

Fourth, the Commission notes that the proposal would generally relax the time frames during which a listing company must meet with and select a specialist unit from the group of units selected by the Allocation Committee. The proposed rule allows the listing company to meet with the selected group of specialist units' representatives by the close of business on the last Exchange business day of the week in which the selection of the group was made, rather than within two business days. In addition, the Policy is being changed to permit the listing company to select its specialist unit as soon as practicable, as opposed to within one business day, following its meeting with representatives of the specialist units.[20] The NYSE has represented that most Allocation Committee meetings occur on Mondays.[21] Accordingly, for most allocations, listing companies will have more time to meet (a total of five business days between Monday and Friday, rather than two) and select their specialist unit. The Commission further notes that should compelling circumstances prevent the required meetings within the established time frames, the proposal grants the Exchange discretion to permit telephone interviews for domestic listing companies.[22] Otherwise, the proposal would permit telephone interviews solely for non-U.S. listing companies. The Commission believes that the proposed time frames are reasonable and should allow, in most cases, sufficient opportunity for specialist units to prepare for the interviews and for listing companies to arrange to meet with representatives of the selected specialist units.

Fifth, the Commission believes that the Exchange's deletion of the proposed sentence in the Policy inviting a listing company to include in its letter to the Allocation Committee its preference not to be traded by specialist units trading competitors' stock is appropriate and consistent with the Act. The Commission believes that the existence of the provision would serve only to encourage the expression of such preferences and consequently, to unnecessarily limit the pool of specialist units to be selected by the Allocation Committee. In addition, the Commission does not believe there is any regulatory reason to prohibit a specialist unit from trading competitors' stock. Indeed, a specialist's market making expertise in a certain industry may actually prove to be a benefit to a listing company. Although the Policy will not prohibit listing companies from expressing such preferences in letters to the Allocation Committee, the Commission believes that the absence of the provision in the Exchange's Policy should enhance competition among specialist units to the benefit of both listing companies and the Exchange.

Sixth, the proposal allows the Allocation Committee to select an alternate unit in cases in which only three units are selected to be interviewed. The Commission recognizes that based on the established time frames, situations may arise in which either the listing company or a particular specialist unit cannot meet at the appointed time. Accordingly, the Commission believes that when only three specialist units are selected by the Allocation Committee, the selection of an alternate unit to be interviewed by the listing company is reasonable and will ensure an adequate pool from which to select a specialist.

Finally, the Commission believes that the NYSE's proposal to allow a listing company that is a spin-off of or related to a listed company to choose to stay with the specialist unit for the related company is reasonable because of the relationship between the spun-off company and the former company. The proposal also requires the Allocation Committee to honor the spin-off company's request not to be allocated to the specialist unit that had traded the related company's stock. The Commission recognizes that both allowing the spin-off company to stay with the original specialist unit and barring the original specialist unit from receiving the listing does raise some concerns about ensuring that all specialist units will be allowed to compete for the allocation on an equal basis. Nonetheless, the Commission believes that there may be legitimate reasons why an unlisted company may want to remain with the related company's specialist unit or may believe it is more appropriate to be allocated to a new specialist unit rather than the one that has dealings with the related company. For the same reasons, the Commission believes that the provisions which allow a listing company to choose Option 2 and request that the Allocation Committee include or exclude the specialist unit registered in the related listed stock are reasonable. Accordingly, the Commission finds these provisions are consistent with the Act.

The Commission finds good cause for approving proposed Amendment No. 1 prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register.** The Commission notes that Amendment No. 1 further clarifies the process by which listings are allocated to specialist units and raises no new regulatory issues. Specifically, Amendment No. 1 interprets the Policy's provisions relating to interviews between listing companies and specialist units, written materials provided to listing companies by specialist units, and specialist units' contact with listing companies during the six month period prior to the solicitation of allocation applications and helps to strengthen the proposal and ensure compliance with the Policy. Regarding the deletion of the proposal to permit listing companies to state their preference not to be traded by units trading competitors' stock, the Commission notes that the elimination of this provision, which would have further restricted the pool of specialist units to be allocated a particular listing, raises no issues of regulatory concern. Finally, the Commission notes that no comments were received on the publication of the proposal or at the time of the approval and subsequent extensions of the pilot program. Accordingly, the Commission believes that good cause exists, consistent with Section 6(b)(5) of the Act,[23] to approve Amendment No. 1 to the NYSE's proposed rule change on an accelerated basis.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning Amendment No. 1. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of all such filings will also be available for inspection and copying at the principal office of the NYSE. All submissions should refer to File No. SR–NYSE–97–30 and should be submitted by February 18, 1998.

V. Conclusion

The Commission believes that the Exchange's amended pilot program, which allow greater listing company input, has been crafted to ensure that allocation decisions continue to be based primarily on specialist performance and objective criteria. In addition, the Commission believes that the procedures adopted by the NYSE in the Policy will help to identify, minimize and penalize potential conflicts arising out of the relationships between specialist units and listing companies and ensure the continued integrity of the allocation process. Based on this, we believe the permanent approval of Option 2, along with the amendments to the Policy, are reasonable and consistent with the requirements of the Act applicable to a national securities exchange, and in particular, with the requirements of Section 6 of the Act[24] and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[25] that the proposed rule change (SR–NYSE–97–30), including Amendment No. 1, is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[26]

Margaret H. McFarland,

Deputy Secretary.

---

[18] See Amendment No. 1, *supra* note 4.

[19] Regulatory action which the NYSE could consider would include reallocation of the stock.

[20] As noted above, under the amended Policy, if a listing company meets with any of its specialist units on the last Exchange business day of the week, it must make its decision on that day.

[21] Telephone conversation between Donald Siemer, Director, Rule Development, NYSE, and Deborah Flynn, Attorney, Division, Commission, on November 3, 1997.

[22] The Exchange stated in its filing that in-person interviews have shown to be more effective. Accordingly, telephone interviews generally are not permitted unless the NYSE approves of it for compelling circumstances. The Exchange has stated that compelling circumstances would include bad weather, which may severely hamper a listing company's ability to attend a scheduled interview. DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Deadline for Submission of Application for Airport Grant Funds Under the Airport Improvement Program (AIP) for Fiscal Year 1998

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces May 1, 1998, as the deadline for having on file with the FAA an acceptable application for airport grant funds under the AIP for fiscal year 1998.

FOR FURTHER INFORMATION CONTACT: Mr. Stanley Lou, Manager, Programming Branch, Airports Financial Assistance Division, Office of Airport Planning and Programming, APP–520, on (202) 267–8809.

SUPPLEMENTARY INFORMATION: Section 47105(f) of Title 49, United States Code, provides that the sponsor of each airport to which entitlement funds are apportioned shall notify the Secretary, by such time and in a form as prescribed by the Secretary, of the sponsor's intent to apply for passenger and cargo entitlement funds. Notification of the sponsor's intent to apply during fiscal year 1998 for any of its entitlement funds, including those unused from prior years, shall be in the form of a project application (SF 424) submitted to the FAA field office no later than May 1, 1998.

This notice is promulgated to expedite and prioritize grants in the final quarter of the fiscal year. Absent an acceptable application by May 1, FAA intends to defer an airport's entitlement funds until the next fiscal year.

Issued in Washington, DC, January 22, 1998.

Stan Lou,

Manager, Programming Branch.

[FR Doc. 98–2015 Filed 1–27–98; 8:45 am]

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Passenger Facility Charge (PFC) Approvals and Disapprovals

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Monthly Notice of PFC Approvals and Disapprovals. In December 1997, there were seven applications approved. This notice also includes information on two

VOL 63 ISS 18 JA 28 1998 UMI

applications, approved in November 1997, inadvertently left off the November 1997 notice. Additionally, six approved amendments to previously approved applications are listed.

SUMMARY: The FAA publishes a monthly notice, as appropriate, of PFC approvals and disapprovals under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101–508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158). This notice is published pursuant to paragraph d of § 158.29.

PFC Applications Approved

Public Agency: City of Lawton/Lawton Municipal Airport Authority, Lawton, Oklahoma.
Application Number: 97–02–C–00–LAW.
Application Type: Impose and use a PFC.
PFC Level: $3.00.
Total PFC Revenue Approved in This Decision: $393,200.
Earliest Charge Effective Date: January 1, 1998.
Estimated Charge Expiration Date: March 1, 2000.
Class of Air Carriers Not Required To Collect PFC's: None.
Brief Description of Projects Approved for Collection and Use:
Relocate guidance signs.
Correct ponding on runway 17/35.
Commute-a-walk system.
Conduct ecological study.
Correct structural problems with aircraft rescue and firefighting (ARFF) station and snow plow bay.
Decision Date: November 7, 1997.
For Further Information Contact: Ben Cuttery, Southwest Region Airports Division, (817) 222–5614.

Public Agency: Central Wisconsin Joint Airport Board acting on behalf of the Counties of Marathon and Portage, Mosinee, Wisconsin.
Application Number: 97–03–C–00–CWA.
Application Type: Impose and use a PFC.
PFC Level: $3.00.
Total PFC Revenue Approved in This Decision: $3,529,500.
Earliest Charge Effective Date: November 1, 2012.
Estimated Charge Expiration Date: November 1, 2021.
Class of Air Carriers Not Required To Collect PFC's: On-demand air taxi operators operating aircraft with less than 20 seats.
Determination: Approved. Based on information contained in the public agency's application, the FAA has determined that the proposed class accounts for less than 1 percent of the total annual enplanements at Central Wisconsin Airport.
Brief Description of Project Approved for Collection and Use: Runway 17/35 and taxiway extension.
Decision Date: November 18, 1997.
For Further Information Contact: Nancy M. Nistler, Minneapolis Airports District Office, (612) 713–4361.

Public Agency: Bloomington-Normal Airport Authority, Bloomington, Illinois.
Application Number: 97–02–C–00–BMI.
Application Type: Impose and use a PFC.
PFC Level: $3.00.
Total PFC Revenue Approved in This Decision: $5,752,503.
Earliest Charge Effective Date: December 1, 2010.
Estimated Charge Expiration Date: November 1, 2021.
Class of Air Carriers Not Required To Collect PFC's: Air taxi/commercial operators filing FAA Form 1800–31.
Determination: Approved. Based on information contained in the public agency's application, the FAA has determined that the proposed class accounts for less than 1 percent of the total annual enplanements at Central Illinois Regional Airport.
Brief Description of Projects Approved for Collection and Use: PFC program development.
Runway 20 Federal Aviation Regulation Part 150 land acquisition.
Terminal building addition.
Terminal jetway facility.
Mobile air stairs.
Extend runway 2/20 600 feet.
Purchase airfield deicing truck.
Purchase two commutal walks.
Expand auto parking facility.
Baggage claim improvements.
Passenger lift device.
Brief Description of Project Approved for Collection Only: Construct new terminal development area.
Decision Date: December 5, 1997.
For Further Information Contact: Denis Rewerts, Chicago Airports District Office, (847) 294–7195.

Public Agency: Luzerne and Lackawanna Counties Bi-County Board of Commissioners, Avoca, Pennsylvania (Wilkes-Barre/Scranton Airport).
Application Number: 97–02–U–00–AVP.
Application Type: Use PFC revenue.
PFC Level: $3.00.
Total PFC Revenue to be Used in This Decision: $3,312,694.
Charge Effective Date: December 1, 1993/December 1, 1997.
Estimated Charge Expiration Date: March 1, 2000.
Class of Air Carriers Not Required to Collect PFC's: No change from previous decision.
Brief Description of Projects Approved for Use:
Design passenger terminal.
Design passenger terminal apron.
Design ARFF building.
Construct parallel taxiway—runway 10/28.
Construct ARFF building.
Construct phase I—air cargo apron.
Decision Date: December 10, 1997.
For Further Information Contact: John Carter, Harrisburg Airports District Office, (717) 782–4548.

Public Agency: Greater Orlando Aviation Authority, Orlando, Florida.
Application Number: 98–05–C–00–MCO.
Application Type: Impose and use a PFC.
PFC Level: $3.00.
Total PFC Revenue Approved in This Decision: $231,750,000.
Earliest Charge Effective Date: June 1, 1998.
Estimated Charge Expiration Date: April 1, 2005.
Class of Air Carriers Not Required to Collect PFC's: None
Brief Description of Projects Approved for Collection and Use at Orlando International Airport (MCO):
Replace four additional high mast light poles.
North crossfield taxiway construction.
Upgrade ARFF vehicle Crash-84 and replace ARFF vehicle Crash-82.
Loop road taper improvement.
Airside 2—final design and construction.
Brief Description of Projects Approved for Collection at MCO and Use at Orlando Executive Airport:
West quadrant improvements (phase III C).
Construct Taxiway C–2 and fillet joiner.
Rehabilitate north west quadrant ramp.
Parallel taxiway west of runway 13/31.
Replace direct buried airfield lights.
Rehabilitate runway 13/31 and pave taxiway shoulders.
Decision Date: December 11, 1997.
For Further Information Contact: Vernon Rupinta, Orlando Airports District Office, (407) 812–6331, extension 24.

Public Agency: Houghton County Memorial Airport Committee, Hancock, Michigan.
Application Number: 97–05–C–00–CMX.
Application Type: Impose and use a PFC.

PFC Level: $3.00.
Total PFC Revenue Approved in This Decision: $71,634.
Earliest Charge Effective Date: January 1, 1998.
Estimated Charge Expiration Date: July 1, 1999.
Estimated Charge Expiration Date: July 1, 1999.
Class of Air Carriers Not Required to Collect PFC's: Air taxi/commercial operators filing FAA Form 1800–31.
Determination: Approved. Based on information contained in the public agency's application, the FAA has determined that the proposed class accounts for less than 1 percent of the total annual enplanements at Houghton County Memorial Airport.
Brief Description of Projects Approved for Collection and Use:
Construct security fence (phase I).
Rehabilitate high intensity runway lighting—runway 13/31.
General aviation apron expansion—200 feet by 600-fee.
Sanitary sewer upgrade—phase I lift station.
Terminal building heating, ventilating, and air conditioning system rehabilitation.
Snow removal equipment (front end loader).
Rehabilitate runway 13/31/ engineering only.
Brief Description of Project Approved in Part for Collection and Use:
Reimbursement of charges for PFC application preparation.
Determination: Partially approved. The public agency requested reimbursement for costs associated with both the 95–03–U–00–CMX and 96–04–C–00–CMX applications. However, the public agency was previously reimbursed for consultant services for the 95–03–U–00–CMX application under the 96–04–C–00–CMX approval. Cost overruns for the 95–03–U–00–CMX have been determined to not be eligible. Therefore, the approval for this project was limited to costs associated the 96–04–C–00–CMX application.
Decision Date: December 16, 1997.
For Further Information Contact: Jon Gilbert, Detroit Airports District Office, (313) 487–7281.

Public Agency: City of Manchester, New Hampshire.
Application Number: 97–05–C–00–MHT.
Application Type: Impose and use a PFC.
PFC Level: $3.00.
Total PFC Revenue Approved in This Decision: $2,331,162.
Earliest Charge Effective Date: February 1, 1998.
Estimated Charge Expiration Date: October 1, 1998.
Class of Air Carriers Not Required to Collect PFC's: On-demand air taxi/commercial operators that (1) do not enplane or deplane passengers at the airport's main passenger terminal building and (2) enplane less than 200 passengers per year at the airport.
Determination: Approved. Based on information submitted by the public agency, the FAA has determined that the proposed class accounts for less than 1 percent of the total annual enplanements at Manchester Airport.
Brief Description of Projects Approved for Collection and Use:
Acquire snow removal equipment.
Construct two remote aircraft parking aprons.
Brief Description of Project Withdrawn: Acquire snow removal equipment storage building.
Determination: This project was withdrawn by the public agency by letter dated December 3, 1997. Therefore, the FAA did not rule on this project in this decision.
Decision Date: December 17, 1997.
For Further Information Contact: Priscilla Scott, New England Region Airports Division, (617) 238–7614.

Public Agency: Dallas/Fort Worth International Airport Board, Dallas/Fort Worth, Texas.
Application Number: 97–03–C–00–DFW.
Application Type: Impose and use a PFC.
PFC Level: $3.00.
Total Approved Net PFC Revenue: $249,093,427.
Earliest Charge Effective Date: October 1, 1998.
Estimated Charge Expiration Date: September 1, 2001.
Class of Air Carriers Not Required to Collect PFC's: Air taxi/commercial operators operating under a certificate authorizing transport of passengers for hire under Part 135 that file FAA Form 1800–31.
Determination: Approved. Based on information contained in the public agency's application, the FAA has determined that the proposed class accounts for less than 1 percent of the total annual enplanements at Dallas/Fort Worth International Airport.
Brief Description of Projects Approved for Collection and Use:
High speed exits E3 and M3 and cross taxiways EL and WL.
Runway 17C ARFF road realignment.
Taxilane 23 (west support).
ARFF vehicles.
Drainage rehabilitation—diagonal runways.
Replace airfield concrete slabs taxiways 18, 19, and G.
Rehabilitate Carbon Road.
West Airfield Drive improvements.
Industrial waste system study.
East Airfield Drive extension.
West air freight (west 18th Street) improvements.
Terminal 4E apron rehabilitation.
Drainage/rehabilitation of runway 17R/35L.
Conduct final environmental impact statement revalidation on runway 16/34.
Conduct airport pavement conditions study.
Brief Description of Projects Approved in Part for Collection and Use: Terminal 2W–A, gate expansion, renovation, and associated development.
Determination: Approved in part. Project elements such as ramp services areas, flight services areas, flight operations areas, and airline employee office space have been identified as ineligible through an FAA analysis and have been excluded from the amount approved for collection and use. In addition, costs associated with other items such as mechanical rooms, electrical rooms, wire closets, and facilities maintenance rooms have been prorated based on the eligible area of the terminal.
General aviation and 3W hardstand relocation.
Relocation: Approved in part. The portion of the project for the in-kind replacement of the general aviation terminal is limited in eligibility to the estimated cost to demolish and remove the existing building, minus any salvage value in accordance with paragraph 595(a) of FAA Order 5100.38A, AIP Handbook (October 24, 1989).
Brief Description of Project Approved for Collection Only: Runway 16/34, west development.
Brief Description of Projects Disapproved: Fiber optics communication system.
Determination: Disapproved. This project was determined to exceed the requirements necessary to serve the security system mandated by Part 107.14. Therefore, this project is ineligible in accordance with paragraph 563 of FAA Order 5100.38A, AIP Handbook (October 24, 1989).
Terminal 2E/3E graphics.
Determination: Disapproved. This project was determined to benefit terminals which are leased on a long-term, exclusive use basis. Therefore, this project is ineligible in accordance with Part 158, Appendix A(5).
Decision Date: December 18, 1997.

VOL 63 ISS 18 JA 28 1998 UMI

For Further Information Contact: Ben Guttery, Southwest Region Airports Division, (817) 222–5614.

Public Agency: City of Manchester, New Hampshire.

Application Number: 98–06–U–00–MHT.

Application Type: Use PFC revenue.

PFC Level: $3.00.

Total PFC Revenue To Be Used in This Decision: $1,626,000.

Charge Effective Date: January 1, 1993.

Estimated Charge Expiration Date: October 1, 1998.

Class of Air Carriers Not Required to Collect PFC's: No change from previous decision.

Brief Description of Project Approved for Use: Upgrade runway 6/24.

Decision Date: December 30, 1997.

For Further Information Contact: Priscilla Scott, New England Region Airports Division, (617) 238–7614.

DEPARTMENT OF THE TREASURY

Senior Executive Service; Departmental Performance Review Board

AGENCY: Treasury Department.

ACTION: Notice of members of the Departmental Performance Review Board (PRB).

SUMMARY: Pursuant to 5 U.S.C. 4314(c)(4), this notice announces the appointment of members of the Departmental PRB. The purpose of this PRB is to review and make recommendations concerning proposed performance appraisals, ratings, bonuses and other appropriate personnel actions for incumbents of SES positions for which the Secretary or Deputy Secretary is the appointing authority. These positions include SES bureau heads, deputy bureau heads and certain other positions. The Board will perform PRB functions for other key bureau positions if requested.

COMPOSITION OF DEPARTMENTAL PRB: The Board shall consist of at least three members. In the case of an appraisal of a career appointee, more than half the members shall consist of career appointees. The names and titles of the PRB members are as follows:

Nancy Killefer, Assistant Secretary for Management and Chief Financial Officer—Chairperson

Kay Frances Dolan, Deputy Assistant Secretary (Human Resources)

John P. Simpson, Deputy Assistant Secretary (Regulatory, Tariff & Trade Enforcement)

Alex Rodriguez, Deputy Assistant Secretary (Administration)

William H. Gillers, Project Coordinator, Bureau of Engraving and Printing

James E. Johnson, Assistant Secretary (Enforcement)

David A. Lebryk, Assistant Fiscal Assistant Secretary

Margrethe Lundsager, Deputy Assistant Secretary (Trade & Investment Policy)

Mary E. Chaves, Director, Office of International Debt Policy

Jane L. Sullivan, Director, Office of Information Resources Management

Joan Affleck-Smith, Director, Office of Financial Institutions Policy

John W. Magaw, Director, Bureau of Alcohol, Tobacco and Firearms

Samuel H. Banks, Deputy Commissioner, U.S. Customs Service

Vincette L. Goerl, Assistant Commissioner (Finance)/CFO, U.S. Customs Service

Douglas M. Browning, Assistant Commissioner (International Affairs), U.S. Customs Service

Lewis C. Merletti, Director, U.S. Secret Service

W. Ralph Basham, Assistant Director, Administration, U.S. Secret Service

John P. Mitchell, Deputy Director, U.S. Mint

Richard B. Calahan, Deputy Inspector General

Richard L. Gregg, Acting Commissioner, Financial Management Service

Thomas A. Ferguson, Acting Director, Bureau of Engraving and Printing

Michael P. Dolan, Deputy Commissioner, Internal Revenue Service

David A. Mader, Chief Officer, Management and Administration, Internal Revenue Service

Frederick V. Zeck, Acting Commissioner, Bureau of the Public Debt

Kenneth R. Schmalzbach, Assistant General Counsel (General Law & Ethics)

Roberta K. McInerney, Assistant General Counsel (Banking & Finance)

DATES: Membership is effective January 28, 1998.

FOR FURTHER INFORMATION CONTACT: Ronald A. Glaser, Department of the Treasury, Acting Director, Office of Personnel Policy, Annex Building, Room 4150, Pennsylvania Avenue at Madison Place, N.W., Washington, DC 20220, Telephone: (202) 622–1890.

This notice does not meet the Department's criteria for significant regulations.

Ronald A. Glaser,

Acting Director, Office of Personnel Policy.

[FR Doc. 98–2052 Filed 1–27–98; 8:45 am]

BILLING CODE 4810–25–M

DEPARTMENT OF THE TREASURY

Customs Service

TECRO/AIT Carnet Issuing and Guaranteeing Association

AGENCY: Customs Service, Department of the Treasury.

ACTION: General Notice.

SUMMARY: This notice informs the public that Customs has selected the United States Council for International Business as the organization which will issue and guarantee TECRO/AIT carnets. These carnets are being issued pursuant to the TECRO/AIT Carnet Agreement which has been entered into between the Taipei Economic and Cultural Representative in the United States (TECRO) and the American Institute in Taiwan (AIT) for the temporary admission of goods, commercial samples and professional equipment.

FOR FURTHER INFORMATION CONTACT: William Scopa, Office of Field Operations 202–927–3112.

SUPPLEMENTARY INFORMATION:

Background

This notice advises the public that the United States Council for International Business has been selected as the issuing and guaranteeing organization for a new carnet, known as the "TECRO/AIT Carnet". This carnet is being offered as a result of the signing of a bilateral carnet agreement between the Taipei Economic and Cultural Representative in the United States (TECRO) and the American Institute in Taiwan (AIT) for the temporary admission of goods, commercial samples and professional equipment. In a final rule also published in this issue of the **Federal Register**, Customs is amending its regulations which apply to carnets to reflect this new agreement.

A carnet is an international customs document, backed by an internationally valid guarantee, which may be used for the temporary admission of merchandise. The carnet is used in place of the usual national customs documentation and guarantees the payment of duties (including taxes) which may become due if the requirements of the carnet are not satisfied.

Taiwan is currently ineligible to accede to the ATA Carnet Convention, under which carnets facilitate trade among more than fifty contracting parties. Thus, Taiwan has sought access to the carnet facility through the recently concluded TECRO/AIT Carnet Agreement. This agreement was negotiated pursuant to the authority contained in 22 U.S.C. 3305.

On November 4, 1996, a Notice was published in the **Federal Register** (61 FR 56740) in which the Customs Service informed the public of the TECRO/AIT carnet and solicited applications for an organization to issue and guarantee the new carnet.

The issuing association must be approved by the Commissioner of Customs. The guaranteeing association is jointly and severally liable with the carnet holder for the payment of the sums. The guaranteeing association also must be approved by the Commissioner of Customs.

Pursuant to § 114.11, Customs Regulations (19 CFR 114.11), an association, in order to be approved by Customs, must provide in writing that it will undertake to perform the functions and fulfill the obligations specified in the Agreement to which the United States accedes.

Based upon the information received from the United States Council for International Business, the Commissioner of Customs has determined that the United States Council for International Business satisfies the conditions to be designated an issuing and guaranteeing organization for the TECRO/AIT Carnet.

Dated: July 15, 1997.

Editorial note: This document was received by the Office of the Federal Register on January 22, 1998.

George J. Weise,

Commissioner of Customs.

BILLING CODE 4820–02–P

DEPARTMENT OF THE TREASURY

Fiscal Service

Application and Renewal Fees Imposed on Surety Companies and Reinsuring Companies; Increase in Fees Imposed

AGENCY: Financial Management Service, Fiscal Service, Department of the Treasury.

SUMMARY: Effective December 31, 1997, The Department of the Treasury, Financial Management Service, is increasing the fees it imposes on and collects from surety companies and reinsuring companies.

FOR FURTHER INFORMATION CONTACT: Surety Bond Branch, (202) 874–6765.

SUPPLEMENTARY INFORMATION: The fees imposed and collected, as referred to in 31 CFR 223.22, cover the costs incurred by the Government for services performed relative to qualifying corporate sureties to write Federal business. These fees are determined in accordance with the Office of Management and Budget Circular A–25, as amended. The increase in fees is the result of a thorough analysis of costs associated with the Surety Bond Branch.

The new fee rate schedule is as follows:

(1) Examination of a company's application for a Certificate of Authority as an acceptable surety or as an acceptable reinsuring company on Federal bonds—$3,900.

(2) Determination of a company's continued qualification for annual renewal of its Certificate of Authority—$2,300.

(3) Examination of a company's application for recognition as an Admitted Reinsurer (except on excess risks running to the United States)—$1,385.

(4) Determination of a company's continued qualification for annual renewal of its authority as an Admitted Reinsurer—$975.

Questions concerning this notice should be directed to the Surety Bond Branch, Funds Management Division, Financial Management Service, Department of the Treasury, Hyattsville, MD 20782, Telephone (202) 874–6850.

Dated: January 16, 1998.

Charles F. Schwan III,

Acting, Assistant Commissioner, Financial Information, Financial Management Service.

[Delegation Order No. 67 (Rev. 24)]

Delegation of Authority

AGENCY: Internal Revenue Service, Treasury.

ACTION: Delegation of authority.

SUMMARY: The specific authority to sign the name of, or on behalf of, Charles O. Rossotti, Commissioner of Internal Revenue. The text of the delegation order appears below.

EFFECTIVE DATE: November 13, 1997.

FOR FURTHER INFORMATION CONTACT: Ronald Ridgley, Chief, Office of Organizational Research, M:SP:A, Room 401, 1255 22nd Street, NW, Washington, D.C. 20037, (202) 874–4479 (not a toll-free call).

Delegation Order No. 67 (Rev. 24)

Effective: November 13, 1997.

Signing the Commissioner's Name or on the Commissioner's Behalf

Authority: To sign the name of, or on behalf of Charles O. Rossotti, Commissioner of Internal Revenue.

Delegated to: Persons with existing authority to sign the name or, or on behalf of, Michael P. Dolan, Acting Commissioner of Internal Revenue.

Redelegation: This authority may not be redelegated.

Source of Authority: Treasury Order 150–10.

This order is effective 11:00 a.m., November 13, 1997, and supersedes Delegation Order 67 (Rev. 23), effective May 26, 1997.

Administration of the Forest Development Transportation System

AGENCY: Forest Service, USDA.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Forest Service proposes to revise the regulations concerning the management of the National Forest System transportation system to address changes in how the road system is developed, used, maintained, and funded. The existing road system on National Forest System lands was largely funded and constructed to develop areas for timber harvesting and the development of other resources. In the last two decades, interest in the appropriate uses of the resources of the national forests, as well as the costs associated with resource development, including road-building, has generated much public debate. At the same time, resource uses on the national forests have shifted substantially toward recreation. The agency believes this is an appropriate time to consider changes in public opinion, public demand, and public use of national forest resources in the context of the accumulated body of scientific information about the benefits and environmental impacts of roads, and to consider adjustments in the management of the forest road system to respond to these changes and, thus, better serve present and future management objectives in a more efficient manner. Public comments on the scope and nature of a proposed revision of the Forest Services road management policy are invited. The agency will consider all comments in developing the proposed rule.

DATES: Comments must be received in writing by March 30, 1998.

ADDRESSES: Send written comments to: Gerald (Skip) Coghlan, Acting Director, Engineering Staff, Forest Service, USDA, P.O. Box 96090, Washington, D.C. 20090–6090, and also at roads/wo@fs.fed.us on the Internet.

All comments, including names and addresses when provided, are available for public inspection and copying. Persons wishing to inspect the comments are encouraged to call ahead (202–205–1400) to facilitate entrance into the building.

FOR FURTHER INFORMATION CONTACT: Gerald (Skip) Coghlan, Acting Director, Engineering Staff, 202–205–1400.

SUPPLEMENTARY INFORMATION:

Background

The road system on National Forest System lands is extensive and diverse. It includes an estimated 373,000 miles of inventoried forest system roads. These roads are essential for the active management of the resources of the National Forests. They carry an estimated 9,000 Forest Service administrative vehicles daily throughout the forests to duties as varied as wildlife habitat improvement projects, maintenance of recreation facilities, fire suppression, law enforcement, and search and rescue activities. National Forest System roads also carry an estimated 15,000 vehicles daily that are associated with timber harvesting and the development of other resources.

Roads are also essential for public use and enjoyment of the National Forests and Grasslands. The agency estimates that 1.7 million vehicles involved in recreation travel forest roads every day, an increase of over 10 times since 1950.

In addition to the 373,000 miles of inventoried system roads, there are 60,000 miles of roads which exist on National Forest System lands, created by repeated public use, that are not managed or maintained by the agency or considered part of the forest road system.

Public use and demands on national forest resources have shifted considerably during the past 10 years. There has been a decrease in timber harvesting and other commodity uses and steadily-increasing growth in the amount and type of recreation uses. The shift in public use and associated changes in user expectations and access needs requires new approaches to deciding the appropriate size and configuration of the road system. In addition, current funding mechanisms and levels are not adequate to maintain roads to the standards originally planned, to assure minimum ecological impacts, as well as to ensure efficient and safe use. Thus, the agency needs to explore new sources of dependable funding as well as ways to better manage roads with limited resources.

The accumulation of new scientific information is increasing the understanding of the ecological and social impacts of existing roads, new construction of roads in roaded and roadless areas, and the impacts of the management activities associated with maintaining and reconstructing roads. New developments in road-building technology have fewer negative ecological impacts; however, ecological impacts from existing roads are more extensive than previously thought. For example, under some conditions, existing roads may cause increased frequency of flooding and landslides, increased stream sedimentation, and associated reductions in fish habitat productivity. There may also be concerns associated with the fragmentation and degradation of habitat for some wildlife species caused by roading, as well as reductions in travel corridors of species with large home ranges. Research also indicates that under some circumstances, roading may begin or accelerate the invasion of exotic plant species that ultimately displace native species.

In addition to the impacts of road-building and roads themselves, there are impacts associated with the increased levels of human activities in previously-inaccessible areas provided by new roads. For example, increases in visitor-use have associated resource impacts, including ground and habitat disturbance, increased pressure on wildlife species from hunters and fishers, and increased expectations for amenities. Also, increases in human access may be associated with increases in the frequency of person-caused fires. A more detailed listing of facts related to the nature and scope of the National Forest Road System, public demand, funding, and environmental impacts of roads are published as Appendix A at the end of this notice.

Rulemaking Objectives

The shifts in resource demands and public use coupled with the need to ensure that decisions associated with the location, design, construction, reconstruction, upgrading, decommissioning, and maintenance of roads are informed by current scientific information lead the Forest Service to conclude that it must thoroughly review its road management policy and develop a comprehensive science-based policy for the future. This policy should allow the Forest Service to balance scientific information, public needs and funding levels when determining the size, purpose, and extent of the future forest road transportation system and any specific road building activities. The following are among the expected outcomes and key features of such a long-range policy:

1. Roads will be removed where they are no longer needed, and ecological values will be rehabilitated and restored in formerly-roaded areas. These outcomes will be accomplished by aggressively decommissioning unneeded roads to reduce adverse environmental impacts.

2. Roads most heavily used by the public will be safe and will promote efficient travel. These outcomes will be accomplished by aggressively updating roads (reconstruction, design and maintenance) and reducing environmental impacts in these areas.

3. New roads that are determined necessary for National Forest System management will be designed more carefully to minimize ecological damage, and limited funds will be spent appropriately. These outcomes will be achieved by carefully analyzing factors surrounding the decision to build new roads in roaded areas, as well as the decision to build new roads in roadless areas, to assure that managers make more informed decisions and that only necessary construction is taking place.

The agency invites comments and suggestions on procedures for improving management of the national forest road system.

Agency Actions

Several research efforts are underway to examine the National Forest road system and its uses; to synthesize scientific information on Forest Service roads; and to analyze attitudes toward roads as expressed in the news media. Drafts of these reports are available from Director, Pacific Northwest Research Station, P.O. Box 3890, Portland, OR 97208–3890, 503–808–2100 and also at pnw/r6pnw@fs.fed.us on the Internet.

An essential element of this comprehensive overhaul of forest road policy is to develop improved analytical tools for land managers and resource specialists. To that end, agency researchers and specialists are developing an improved analysis process that assures that the ecological, social, and economic impacts of proposed construction and reconstruction of National Forest System roads are objectively evaluated, and that there is a full consideration of public demand on National Forest System roads in the context of current scientific information. This process will undergo an independent technical and scientific peer review before adoption.

Until the effects of roads can be more rigorously assessed, the Forest Service is also proposing to issue an interim rule to temporarily suspend road construction and reconstruction in roadless areas for not more than 18 months. The proposed interim rule appears in the same separate part of today's **Federal Register** with a request for public comment and notice of the initiation of scoping under the National Environmental Policy Act of 1969.

Suggestions on the scope and nature of a proposed revision of the Forest Service's road management policy, as well as comments on the agency's preliminary suggestions are invited. The agency will consider all comments in developing the proposed rule.

Dated: January 22, 1998.

Mike Dombeck,

Chief, Forest Service.

Appendix A—Facts About the National Forest Road System

1. The National Forest Road System is extensive and diverse; it includes an estimated 373,000 miles of forest roads.

a. One-fourth (23%) are called arterial or collector roads and they serve all users, including passenger cars.

b. Over one-half (57%) are roads that are only passable by high-clearance vehicles such as four-wheel drives.

c. One-fifth (20%) are closed by gates.

d. The Forest Service has identified an additional estimated 60,000 miles of "uninventoried roads" that were created by repeated use but never build or maintained to any standards. The actual number of miles of "uninventoried roads" is likely far greater than this estimate. There are also additional public roads on National Forest System lands, such as state and county roads that are typically maintained by others.

e. There are more than 7,000 bridges on forest roads, three-fourths of these are on the arterial and collector roads.

f. In 1996, new construction of National Forest System roads was 434 miles, or 0.1% of the total National Forest road system.

2. Roads are essential for public use and enjoyment of National Forests and Grasslands.

a. An estimated 15,000 logging trucks and vehicles associated with timber harvesting use National Forest roads each day, about the same number as in 1950.

b. An estimated 1.7 million vehicles associated with recreation activities travel forest roads each day, over 10 times more than in 1950. Recreation usage is projected to continue to increase.

c. An estimated 9,000 Forest Service administrative vehicles travel forest roads each day, conducting duties essential to the stewardship of forest resources, including special use administration, wildlife habitat improvement projects, maintenance and operation of recreation facilities, law enforcement, and fire suppression.

3. Public use and demands on National Forest System lands have shifted considerably during the past 10 years. The size and composition of the National Forest System road system has not been adjusted accordingly.

a. Recreation usage has increased from less than 250 million Recreation Visitor Days to almost 350 million and is projected to continue to increase.

b. Timber harvest has dropped to below 4 billion board feet from a high of about 12 billion board feet annually.

c. The need for, and understanding of, ecological benefits that these forest and rangelands provide has increased, such as clean water, wildlife habitat, and habitat for endangered species.

4. While a significant portion of the 191,000,000 acres of the National Forest System is roaded, a significant portion remains roadless.

a. An estimated 34,000,000 acres are currently designated as wilderness; an estimated 6,000,000 acres are designated as proposed wilderness in forest plans.

b. An estimated 33,000,000 acres are currently unroaded in blocks of 5,000 acres or more for which the existing forest plans have proposed management that could include building new roads.

c. Of the 33,000,000 acres that are unroaded and available for management activities that could include roading, an estimated 8,000,000 acres are classified as "suitable for timber production.

5. Current funding levels are inadequate to maintain the roads to planned standards that permit efficient and safe use and keep ecological impacts at acceptably low levels.

a. About 40% of National Forest System roads are fully maintained to the planned safety and environmental standards for which they were designed.

b. The backlog of reconstruction needs on National Forest System roads is considerable. For example, the backlog on arterial and collector roads alone is estimated to be over $10 million, due to their age (three-fourths are over 50 years old) and their lack of adequate regular maintenance.

c. From 1991 to 1996, funding for decommissioning roads has only financed a reduction of about 0.5% of National Forest System roads per year.

6. New scientific information continues to increase our understanding of the ecological and social impacts from existing roads and associated management activities. In some instances, ecological impacts from existing roads are more extensive than previously thought. Examples of these impacts include: increased frequency of flooding and landslides: increased stream sedimentation and associated reduction in fish habitat productivity; increased habitat fragmentation and degradation which reduce the travel corridors needed by species requiring large home ranges; increased frequency of person-caused fires as a result of access; and invasion of exotic species that displace native species. In contrast, recently constructed roads that are better designed and better located than earlier roads, and result in fewer and less severe ecological impacts.

UMI

ACTION: Notice of proposed interim rule; request for comment.

SUMMARY: In an Advanced Notice of Proposed Rulemaking (ANPR) published elsewhere in today's **Federal Register** the Forest Service has announced its intentions to revise its management of the National Forest Road System. In concert with that ANPR, the Forest Service proposes to suspend temporarily road construction and reconstruction in most roadless areas of the National Forest System. The intended effect is to safeguard the significant ecological values of roadless areas from potentially adverse effects associated with road construction, while new and improved analytical tools are developed to evaluate the impact of locating and constructing roads. The temporary suspension of road construction and reconstruction would expire upon the application of the new and improved analysis tools or 18 months, whichever is sooner. This rulemaking is a component of a larger effort to address a number of National Forest System transportation issues. Public comment is invited and will be considered in adoption of an interim rule.

DATES: Comments are due by February 27, 1998.

ADDRESSES: Send written comments to Director, Ecosystem Management Coordination Staff, MAIL STOP 1104, Forest Service, USDA, P.O. Box 96090, Washington, D.C. 20090–6090. Comments also may be sent via the Internet to roads/wo@fs.fed.us.

All comments, including names and addresses when provided, are placed in the record and are available for public inspection and copying at the Forest Service National Headquarters Offices, 14th and Independence Avenue SW, Washington, D.C. Persons wishing to inspect the comments are encouraged to call ahead (202–205–0895) to facilitate entrance into the building.

FOR FURTHER INFORMATION CONTACT: Gerald (Skip) Coghlan, Engineering Staff, 202–205–1400 or Rhey Solomon, Ecosystem Management Coordination Staff, 202–205–0939.

SUPPLEMENTARY INFORMATION: This proposed interim rule is being published in association with an Advance Notice of Proposed Rulemaking (ANPR) published elsewhere in this separate part in today's **Federal Register**. In the ANPR, the Forest Service is giving notice of its intention to revise the regulations concerning the management of the National Forest System transportation system to address changes in how the road system is developed, used, maintained, and funded. As part of the ANPR, the agency also indicates that the development of improved scientific and analytical tools for land managers and resource specialists is an essential element of the comprehensive overhaul of forest road policy.

As noted in the ANPR, the road system on the National Forest System is extensive and diverse. It includes an estimated 373,000 miles of forest system roads. Roads are essential for the active management of the resources of the National Forests and Grasslands. These roads also are essential for public use and enjoyment of the National Forest System.

In addition, the agency estimates that there are more than 60,000 miles of roads created by repeated public use of the National Forests and Grasslands. Although these roads occur on National Forest System lands, they are not planned, managed or maintained by the agency or considered part of the forest road system.

A growing body of scientific information demonstrates that road construction in sensitive areas, such as roadless areas, may cause the introduction of exotic plant species, disrupt wildlife habitat, and otherwise compromise the attributes that make roadless areas ecologically important and often unique. Roadless areas are often aquatic strongholds for fish of great recreational and commercial value. These areas also often provide critical habitat and migration routes for many wildlife species, and they are particularly important for those species requiring large home ranges, such as the grizzly bear and the wolf.

The effects of road construction may persist for decades. Many of the remaining areas with the National Forest System are in areas with steep slopes that surround headwater streams. Road construction increases the risk of erosion, landslides, and slope failure, which may compromise critically important water quality. Until new and improved analytical tools can be developed and implemented to evaluate the positive benefits and adverse impacts of roads, the adoption of an interim rule to temporarily suspend road construction or reconstruction within National Forest System roadless areas is viewed as critical to preserve land and resource management options.

Draft Proposed Interim Rule

The agency proposes to temporarily suspend road construction activities, including the construction of temporary roads on National Forest System roadless areas, through issuance of an interim rule to a new § 212.13 of Part 212 of Title 36 of the Code of Federal Regulations. Specifically, the interim rule would apply the temporary suspension to roadless areas of 5,000 acres or more inventoried in RARE II (Roadless Area Review and Evaluation) and other unroaded areas, regardless of size, identified in a forest plan; unroaded areas greater than 1,000 acres contiguous to Congressionally-designated Wilderness or contiguous to federally-administered components of the National Wild and Scenic Rivers System that are classified as "Wild"; and all unroaded areas greater than 1,000 acres contiguous to roadless areas of 5,000 acres or more on other federal lands. In addition, the suspension would apply to two other categories: (1) any National Forest System (NFS) area of low-density road development or (2) any other NFS area that retains its roadless characteristics which the Regional Forester subsequently determines have such special and unique ecological characteristics or social values that no road construction or reconstruction should proceed. The agency does not anticipate that Regional Foresters will create a new inventory of roadless areas that meet the criteria of these latter two categories. Rather, it is expected that Regional Foresters will apply these categories on a project-by-project basis. Examples of areas that might be considered under these latter categories are areas needed to protect the values of municipal watersheds, including public drinking water sources, or to provide habitat for listed or proposed endangered and threatened fish, wildlife, or plants. Another example might be the National Forest System roadless areas listed in Table 5.1 of the Southern Appalachian Area Assessment, Social/Cultural/Economic Technical Report, Report 4 of 5, July 1996.

The suspension would remain in effect until any suspended road construction could be evaluated using the new analytical tools that are being developed, but no longer than 18 months from the effective date of the interim rule.

The proposed interim rule would expressly exempt four categories of roadless areas from the temporary suspension of road construction and reconstruction:

1. Roadless areas within National Forests that have a signed Record of Decision revising their forest plans and have completed the administrative appeal process as of the effective date of the rule.

2. Roadless areas within National Forests that have a signed Record of Decision revising their forest plans on which the administrative appeal process is underway, but not completed as of the effective date of the rule.

3. Roadless areas in Washington, Oregon, and California within those portions of National Forests encompassed by the Northwest Forest Plan; and

4. Road construction or reconstruction in roadless areas needed for public safety or to ensure access to private lands pursuant to statute or outstanding and reserved rights.

The exemptions for final revised forest plans and for the Northwest Forest Plan recognize the currency of the scientific information, evaluations, public participation, and decisions made in these plans and the need to minimize disruption in programs of work. The proposed interim rule also recognizes the necessity to ensure public safety and access to private property. The exemption for revised plans currently under appeal also honors exiting decisionmaking and administrative appeal processes and seeks to avoid undue interruptions or interference with established planning processes. We specifically request comment on whether additional measures are needed to implement exemption (b)(2).

The proposed interim rule would not modify, suspend, or cause to be re-examined any existing permit, contract, or other instrument authorizing occupancy and use of the National Forest System, any land and resource management plan, any land allocation decision, or other management activity or use within roadless areas in which road construction or reconstruction are temporarily suspended. The intent is not to halt active management of roadless areas but to protect their values while improved analytical tools are developed to better assess the impacts of road construction on roadless area values.

Regulatory Impact

Under the proposed interim rule, some currently planned land management projects that are dependent on new road construction, such as timber sales and ecosystem restoration activities, may not be implemented in the timeframe currently planned. During the interim period, some projects may proceed in an altered form and some may be postponed until such time that the road assessment process is implemented. Those projects may eventually be altered as a result of new information provided by the forest road assessment process. It is difficult to estimate with precision the costs and benefits associated with deferring projects due to considerable variation in site-specific factors; the fact that projects are in various stages of development and readiness to execute; the fact that planning and analysis often take much longer to complete than originally anticipated; and the fact that some project work can be shifted to other sites outside roadless areas.

Nationwide, the agency estimates that of the total 3.8 billion board feet planned for FY 1998, the volume of timber actually offered for sale will be reduced by 100–275 million board feet. Although the actual amounts are very difficult to estimate, this reduction in timber volume offered could lead to corresponding reductions in employment and in payments to states. It is expected that the Intermountain and Northern Regions of the National Forest System will experience a disproportionately higher effect from the suspension than other geographic regions of the country, due to the higher dependence on roadless areas for timber production in these regions.

While the delay in these projects will have some adverse economic impact in the short term, these impacts are offset by the benefits to be gained from the temporary suspension of road construction and reconstruction in these areas. The benefits would include the prevention of an increased risk of erosion, landslides, and slope failure, all of which may compromise critically important water quality in the headwater streams that are found in many of the covered roadless areas. The temporary suspension would also help to prevent introduction of exotic plant species into these areas. The development of a new road analysis process would also allow currently proposed and future projects requiring road construction to reflect current scientific information and resource use trends. This will help managers and the public better understand the consequences of locating and building roads in roadless areas.

This proposed interim rule has been reviewed under USDA procedures and Executive Order 12866 on Regulatory Planning and Review. It has been determined that this is a significant rule because of the importance of road policy issues. While this proposed interim measure would create some costs associated with temporarily suspending actions on road construction or reconstruction, the suspension is limited to roadless areas and some low-density roaded areas and is temporary, not to exceed 18 months. This proposed interim rule will not have an annual effect of $100 million or more on the economy nor have a significant adverse effect on productivity, competition, jobs, the environment, public health or safety, nor State or local governments. Accordingly, this proposed interim rule has been reviewed by OMB under Executive Order 12866.

Moreover, this proposed interim rule has been considered in light of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), and it is hereby certified that this action will not have a significant economic impact on a substantial number of small entities as defined by that Act.

Unfunded Mandates Reform

Pursuant to Title II of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538), the Department has assessed the effects of this proposed interim rule on State, local, and tribal governments and the private sector. This proposed interim rule does not compel the expenditure of $100 million or more by any State, local, or tribal government or anyone in the private sector. Therefore, a statement under section 202 of the Act is not required.

Environmental Impact

Section 31.1b of Forest Service Handbook (FSH) 1909.15 (57 FR 43180; September 18, 1992) excludes from documentation in an environmental assessment or impact statement "rules, regulations, or policies to establish Service-wide administrative procedures, program processes, or instructions." The agency's assessment is that this proposed interim rule falls within this category of actions. Nevertheless, in furtherance of the purposes of the National Environmental Policy Act, the agency has elected to undertake environmental analysis and documentation prior to publication of the final interim rule. As part of the agency scoping under its NEPA procedures, public comment is invited.

No Takings Implications

This proposed interim rule has been analyzed in accordance with the principles and criteria contained in Executive Order 12630, and it has been determined that the proposed interim rule does not pose the risk of taking of Constitutionally-protected private property. There are no Constitutionally-protected private property rights to be affected, since the proposed interim rule applies only to federal lands and explicitly ensures access to private property pursuant to statute or to outstanding or reserved rights.

UMI

Civil Justice Reform Act

This proposed interim rule has been reviewed under Executive Order 12988, Civil Justice Reform. This proposed interim rule (1) preempts all State and local laws and regulations that are in conflict or which would impede its full implementation, (2) has no retroactive effect on existing permits, contracts, or other instruments authorizing the occupancy and use of the National Forest System, and (3) does not require administrative proceedings before parties may file suit in court challenging its provisions.

Controlling Paperwork Burdens on the Public

This proposed interim rule does not contain any recordkeeping or reporting requirements or other information collection requirements as defined in 5 CFR 1320 and, therefore, imposes no paperwork burden on the public. Accordingly, the review provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501, *et seq.*) and implementing regulations at 5 CFR part 1320 do not apply.

List of Subjects in 36 CFR Part 212

Highways and roads, National forests, Rights-of-way, and Transportation.

Therefore, the Forest Service proposes an interim rule amending 36 CFR part 212 as follows:

PART 212—ADMINISTRATION OF THE FOREST DEVELOPMENT TRANSPORTATION SYSTEM

1. The authority citation for part 212 continues to read as follows:

Authority: Sec. 1, 30 Stat. 35, as amended sec. 205, 72 Stat. 907; 16 U.S.C. 551, 23 U.S.C. 205, unless otherwise noted.

2. Add a new § 212.13 to read as follows:

§ 212.13 Temporary suspension of road construction in roadless areas.

(a) *Suspensions.* Except as provided in paragraphs (b) and (c) of this section, new road construction projects, including temporary roads, and road reconstruction projects are suspended within the following areas of the National Forest System:

(1) ALL RARE II inventoried roadless areas of 5,000 acres or more within the National Forest System and all other roadless areas, regardless of size, identified in a land and resource management plan;

(2) All National Forest System roadless areas greater than 1,000 acres that are contiguous to Congressionally-designated Wilderness Areas or that are contiguous to federally-administered components of the National Wild and Scenic River System (16 U.S.C. 1274) which are classified as Wild;

(3) All National Forest System roadless areas greater than 1,000 acres that are contiguous to roadless areas of 5,000 acres or more on other federal lands;

(4) Any National Forest System area, regardless of size, with low-density road development that essentially retains its roadless characteristics on which the Regional Forester subsequently determines that road construction or reconstruction should not proceed, because of the area's special and unique ecological characteristics or social values; and

(5) Any other National Forest System area, regardless of size, that essentially retains its roadless characteristics on which the Regional Forester subsequently determines that road construction or reconstruction should not proceed, because of the area's special and unique ecological characteristics or social values.

(b) *Exemptions.* Road construction and reconstruction projects within the following roadless areas are exempt from the suspension required by paragraph (a) of this section:

(1) Roadless areas within National Forests that have a signed Record of Decision revising their land and resource management plans prepared pursuant to the National Forest Management Act (16 U.S.C. 1604(f)(5)) on which the administrative appeals process under 36 CFR Part 217 has been completed as of the effective date of the final interim rule;

(2) Roadless areas within a National Forest that has a signed Record of Decision revising the land and resource management plan prepared pursuant to the National Forest Management Act (16 U.S.C. 1604(f)(5)) on which the administrative appeals process under 36 CFR Part 217 is underway as of the effective date of the final interim rule. (For these forests, issues related to the construction of roads in roadless areas will be addressed in the appeal decision, when appropriate.);

(3) Roadless areas within National Forest System lands in Washington, Oregon, and California, that are encompassed by the Northwest Forest Plan which is described in the "Record of Decision for Amendments to Forest Service and Bureau of Land Management Planning Documents Within the Range of the Northern Spotted Owl and Standards and Guidelines for Management of Habitat for Late Successional and Old-Growth Forest Related Species Within the Range of the Northern Spotted Owl, April 13, 1994;" and

(4) Road construction or reconstruction in roadless areas needed for public safety or to ensure access provided by statute or provided pursuant to reserved or outstanding private rights.

(c) *Scope and applicability.* (1) This section does not suspend or modify any existing permit, contract, or other instrument authorizing the occupancy and use of National Forest System land. Additionally, this section does not suspend or modify any existing National Forest System land allocation decision, nor is this section intended to suspend or otherwise affect other management activities or uses within roadless areas in which road construction or reconstruction projects are suspended pursuant to paragraph (a) of this section.

(2) The suspensions provided by paragraph (a) of this section remain in effect until any suspended road construction in roadless areas can be evaluated using new analytical tools, or 18 months, which ever is first.

(d) *Effective date.* The suspension of road construction and reconstruction projects in roadless areas as provided in paragraph (a) of this section is effective upon the date of publication of the final interim rule.

Dated: January 22, 1998.

Mike Dombeck,

Chief, Forest Service.

Fines and Costs for "Old Law" Inmates; Final Rule

VOL 63 ISS 18 JA 28 1998 UMI

DEPARTMENT OF JUSTICE

Bureau of Prisons

28 CFR Part 571

[BOP–1033–F]

RIN 1120–AA29

Fines and Costs for "Old Law" Inmates

AGENCY: Bureau of Prisons, Justice.

ACTION: Final rule.

SUMMARY: In this document, the Bureau of Prisons is amending its regulations on fines, or fines and costs, ordered by the court with respect to an inmate convicted of an offense committed before November 1, 1987. The amended regulations conform with 18 U.S.C. 3569, requiring a United States Magistrate Judge to determine whether an inmate is indigent, for the purpose of determining the inmate's ability to pay a committed fine, or fine and costs. This statutory authority previously had included the Warden as a determining official. In accordance with delegated authority by the Attorney General, final determination as to the retention by the inmate of property in excess of that which is by law exempt from being taken on civil process is to be made by the appropriate United States Attorney. Bureau regulations previously had designated the Regional Director as the determining official.

EFFECTIVE DATE: January 28, 1998.

FOR FURTHER INFORMATION CONTACT: Roy Nanovic, Office of General Counsel, Bureau of Prisons, phone (202) 514–6655.

SUPPLEMENTARY INFORMATION: The Bureau of Prisons is amending its regulations on fines and costs (28 CFR part 571, subpart F). A final rule on this subject was published in the **Federal Register** on October 21, 1983 (48 FR 48971).

These amendments conform Bureau regulations to reflect 18 U.S.C. 3569 which, as revised and still applicable to offenses committed before November 1, 1987, specifies a U.S. Magistrate Judge in the district where the inmate is imprisoned as the official responsible for determining whether an inmate is indigent for the purpose of determining the inmate's ability to pay a committed fine, or fine and costs. Previously, this statute had also authorized the Warden as a determining official. These amendments also conform to delegated authority (28 CFR 0.171(g)) from the Attorney General to United States Attorneys regarding findings on retention by the inmate of property in excess of that which is by law exempt from being taken on civil process for debt. A discussion of the specific changes follows.

In § 571.50, the introductory paragraph and paragraph (a) are revised to identify clearly the applicability of the regulations. There is no change in the intent of these paragraphs. Paragraph (b) is amended to remove references to the Warden and the Regional Director as determining officials, to include reference to the United States Attorneys, and to remove unnecessary explanatory information.

In § 571.51, paragraph (b) has been revised for editorial purposes. There is no change in the intent of this paragraph.

In § 571.52, paragraphs (a) and (b) have been revised for editorial purposes. There is no change in the intent of these paragraphs. Paragraph (c) has been amended to remove a reference to the Warden as a determining official.

Former § 571.53 has been removed. Removal of this provision is necessary because the Warden no longer has the authority to determine an inmate's ability to pay his or her fine or fine and costs. Former § 571.56 has also been removed, because the final determination as to the retention of property which is reasonably necessary for the inmate's support or that of his or her family has been delegated by the Attorney General to United States Attorneys.

The material in §§ 571.54 and 571.55 has been redesignated and revised as new §§ 571.53 and 571.54.

New § 571.53 restates material formerly in old § 571.54. Paragraph (a) is revised to specify that an inmate must apply to the U.S. Magistrate Judge in the district where the inmate is incarcerated to determine whether the inmate is indigent for the purpose of determining the inmate's ability to pay his or her fine, or fine and costs. As revised, paragraph (b) removes the condition of a determination of non-indigency by the Warden before an inmate may elect to apply to the U.S. Magistrate Judge. This paragraph still directs institution staff to offer to send all forms and information to the U.S. Magistrate Judge for the inmate. Paragraph (c) has been revised for editorial purposes. There is no change in the intent of this paragraph. Paragraph (d) has been revised to include reference to the United States Attorney as a determining official.

New § 571.54 restates material in old § 571.55. Paragraphs (a), (b) and (c) have been revised for editorial purposes. There is no change in the intent of these paragraphs. A new paragraph (d) is added parallel the provisions in new § 571.53(d) for forwarding a referral package to the appropriate United States Attorney subsequent to a finding of non-indigency.

Because these changes impose no new restrictions on inmates and either conform to statutory requirements, other delegated authority, or are administrative in nature, the Bureau finds good cause for exempting the provisions of the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, the opportunity for public comment, and delay in effective date. Members of the public may submit comments concerning this rule by writing to the previously cited address. These comments will be considered but will receive no response in the **Federal Register**.

The Bureau of Prisons has determined that this rule is not a significant regulatory action for the purpose of E.O. 12866, and accordingly this rule was not reviewed by the Office of Management and Budget. After review of the law and regulations, the Director, Bureau of Prisons has certified that this rule, for the purpose of the Regulatory Flexibility Act (Pub. L. 96–354), does not have a significant economic impact on a substantial number of small entities, within the definition of the Act. Because this rule pertains to the correctional management of offenders committed to the custody of the Attorney General or the Director of the Bureau of Prisons, its economic impact is limited to the Bureau's appropriated funds.

List of Subjects in 28 CFR Part 571

Prisoners.

Kathleen M. Hawk,

Director, Bureau of Prisons.

Accordingly, pursuant to the rulemaking authority vested in the Attorney General in 5 U.S.C. 552(a) and delegated to the Director, Bureau of Prisons in 28 CFR 0.96(p), part 571 in subchapter D of 28 CFR, chapter V is amended as set forth below.

SUBCHAPTER D—COMMUNITY PROGRAMS AND RELEASE

PART 571—RELEASE FROM CUSTODY

1. The authority citation for 28 CFR part 571 continues to read as follows:

Authority: 5 U.S.C. 301; 18 U.S.C. 3565, 3568–3569 (Repealed in part as to offenses committed on or after November 1, 1987), 3582, 3621, 3622, 3624, 4001, 4042, 4081, 4082 (Repealed in part as to offenses committed on or after November 1, 1987), 4161–4166, and 4201–4218 (Repealed as to offenses committed on or after November 1, 1987), 5006–5024 (Repealed October 12, 1984 as to offenses committed after that date), 5031–5042; 28 U.S.C. 509, 510; U.S. Const., Art. II, Sec. 2; 28 CFR 0.95–0.99, 1.1–1.10.

2. § 571.50 is revised to read as follows:

§ 571.50 Purpose and scope.

This subpart establishes procedures for processing a fine, or fine and costs ordered by the court with respect to an inmate convicted of an offense committed before November 1, 1987. When the court orders a prisoner's confinement until payment of a fine, or fine and costs under 18 U.S.C. 3565, the Bureau of Prisons shall confine that inmate until the fine, or fine and costs are paid, unless the inmate qualifies for release under 18 U.S.C. 3569.

(a) An inmate held on the sole basis of his/her inability to pay such fine, or fine and costs, and whose non-exempt property does not exceed $20.00 may request discharge from imprisonment on the basis of indigency (see 18 U.S.C. 3569).

(b) Under 18 U.S.C. 3569, the determination of indigency may be made by a U.S. Magistrate Judge. Where the U.S. Magistrate Judge makes a finding of non-indigency based on the inmate's application for a determination of his ability to pay the committed fine, or fine and costs, staff shall refer the application to the appropriate United States Attorney for the purpose of making a final decision on the inmate's discharge under 18 U.S.C. 3569. It is to be noted that 18 U.S.C. 3569 provides for confining an inmate for nonpayment of a committed fine, or fine and costs.

3. In § 571.51, the concluding text is removed and paragraph (b) is revised as follows:

§ 571.51 Definitions.

* * * * *

(b) *Costs*—Monetary costs of the legal proceeding which the court may levy. Imposition of costs is similar in legal effect to imposition of a fine. The court may also impose costs with a condition of imprisonment.

* * * * *

4. § 571.52 is revised to read as follows:

§ 571.52 Procedures—committed fines.

(a)(1) Promptly after the inmate's commitment, staff shall inform the inmate that there is a committed fine, or fine and costs on file, as part of the sentence. Staff shall then impound the inmate's trust fund account until the fine, or fine and costs is paid, except—

(i) The inmate may spend money from his/her trust fund account for the purchase of commissary items not exceeding the maximum monthly allowance authorized for such purchases.

(ii) Staff may authorize the inmate to make withdrawals from his/her trust fund account for emergency family, emergency personal needs or furlough purposes.

(2) This rule of impounding an inmate's trust fund account applies only when the inmate is confined in a federal institution. It does not apply to a federal inmate confined in a state institution or a contract community-based facility.

(b) If the inmate pays the committed fine, or fine and costs, or staff have verified payment, staff shall document payment in the appropriate file and release the inmate's trust fund account from impoundment.

(c) Staff shall interview the inmate with an unpaid committed fine at least 75 days prior to the inmate's release date. Staff shall explain to the inmate that to secure release without paying the committed fine, or fine and costs in full, the inmate must make an application, on the appropriate form, to the U.S. Magistrate Judge for determination as to whether the inmate can be declared indigent under 18 U.S.C. 3569.

§§ 571.53 and 571.56 [Removed]

5. §§ 571.53 and 571.56 are removed.

6. §§ 571.54, 571.55 are redesignated as new §§ 571.53 and 571.54 and revised as follows:

§ 571.53 Determination of indigency by U.S. Magistrate—inmates in federal institutions.

(a) An inmate with a committed fine, or fine and costs who is imprisoned in a federal institution may make application for a determination of indigency directly to the U.S. Magistrate Judge in the district where the inmate is imprisoned under 18 U.S.C. 3569.

(b) After completion of the application, staff shall offer to forward the completed forms and any other applicable information the inmate chooses to the U.S. Magistrate Judge.

(c) If the U.S. Magistrate Judge finds that the inmate is indigent, the U.S. Magistrate Judge will administer the oath to the inmate. The inmate shall be released no earlier than the regularly established release date.

(d) If the U.S. Magistrate Judge finds that the inmate is not indigent, Bureau staff shall forward a referral package to the appropriate United States Attorney for a final determination as to the inmate's ability to pay the committed fine, or fine and costs.

§ 571.54 Determination of indigency by U.S. Magistrate Judge—inmates in contract community-based facilities or state institutions.

(a) Inmates with a committed fine, or fine and costs may be transferred to contract community-based facilities, state institutions as boarders, or state institutions for service of federal sentences running concurrently with state sentences.

(b) Inmates with a committed fine, or fine and costs may be committed directly to contract community-based facilities or state institutions as boarders or may be designated to state institutions for service of federal sentences running concurrently with state sentences.

(c) An inmate with a committed fine, or fine and costs who is imprisoned in a contract community-based facility or state institution and desires to make application for a determination of ability to pay the committed fine, or fine and costs under 18 U.S.C. 3569 may make application directly to the U.S. Magistrate Judge.

(d) Upon receipt of a finding by the U.S. Magistrate Judge that the inmate is not indigent, Bureau staff shall forward a referral package to the appropriate United States Attorney for a final determination as to the inmate's ability to pay the committed fine, or fine and costs.

Protection of Stratospheric Ozone: Allocation of 1998 Essential Use Allowances; Interim Final Rule

VOL 63 ISS 18 JA 28 1998 UMI

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 82

[FRL–5953–6]

RIN 2060–AG48

Protection of Stratospheric Ozone: Allocation of 1998 Essential Use Allowances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Interim final rule.

SUMMARY: With this action, EPA allocates essential-use allowances for the 1998 control period. The United States nominated specific uses of ozone-depleting substances (ODS) as essential uses for 1998 under the Montreal Protocol on Substances that Deplete the Ozone Layer (Protocol). The Parties to the Protocol subsequently approved production and import of ODS for the uses nominated by the United States in the quantities specified. In today's action, EPA allocates essential use allowances based on the quantities approved by the Parties for the nominated uses. Essential use allowances permit a person to obtain controlled ozone-depleting substances as an exemption to the January 1, 1996 regulatory phaseout of production and import. Essential use allowances are allocated to a person for exempted production or importation of a specific quantity of a controlled substance solely for the designated essential purpose.

DATES: This action is effective January 28, 1998. EPA will consider all written comments received by February 27, 1998, to determine if any change to this action is necessary.

ADDRESSES: Comments on and materials supporting this interim final rule are collected in Air Docket No. A–92–13, U.S. Environmental Protection Agency, 401 M Street, SW., Room M–1500, Washington, DC 20460. The Docket is located in room M–1500, First Floor, Waterside Mall at the address above. The materials may be inspected from 8 am until 4 pm Monday through Friday. A reasonable fee may be charged by EPA for copying docket materials. Those wishing to notify EPA of their intent to submit adverse comments on this action should contact Tom Land, EPA, Stratospheric Protection Division, Office of Atmospheric Programs, Office of Air and Radiation (6205–J), 401 M Street, SW., Washington, DC 20460, (Docket # A–92–13), (202)–564–9185.

FOR FURTHER INFORMATION CONTACT: Tom Land, EPA, Stratospheric Protection Division, Office of Atmospheric Programs, Office of Air and Radiation (6205–J), 401 M Street, SW., Washington, DC 20460, (202)–564–9185 or The Stratospheric Ozone Hotline at (800)–296–1996.

I. Background

The Montreal Protocol on Substances that Deplete the Ozone Layer (Protocol) sets specific deadlines for the phaseout of production and importation of ozone depleting substances (ODS). At their Fourth Meeting in 1992, the signatories to the Protocol (the Parties) amended the Protocol to allow exemptions to the phaseout for uses agreed by the Parties to be essential. At the same Meeting, the Parties also adopted Decision IV/25, which established both criteria for determining whether a specific use should be approved as essential and a process for the Parties to use in making such a determination.

The criteria for an essential use as set forth in Decision IV/25 are the following:

"(1) that a use of a controlled substance should qualify as 'essential' only if:

(i) it is necessary for the health, safety or is critical for the functioning of society (encompassing cultural and intellectual aspects); and

(ii) there are no available technically and economically feasible alternatives or substitutes that are acceptable from the standpoint of environment and health;

(2) that production and consumption, if any, of a controlled substance for essential uses should be permitted only if:

(i) all economically feasible steps have been taken to minimize the essential use and any associated emission of the controlled substance; and

(ii) the controlled substance is not available in sufficient quantity and quality from existing stocks of banked or recycled controlled substances, also bearing in mind the developing countries' need for controlled substances."

Decision IV/25 also sets out the procedural steps for implementing this process. It first calls for individual Parties to nominate essential uses. These nominations are then to be evaluated by the Protocol's Technology and Economic Assessment Panel (TEAP or the Panel) which makes recommendations to representatives of all Protocol Parties. The final decision on which nominations to approve is to be taken by a meeting of the Parties.

The initial cycle of implementing this Decision has been completed in the context of halons which were phased out of production at the end of 1993. This initial timetable separated nominations for halons from those for other ozone-depleting substances. EPA issued a **Federal Register** notice requesting nominations for essential uses of halons (February 2, 1993; 58 FR 6786). In response, the Agency received over ten nominations, but was able to work with applicants to resolve their near-term requirements. As a result, the U.S. did not nominate any uses for continued halon production in 1994. About a dozen other nations put forth nominations which were reviewed by the Technical and Economic Assessment Panel. Because the Panel determined that in each case alternatives existed or that the existing supply of banked halons was adequate to meet near-term needs, it did not recommend approval of any of the nominations. In November of 1993, at the Fifth Meeting, the Parties unanimously adopted the recommendation of the Panel not to approve any essential uses for the production or consumption of halons in 1994.

EPA issued a second notice for essential use nominations for halons on October 18, 1993 (58 FR 53722). These nominations covered possible production of halons in 1995 for essential uses. In response to this inquiry, EPA received no nominations.

Only one nomination (from France) was received by the TEAP for production and consumption of halons for an essential use in 1995. The TEAP did not recommend approval of this nomination.

EPA also issued a **Federal Register** notice requesting nominations for essential use applications which would need to continue beyond the 1996 phaseout of consumption and production allowances for CFCs, methyl chloroform, carbon tetrachloride, and hydrobromofluorocarbons (May 20, 1993, 58 FR 29410). EPA received 20 applications in response to this notice. For several of these applications, EPA determined that the criteria contained in Decision IV/25 had not been satisfied. For example, two applications sought CFCs for servicing existing air-conditioning equipment. EPA rejected these applications on the basis that if all economically feasible steps were taken prior to the 1996 phaseout, then adequate supplies of banked and recycled CFCs should be available. However, in rejecting these nominations, the United States noted that servicing existing air-conditioning and refrigeration equipment remains a major challenge to the successful transition from the use of CFCs and that a future nomination in this area might be necessary if a combination of retrofits, replacements, recycling, recovery at disposal, and banking do not adequately address these needs.

Of the responses to the **Federal Register** request for essential use applications, the United States submitted essential use nominations to the Protocol Secretariat for the following uses of CFCs: metered dose inhalers and other selected medical applications; a bonding agent for the Space Shuttle; aerosol wasp killers; limited use in a specified bonding agent and polymer application; and a generic application for laboratory uses under specified limitations. (Letter from Pomerance to UNEP, September 27, 1993).

Nominations from the U.S. and other countries for over 200 specific uses were submitted to the Montreal Protocol Secretariat and provided to the Technical and Economic Assessment Panel for review. In March 1994, the Panel issued the "1994 Report of the Technology and Economic Assessment Panel." The Report includes the Panel's recommendations for essential-use production and consumption exemptions. The Panel recommended that essential use exemptions be granted for nominations of: Methyl chloroform in solvent bonding for the Space Shuttle; CFCs used in metered dose inhalers; and specific controlled substances needed for laboratory and analytical applications. For each of the other nominations submitted, the TEAP determined that one or more of the criteria for evaluating an essential use had not been satisfied. For example, in the case of several of the U.S. nominations, the report states that alternatives are available and therefore the essential use exemption is not warranted.

In every year since 1994, the Parties have reviewed recommendations by the Technology and Economic Assessment Panel and made final decisions on essential use authorizations. Today's action follows decisions taken by the Parties after considering recommendations by the TEAP in 1996 and 1997.

In 1993, the Parties to the Protocol modified the timetable for submission of essential use nominations to combine both halons and all the other class I controlled substances (except methyl bromide) and to reduce the overall length of time between nomination and decision. According to Decision V/18, essential use nominations for halon consumption and production for 1995 and beyond, and essential use nominations for all the other class I controlled substances (except methyl bromide) for 1997 and beyond, must be submitted to the Secretariat prior to January 1st of the year prior to the year for which production and consumption is being sought. The Parties again revised the timetable for essential use nominations in Decision VIII/9 requiring submission by 31 January in the year in which decisions would be taken for subsequent years. EPA revised the domestic schedule accordingly so a **Federal Register** notice calling for essential use applications for class I controlled substances for future years is published prior to the Protocol deadline for submission to the Ozone Secretariat.

Decision V/18 directed the Technology and Economic Assessment Panel to develop a "handbook on essential use nominations" (Handbook). The July 1994 Handbook contained forms and instructions for how to apply for an essential-use exemption. Subsequent decisions by the Parties to the Protocol created additional criteria for essential use authorizations now reflected in the August 1997 Handbook. The Handbook may be obtained from the Stratospheric Protection Division, U.S. Environmental Protection Agency or the Ozone Secretariat of the Montreal Protocol in Nairobi.

II. Allocation of 1998 Essential Use Allowances

In today's action, EPA is allocating essential use allowances for the 1998 control period to the entities listed in Table I for exempted production or import of the specific quantity of class I controlled substances solely for the specified essential use.

TABLE I.—ESSENTIAL USES AGREED TO BY THE PARTIES TO THE PROTOCOL FOR 1998 AND ESSENTIAL USE ALLOWANCES

Company/entity	Class I controlled substance	Quantity (metric tonnes)
(i) Metered Dose Inhalers for Treatment of Asthma and Chronic Obstructive Pulmonary Disease		
International Pharmaceutical Aerosol Consortium (IPAC)—Abbott Laboratories, Armstrong Laboratories, Boehringer Ingelheim, Glaxo Wellcome, 3M, Rhone Poulenc Rorer, Schering-Plough Corporation.	CFC–11	1043.6
	CFC–12	2512.2
	CFC–114	338.0
Medisol	CFC–11	78.0
	CFC–12	132.0
	CFC–114	11.0
Aeropharm	CFC–11	83.0
	CFC–12	166.7
(ii) Cleaning, Bonding and Surface Activation Applications for the Space Shuttle Rockets and Titan Rockets		
National Aeronautics and Space Administration (NASA)/Thiokol Rocket	Methyl Chloroform	56.7
United States Air Force/Titan Rocket	Methyl Chloroform	3.4
(iii) Laboratory and Analytical Applications		
Global Exemption (Restrictions in Appendix G Apply)	All Class I Controlled Substances (except Group VI).	No (1)

[1] No quantity specified.

VOL 63 ISS 18 JA 28 1998 UMI

The International Pharmaceutical Aerosol Consortium (IPAC) consolidated requests for an essential use exemption to be nominated to the Protocol as an agent of its member companies for administrative convenience. By means of a confidential letter to each of the companies listed above, EPA will allocate essential-use allowances separately to each company in the amount requested by it for the nomination.

Applications submitted by these companies requested class I controlled substances for uses claimed to be essential during the 1998 control period. The applications provided information in accordance with the criteria set forth in Decision VI/25 of the Protocol and the procedures outlined in the "Handbook on Essential Use Nominations." The applications request exemptions for the production and import of specific quantities of specific class I controlled substances after the phaseout as set forth in 40 CFR 82.4. The applications were reviewed by the U.S. government and nominated to the Protocol Secretariat for analysis by the Technical and Economic Assessment Panel (TEAP) and its Technical Option Committees (TOCs). The Parties to the Montreal Protocol approved the U.S. nominations for essential-use exemptions during meetings in 1995 and 1996. In today's action essential-use allowances are allocated to United States entities based on nominations decided upon by the Parties to the Protocol.

The 1998 global essential use exemption for analytical and laboratory applications published in today's rule imposes strict requirements both in § 82.13 and in Appendix G of this subpart. The restrictions for the global laboratory and analytical essential use exemption listed in Appendix G include requirements regarding purity of the class I controlled substances and the size of the containers. In addition, there are detailed reporting requirements in § 82.13 for persons that take advantage of the global laboratory and analytical essential-use exemption for class I controlled substances. The strict requirements are established because the Parties to the Protocol, and today's rule, do not specify a quantity of essential use allowances permitted for analytical and laboratory applications, but establish a global essential-use exemption, without a named recipient.

Any person obtaining class I controlled substances after the phaseout under the essential use exemptions published in today's rule is subject to all the restrictions and requirements in other sections of 40 CFR part 82, subpart A. Holders of essential-use allowances or persons obtaining class I controlled substances under the essential-use exemptions must comply with the recordkeeping and reporting requirements in § 82.13 of this subpart and the restrictions in Appendix G of this subpart.

Section 307(d) of the Clean Air Act Amendments of 1990 (CAA or the Act) states that in the case of any rule to which section 307(d) applies, notice of proposed rulemaking must be published in the **Federal Register** (CAA 307(d)(3)). The promulgation or revision of regulations under title VI of the CAA (relating to stratospheric ozone protection) is generally subject to section 307(d). However, section 307(d) does not apply to any rule referred to in subparagraphs (A) or (B) of section 553(b) of the Administrative Procedure Act (APA), 5 U.S.C. 551 et seq.

APA section 553(b) requires that any rule to which it applies be issued only after the public has received notice of, and an opportunity to comment on, the rule. However, APA section 553(b)(B) exempts from those requirements any rule for which the issuing agency for good cause finds that providing prior notice-and-comment would be impracticable, unnecessary or contrary to the public interest. Thus, any rule for which EPA makes such a finding is exempt from the notice-and-comment requirements of both APA section 553(b) and CAA section 307(d).

EPA believes that the circumstances presented here provide good cause to take this action without prior notice and comment. EPA finds that providing prior notice and comment would be impracticable and contrary to the public interest because the ozone-depleting substances need to be available to the listed entities in 1998 for the health and safety of society as defined in the Protocol essential use criteria. The allocation of essential-use allowances for CFCs to the manufacturers of metered-dose inhalers will ensure the availability of treatment in order to protect the health of U.S. patients with asthma and chronic obstructive pulmonary disease. The allocation of essential-use allowances for methyl chloroform for the manufacture of the Thiokol/Space Shuttle Rockets and the Titan Rockets will provide a guarantee of safety from explosions that are unacceptable risks to both national programs.

Nonetheless, EPA is providing 30 days for submission of public comments following today's action. EPA will consider all written comments submitted in the allotted time period to determine if any change to this action is necessary.

Section 553(d) of the APA generally provides that rules may not take effect earlier than 30 days after they are published in the **Federal Register**. However, APA section 553(d)(1) excepts from this provision any action that grants or recognizes an exemption or relieves a restriction. Since today's action grants an exemption from the phaseout of production and consumption of most class I ozone-depleting substances, EPA is making this action immediately effective to ensure the availability of ozone-depleting substances for essential uses during the 1998 control period.

III. Additional Changes in the Essential Use Process To Be Published in Subsequent Proposed Rulemaking

EPA will be publishing a Notice of Proposed Rulemaking that includes changes to the essential-use provisions published in the **Federal Register** on May 10, 1995. One of the proposals will be a simplification of the process for allocating essential-use allowances by providing that allowances will be allocated through a Notice published in the **Federal Register** rather than through a Final Rulemaking. EPA will propose allocating essential-use allowances according to the quantities approved by the Parties to the Protocol for which applications were submitted to the U.S. government. EPA will be seeking comments on a simplification of the current allocation process.

EPA will also be proposing changes to the reporting requirements for holders of essential-use allowances in the subsequent Notice of Proposed Rulemaking. EPA will propose changes to the reporting requirements to allow the U.S. to gather information in accordance with Decision VIII/9, paragraph 9. Under the reporting format associated with Decision VIII/9, paragraph 9, Parties to the Protocol are requested to report data regarding essential uses, including inventories of CFCs, quantities of CFCs imported and produced for essential uses, the amount of CFCs that are actually filled into metered-dose inhalers, and stockpiles of CFCs remaining at the end of a control period.

IV. Summary of Supporting Analysis

A. Unfunded Mandates Reform Act and Regulatory Flexibility Act

Since this action is not subject to notice-and-comment rulemaking requirements under the APA or any other law, it is also not subject to sections 202, 204 or 205 of the Unfunded Mandates Reform Act (UMRA). In addition, since this action does not impose annual costs of $100 million or more on small governments or uniquely affect small governments, the Agency has no obligations under section 203 of UMRA. Moreover, since this action is not subject to notice-and-comment requirements under the APA or any other statute as stated above, it is not subject to section 603 or 604 of the Regulatory Flexibility Act.

B. Executive Order 12866

Under Executive Order 12866 (58 FR 51735, October 4, 1993), the Agency must determine whether this regulatory action is "significant" and therefore subject to OMB review and the requirements of the Executive Order. The Order defines "significant" regulatory action as one that is likely to result in a rule that may:

(1) have an annual effect on the economy of $100 million or more, or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;

(2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

It has been determined by EPA that this rule is not a "significant regulatory action" within the meaning of the Executive Order.

C. Paperwork Reduction Act

This action does not add any information collection requirements or increase burden under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* The Office of Management and Budget (OMB) previously approved the information collection requirements contained in the final rule promulgated on May 10, 1995, and assigned OMB control number 2060–0170 (EPA ICR No. 1432.16).

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15.

D. Executive Order 12875

Today's action does not impose any unfunded mandate upon any State, local, or tribal government; therefore, Executive Order 12875 does not apply to this rulemaking.

E. Submission to Congress and the General Accounting Office

Under 5 U.S.C. 801(a)(1)(A) as added by the Small Business Regulatory Enforcement Fairness Act of 1996, EPA submitted a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the General Accounting Office prior to publication of the rule in today's **Federal Register**. This rule is not a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 82

Environmental protection, Administrative practice and procedure, Air pollution control, Chemicals, Chlorofluorocarbons, Exports, Hydrochlorofluorocarbons, Imports, Ozone layer, Reporting and recordkeeping requirements.

Dated: January 16, 1998.

Carol M. Browner,

Administrator.

40 CFR part 82 is to be amended as follows:

PART 82—PROTECTION OF STRATOSPHERIC OZONE

1. The authority citation for part 82 continues to read as follows:

Authority: 42 U.S.C. 7414, 7601, 7671–7671q.

Subpart A—Production and Consumption Controls

2. Section 82.4(r)(2) is amended by revising the table to read as follows:

§ 82.4 Prohibitions.

Election of education benefits; comments due by 1-26-98; published 11-25-97

LIST OF PUBLIC LAWS

The List of Public Laws for the 105th Congress, First Session, has been completed. It will resume when bills are enacted into Public Law during the second session of the 105th Congress, which convenes on January 27, 1998.

Note: A Cumulative List of Public Laws was published in the **Federal Register** on December 31, 1997.

Public Laws Electronic Notification Service (PENS)

PENS is a free electronic mail notification service for newly enacted public laws. To subscribe, send E-mail to **LISTPROC@ETC.FED.GOV** with the message:

SUBSCRIBE PUBLAWS-L FIRSTNAME LASTNAME

Note: This service is strictly for E-mail notification of new public laws only. The text of laws is not available through this service. We cannot respond to specific inquiries sent to this address.

The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**

This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue includes a Table of Contents, lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements. Indexes are published quarterly.

Published by the Office of the Federal Register, National Archives and Records Administration.

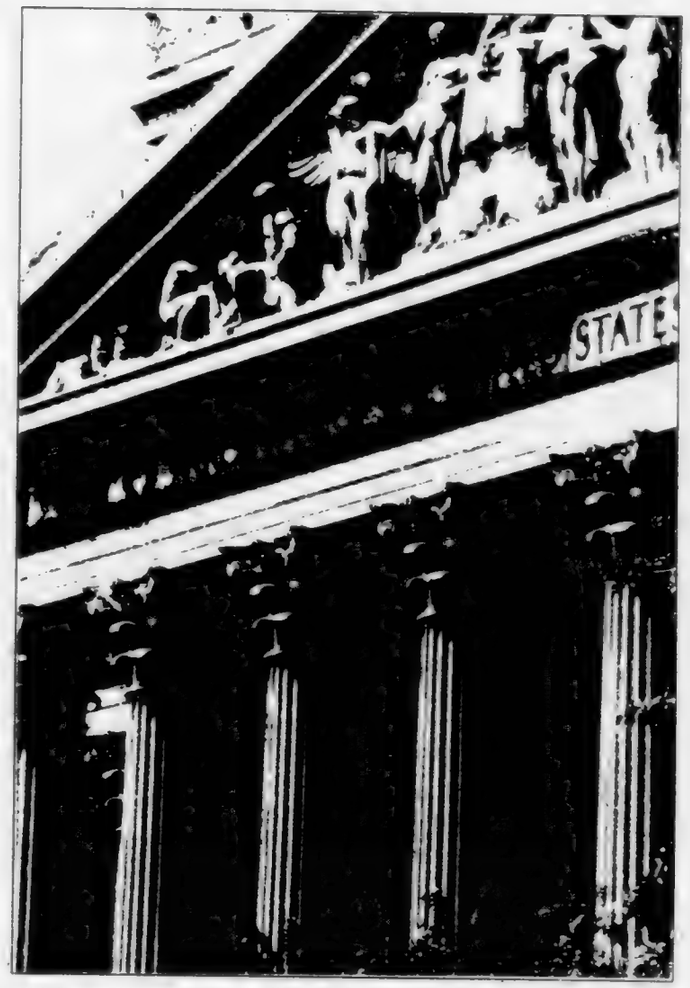
Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.



LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$27 per year.

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$25 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the Federal Register as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The Federal Register is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online edition of the **Federal Register** on *GPO Access* is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. Free public access is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. Internet users can access the database by using the World Wide Web; the Superintendent of Documents home page address is http://www.access.gpo.gov/su_docs/, by using local WAIS client software, or by telnet to swais.access.gpo.gov, then login as guest, (no password required). Dial-in users should use communications software and modem to call (202) 512–1661; type swais, then login as guest (no password required). For general information about *GPO Access*, contact the *GPO Access* User Support Team by sending Internet e-mail to gpoaccess@gpo.gov; by faxing to (202) 512–1262; or by calling toll free 1–888–293–6498 or (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except for Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $555, or $607 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $220. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 60 FR 12345.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: February 17, 1998 at 9:00 am.
WHERE: Office of the Federal Register

Rules and Regulations

Federal Register
Vol. 63, No. 19
Thursday, January 29, 1998

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

FEDERAL RETIREMENT THRIFT INVESTMENT BOARD

5 CFR Part 1605

Correction of Administrative Errors

AGENCY: Federal Retirement Thrift Investment Board.

ACTION: Interim rule with request for comments.

SUMMARY: The Executive Director of the Federal Retirement Thrift Investment Board (Board) is publishing an amendment to its final rules on correction of administrative errors affecting Thrift Savings Plan (TSP) accounts. The amendment provides for attribution of makeup contributions from a participant to the appropriate prior year in which the contributions should have been made. Such makeup contributions are permitted only if aggregation with other contributions made in (or with respect to) the appropriate prior year would not result in contributions in excess of the limits imposed by sections 402(g) and 415(c) of the Internal Revenue Code (I.R.C.).

DATES: *Effective date:* January 29, 1998. *Comment date:* March 30, 1998.

ADDRESSES: Send comments to Elizabeth S. Woodruff, Associate General Counsel, Federal Retirement Thrift Investment Board, 1250 H Street, NW., Washington, DC 20005.

FOR FURTHER INFORMATION CONTACT: Elizabeth S. Woodruff, (202) 942–1661.

SUPPLEMENTARY INFORMATION: A final rule governing the correction of administrative errors was published in the **Federal Register** on December 24, 1996 (61 FR 68464). That rule revised the final regulations that were published in the **Federal Register** on December 4, 1987 (52 FR 46314). Both sets of regulations required a limitation on TSP makeup contributions when a retroactive adjustment to an employee's pay included a correction for the employee's inability to have made TSP contributions during the period of retroactivity. At the time these regulations were issued, the Board interpreted I.R.C. 402(g) and its discussions with the Internal Revenue Service (IRS) as requiring that such makeup contributions always be counted against the IRS deferral limit of the year in which they were actually made, rather than the limit of the year to which they were attributable.

On June 25, 1997, a decision was issued in the matter of *Kahmann* v. *Reno*, 967 F. Supp. 731 (N.D.N.Y.), holding that application of the current IRS deferral limit to makeup contributions for prior years was contrary to the purpose of a make-whole award. The court required the participant's employing agency to calculate contributions for each pay period for which the employee could have made a TSP contribution and to deposit the appropriate contributions (and lost earnings) to the employee's account without regard to the current deferral limit.

Because this holding involved the Board's interpretation of I.R.C. 402(g), the Board requested guidance from the IRS on whether a participant's makeup contributions to the TSP in the current year could be attributed to the years in which the contributions should have been made for purposes of the limit on annual contributions found in I.R.C. 402(g). The IRS advised the Board that such makeup contributions could indeed be so attributed.

For this reason, § 1605.4(c)(1) of the Board's error correction regulations is being amended to provide that makeup contributions to the TSP will be attributed to the year in which the contributions should have been made to determine compliance with the (applicable) IRS deferral limit. The board intends to apply this rule to all situations in which contributions should have been made in an earlier year, regardless of the reason the employee was improperly not permitted to contribute to the TSP. Because this change could affect the ongoing makeup contributions of some participants, it is being given immediate effect.

Regulatory Flexibility Act

I certify that this amendment will not have a significant economic impact on a substantial number of small entities. It will only affect TSP participants.

Paperwork Reduction Act

I certify that these regulations do not require additional reporting under the criteria of the Paperwork Reduction Act of 1980.

Waiver of Notice of Proposed Rulemaking and 30-day Delay of Effective Date

Under 5 U.S.C. 553(b)(B) and (d)(3), I find that good cause exists for waiving the general notice of proposed rulemaking and for making these regulations effective in less than 30 days. These regulations facilitate correction of errors in the amount of contributions made to Thrift Savings Plan accounts. Prompt implementation of the regulations will provide necessary guidance to employing agencies and TSP participants.

Unfunded Mandates Reform Act of 1995

Pursuant to the Unfunded Mandates Reform Act of 1995, section 201, Public Law 104–4, 109 Stat. 48, 64, the effect of these regulations on State, local, and tribal governments and on the private sector has been assessed. This regulation will not compel the expenditure in any one year of $100 million or more by any State, local, and tribal governments in the aggregate, or by the private sector. Therefore, a statement under section 202, 109 Stat. 48, 64–65, is not required.

Submission to Congress and the General Accounting Office

Under 5 U.S.C. 801(a)(1)(A), the Board submitted a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States before the publication of this rule in today's **Federal Register**. This rule is not a major rule as defined in section 804(2) of title 5, United States Code.

List of Subjects in 5 CFR Part 1605

Claims, Government employees, Pensions, Retirement.

Roger W. Mehle,
Executive Director.

Federal Retirement Thrift Investment Board

For the reasons set forth in the preamble, part 1605 of chapter VI of title

VOL 63 ISS 19 JA 29 1998 UMI

5 of the Code of Federal Regulations is amended as follows:

PART 1605—CORRECTION OF ADMINISTRATIVE ERRORS

1. The authority citation for part 1605 continues to read as follows:

Authority: 5 U.S.C. 8351 and 8474.

2. Section 1605.2 is amended by revising paragraph (c)(5) to read as follows:

§ 1605.2 Makeup of missed or insufficient contributions.

* * * * *

(c) * * *

(5) When establishing a schedule of makeup contributions, the employing agency must review any schedule proposed by the affected participant, as well as the participant's prior TSP contributions, if any, to determine whether the makeup contributions, when combined with prior contributions, would exceed the annual contribution limit(s) contained in sections 402(g) and 415 of the Internal Revenue Code (I.R.C.) (26 U.S.C. 402(g) and 415) for the prior year(s) with respect to which the contributions are being made.

(i) The employing agency must not permit contributions that, when combined with prior contributions, would exceed the applicable annual contribution limit(s) contained in I.R.C. 402(g) and 415.

(ii) A schedule of makeup contributions may be suspended if a participant has insufficient net pay to permit the makeup contributions. If this happens, the period of suspension should not be counted against the maximum number of pay periods to which the participant is entitled in order to complete the schedule of makeup contributions.

* * * * *

3. Section 1605.4 is amended by revising paragraph (c)(1) to read as follows:

§ 1605.4 Back pay awards and other retroactive pay adjustments.

* * * * *

(c)(1) Makeup employee contributions required under paragraphs (a) and (b) of this section must be computed before the back pay or other retroactive pay adjustment is made. The makeup employee contributions must be deducted from the back pay or other retroactive pay adjustment and contributed to the TSP. However, contributions must not be made that would cause the participant to exceed the annual contribution limit(s) contained in sections 402(g) and 415 of the Internal Revenue Code (I.R.C.) (26 U.S.C. 402(g) and 415) for the prior year(s) with respect to which the contributions are being made, taking into consideration the TSP contributions already made in (or with respect to) that year.

BILLING CODE 6760–01–M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 979

[Docket No. FV98–979–1 IFR]

Melons Grown in South Texas; Decreased Assessment Rate

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim final rule with request for comments.

SUMMARY: This interim final rule decreases the assessment rate established for the South Texas Melon Committee (Committee) under Marketing Order No. 979 for the 1997–98 and subsequent fiscal periods. The Committee is responsible for local administration of the marketing order which regulates the handling of melons grown in South Texas. Authorization to assess Texas melon handlers enables the Committee to incur expenses that are reasonable and necessary to administer the program. The 1997–98 fiscal period began October 1 and ends September 30. The assessment rate will continue in effect indefinitely unless modified, suspended, or terminated.

DATES: Effective January 30, 1998. Comments received by March 30, 1998, will be considered prior to issuance of a final rule.

ADDRESSES: Interested persons are invited to submit written comments concerning this rule. Comments must be sent in triplicate to the Docket Clerk, Fruit and Vegetable Programs, AMS, USDA, room 2525–S, PO Box 96456, Washington, DC 20090–6456; Fax: (202) 205–6632. Comments should reference the docket number and the date and page number of this issue of the **Federal Register** and will be available for public inspection in the Office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Cynthia Cavazos or Belinda G. Garza, McAllen Marketing Field Office, Fruit and Vegetable Programs, AMS, USDA, 1313 East Hackberry, McAllen, Texas 78501; telephone: (956) 682–2833, Fax: (956) 682–5942 or George J. Kelhart, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, room 2525–S, PO Box 96456, Washington, DC 20090–6456; telephone: (202) 720–2491, Fax: (202) 205–6632. Small businesses may request information on compliance with this regulation by contacting Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, room 2525–S, PO Box 96456, Washington, DC 20090–6456; telephone: (202) 720–2491, Fax: (202) 205–6632.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement No. 156 and Order No. 979 (7 CFR part 979), regulating the handling of melons grown in South Texas, hereinafter referred to as the "order." The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

The Department of Agriculture (Department) is issuing this rule in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. Under the marketing order now in effect, South Texas melon handlers are subject to assessments. Funds to administer the order are derived from such assessments. It is intended that the assessment rate as issued herein will be applicable to all assessable melons beginning October 1, 1997, and continuing until amended, suspended, or terminated. This rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review the Secretary's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

This rule decreases the assessment rate established for the Committee for the 1997–98 and subsequent fiscal periods from $0.07 to $0.04 per carton.

The Texas melon marketing order provides authority for the Committee, with the approval of the Department, to formulate an annual budget of expenses and collect assessments from handlers to administer the program. The members of the Committee are producers and handlers of South Texas melons. They are familiar with the Committee's needs and with the costs of goods and services in their local area and are thus in a position to formulate an appropriate budget and assessment rate. The assessment rate is formulated and discussed in a public meeting. Thus, all directly affected persons have an opportunity to participate and provide input.

For the 1996–97 and subsequent fiscal periods, the Committee recommended, and the Department approved, an assessment rate that would continue in effect from fiscal period to fiscal period indefinitely unless modified, suspended, or terminated by the Secretary upon recommendation and information submitted by the Committee or other information available to the Secretary.

The Committee, in a telephone vote, unanimously recommended 1997–98 administrative expenses of $100,000 for personnel, office, and the travel portion of the compliance budget. These expenses were approved in September 1997. The assessment rate and funding for research projects, promotion, and the road guard station maintenance portion of the compliance budget were to be recommended at a later Committee meeting.

The Committee subsequently met on December 16, 1997, and unanimously recommended 1997–98 expenditures of $158,200 and an assessment rate of $0.04 per carton of melons. In comparison, last year's budgeted expenditures were $308,000. The assessment rate of $0.04 is $0.03 less than the rate currently in effect. The Committee voted to lower its assessment rate and use more of the reserve to cover its expenses. The assessment rate decrease is necessary to bring expected assessment income closer to the amount necessary to administer the program for the 1997–98 fiscal period. At the current rate, assessment income would exceed anticipated expenses by about $112,700, and the projected reserve of $234,269 on September 30, 1998, would exceed the level the Committee believes to be adequate to administer the program.

Major expenses recommended by the Committee for the 1997–98 fiscal period include $84,500 for personnel and administrative expenses, $40,500 for compliance, $23,200 for research projects, and $10,000 for promotion. Budgeted expenses for these items in 1996–97 were $84,500, $115,500, $108,000, and $0, respectively.

The assessment rate recommended by the Committee was derived by dividing anticipated expenses by expected shipments of South Texas melons. Melon shipments for the year are estimated at 3,870,000 cartons, which should provide $154,800 in assessment income. Income derived from handler assessments, along with funds from the Committee's authorized reserve, will be adequate to cover budgeted expenses. Funds in the reserve (currently $228,669) will be kept within the maximum permitted by the order (approximately two fiscal periods' expenses; § 979.44).

The assessment rate established in this rule will continue in effect indefinitely unless modified, suspended, or terminated by the Secretary upon recommendation and information submitted by the Committee or other available information.

Although this assessment rate is effective for an indefinite period, the Committee will continue to meet prior to or during each fiscal period to recommend a budget of expenses and consider recommendations for modification of the assessment rate. The dates and times of Committee meetings are available from the Committee or the Department. Committee meetings are open to the public and interested persons may express their views at these meetings. The Department will evaluate Committee recommendations and other available information to determine whether modification of the assessment rate is needed. Further rulemaking will be undertaken as necessary. The Committee's 1997–98 budget and those for subsequent fiscal periods will be reviewed and, as appropriate, approved by the Department.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities. Accordingly, AMS has prepared this initial regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and the rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 33 producers of South Texas melons in the production area and approximately 16 handlers subject to regulation under the marketing order. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.601) as those having annual receipts less than $500,000 and small agricultural service firms are defined as those whose annual receipts are less than $5,000,000. The majority of South Texas melon producers and handlers may be classified as small entities.

This rule decreases the assessment rate established for the Committee and collected from handlers for the 1997–98 and subsequent fiscal periods from $0.07 to $0.04 per carton. The Committee unanimously recommended 1997–98 expenditures of $158,200 and an assessment rate of $0.04 per carton of melons. In comparison, last year's budgeted expenditures were $308,000. The assessment rate of $0.04 is $0.03 less than the rate currently in effect. At the rate of $0.07 per carton and an estimated 1998 melon production of 3,870,000 cartons, the projected reserve on September 30, 1998, would exceed the level the Committee believes to be adequate to administer the program. The Committee decided that an assessment rate of less than $0.04 would not generate the income necessary to administer the program with an adequate reserve.

Major expenses recommended by the Committee for the 1997–98 fiscal period include $84,500 for personnel and administrative expenses, $40,500 for compliance, $23,200 for research projects, and $10,000 for promotion. Budgeted expenses for these items in 1996–97 were $84,500, $115,500, $108,000, and $0, respectively.

Melon shipments for the year are estimated at 3,870,000 cartons, which should provide $154,800 in assessment income. Income derived from handler assessments, along with funds from the Committee's authorized reserve, will be adequate to cover budgeted expenses. Funds in the reserve (currently $228,669) will be kept within the maximum permitted by the order (approximately two fiscal periods' expenses; § 979.44).

Recent price information indicates that the grower price for the 1997–98 marketing season will range between $7.00 and $9.00 per carton of cantaloupes and between $5.00 and $7.00 per carton of honeydew melons.

VOL 63 ISS 19 JA 29 1998 UMI

Therefore, the estimated assessment revenue for the 1997–98 fiscal period as a percentage of total grower revenue will range between .006 and .004 percent for cantaloupes and between .008 and .006 percent for honeydew melons.

This action reduces the assessment obligation imposed on handlers. While this rule imposes some additional costs on handlers, the costs are minimal and in the form of uniform assessments on all handlers. Some of the additional costs may be passed on to producers. However, these costs will be offset by the benefits derived by the operation of the marketing order. In addition, the Committee's meeting was widely publicized throughout the South Texas melon industry and all interested persons were invited to attend the meeting and participate in Committee deliberations on all issues. Like all Committee meetings, the December 16, 1997, meeting was a public meeting and all entities, both large and small, were able to express views on this issue. Finally, interested persons are invited to submit information on the regulatory and informational impacts of this action on small businesses.

This action will not impose any additional reporting or recordkeeping requirements on either small or large South Texas melon handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies.

The Department has not identified any relevant Federal rules that duplicate, overlap, or conflict with this rule.

After consideration of all relevant matter presented, including the information and recommendation submitted by the Committee and other available information, it is hereby found that this rule, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined upon good cause that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice prior to putting this rule into effect, and that good cause exists for not postponing the effective date of this rule until 30 days after publication in the **Federal Register** because: (1) This action reduces the current assessment rate for South Texas melons; (2) the 1997–98 fiscal period began on October 1, 1997, and the marketing order requires that the rate of assessment for each fiscal period apply to all assessable melons handled during such fiscal period; (3) handlers are aware of this action which was unanimously recommended by the Committee at a public meeting and is similar to other assessment rate actions issued in past years; and (4) this interim final rule provides a 60-day comment period, and all comments timely received will be considered prior to finalization of this rule.

List of Subjects in 7 CFR Part 979

Marketing agreements, Melons, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 979 is amended as follows:

PART 979—MELONS GROWN IN SOUTH TEXAS

1. The authority citation for 7 CFR part 979 continues to read as follows:

Authority: 7 U.S.C. 601–674.

§ 979.219 [Amended]

2. Section 979.219 is amended by removing the words "October 1, 1998," and adding in their place the words "October 1, 1997," and by removing "$0.07" and adding in its place "$0.04."

Dated: January 23, 1998.

Robert C. Keeney,

Deputy Administrator, Fruit and Vegetable Programs.

BILLING CODE 3410–02–P

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 989

[Docket No. FV97–989–3 FIR]

Raisins Produced From Grapes Grown in California; Modifications to the Raisin Diversion Program

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department of Agriculture (Department) is adopting, as a final rule, without change, the provisions of an interim final rule modifying the raisin diversion program (RDP) currently authorized under the Federal marketing order for California raisins. The marketing order regulates the handling of raisins produced from grapes grown in California and is administered locally by the Raisin Administrative Committee (Committee). Under the RDP, producers are issued certificates representing reserve raisins for voluntarily reducing their raisin production in order to bring raisin supplies more closely in line with market needs. Producers may then sell these certificates to handlers, who, in turn, can redeem the certificates for reserve raisins. This rule continues in effect various modifications to the diversion program to improve compliance and bring the program in line with current industry practices. Improving compliance with the RDP helps ensure equity among all producers who participate in the program, and helps maintain the integrity of the RDP.

EFFECTIVE DATE: March 2, 1998.

FOR FURTHER INFORMATION CONTACT: Maureen T. Pello, Marketing Specialist, California Marketing Field Office, Marketing Order Administration Branch, F&V, AMS, USDA, 2202 Monterey Street, suite 102B, Fresno, California 93721; telephone: (209) 487–5901, Fax: (209) 487–5906; or George Kelhart, Technical Advisor, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, room 2525–S, PO Box 96456, Washington, DC 20090–6456; telephone: (202) 720–2491, Fax: (202) 205–6632. Small businesses may request information on compliance with this regulation by contacting Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, room 2525–S, PO Box 96456, Washington, DC 20090–6456; telephone: (202) 720–2491, Fax: (202) 205–6632.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement and Order No. 989, both as amended (7 CFR part 989), regulating the handling of raisins produced from grapes grown in California, hereinafter referred to as the "order." The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

The Department is issuing this rule in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule is not intended to have retroactive effect. This rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review the Secretary's ruling on the petition, provided an action is filed not later than 20 days after date of the entry of the ruling.

This rule continues in effect modifications to the raisin diversion program currently authorized under the Federal marketing order for California raisins. Under the RDP, producers are issued certificates representing reserve raisins for voluntarily reducing their raisin production in order to bring raisin supplies more closely in line with market needs. Producers may then sell these certificates to handlers, who, in turn, can redeem the certificates for reserve raisins. This rule makes various modifications to the RDP to improve compliance and bring the RDP in line with current industry practices. Improving compliance with the RDP helps ensure equity among all producers who participate in the program, and helps maintain the integrity of the RDP.

The Federal marketing order for California raisins provides authority for volume regulation designed to promote orderly marketing conditions, stabilize prices and supplies, and improve producer returns. When volume regulation is in effect, a certain percentage of the raisin crop may be sold by handlers to any market (free tonnage) while the remaining percentage of the crop must be held by handlers in a reserve pool (or reserve) for the account of the Committee. Reserve pool raisins are disposed through certain programs authorized under the order. For example, reserve raisins may be sold by the Committee to handlers for sale to any market; exported to authorized countries; carried over as a hedge against a short crop the following year; or may be disposed of in other outlets not competitive with those for free tonnage raisins, such as government purchase, distilleries, or animal feed. The RDP is another program concerning reserve pool raisins authorized under the order, and may be used as a means for controlling overproduction. The RDP is described in the following paragraphs.

Pursuant to § 989.56 of the order, the Committee meets by November 30 of each crop year to review raisin data, including information on production, supplies, market demand, and inventories. If the Committee determines that the available supply of raisins, including those in the reserve pool, exceeds projected market needs, it can decide to implement a diversion program, and announce the amount of tonnage eligible for diversion during the subsequent crop year. Producers who wish to participate in the RDP must submit an application to the Committee. Such producers then curtail their production by vine removal or some other means established by the Committee and receive a certificate from the Committee which represents the quantity of raisins diverted. Producers sell these certificates to handlers who pay producers for the free tonnage applicable to the diversion certificate minus the established harvest cost for the diverted tonnage. Handlers redeem the certificates by presenting them to the Committee and paying an amount equal to the established harvest cost plus payment for receiving, storing, fumigating, handling, and inspecting the tonnage represented on the certificate. The Committee then gives the handler raisins from the reserve pool in an amount equal to the tonnage represented by the diversion certificate.

Section 989.156 of the order's administrative rules and regulations prescribes additional procedures for the RDP. At a meeting on August 14, 1997, the Committee unanimously recommended that various changes be made to these additional RDP procedures to improve compliance and bring the RDP in line with current industry practices.

The first change to the RDP recommended by the Committee concerns references throughout § 989.156 to partial production units. Such references are contained in paragraphs (d), (h)(2), (h)(3), (i), (s)(1), and (s)(3) of § 989.156. As defined in § 989.156(o), a production unit is a clearly defined geographic area with permanent boundaries (either natural or man-made). For example, a production unit could be 30 acres of raisins surrounded by a permanent road on two sides and permanent fencing on the other two sides.

Partial production units have been allowed under the RDP in past years. For instance, in the 30-acre production unit example, three rows of vines from that unit could qualify as a partial production unit under the RDP. Under § 989.156(s)(3) of the order's administrative rules and regulations, the determination of the tonnage allowed for acreage removed for such a partial unit would be computed by multiplying the previous year's tonnage produced and verified on the entire unit by the ratio of the acreage removed divided by the acreage contained in the total production unit. However, the Committee is concerned that some producers may be removing weak vines in a production unit and getting credit under the RDP for an inflated amount of tonnage. In the 30-acre example, a producer could have an average past production of 2.2 tons of raisins on the entire unit, remove three rows of low-producing vines that averaged only 1.5 tons of raisins per acre, and get credit in the RDP for 2.2 tons of raisins per acre. Although § 989.56(a) of the order specifies a cap of 2.75 tons of raisins per acre for an approved production unit (which can be changed through informal rulemaking), the Committee is still concerned that actual production on a partial unit could be inflated.

Thus, the Committee recommended that partial production units no longer be accepted as part of the RDP. This change will help ensure that producers who participate in an RDP do not receive credit for an inflated amount of tonnage and gain a financial advantage over other producers. This change will help ensure equity among all producers who participate in the program, and help maintain the integrity of the RDP.

In addition, the Committee believes that this change will improve the accuracy of the amount of tonnage accepted into the RDP. When an RDP is established, a quantity of raisins equivalent to the amount diverted would be made available in the subsequent crop year from the prior year's reserve. This RDP diverted tonnage from the reserve is included in the Committee's marketing policy computations for that year and subject to free and reserve percentages. Thus, it is important for the Committee to have as accurate a figure as possible for RDP tonnage. The Committee believes that not allowing partial production units into the RDP will improve the accuracy of this figure. Appropriate changes have been made to the applicable paragraphs to implement this recommended change.

According to Committee staff, most of the RDP applications over the years have been for full production units. The partial unit authority has typically been used by a producer desiring to receive credit under the RDP for a few weak rows of vines, which usually amounts to less than an acre. Thus, this change is not expected to adversely impact RDP participants.

The second change recommended by the Committee concerns paragraph (g) of § 989.156 regarding procedures to verify whether producers under the RDP are curtailing their production. This section

VOL 63 ISS 19 JA 29 1998 UMI

currently specifies that committees of industry persons may be established to serve as agents of the Committee in assuring producer compliance with the RDP. These groups of industry persons may be furnished approved RDP applications and are to advise the Committee on the progress of the diversion within a particular district.

Such industry committees have been utilized during only one season since the inception of the RDP in 1985. Committee staff has assumed the functions of monitoring producer diversion and assuring program compliance. Thus, the Committee recommended that reference to these RDP industry committees be removed from § 989.156(g) of the order's administrative rules and regulations. This change brings RDP procedures in line with current industry practices.

A third change to the RDP recommended by the Committee concerns paragraph (h) of § 989.156 regarding compliance. Paragraph (h)(1) of § 989.156 currently specifies that an approved applicant must remove or spur-prune vines to preclude grapes from being produced and harvested on the production unit involved in the program: *Provided*, That vine removal may be the only acceptable means of diversion in some seasons as determined by the Committee. If the Committee representatives or agents determine that there is an average of more than four bunches per vine remaining on a properly spur-pruned production unit, the producer must be notified in writing and given 2 weeks to remove such bunches.

The Committee recommended that this section be modified to remove the impression that spur-pruning is the only acceptable method of diverting the crop, other than removing the vines altogether. Other methods such as spraying with certain substances should also be allowed. Producers should be allowed to remove and destroy the bunches of grapes by whatever method they choose in order to receive a diversion certificate. The Committee also recommended that the word "acceptable" in the first sentence in § 989.156(h)(1) be removed because it is not necessary. In addition, the Committee recommended that the section be modified to strengthen the requirement regarding producer notification of noncompliance with the RDP. Specifically, Committee staff must notify producers "immediately by certified mail," in writing, and give producers 2 weeks to remove extra bunches. The Committee believes that this added language will strengthen producer compliance with the RDP.

The Committee also recommended that paragraph (h)(3) of § 989.156 concerning failure to divert be revised to specify that any producer who has more than one production unit and fails to divert on an approved production unit may be denied the opportunity to participate in the next RDP on all of that producer's production units. The current provisions specify that the producer should be denied participation, and not the specific production unit. However, the provisions have been interpreted so that producers only have been denied the opportunity to participate in the next RDP on the unit that was not properly diverted, not all of that producer's units. The clarification will eliminate the confusion and is expected to provide producers more incentive to remain in compliance with the RDP because the clarified provisions specify that the failure to comply could mean denial to participate on any of that producer's production units in the next RDP. Thus, this provision is expected to strengthen producer compliance with the RDP which will help ensure that the integrity of the program is maintained.

The fourth change to the RDP recommended by the Committee concerns paragraph (o) of § 989.156. This section defines a production unit. As previously mentioned, a production unit is a clearly defined geographic area with permanent boundaries (either natural or man-made). Under the RDP, producers must be able to document to the Committee the previous year's production data for that specific area by means of sales receipts or other delivery or transfer documents which indicate the creditable fruit weight delivered to handlers from that specific area. Additional criteria are specified for new production units and existing units that may have been transferred to another producer.

The Committee believes that additional information may be necessary in some cases to verify the appropriate production figure to apply to a production unit. There have been concerns that some producers have inflated their production units under past RDP's by reporting statistics showing higher than actual raisin production. For example, since diversion certificate tonnage is based on the tons of raisins delivered per acre during the prior year, producers could inflate their tonnage by acquiring raisins from another source and adding them to deliveries from their production units, thereby receiving credit for a greater amount of raisins than actually produced on the acreage. By inflating yield figures, producers could receive diversion certificates equal to more raisins from the reserve pool than they actually would have produced from those production units.

Thus, the Committee recommended that authority be added to paragraph (o) of § 989.156 authorizing Committee staff to request additional documentation to substantiate the tonnage of raisins produced on any known production unit. This documentation may include information such as tray count, employee payroll records, prior years' production for all production units, and insurance records. This information is maintained by producers in the normal course of business. Such information for approved production units, in addition to producers' other known production units, will give Committee staff another tool to ensure producer compliance with the RDP so that the integrity of the program is maintained.

This rule also continues to make minor changes to remove obsolete language in paragraph (s)(1) in § 989.156. That paragraph makes two references to provisions particular to the 1985 calendar year which marked the inception of the RDP. Certain parameters regarding dates particular to 1985 were incorporated into the order's administrative rules and regulations that are no longer necessary. Thus, those two references have been removed.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities. Accordingly, AMS has prepared this final regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 20 handlers of California raisins who are subject to regulation under the order and approximately 4,500 raisin producers in the regulated area. Small agricultural service firms have been defined by the Small Business Administration (13 CFR 121.601) as those having annual receipts of less than $5,000,000, and small agricultural producers are defined as those having annual receipts of less than $500,000. No more than 8 handlers, and a majority of producers, of California raisins may be classified as small entities. Twelve of the 20 handlers subject to regulation have annual sales estimated to be at least $5,000,000, and the remaining 8 handlers have sales less than $5,000,000, excluding receipts from any other sources.

This rule continues to modify the RDP currently authorized under § 989.56 of the Federal marketing order for California raisins. Under the RDP, the Committee issues diversion certificates to producers who have removed grapes in accordance with § 989.156 to reduce raisin production and bring raisin supplies more closely in line with market needs. Such certificates represent an amount of reserve tonnage raisins equal to the amount of raisins diverted. Diversion certificates may be submitted by producers to handlers. Handlers may then redeem such certificates for reserve pool raisins from the Committee. This rule continues to make various modifications to § 989.156 of the order's administrative rules and regulations concerning the RDP. The changes include: Removing authority for the diversion of partial production units in an RDP; removing authority for committees of industry persons to assist the Committee in compliance efforts; clarifying that spur-pruning is not the only acceptable method of aborting a crop; and making other changes to strengthen compliance with the RDP.

Regarding the impact of this rule on affected entities, the changes are designed to either improve compliance with the RDP, or are administrative in nature to bring the RDP in line with current industry practices. None of the changes concerning compliance are expected to increase the cost of administering the RDP. Also, because most of the producer applications over the years have been for full production units, rather than for partial production units, discontinuance of partial production units as part of the RDP is not expected to increase appreciably costs to producers. Moreover, the addition of other methods of diversion, like chemical application, should have a positive affect. The changes are intended to ensure equity among all those participating in the RDP and to maintain the integrity of the program. Thus, the changes are expected to be equally beneficial to all affected entities who are adhering to the requirements of the program, regardless of size.

Other alternatives to the RDP procedures were considered by the raisin industry prior to the Committee's recommendation. The Committee has an appointed Amendment Subcommittee and Working Group which held several public meetings throughout the year to consider changes to the RDP and other order provisions. One alternative considered was to leave the RDP procedures unchanged. However, the Committee concluded that the changes established by this rule were necessary to improve the RDP and better accomplish program objectives. The Working Group also considered adding to the rules and regulations a scale that would correlate production ranges with an appropriate production cap for each range, to help ensure that participating producers did not receive credit for an inflated amount of tonnage and gain a financial advantage over other participants. Another related option concerned modifying the rules and regulations to specify that the production cap should be based on a 5-year rolling average of production per acre with a maximum of 2.75 tons per acre. However, Committee staff indicated that data concerning total industry production on a per acre basis was not available, and the Working Group decided not to recommend these changes.

The Working Group also considered adding guidelines to the RDP procedures for hardship cases where producers have been denied participation in an RDP. For example, there have been cases in past seasons where producers have submitted an application to participate in an RDP, curtailed production, and then been denied a certificate from Committee staff because such producers did not satisfy the terms of the RDP (i.e., could not document their previous year's production). Under the current rules and regulations, such producers have the option of appealing such a decision to the Committee and ultimately the Department. After some deliberation, the Working Group decided not to change this appeal process by trying to specify various "what if" scenarios in the rules and regulations. The group believed it was best to address each such situation on a case-by-case basis. Ultimately, the full Committee concluded that the changes to the RDP previously discussed were appropriate at this time.

Regarding any additional reporting or recordkeeping requirements, this rule continues to allow Committee staff to request additional information from producers participating in an RDP to verify production. However, such information will only be requested on a case-by-case basis for use as a compliance tool when the information submitted on a producer's application concerning a unit's production is significantly greater than past production on the unit, production on neighboring units, or the industry norm, or when Committee staff is unable to verify production based on submitted documentation. For instance, if a producer had multiple production units of similar size, and the production on the unit to be diverted was significantly different than the others, the Committee wants its staff to be authorized to request additional information such as that mentioned to verify the accuracy of the producer application. Additional information may also be needed in cases where the production on a unit to be diverted is significantly different from that of neighboring production units. As a third example, if information obtained from weigh tags and other delivery documents provided to the Committee did not correspond to the production figure indicated on the producer's application, Committee staff may request additional information.

This rule requires no new forms and the number of producers for which additional information may be requested is expected to be small. According to the Committee staff, only about 5–10 percent of producer applications raise questions for which additional information may be needed. During the industry's diversion program in 1996 which provided for only vine removal (as opposed to allowing spur pruning), 66 producers participated. In 1995's program, which provided for spur pruning and vine removal, 778 producers participated.

Using the 778 participation figure and the 10 percent figure for questionable applications, a total of 78 producer applicants might need to provide additional information. The Committee staff estimated that it will take each of these participants about 10 minutes to compile, package, and submit this information. Thus, the time taken by the 78 participants as a group will total about 13 hours, and this time is currently approved under OMB No. 0581–0178 by the Office of Management and Budget (OMB) in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

The industry is currently implementing a diversion program for Zante Currant raisins for the 1997–98 season. The Department is monitoring producer reporting under the current diversion program.

This rule does not impose a reporting burden above that currently approved for small and large raisin producers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sectors. In addition, the Department has not identified any relevant Federal rules

VOL
63
ISS
19
JA
29
1998
UMI

that duplicate, overlap, or conflict with this rule.

Further, the Committee's meeting was widely publicized throughout the raisin industry and all interested persons were invited to attend the meeting and participate in Committee deliberations. Like all Committee meetings, the August 14, 1997, meeting was a public meeting and all entities, both large and small, were able to express their views on this issue.

Also, the Committee has a number of appointed subcommittees to review certain issues and make recommendations to the Committee. As previously mentioned, the Committee's Amendment Working Group met throughout the year at public meetings to discuss various changes to the raisin order, including the recommended changes to the RDP. The Working Group made its recommendations concerning revisions to the RDP to the Amendment Subcommittee on August 7, 1997. The Amendment Subcommittee in turn made its recommendations to the full Committee on August 14, 1997. All of these meetings were public meetings and both large and small entities were able to participate and express their views.

As stated earlier and in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the information collection requirements contained in this rule have been previously approved by the Office of Management and Budget (OMB) and have been assigned OMB No. 0581–0178.

An interim final rule concerning this action was published in the **Federal Register** on November 13, 1997. Copies of the rule were mailed by the Committee's staff to all raisin handlers. In addition, the rule was made available through the Internet by the Office of the Federal Register. That rule provided for a 60-day comment period which ended on January 12, 1998. Interested persons were also invited to submit information on the information and regulatory impact of the rule. No comments were received.

After consideration of all relevant material presented, including the Committee's recommendation, and other information, it is found that finalizing this interim final rule, as published in the **Federal Register** (62 FR 60764; November 13, 1997), will tend to effectuate the declared policy of the Act.

BILLING CODE 3410–02–P

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Part 701

Organization and Operations of Federal Credit Unions

AGENCY: National Credit Union Administration.

ACTION: Final amendment to interpretive ruling and policy statement 94–1 (IRPS 98–1).

SUMMARY: The NCUA Board is updating the requirements for a credit union converting to a community charter. The final amendment deletes the requirement that a credit union converting to a community charter provide evidence of community support, since such evidence is not necessary for the agency to determine the economic viability of the credit union.

EFFECTIVE DATE: March 1, 1998.

ADDRESSES: National Credit Union Administration, 1775 Duke Street, Alexandria, Virginia 22314–3428.

FOR FURTHER INFORMATION CONTACT: J. Leonard Skiles, President, Asset Management and Assistance Center, 4807 Spicewood Springs Road, Suite 5100, Austin, Texas 78759, or telephone (512) 795–0999; Lynn K. McLaughlin, Program Officer, Office of Examination and Insurance, 1775 Duke Street, Alexandria, Virginia 22314–3428, or telephone (703) 518–6360; Michael J. McKenna, Staff Attorney, Office of General Counsel, at the above address or telephone (703) 518–6540.

SUPPLEMENTARY INFORMATION:

A. Comments

On October 22, 1997, the NCUA Board proposed clarifying amendments on what is necessary for the approval of a community charter (62 FR 56134 (October 29, 1997)). Sixty-four comments were received. Comments were received from forty-two federal credit unions, two state-chartered credit unions, thirteen state credit union leagues, four national credit union trade associations, one state regulatory agency, one consumer group and one banking association.

B. Serving All Segments of the Community

In the proposal, the Board stated that all community charters must be prepared to serve all segments of the community. The Board suggested that membership and loan penetration rates, among other factors, could be reviewed to assess how well the credit union is serving the entire community. The proposal also would have required that a credit union receiving a community charter review its business plan regularly, as well as membership and loan penetration rates throughout the community, to determine if the community is being adequately served. The Board specifically proposed that a new community charter or a credit union converting to a community charter be held accountable for its business plan/marketing strategy outlining how it will serve the entire community. The proposal also would have required that a credit union converting to a community charter provide information on the groups being served. Finally, the Board proposed deleting the requirement that a credit union converting to a community charter provide written evidence of community support such as letters of support, petitions or surveys.

At this time, the Board is addressing only one aspect of the proposal regarding credit unions converting to a community charter. The Board needs further time to study the remaining proposed amendments to ensure that they are necessary and will not unduly burden credit unions. The Board plans on addressing these issues in the near future and will respond to the issues raised by the commenters at that time.

C. Written Evidence of Community Support

As stated above, the Board proposed deleting the requirement that a credit union converting to a community charter provide written evidence of community support such as letters of support, petitions or surveys. Twenty-nine commenters do not believe a credit union applying to convert to a community charter should be required to provide evidence of community support. Most of these commenters find the current requirement to be burdensome. Seven commenters specifically stated that the validity of these documents is questionable and the effort to obtain such documentation is time-consuming and expensive. Some commenters believe that community leaders are reluctant to give support because they fear a backlash from banks. Three commenters support any action by NCUA to simplify the application process and reduce the processing time for community charter conversions. Most of these commenters believe that credit union management is better able to gauge the depth of community support than a petition or survey. Two commenters stated that a letter from the board of directors showing evidence of the attitude of the credit union's sponsors and members toward a conversion should be sufficient documentation. One commenter stated that the elimination of this requirement offers modest relief from the burden of providing information in support of the conversion request.

Ten commenters believe a credit union applying to convert to a community charter should be required to provide evidence of community support before the conversion can be approved. Two commenters believe this evidence is a key element to any good marketing plan and would provide the credit union with valuable information about its new market as well as an introduction to potential new constituencies. These commenters state further that this evidence is useful to NCUA in making its determination whether the applied for area actually constitutes a community. One commenter also believes this evidence helps build a substantial administrative record in case of a legal challenge. One commenter believes that credit unions wishing to convert to a community charter should be required to demonstrate community support in a manner validating the credit union's business plan. One commenter, although opposing this amendment, believes that, if we delete this requirement for converting credit unions, we should also eliminate it for new credit unions.

The NCUA Board believes that providing evidence of written support is expensive, burdensome and not a reliable indicator of the economic viability of the converting credit union. Such evidence is still needed for a new charter so that the agency may accurately determine the economic viability of the new credit union. Economic viability of an existing credit union is self-evident. Furthermore, a converting credit union can still submit such evidence if it believes it would be helpful to demonstrate that the area is a well-defined community where residents interact or will support some other aspect of the credit union's business plan or marketing strategy.

The final amendment deletes the requirement for a converting credit union to provide written evidence of community support. Nothing in this final amendment changes or relaxes the requirement that a credit union converting to a community charter must demonstrate that the proposed community is a well-defined area where residents interact.

D. Groups Outside the Community

The Board also proposed to eliminate the ability of a credit union converting to a community charter to continue to serve groups outside the new community boundaries. At this time, the Board is still considering the implications of such a policy change. As a practical matter, because of the injunction issued in the consolidated cases of *First National Bank and Trust Co., et al.* v. *NCUA* and the *American Bankers Association* v. *NCUA, et al.*, which was partially stayed by the Court of Appeals on December 24, 1996, a credit union converting to a community charter cannot continue to serve groups outside the new community boundaries, but may only serve members of record. The Board plans on addressing this issue in the near future and will respond to the concern raised by the commenters at that time.

E. Ongoing Litigation

Five commenters did not believe that this is the appropriate time to initiate changes to field of membership policies, because of the ongoing litigation involving multiple group credit unions. NCUA disagrees since NCUA's community chartering policy is not affected by the injunction issued in the consolidated cases of *First National Bank and Trust Co., et al.* v. *NCUA* and the *American Bankers Association* v. *NCUA, et al.*, which was partially stayed by the Court of Appeals on December 24, 1996. Nor would other ongoing chartering litigation be affected because this change in policy modifies only the requirement for evidence of support for conversion to a community charter, not the requirement for evidence that the community to be served is a "well-defined community."

The NCUA Board believes it is necessary to address the documentation requirements for converting credit unions because questions regarding cost and value have been raised during NCUA Board review of requests by credit unions converting to community charters. The NCUA Board has not been provided with any compelling rationale that would justify a delay in amending this aspect of community chartering policy at this time.

F. Regulatory Procedures

Regulatory Flexibility Act

The Regulatory Flexibility Act requires NCUA to prepare an analysis to describe any significant economic impact a regulation may have on a substantial number of small credit unions (primarily those under $1 million in assets). The final amendment will not have a significant economic impact on a substantial number of small credit unions and therefore a regulatory flexibility analysis is not required.

Paperwork Reduction Act

NCUA has determined that the final amendment does not increase paperwork requirements under the Paperwork Reduction Act of 1995 and regulations of the Office of Management and Budget (OMB). 60 FR 44978 (August 29, 1995).

Executive Order 12612

Executive Order 12612 requires NCUA to consider the effect of its actions on state interests. This final amendment makes no significant changes with respect to state credit unions and therefore, will not materially affect state interests.

Congressional Review

Awaiting OMB determination.

List of Subjects in 12 CFR Part 701

Credit, Credit unions, Reporting and recordkeeping requirements.

By the National Credit Union Administration Board on January 22, 1998.

Becky Baker,

Secretary of the Board.

Accordingly, NCUA amends 12 CFR part 701 as follows:

PART 701—ORGANIZATION AND OPERATION OF FEDERAL CREDIT UNIONS

1. The authority citation for part 701 continues to read as follows:

Authority: 12 U.S.C. 1752(5), 1755, 1756, 1757, 1759, 1761a, 1761b, 1766, 1767, 1782, 1784, 1787, 1789. Section 701.6 is also authorized by 31 U.S.C. 3717. Section 701.31 is also authorized by 12 U.S.C. 1601 *et seq.*, 42 U.S.C. 1981 and 3601–3610. Section 701.35 is also authorized by 12 U.S.C. 4311–4312.

2. Section 701.1 is revised to read as follows:

VOL
63
ISS
19
JA
29
1998
UMI

§ 701.1 Federal credit union chartering, field of membership modifications, and conversions.

National Credit Union Administration policies concerning chartering, field of membership modifications, and conversions are set forth in Interpretive Ruling and Policy Statement 94–1, Chartering and Field of Membership Policy (IRPS 94–1), as amended by IRPS 96–1 and IRPS 98–1. Copies may be obtained by contacting NCUA at the address found in § 792.2(g)(1) of this chapter. The combined IRPS are incorporated into this section.

(Approved by the Office of Management and Budget under control number 3133–0015.)

IRPS 94–1—[Amended]

Note: The text of the Interpretive Ruling and Policy Statement (IRPS 94–1) does not, and the following amendments will not, appear in the Code of Federal Regulations.

3. IRPS 94–1, Chapter 1, Section II.C.2 is amended by removing the words "field of membership expansion or conversion to a community credit union".

4. In IRPS 94–1, Chapter 2, Section IV.B is revised to read as follows:

* * * * *

IV.B—Conversion to Community Charter

An existing occupational, associational, or multiple group federal credit union may apply to convert to a community charter. In most cases, groups currently in the credit union's field of membership but outside the new community credit union's boundaries may be included in the new community charter.

In order to support a case for a conversion to community charter, the applicant federal credit union must, in addition to the requirements for a community charter set forth in Chapter I (except for the requirement to demonstrate community support), develop a detailed business plan which may include, but not be limited to the following data:

- Current financial statements, including the income statement and a summary of loan delinquency;
- A map or maps showing both the existing and proposed boundaries for the field of membership, as well as existing and planned service facilities;
- A written description of the area of community service for the proposed community credit union;
- The most current population figures for the existing and proposed boundaries;
- The source of the population information (census data are considered the most authoritative); the greater the population of the proposed area, the greater justification necessary to support the existence of the "community" and interaction among its residents;
- Evidence that the proposed area is a "community" as defined in "Community Common Bond" in Chapter 1;
- Information concerning the availability of financial services to the residents of the new area;
- A list of credit unions with a home or branch office in the proposed area (If present credit union service to the residents of the new area is adequate, there may be no basis for the proposed conversion.);
- The attitude of the current credit union sponsors and existing credit union members toward the proposed conversion; and
- The anticipated financial impact on the credit union in terms of need for additional employees and fixed assets.

BILLING CODE 7535–01–U

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 97–NM–293–AD; Amendment 39–10295; AD 98–03–03]

RIN 2120–AA64

Airworthiness Directives; Airbus Model A330 and A340 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Airbus Model A330 and A340 series airplanes. This action requires a one-time inspection of the free-fall actuators of the landing gear for discrepancies, and replacement of discrepant actuators with new, improved actuators. This action also requires eventual replacement of certain free-fall actuators. This amendment is prompted by the issuance of mandatory continuing airworthiness information by a foreign civil airworthiness authority. The actions specified by this AD are intended to prevent electrical short circuits to the free-fall actuators of the landing gear, which could result in failure to extend the landing gear, and consequent damage to the airplane structure during landing.

DATES: Effective February 13, 1998.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of February 13, 1998.

Comments for inclusion in the Rules Docket must be received on or before March 2, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 97–NM–293–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

The service information referenced in this AD may be obtained from Airbus Industrie, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Norman B. Martenson, Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2110; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION: The Direction Générale de l'Aviation Civile (DGAC), which is the airworthiness authority for France, notified the FAA that an unsafe condition may exist on certain Airbus Model A330 and A340 series airplanes. The DGAC advises that, during several attempted free-fall extensions of the landing gear, electrical short circuits and circuit breaker overloads have occurred. The cause of the short circuits was attributed to installation of incorrect screws in the motor brush housing of the free-fall actuators during manufacture. This condition, if not corrected, could result in electrical short circuits to the free-fall actuators of the landing gears, which could result in failure to extend the landing gear, and consequent damage to the airplane structure during landing.

Explanation of Relevant Service Information

Airbus has issued Service Bulletins A340–32–4066, Revision 1, and A340–32–3042, Revision 1, both dated September 19, 1995, which describe procedures for a one-time inspection of the free-fall actuators of the landing gear to ensure that no electrical short circuit occurs, and to ensure that replacement free-fall actuators having correct serial numbers are installed. The service bulletins also describe procedures for eventual replacement of certain actuators with new, improved actuators. The DGAC classified these service bulletins as mandatory and issued French airworthiness directives 95–187–020(B) and 95–189–032(B), both dated September 27, 1995, in order to assure the continued airworthiness of these airplanes in France.

FAA's Conclusions

These airplane models are manufactured in France and are type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.19) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the DGAC has kept the FAA informed of the situation described above. The FAA has examined the findings of the DGAC, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Explanation of Requirements of the Rule

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, this AD requires accomplishment of the actions specified in the service bulletins described previously.

Cost Impact

None of the Airbus Model A330 and A340 series airplanes affected by this action are on the U.S. Register. All airplanes included in the applicability of this rule currently are operated by non-U.S. operators under foreign registry; therefore, they are not directly affected by this AD action. However, the FAA considers that this rule is necessary to ensure that the unsafe condition is addressed in the event that any of these subject airplanes are imported and placed on the U.S. Register in the future.

Should an affected airplane be imported and placed on the U.S. Register in the future, it would require approximately 3 work hours per airplane to accomplish the inspection, at an average labor rate of $60 per work hour. Based on these figures, the cost impact of the inspection would be $180 per airplane.

It would require approximately 16 to 28 work hours (depending upon airplane configuration) to accomplish the replacement, at an average labor rate of $60 per work hour. Required parts would be supplied by the manufacturer at no cost to operators. Based on these figures, the cost impact of the replacement on U.S. operators is estimated to be between $960 and $1,680 per airplane.

Determination of Rule's Effective Date

Since this AD action does not affect any airplane that is currently on the U.S. register, it has no adverse economic impact and imposes no additional burden on any person. Therefore, prior notice and public procedures hereon are unnecessary and the amendment may be made effective in less than 30 days after publication in the **Federal Register**.

Comments Invited

Although this action is in the form of a final rule and was not preceded by notice and opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES**. All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 97–NM–293–AD." The postcard will be date stamped and returned to the commenter.

Regulatory Impact

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

98–03–03 Airbus Industrie: Amendment 39–10295. Docket 97–NM–293–AD.

Applicability: Model A330 series airplanes, as listed in Airbus Service Bulletin A330–32–3042, Revision 1, dated September 19, 1995; and Model A340 series airplanes, as listed in Airbus Service Bulletin A340–32–4066, Revision 1, dated September 19, 1995; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (d) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent electrical short circuits to the free-fall actuators of the landing gear, which could result in failure to extend the landing gear, and consequent damage to the airplane structure during landing, accomplish the following:

(a) Within 500 flight hours after the effective date of this AD, inspect the free-fall actuators of the landing gear for

VOL 63 ISS 19 JA 29 1998 UMI

discrepancies, in accordance with Airbus Service Bulletin A330–32–3042, Revision 1 (for Model A330 series airplanes), or A340–32–4066, Revision 1 (for Model A340 series airplanes), both dated September 19, 1995; as applicable. Prior to further flight, replace any discrepant actuator with a new, improved actuator in accordance with the applicable service bulletin.

Note 2: Airbus Service Bulletins A330–32–3042 and A340–32–4066 both reference LUCAS AEROSPACE Alert Service Bulletin AR024–A32–001, dated July 28, 1995, as an additional source of service information.

(b) Within 15 months after the effective date of this AD, replace any free-fall actuator having a serial number specified in Airbus Service Bulletin A330–32–3042, Revision 1 (for Model A330 series airplanes) or A340–32–4066, Revision 1 (for Model A340 series airplanes), both dated September 19, 1995, with a new, improved actuator in accordance with the applicable service bulletin.

(c) As of the effective date of this AD, no person shall install on any airplane a free-fall actuator, type AR02403, AR02404, or AR02405 having a serial number specified in Lucas Aerospace Limited Service Bulletin AR024–A32–001, dated July 28, 1995.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, International Branch, ANM–116.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the International Branch, ANM–116.

(e) Special flight permits may be issued in accordance with §§ 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(f) The actions shall be done in accordance with the following Airbus service bulletins, which contain the specified list of effective pages:

Service Bulletin Referenced and Date	Page Number	Revision Level Shown on Page	Date Shown on Page
A330–32–3042, ...	1–4, 9, 11, 13	1	September 19, 1995
Revision 1, September 19, 1995	5–8, 10, 12, 14.	Original.	August 2, 1995
A340–32–4066, ...	1–5, 11, 13, 15	1	September 19, 1995
Revision 1, September 19, 1995	6–10, 12, 14, 16.	Original.	August 2, 1995

This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Airbus Industrie, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

Note 4: The subject of this AD is addressed in French airworthiness directives 95–187–020(B) and 95–189–032(B), both dated September 27, 1995.

(g) This amendment becomes effective on February 13, 1998.

Issued in Renton, Washington, on January 21, 1998.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 97–ACE–35]

Amendment to Class D and Class E Airspace; Salina, KS

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Direct final rule; request for comments.

SUMMARY: This action amends Class D and Class E airspace areas at Salina, KS. The current description indicates part-time operation for the Class E airspace area at Salina Municipal Airport, Salina, KS. The actual hours of operation for the Class E airspace area are continuous. The Class E airspace area description at Salina, KS, is revised to indicate the area is in effect continuously. A review of the airspace for Salina Municipal Airport indicates it does not meet the criteria for 700 feet Above Ground Level (AGL) Class E airspace as required in FAA Order 7400.2D. A revision to the Airport Reference Point (ARP) is included in this document. The intended effect of this amendment is to indicate the Class E airspace area is in effect continuously, comply with the criteria of FAA Order 7400.2D, and amend the ARP for the Class D and Class E airspace areas.

DATES: *Effective date:* 0901 UTC, April 23, 1998.

Comment date: Comments for inclusion in the Rules Docket must be received on or before March 2, 1998.

ADDRESSES: Send comments in triplicate to the Federal Aviation Administration (FAA), Manager, Airspace Branch, Air Traffic Division, (ACE–520), Attention: Rules Docket Number 97–ACE–35, 601 East 12th Street, Kansas City, MO 64106.

The official docket may be examined in the Office of the Regional Counsel for the Central Region at the same address between 9:00 a.m. and 3:00 pm., Monday through Friday, except Federal holidays. An informal docket may also be examined during normal business hours in the Air Traffic Division at the same address listed above.

FOR FURTHER INFORMATION CONTACT: Kathy Randolph, Air Traffic Division, Airspace Branch, ACE–520C, Federal Aviation Administration, 601 East 12th Street, Kansas City, MO 64106; telephone: (816) 426–3408.

SUPPLEMENTARY INFORMATION: This amendment to 14 CFR part 71 amends the Class D and Class E airspace at Salina Municipal Airport, Salina, KS. The Class E airspace is amended by removing the statement which indicates part-time status. The Class E airspace area description does not reflect the actual hours of operation, which are continuous. This action will amend the description for the Class E airspace area at Salina Municipal Airport, Salina, KS, to indicate the area is in effect continuously. A review of the airspace for Salina Municipal Airport indicates it does not meet the criteria for 700 feet AGL Class E airspace area as required in FAA Order 7400.2D. The criteria in FAA Order 7400.2D for an aircraft to reach 1200 feet AGL is based on a standard climb gradient of 200 feet per mile, plus the distance from the ARP to the end of the outermost runway.

Any fractional part of a mile is converted to the next higher tenth of a mile increment. The Class E 700 feet AGL airspace area has been enlarged to conform to the criteria of FAA Order 7400.2D. This action will also amend the ARP for the Class D and Class E airspace areas, at Salina, KS. The areas will be depicted on appropriate aeronautical charts. Class D airspace areas are published in paragraph 5000, Class E airspace areas designated as a surface area for an airport are published in paragraph 6002, Class E airspace areas designated as an extension to a Class D or Class E surface area are published in paragraph 6004, and Class E airspace areas extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005, of FAA Order 7400.9E, dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the order.

The Direct Final Rule Procedure

The FAA anticipates that this regulation will not result in adverse or negative comment and, therefore, is issuing it as a direct final rule. Previous actions of this nature have not been controversial and have not resulted in adverse comments or objections. The amendment will enhance safety for all flight operations by designating an area where VFR pilots may anticipate the presence of IFR aircraft at lower altitudes, especially during inclement weather conditions. A greater degree of safety is achieved by depicting the area on aeronautical charts. Unless a written adverse or negative comment, or a written notice of intent to submit an adverse or negative comment is received within the comment period, the regulation will become effective on the date specified above. After the close of the comment period, the FAA will publish a document in the **Federal Register** indicating that no adverse or negative comments were received and confirming the date on which the final rule will become effective. If the FAA does receive, within the comment period, an adverse or negative comment, or written notice of intent to submit such a comment, a document withdrawing the direct final rule will be published in the **Federal Register**, and a notice of proposed rulemaking may be published with a new comment period.

Comments Invited

Although this action is in the form of a final rule and was not preceded by a notice of proposed rulemaking, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES.** All communications received on or before the closing date for comments will be considered, and this rule may be amended or withdrawn in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of this action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, aeronautical, environmental, and energy-related aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this action will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 97–ACE–35." The postcard will be date stamped and returned to the commenter.

Agency Findings

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Therefore the FAA has determined that this regulation is noncontroversial and unlikely to result in adverse or negative comments. For the reasons discussed in the preamble, I certify that this regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034, February 26, 1979), and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

Accordingly, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9E, Airspace Designations and Reporting Points, dated September 10, 1997, and effective September 16, 1997, is amended as follows:

Paragraph 5000 Class D airspace.

* * * * * *

ACE KS D Salina, KS [Revised]

Salina Municipal Airport, KS
(Lat. 38°47′29″ N., long. 97°39′02″ W.)

That airspace extending upward from the surface to and including 3,800 feet MSL within a 4.9-mile radius of Salina Municipal Airport. The Class D airspace area is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airport/Facility Directory.

* * * * * *

Paragraph 6002 Class E airspace areas designated as a surface area for an airport.

* * * * * *

ACE KS E2 Salina, KS [Revised]

Salina Municipal Airport, KS
(Lat. 38°47′29″ N., long. 97°39′02″ W.)

Within a 4.9-mile radius of Salina Municipal Airport.

14 CFR Part 71

[Airspace Docket No. 97–ACE–36]

Amendment to Class D and Class E Airspace; Topeka, Philip Billard Municipal Airport, KS

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Direct final rule; request for comments.

SUMMARY: This action amends Class D and Class E airspace areas at Topeka, Philip Billard Municipal Airport, KS. The current description indicates part-time operation for the Class E airspace area at Topeka, Philip Billard Municipal Airport, KS. The actual hours of operation for the Class E airspace area are continuous. The Class E airspace area description at Topeka, Philip Billard Municipal Airport, KS, is revised to indicate the area is in effect continuously. A revision to the Airport Reference Point (ARP) is included in this document. The intended effect of this amendment is to indicate the Class E airspace area is in effect continuously, and amend the ARP for the Class D and Class E airspace areas.

DATES: *Effective date:* 0901 UTC, April 23, 1998.

Comment date: Comments for inclusion in the Rules Docket must be received on or before March 2, 1998.

ADDRESSES: Send comments in triplicate to the Federal Aviation Administration (FAA), Manager, Airspace Branch, Air Traffic Division (ACE–520), Attention: Rules Docket Number 97–ACE–36, 601 East 12th Street, Kansas City, MO 64106.

The official docket may be examined in the Office of the Regional Counsel for the Central Region at the same address between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

An informal docket may also be examined during normal business hours in the Air Traffic Division at the same address listed above.

FOR FURTHER INFORMATION CONTACT: Kathy Randolph, Air Traffic Division, Airspace Branch, ACE–520C, Federal Aviation Administration, 601 East 12th Street, Kansas City, MO 64106; telephone: (816) 426–3408.

SUPPLEMENTARY INFORMATION: This amendment to 14 CFR part 71 amends the Class D and Class E airspace at Topeka, Philip Billard Municipal Airport, KS. The Class E airspace is amended by removing the statement which indicates part-time status. The Class E airspace area description does not reflect the actual hours of operation, which are continuous. This action will amend the description for the Class E airspace area at Topeka, Philip Billard Municipal Airport, KS, to indicate the area is in effect continuously. This action will also amend the ARP for the Class D and Class E airspace areas at Topeka, Philip Billard Municipal Airport, KS. The Class D and Class E airspace areas will be depicted on appropriate aeronautical charts. Class D airspace areas are published in paragraph 5000, Class E airspace areas designated as a surface area for an airport are published in paragraph 6002, and Class E airspace areas designated as an extension to a Class D or Class E surface area are published in paragraph 6004, of FAA Order 7400.9E, dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class D and Class E airspace designations listed in this document will be published subsequently in the Order.

The Direct Final Rule Procedure

The FAA anticipates that this regulation will not result in adverse or negative comment and, therefore, is issuing it as a direct final rule. Previous actions of this nature have not been controversial and have not resulted in adverse comments or objections. The amendment will enhance safety for all flight operations by designating an area where VFR pilots may anticipate the presence of IFR aircraft at lower altitudes, especially during inclement weather conditions. A greater degree of safety is achieved by depicting the area on aeronautical charts. Unless a written adverse or negative comment, or a written notice of intent to submit an adverse or negative comment is received within the comment period, the regulation will become effective on the date specified above. After the close of the comment period, the FAA will publish a document in the **Federal Register** indicating that no adverse or negative comments were received and confirming the date on which the final rule will become effective. If the FAA does receive, within the comment period, an adverse or negative comment, or written notice of intent to submit such a comment, a document withdrawing the direct final rule will be published in the **Federal Register**, and a notice of proposed rulemaking may be published with a new comment period.

Comments Invited

Although this action is in the form of a final rule and was not preceded by a notice of proposed rulemaking, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES**. All communications received on or before the closing date for comments will be considered, and this rule may be amended or withdrawn in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of this action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, aeronautical, environmental, and energy-related aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this action will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made. "Comments to Docket No. 97–ACE–36." The postcard will be date stamped and returned to the commenter.

Agency Findings

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Therefore the FAA has determined that this regulation is noncontroversial and unlikely to result in adverse or negative comments. For the reasons discussed in the preamble, I certify that this regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

Accordingly, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9E, Airspace Designations and Reporting Points, dated September 10, 1997, and effective September 16, 1997, is amended as follows:

Paragraph 5000 Class D airspace.

* * * * *

ACE KS D Topeka, Philip Billard Municipal Airport, KS [Revised]

Topeka, Philip Billard Municipal Airport, KS
(Lat. 39°04'07" N., long. 95°37'21" W.)
Topeka Forbes Field, KS
(Lat. 38°57'01" N., long. 95°39'51" W.)

That airspace extending upward from the surface to and including 3,400 feet MSL within a 4-mile radius of Philip Billard Municipal Airport, excluding that airspace within the Topeka Forbes Field, KS, Class D airspace area. This Class D airspace area is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airport/Facility Directory.

* * * * *

Paragraph 6002 Class E airspace areas designated as a surface area for an airport.

* * * * *

ACE KS E2 Topeka, Philip Billard Municipal Airport, KS [Revised]

Topeka, Philip Billard Municipal Airport, KS
(Lat. 39°04'07" N., long. 95°37'21" W.)
Topeka Forbes Field, KS
(Lat. 38°57'01" N., long. 95°39'51" W.)

Within a 4-mile radius of Philip Billard Municipal Airport, excluding that airspace within the Topeka Forbes Field, KS, Class D and E airspace areas.

14 CFR Part 71

[Airspace Docket No. 97–AEA–26]

Amendment to Class E Airspace; Wellsboro, PA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends Class E airspace extending upward from 700 feet Above Ground Level (AGL) at Wellsboro, PA. The development of a Global Positioning System (GPS) Standard Instrument Approach Procedure (SIAP) to Runway (RWY) 28 and the amendment of the VHF Omnidirectional Radio Range (VOR)/GPS A SIAP at Grand Canyon State Airport have made this action necessary. This action is intended to provide adequate Class E airspace to contain instrument flight rules (IFR) operations for aircraft executing the GPS RWY 28 SIAP and the VOR/GPS A SIAP to Grand Canyon State Airport at Wellsboro, PA.

EFFECTIVE DATE: 0901 UTC, April 23, 1998.

FOR FURTHER INFORMATION CONTACT: Mr. Francis Jordan, Airspace Specialist, Airspace Branch, AEA–520, Air Traffic Division, Eastern Region, Federal A'viation Administration, Federal Building #111, John F. Kennedy International Airport, Jamaica, New York 11430; telephone: (718) 553–4521.

SUPPLEMENTARY INFORMATION:

History

On October 17, 1997, a proposal to amend 14 CFR Part 71 to modify the Class E airspace at Wellsboro, PA, was published in the **Federal Register** (62 FR 53982). The development of a GPS RWY 28 SIAP and the amendment of the VOR/GPS A SIAP for Grand Canyon State Airport require the amendment of the Class E airspace at Wellsboro, PA. The proposal was to amend controlled airspace extending upward from 700 feet AGL to contain IFR operations in controlled airspace during portions of the terminal operation and while transitioning between the enroute and terminal environments.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments to the proposal were received. The rule is adopted as proposed.

VOL 63 ISS 19 JA 29 1998 UMI

The coordinates for this airspace docket are based on North American Datum 83. Class E airspace areas designations for airspace extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9E, dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to 14 CFR Part 71 modifies Class E airspace at Wellsboro, PA, to provide controlled airspace extending upward from 700 feet AGL for aircraft executing the GPS RWY 28 SIAP and VOR/GPS A SIAP to Grand Canyon State Airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigations it is certified that this rule will not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR Part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for 14 CFR Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; EO 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9E, Airspace Designations and Reporting Points, dated September 10, 1997, and effective September 16, 1997, is amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

[Airspace Docket No. 97–ACE–34]

Revocation, Establishment, and Modification of Class E Airspace Areas; Cedar Rapids, IA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Direct final rule; request for comments.

SUMMARY: This action revokes the Class E surface area airspace designated "Cedar Rapids Municipal Airport, IA," and establishes a larger Class E surface airspace area in its place designated "Cedar Rapids, The Eastern Iowa Airport, IA." The name of the Cedar Rapids Municipal Airport has been changed to the Eastern Iowa Airport. In order to rename the Class E surface area, it is necessary to revoke the existing airspace designation, and to reestablish the airspace under the new designation. This action also increases the size of both the Class E surface area, and the Cedar Rapids Class E airspace area extending upward from 700 feet above ground level (AGL). The additional controlled airspace is necessary to accommodate two new Global Positioning System (GPS) standard instrument approach procedures (SIAP) which have been established to serve The Eastern Iowa Airport.

DATES: *Effective date:* 0901 UTC, April 23, 1998.

Comment date: Comments for inclusion in the Rule Docket must be received on or before March 2, 1998.

ADDRESSES: Send comments regarding the rule in triplicate to: Federal Aviation (FAA), Manager, Airspace Branch, Air Traffic Division, (ACE–520), Attention: Rules Docket Number 97–ACE–34, 601 East 12th Street, Kansas City MO 64106.

The official docket may be examined in the Office of the Regional Counsel for the Central Region at the same address between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

An informal docket may also be examined during normal business hours in the Air Traffic Division at the same address listed above.

FOR FURTHER INFORMATION CONTACT: Kathy Randolph, Air Traffic Division, Airspace Branch, ACE–520C, Federal Aviation Administration, 601 East 12th Street, Kansas City, MO 64106; telephone: (816) 426–3408.

SUPPLEMENTARY INFORMATION: The FAA has developed GPS RWY 13 and GPS RWY 31 SIAPs to serve The Eastern Iowa Airport, Cedar Rapids, IA. The amendment to Class E airspace at Cedar Rapids, IA, will provide additional controlled airspace from the surface, and at and above 700 feet AGL in order to contain the new SIAPs within controlled airspace, and thereby facilitate separation of aircraft operating under Instrument Flight Rules (IFR). The areas will be depicted on appropriate aeronautical charts. Class E airspace areas designated as surface area for an airport are published in paragraph 6002, and Class E airspace areas extending from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9E, dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

The Direct Final Rule Procedure

The FAA anticipates that this regulation will not result in adverse or negative comment and, therefore, is issuing it as a direct final rule. Previous actions of this nature have not been controversial and have not resulted in adverse comments or objections. The amendment will enhance safety for all flight operations by designating an area the VFR pilots may anticipate the presence of IFR aircraft at lower altitudes, especially during inclement weather conditions. A greater degree of safety is achieved by depicting the area on aeronautical charts. Unless a written adverse or negative comment, or a written notice of intent to submit an adverse or negative comment is received within the comment period, the regulation will become effective on the date specified above. After the close of the comment period, the FAA will publish a document in the **Federal Register** indicating that no adverse or negative comments were received and confirming the date on which the final rule will become effective. If the FAA does receive, within the comment period, an adverse or negative comment, or written notice of intent to submit such a comment, a document withdrawing the direct final rule will be published in the **Federal Register**, and a notice of proposed rulemaking may be published with a new comment period.

Comments Invited

Although this action is in the form of a final rule and was not preceded by a notice of proposed rulemaking, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket Number and be submitted in triplicate to the address specified under the caption **ADDRESSES.** All communications received on or before the closing date for comments will be considered, and this rule may be amended or withdrawn in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of this action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, aeronautical, environmental, and energy-related aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this action will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in responses to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 97–ACE–34." The postcard will be date stamped and returned to the commenter.

Agency Findings

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is noncontroversial and unlikely to result in adverse or negative comments. For the reasons discussed in the preamble, I certify that this regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11035, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

[Airspace Docket No. 97–ACE–37]

Amendment to Class E Airspace; Iola, KS

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Direct final rule; request for comments.

SUMMARY: This amendment modifies the Class E airspace area at Allen County Airport, Iola, KS. The FAA has developed Global Positioning System (GPS) Runway (RWY) 1 and RWY 19 Standard Instrument Approach Procedures (SIAPs) to serve the Allen County Airport, Iola, KS. Additional controlled airspace 700 feet Above Ground Level (AGL) is needed to accommodate these SIAPs. The intended effect of this rule is to provide controlled Class E airspace for aircraft executing the GPS RWY 1 and GPS RWY 19 SIAPs.

DATES: *Effective date.* 0901 UTC, April 23, 1998.

Comment date: Comments for inclusion in the Rules Docket must be received on or before March 2, 1998.

VOL 63 ISS 19 JA 29 1998 UMI

ADDRESSES: Send comments regarding the rule in triplicate to: Federal Aviation Administration (FAA), Manager, Airspace Branch, Air Traffic Division, ACE–520, Attention: Rules Docket Number 97–ACE–37, 601 East 12th Street, Kansas City, MO 64106.

The official docket may be examined in the Office of the Regional Counsel for the Central Region at the same address between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

An informal docket may also be examined during normal business hours in the Air Traffic Division at the same address listed above.

FOR FURTHER INFORMATION CONTACT: Kathy Randolph, Air Traffic Division, Airspace Branch, ACE–520C, Federal Aviation Administration, 601 East 12th Street, Kansas City, MO 64106; telephone: (816) 426–3408.

SUPPLEMENTARY INFORMATION: The FAA has developed GPS RWY 1 and GPS RWY 19 SIAPs to serve the Allen County Airport, Iola, KS. The amendment to Class E airspace at Iola, KS, will provide additional controlled airspace at and above 700 feet AGL in order to contain the new SIAPs within controlled airspace, and thereby facilitate separation of aircraft operating under Instrument Flight Rules (IFR). The area will be depicted on appropriate aeronautical charts. Class E airspace areas extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9E, dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Direct Final Rule Procedure

The FAA anticipates that this regulation will not result in adverse or negative comment and, therefore, is issuing it as a direct final rule. Previous actions of this nature have not been controversial and have not resulted in adverse comments or objections. The amendment will enhance safety for all flight operations by designating an area where VFR pilots may anticipate the presence of IFR aircraft at lower altitudes, especially during inclement weather conditions. A greater degree of safety is achieved by depicting the area on aeronautical charts. Unless a written adverse or negative comment, or a written notice of intent to submit an adverse or negative comment is received within the comment period, the regulation will become effective on the date specified above. After the close of the comment period, the FAA will publish a document in the **Federal Register** indicating that no adverse or negative comments were received and confirming the date on which the final rule will become effective. If the FAA does receive, within the comment period, an adverse or negative comment, or written notice of intent to submit such a comment, a document withdrawing the direct final rule will be published in the **Federal Register** and a notice of proposed rulemaking may be published with a new comment period.

Comments Invited

Although this action is in the form of a final rule and was not preceded by a notice of proposed rulemaking, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES**. All communications received on or before the closing date for comments will be considered, and this rule may be amended or withdrawn in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of this action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, aeronautical, environmental, and energy-related aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this action will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 97–ACE–37." The postcard will be date stamped and returned to the commenter.

Agency Findings

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is noncontroversial and unlikely to result in adverse or negative comments. For the reasons discussed in the preamble, I certify that this regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

[Airspace Docket No. 97–AEA–39]

Amendment to Class E Airspace; Syracuse, NY

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends Class E airspace extending upward from 700 feet Above Ground Level (AGL) at Syracuse, NY. The development of Global Positioning System (GPS) Standard Instrument Approach Procedures (SIAP) at Syracuse Hancock International Airport has made this action necessary. This action is intended to provide adequate Class E airspace to contain instrument flight rules (IFR) operations for aircraft executing the GPS Runway (RWY) 10 SIAP, the GPS RWY 14 SIAP, the GPS RWY 28 SIAP, and the GPS RWY 32 SIAP to Syracuse Hancock International Airport at Syracuse, NY.

EFFECTIVE DATE: 0901 UTC, April 23, 1998.

FOR FURTHER INFORMATION CONTACT: Mr. Francis Jordan, Airspace Specialist, Airspace Branch, AEA–520, Air Traffic Division, Eastern Region, Federal Aviation Administration, Federal Building #111, John F. Kennedy International Airport, Jamaica, New York, 11430; telephone: (718) 553–4521.

SUPPLEMENTARY INFORMATION:

History

On October 17, 1997, a proposal to amend 14 CFR Part 71 to modify the Class E airspace at Syracuse, NY, was published in the **Federal Register** (62 FR 53985). The development of a GPS RWY 10 SIAP, a GPS RWY 14 SIAP, a GPS RWY 28, and a GPS RWY 32 SIAP for Syracuse Hancock International Airport requires an amendment to the Class E airspace at Syracuse, NY. The proposal was to amend controlled airspace extending upward from 700 feet AGL to contain IFR operations in controlled airspace during portions of the terminal operation and while transitioning between the enroute and terminal environments.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments to the proposal were received. The rule is adopted as proposed.

The coordinates for this airspace docket are based on North American Datum 83. Class E airspace areas designations for airspace extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9E, dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to 14 CFR Part 71 modifies Class E airspace at Syracuse, NY, to provide controlled airspace extending upward from 700 feet AGL for aircraft executing the GPS RWY 10 SIAP, the GPS RWY 14, the GPS RWY 28, and the GPS RWY 32 SIAP to Syracuse Hancock International Airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for 14 CFR Part 71 continues to read as follows:

Establishment of Class E Airspace; Ticonderoga, NY

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action establishes Class E airspace extending upward from 700 feet Above Ground Level (AGL) at Ticonderoga, NY. The development of Global Positioning System (GPS) Standard Instrument Approach Procedures (SIAP) at Ticonderoga Municipal Airport has made this action necessary. This action is intended to provide adequate Class E airspace to

VOL 63 ISS 19 JA 29 1998 UMI

contain instrument flight rules (IFR) operations for aircraft executing the GPS Runway (RWY) 20 SIAP and the GPS RWY 2 SIAP to Ticonderoga Municipal Airport at Ticonderoga, NY.

EFFECTIVE DATE: 0901 UTC, April 23, 1998.

FOR FURTHER INFORMATION CONTACT: Mr. Francis Jordan, Airspace Specialist, Airspace Branch, AEA–520, Air Traffic Division, Eastern Region, Federal Aviation Administration, Federal Building #111, John F. Kennedy International Airport, Jamaica, New York 11430; telephone: (718) 553–4521.

SUPPLEMENTARY INFORMATION:

History

On October 17, 1997, a notice proposing to amend 14 CFR Part 71 to establish Class E airspace at Ticonderoga, NY, was published in the **Federal Register** (62 FR 53981). A GPS RWY 20 SIAP and a GPS RWY 2 SIAP developed for Ticonderoga Municipal Airport, Ticonderoga, NY, require the establishment of Class E airspace at the airport. The notice proposed to establish controlled airspace extending upward from 700 feet AGL to contain IFR operations in controlled airspace during portions of the terminal operation and while transitioning between the enroute and terminal environments.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments to the proposal were received. The rule is adopted as proposed.

The coordinates for this airspace docket are based on North American Datum 83. Class E airspace areas designations for airspace extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9E, dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to 14 CFR Part 71 establishes Class E airspace at Ticonderoga, NY, to provide controlled airspace extending upward from 700 feet AGL for aircraft executing the GPS RWY 20 SIAP and the GPS RWY 2 SIAP to Ticonderoga Municipal Airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation it is certified that this rule will not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for 14 CFR Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; EO 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9E, Airspace Designations and Reporting Points, dated September 10, 1997, and effective September 16, 1997, is amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

SUPPLEMENTARY INFORMATION:

History

On October 17, 1997, a notice proposing to amend 14 CFR Part 71 to establish Class E airspace at Towanda, PA, was published in the **Federal Register** (62 FR 53989). A GPS RWY 23 SIAP developed for Bradford County Airport, Towanda, PA, requires the establishment of the Class E airspace at the airport. The notice proposed to establish controlled airspace extending upward from 700 feet AGL to contain IFR operations in controlled airspace during portions of the terminal operation and while transitioning between the enroute and terminal environments.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments to the proposal were received. The rule is adopted as proposed.

The coordinates for this airspace docket are based on North American Datum 83. Class E airspace areas designations for airspace extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9E, dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to 14 CFR Part 71 establishes Class E airspace at Towanda, PA, to provide controlled airspace extending upward from 700 feet AGL for aircraft executing the GPS RWY 23 SIAP to Bradford County Airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation it is certified that this rule will not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

Modification of Class E Airspace; Tracy, CA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends the Class E airspace areas at Tracy, CA. The development of a Global Positioning System (GPS) Standard Instrument Approach Procedure (SIAP) to Runway (RWY) 11, GPS SIAP to RWY 25, and a GPS SIAP to RWY 29 at Tracy Municipal Airport has made this action necessary. Additional controlled airspace extending upward from 700 feet or more above the surface of the earth is needed to contain aircraft executing the approach and departure procedures at Tracy Municipal Airport. The intended effect of this action is to provide adequate controlled airspace for Instrument Flight Rules (IFR) operations at Tracy Municipal Airport, Tracy, CA.

EFFECTIVE DATE: 0901 UTC April 23, 1998.

FOR FURTHER INFORMATION CONTACT: Debra Trindle, Airspace Specialist, Airspace Branch, AWP–520, Air Traffic Division, Western-Pacific Region, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California, 90261, telephone (310) 725–6613.

SUPPLEMENTARY INFORMATION:

History

On November 20, 1997, the FAA proposed to amend 14 CFR part 71 to modify the Class E airspace area at Tracy, CA (62 FR 61927). The development of GPS SIAP's at Tracy Municipal Airport has made this action necessary. The intended effect of this action is to provide additional controlled airspace extending upward from 700 feet or more above surface of the earth is needed to contain aircraft executing the GPS RWY 11 SIAP, GPS RWY 25 SIAP, GSP RWY 29 SIAP, and other IFR operations at Tracy Municipal Airport, Tracy, CA.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments to the proposal were received. Class E airspace areas extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9E, dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. Class E airspace designations listed in this document will be published subsequently in the Order.

The Rule

This amendment to 14 CFR part 71 modifies the Class E airspace area at Tracy, CA. The development of a GPS RWY 11 SIAP, GPS RWY 25 SIAP, and a GPS RWY 29 SIAP at Tracy Municipal Airport has made this action necessary. Additional controlled airspace extending upward from 700 feet or more above the surface is needed to contain aircraft executing the approach and departures procedures at Tracy Municipal Airport. The intended effect of this action is to provide adequate controlled airspace for aircraft executing the GPS RWY 11 SIAP, a GPS RWY 25 SIAP, and a GPS RWY 29 SIAP, and other IFR operations at Tracy Municipal Airport, Tracy, CA.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; ROUTES; AND REPORTING POINTS

1. The authority citation for CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9E, Airspace Designations and Reporting Points, dated September 10, 1997, and effective September 16, 1997, is amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

Amendment to Class E Airspace; Somerset, PA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

VOL 63 ISS 19 JA 29 1998 UMI

SUMMARY: This action amends Class E airspace extending upward from 700 feet Above Ground Level (AGL) at Somerset, PA. The development of a Global Positioning System (GPS) Standard Instrument Approach Procedure (SIAP) at Somerset County Airport has made this action necessary. This action is intended to provide adequate Class E airspace to contain instrument flight rules (IFR) operations for aircraft executing the GPS Runway (RWY) 6 SIAP to Somerset County Airport, Somerset, PA.

EFFECTIVE DATE: 0901 UTC, April 23, 1998.

FOR FURTHER INFORMATION CONTACT: Mr. Francis Jordan, Airspace Specialist, Airspace Branch, AEA–520, Air Traffic Division, Eastern Region, Federal Aviation Administration, Federal Building #111, John F. Kennedy International Airport, Jamaica, New York 11430; telephone (718) 553–4521.

SUPPLEMENTARY INFORMATION:

History

On November 13, 1997, a proposal to amend 14 CFR Part 71 to modify the Class E airspace at Somerset, PA, was published in the **Federal Register** (62 FR 60814). The development of a GPS RWY 6 SIAP for Somerset County Airport requires the amendment of the Class E airspace at Somerset, PA. The proposal was to amend controlled airspace extending upward from 700 feet AGL to contain IFR operations in controlled airspace during portions of the terminal operation and while transitioning between the enroute and terminal environments.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments to the proposal were received. The rule is adopted as proposed.

The coordinates for this airspace docket are based on North American Datum 83. Class E airspace areas designations for airspace extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9E, dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to 14 CFR Part 71 modifies Class E airspace at Somerset, PA, to provide controlled airspace extending upward from 700 feet AGL for aircraft executing the GPS RWY 6 SIAP to Somerset County Airport.

The FAA has determined that this regulation only involves as established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routing matter that will only affect air traffic procedures and air navigation it is certified that this rule will not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for 14 CFR Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; EO 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9E, Airspace Designations and Reporting Points, dated September 10, 1997, and effective September 16, 1997, is amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

Amendment to Class E Airspace; Allentown, PA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends Class E airspace extending upward from 700 feet Above Ground Level (AGL) at Allentown, PA. The development of a Global Positioning System (GPS) Standard Instrument Approach Procedure (SIAP) at Allentown-Queen City Airport has made this action necessary. This action is intended to provide adequate Class E airspace to contain instrument flight rules (IFR) operations for aircraft executing the GPS Runway (RWY) 7 SIAP to Allentown-Queen City Airport, Allentown, PA.

EFFECTIVE DATE: 0901 UTC, April 23, 1998.

FOR FURTHER INFORMATION CONTACT: Mr. Francis Jordan, Airspace Specialist, Airspace Branch, AEA–520, Air Traffic Division, Eastern Region, Federal Aviation Administration, Federal Building #111, John F. Kennedy International Airport, Jamaica, New York 11430; telephone: (718) 553–4521.

SUPPLEMENTARY INFORMATION:

History

On November 6, 1997, a proposal to amend 14 CFR Part 71 to modify the Class E airspace at Allentown, PA, was published in the **Federal Register** (62 FR 60051). The development of a GPS RWY 7 SIAP for Allentown-Queen City Airport requires the amendment of the Class E airspace at Allentown, PA. The proposal was to amend controlled airspace extending upward from 700 feet AGL to contain IFR operations in controlled airspace during portions of the terminal operation and while transitioning between the enroute and terminal environments.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments to the proposal were received. The rule is adopted as proposed.

The coordinates for this airspace docket are based on North American Datum 83. Class E airspace designations for airspace extending upward from 700 or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9E, dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to 14 CFR Part 71 modifies Class E airspace at Allentown, PA, to provide controlled airspace extending upward from 700 feet AGL for aircraft executing the GPS RWY 7 SIAP to Allentown-Queen City Airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation it is certified that this rule will not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for 14 CFR Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; EO 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9E, Airspace Designations and Reporting Points, dated September 10, 1997, and effective September 16, 1997, is amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

* * * * *

AEA PA AEA E5 Allentown, PA [Revised]

Lehigh Valley International Airport, PA
(lat. 40°39′09″N., long. 75°26′25″W.)

14 CFR Part 71

[Airspace Docket No. 97–AEA–41]

Amendment to Class E Airspace; York, PA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends Class E airspace extending upward from 700 feet Above Ground Level (AGL) at York, PA. The development of a Global Positioning System (GPS) Standard Instrument Approach Procedure (SIAP) and amendments to existing SIAPs at York Airport have made this action necessary. This action is intended to provide adequate Class E airspace to contain instrument flight rules (IFR) operation for aircraft executing the GPS Runway (RWY) 17 SIAP, and the amended GPS RWY 35 SIAP and Nondirectional Beacon (NDB) RWY 17 SIAP to York Airport at York, PA.

EFFECTIVE DATE: 0901 UTC, April 23, 1998.

FOR FURTHER INFORMATION CONTACT: Mr. Francis Jordan, Airspace Specialist, Airspace Branch, AEA–520, Air Traffic Division, Eastern Region, Federal Aviation Administration, Federal Building #111, John F. Kennedy International Airport, Jamaica, New York 11430; telephone: (718) 553–4521.

SUPPLEMENTARY INFORMATION:

History

On October 17, 1997, a proposal to amend 14 CFR Part 71 to modify the Class E airspace at York, PA, was published in the **Federal Register** (62 FR 53995). The development of a GPS RWY 17 SIAP, and the amendments to the GPS RWY 35 SIAP and the NDB RWY 17 SIAP for York Airport, require the amendment of the Class E airspace at York, PA. The proposal was to amend controlled airspace extending upward from 700 feet AGL to contain IFR operations in controlled airspace during portions of the terminal operation and while transitioning between the enroute and terminal environments.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments to the proposal were received. The rule is adopted as proposed.

The coordinates for this airspace docket are based on North American Datum 83. Class E airspace areas designations for airspace extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9E, dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to 14 CFR Part 71 modifies Class E airspace at York, PA, to provide controlled airspace extending upward from 700 feet AGL for aircraft executing the GPS RWY 17 SIAP, the GPS RWY 35 SIAP, and the NDB RWY 17 SIAP to York Airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) Is not a "significant regulatory action"

VOL 63 ISS 19 JA 29 1998 UMI

under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation it is certified that this rule will not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for 14 CFR Part 71 continues to read as follows:

14 CFR Part 71

[Airspace Docket No. 97–AEA–40]

Amendment to Class E Airspace; Lewisburg, WV

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends Class E airspace extending upward from 700 feet Above Ground Level (AGL) at Lewisburg, WV. The development of new VHF Omnidirectional Radio Range (VOR) Standard Instrument Approach Procedures (SIAP) at Greenbrier Valley Airport has made this action necessary. This action is intended to provide adequate Class E airspace to contain instrument flight rules (IFR) operations for aircraft executing the VOR Runway (RWY) 22 SIAP and VOR RWY 4 SIAP to Greenbrier Valley Airport, Lewisburg, WV.

EFFECTIVE DATE: 0901 UTC, April 23, 1998.

FOR FURTHER INFORMATION CONTACT: Mr. Francis Jordan, Airspace Specialist, Airspace Branch, AEA–520, Air Traffic Division, Eastern Region, Federal Aviation Administration, Federal Building 1#111, John F. Kennedy International Airport, Jamaica, New York 11430; telephone: (718) 553–4521.

SUPPLEMENTARY INFORMATION:

History

On October 17, 1997, a proposal to amend 14 CFR Part 71 to modify the Class E airspace at Lewisburg, WV, was published in the **Federal Register** (62 FR 53986). The development of a VOR RWY 4 SIAP and a VOR RWY 22 SIAP for Greenbrier Valley Airport requires the amendment of the Class E airspace at Lewisburg, WV. The proposal was to amend controlled airspace extending upward from 700 feet AGL to contain IFR operations in controlled airspace during portions of the terminal operation and while transitioning between the enroute and terminal environments.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments to the proposal were received. The rule is adopted as proposed.

The coordinates for this airspace docket are based on North American Datum 83. Class E airspace areas designations for airspace extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9E, dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to 14 CFR Part 71 modifies the Class E airspace at Lewisburg, WV, to provide controlled airspace extending upward from 700 feet AGL for aircraft executing the VOR RWY 4 SIAP and VOR RWY 22 SIAP to Greenbrier Valley Airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation it is certified that this rule will not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for 14 CFR Part 71 continues to read as follows:

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 97–ANM–18]

Amendment of Class E Airspace; Sheridan, WY

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Direct final rule; request for comments.

SUMMARY: This action changes the Sheridan, WY, Class E airspace legal description from part-time to continuous. A review of the airspace for Sheridan Airport reveals a need for continuous use as indicated in the Airport/Facility Directory (A/F D).

DATES: Effective 0901 UTC, April 29, 1998.

Comments for inclusion in the Rules Docket must be received on or before March 2, 1998.

ADDRESSES: Send comments regarding the rule in triplicate to: Manager, Airspace Branch, Air Traffic Division, ANM–520, Federal Aviation Administration, Docket Number 97–ANM–18, 1601 Lind Avenue, S.W., Renton, Washington 98055–4056.

The official docket may be examined in the office of the Regional Counsel for the Northwest Mountain Region at the same address.

An informal docket may also be examined during normal business hours at the address listed above.

FOR FURTHER INFORMATION CONTACT: Dennis Ripley, ANM–520.6, Federal Aviation Administration, Docket Number 97–ANM–18, 1601 Lind Avenue, S.W., Renton, Washington 98055–4056; telephone number: (425) 227–2527.

SUPPLEMENTARY INFORMATION: The Sheridan, WY, Class E airspace was originally effective on a part-time basis. The Class E airspace is now used on a continuous basis as is stated in the A/F D. The statement in the A/F D is meant to be temporary until the legal description can be changed. This amendment changes the legal airspace description from part-time to continuous, thereby reflecting actual operations. The boundaries of the airspace remain the same.

The area will be depicted on aeronautical charts for pilot reference. The coordinates for this airspace docket are based on North American Datum 83. Class E airspace designated as a surface area for an airport are published in Paragraph 6002 of FAA Order 7400.9E dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Direct Final Rule Procedure

The FAA anticipates that this regulation will not result in adverse or negative comment, and, therefore, issues it as a direct final rule. The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Unless a written adverse or negative comment or a written notice of intent to submit an adverse or negative comment is received within the comment period, the regulation will become effective on the date specified above. After the close of the comment period, the FAA will publish a docket in the **Federal Register** indicating that no adverse or negative comments were received and confirming the date on which the final rule will become effective. If the FAA does receive, within the comment period, an adverse or negative comment, or written notice of intent to submit such a comment, a document withdrawing the direct final rule will be published in the **Federal Register**, and a notice of proposed rulemaking may be published with a new comment period.

Comments Invited

Although this action is in the form of a direct final rule, and was not preceded by a notice of proposed rulemaking, interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket Number and be submitted in triplicate to the address specified under the caption **ADDRESSES**. All communications received on or before the closing date for comments will be considered, and this rule may be amended or withdrawn in light of the comments received. Factual information that supports the commenter's ideas and suggestions are extremely helpful in evaluating the effectiveness of this action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this action will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 97–ANM–18." The postcard will be date stamped and returned to the commenter.

Agency Findings

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is noncontroversial and unlikely to result in adverse or negative comments. For the reasons discussed in the preamble, I certify that this regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant

VOL 63 ISS 19 JA 29 1998 UMI

rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as these routine matters will only affect air traffic procedures and air navigation. It is certified that these proposed rules will not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

Accordingly, the Federal Aviation Administration amends part 71 of the Federal Aviation Regulations (14 CFR part 71) as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for 14 CFR part 71 continues to read as follows:

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 97–ANM–12]

Amendment of Class E Airspace; Powell, WY

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action revises the Powell, WY, Class E airspace. This amendment provides additional airspace to fully encompass the procedures for a new Global Positioning System (GPS) Standard Instrument Approach Procedure (SIAP) at Yellowstone Regional Airport, Cody, WY.

EFFECTIVE DATE: 0901 UTC, April 23, 1998.

FOR FURTHER INFORMATION CONTACT: Dennis Ripley, ANM–520.6, Federal Aviation Administration, Docket No. 97–ANM–12, 1601 Lind Avenue S.W., Renton, Washington, 98055–4056; telephone number: (425) 227–2527.

SUPPLEMENTARY INFORMATION:

History

On October 31, 1997, the FAA proposed to amend Title 14, Code of Federal Regulations, part 71 (14 CFR part 71) by amending the Class E airspace area at Powell WY (62 FR 58931). This action would provide additional airspace to fully encompass a revised SIAP at Yellowstone Regional Airport. Interested parties were invited to participate in the rulemaking proceeding by submitting written comments on the proposal. No comments were received.

This action is the same as the proposal except for two typographical errors discovered (and corrected herein) in the coordinates for the Powell NDB and the Powell Municipal Airport. The coordinates for this airspace docket are based on North American Datum 83. Class E airspace areas extending upward from 700 feet or more above the surface of the earth are published in Paragraph 6005 of FAA Order 7400.9E, dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to 14 CFR part 71 revises the 1200-foot Class E airspace at Powell, WY. The revised airspace, which overlies the Yellowstone Regional Airport, provides an extension to the south from approximately 6 to 26 miles, thus fully encompassing the new SIAP.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9E, Airspace Designations and Reporting Points, dated September 10, 1997, and effective September 16, 1997, is amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

DEPARTMENT OF STATE

Bureau of Consular Affairs

22 CFR Part 42

[Public Notice 2664]

Visas: Issuance of New or Replacement Immigrant Visas

AGENCY: Bureau of Consular Affairs, DOS.

ACTION: Final rule.

SUMMARY: This rule amends the Department's regulations to comply with a change in the Immigration and Nationality Act (INA) that requires the Department to factor the number of immigrant visas issued to immediate relatives into the annual worldwide limitation on immigration.

EFFECTIVE DATE: January 29, 1998.

FOR FURTHER INFORMATION CONTACT: Pam Chavez, Legislation and Regulations Division, Visa Services, Department of State, Room L6–21, SA–1, Washington, DC 20520–0106. Phone: (202) 663–1203.

SUPPLEMENTARY INFORMATION: On November 29, 1990, the President signed the Immigration Act of 1990 (IMMACT 90) which, among other things, amended by including the number of aliens granted immediate relative status into the calculation for determining the annual family preference limitation. Before IMMACT 90 (Pub. L. 101–649) the number of immediate relative visas issued to the spouses, minor children and parents of U.S. citizens was not a factor in determining the overall annual numerical limitation for worldwide immigration.

IMMACT 90 amended the INA by requiring the Department to deduct the number of immediate relatives granted permanent resident status in the United States during the previous fiscal year from the worldwide 480,000 annual limit for the current fiscal year, but limited the annual family preference limit to no less than 226,000. To avoid double-counting the number of visas issued to immediate relatives who, for reasons beyond their control, are unable to use their original immigrant visas, consular offices will now issue replacement visas rather than new visas. The Department is amending its regulations at 22 CFR 42.74 accordingly.

Final Rule

The Department has determined that there is good cause for this rule to be exempt from notice comment requirements under 5 U.S.C. 553(b)(3)(A) because Public Law 101–649 requires that the number of aliens granted immediate relative status be included in the calculation of the annual family preference limitation and the use of replacement visas rather than new visas is simply an administrative mechanism to avoid double counting. Notice and public comment thereon are therefore unnecessary.

Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980, as amended in 1996 (5 U.S.C. Chapter 6), requires the Federal Government to anticipate and minimize the impact of rules and paperwork requirements on small entities. Such entities are defined as small businesses (those with fewer than 500 employees), small non-profit organizations (those with fewer that 500 employees), and small governmental entities (those in areas with fewer than 50,000 residents). The Department has assessed the potential impact of the Rule and the Assistant Secretary for Consular Affairs by approving it certifies that it will not have a significant economic effect on a substantial number of small entities. It imposes no requirements on such entities.

In addition, pursuant to the Small Business Regulatory Fairness Act (5 U.S.C. Chapter 8), the Department has screened the Rule and determined that it is not a "major rule", as defined in 5 U.S.C. 804(2). It will not result in an annual effect on the economy of $100,000 or more; a major increase in cost or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of U.S.-based companies in domestic and export markets.

Paperwork Reduction Act

No new information requirements are contained in this final rule.

Executive Orders 12866 and 12988

This rule is exempt from Executive Order 12866 but has been reviewed internally by the Department to ensure consistency with the objectives thereof. This rule also has been reviewed as required by Executive Order 12988 and determined to be in compliance therewith.

Executive Order 12612

This rule will not have substantial direct effect on the States, on the relationship between the national government and the States, or on distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Unfunded Mandates Reform Act of 1995

This rule will not result in the expenditure by state, local and tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more in any one year, and it will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1501 *et seq.*) and Executive Order 12875.

List of Subjects in 22 CFR Part 42

Aliens, Immigrants, Visas and passports.

In view of the foregoing 22 CFR is amended as follows:

PART 42—[AMENDED]

1. The authority citation for part 42 continues to read:

Authority: 8 U.S.C. 1104.

2. 22 CFR 42.74 is amended by revising paragraph (a) and (b) to read as follows:

§ 42.74 Issuance of new or replacement visas.

(a) *New immigrant visa for a special immigrant under INA 101(a)(27)(A) and (B).*

(1) The consular officer may issue a new immigrant visa to a qualified alien entitled to status under INA 101(a)(27)(A) or (B), who establishes:

(i) That the original visa has been lost, mutilated or has expired, or

(ii) The alien will be unable to use it during the period of its validity;

VOL 63 ISS 19 JA 29 1998 UMI

(2) Provided:

(i) The alien pays anew the statutory application and issuance fees; and

(ii) The consular officer ascertains whether the original issuing office knows of any reason why a new visa should not be issued.

(b) *Replacement immigrant visa for an immediate relative or for an alien subject to numerical limitation.*

(1) A consular officer may issue a replacement visa under the original number of a qualified alien entitled to status under INA 201(b)(2)(A)(i), INA 203(a), (b), or (c), or under INA 124, if—

(i) The alien is unable to use the visa during the period of its validity due to reasons beyond the alien's control;

(ii) The visa is issued during the same fiscal year in which the original visa was issued;

(iii) The number has not be returned to the Department as a "recaptured visa number";

(iv) The alien pays anew the statutory application and issuance fees; and

(v) The consular officer ascertain whether the original issuing office of knows of any reason why a new visa should not be issued.

(2) In issuing a visa under this paragraph (b), the consular officer shall insert the word "REPLACE" on Form OF–155A, Immigrant Visa and Alien Registration, before the word "IMMIGRANT" in the title of the visa.

BILLING CODE 4710–06–M

DEPARTMENT OF STATE

Bureau of Consular Affairs

22 CFR Part 42

[Public Notice 2715]

Visas: Immigrant Religious Workers

AGENCY: Bureau of Consular Affairs, DOS.

ACTION: Final rule.

SUMMARY: The Immigration Act of 1990 created a new special immigrant visa classification for religious workers who have 2 years of membership in a religious denomination; two years of experience in a religious occupation or vocation and who intend to continue to work in such occupation or vocation. The legislation, as originally enacted, required religious workers (other than ministers) to seek entry into the United States before October 1, 1994.

On October 25, 1994 in the Immigration and Nationality Technical Corrections Act of 1994 the deadline was extended to allow religious workers to enter the United States "before October 1, 1997".

The Religious Workers Act of 1997 enacted on October 6, 1997 further extended the deadline to "before October 1, 2000". Thus, this final rule amends the previously published regulation and extends the allowable validity date of immigration visas for aliens seeking to enter the United States as special immigrant religious workers to not later than September 30, 2000.

EFFECTIVE DATE: January 29, 1998.

FOR FURTHER INFORMATION CONTACT: Pam Chavez, Legislation and Regulations Division, Visa Services, (202) 663–1206.

SUPPLEMENTARY INFORMATION:

Immigration Act of 1990

Section 151 of the Immigration Act of 1990 (IMMACT 90), Public Law 101–649, amended INA 101(a)(27)(C) by adding a new category of special immigrant visas for aliens who will work in a religious occupation or vocation for a religious organization in a professional or other capacity. Unlike the provision for special immigrant ministers of religion, which does not contain a sunset provision, the provisions for religious workers (as defined under INA 101(a)(27)(C)(ii)(II) and (III)), as originally enacted, required religious workers to seek to enter the United States before October 1, 1994.

Immigration and Nationality Technical Corrections Act of 1994

On October 25, 1994, sec. 214 of the Immigration and Nationality Technical Corrections Act of 1994 (Pub. L. 103–416) amended INA 101(a)(27)(C)(ii) to extend the sunset date to before October 1, 1997.

Religious Workers Act of 1997

Sec. 1 of the Religious Workers Act of 1997, Public Law 105–54, enacted October 6, 1997 further extended the deadline for special immigrant religious workers to enter the United States until before October 1, 2000. This final rule implements this section by revising 42.32(d)(1)(ii) to extend the visa validity date to not later than September 30, 2000.

Final Rule

This rule is not expected to have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. This rule imposes no reporting or recordkeeping action from the public requiring the approval of the Office of Management and Budget under the Paperwork Reduction Act requirements. This rule has been reviewed as required by E.O. 12778 and certified to be in compliance therewith. This rule is exempted from E.O. 12866 but has been coordinated with INS and reviewed to ensure consistency therewith.

List of Subjects in 22 CFR Part 42

Aliens, Immigration, Passports and visas.

In view of the foregoing 22 CFR Chapter I is amended as follows:

PART 42—[AMENDED]

1. The authority citation for Part 42 is revised to read:

Authority: 8 U.S.C. 1104.

2. Section 42.32 is amended by revising paragraph (d)(1)(ii) to read as follows:

§ 42.32 Employment based preference immigrants.

* * * * *

(d) *Fourth preference—Special immigrants*—(1) *Religious workers.*

* * *

(ii) *Timeliness of application.* An immigrant visa issued under INA 203(b)(4) to an alien described in INA 101(a)(27)(C), other than a minister of religion, who qualifies as a "religious worker" as defined in 8 CFR 204.5 shall bear the usual validity except that in no case shall it be valid later than September 30, 2000.

BILLING CODE 4710–06–M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[TD 8763]

RIN 1545–AU06

Modifications of Bad Debts and Dealer Assignments of Notional Principal Contracts

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final and temporary regulations.

SUMMARY: This document contains regulations that deem a charge-off and allow a deduction for a partially worthless debt when the terms of a debt instrument have been modified.

The regulations provide guidance to certain taxpayers that have claimed a deduction for a partially worthless debt and then modified the terms of the debt instrument. This document also contains regulations relating to certain assignments of notional principal contracts by dealers in those contracts. The regulations provide guidance to taxpayers relating to the consequences of these assignments.

DATES: *Effective date:* These regulations are effective February 29, 1998.

Applicability date: These regulations apply to significant modifications of debt instruments and assignments of interest rate swaps, commodity swaps, and other notional principal contracts occurring on or after September 23, 1996.

FOR FURTHER INFORMATION CONTACT: Concerning the modifications of bad debts, Craig Wojay, (202) 622–3920, and concerning dealer assignments of notional principal contracts, Thomas M. Preston, (202) 622–3940 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Background

On June 25, 1996, temporary regulations (TD 8676) relating to modifications of bad debts and dealer assignments of notional principal contracts under sections 166 and 1001 of the Internal Revenue Code (Code) were published in the **Federal Register** (61 FR 32653). A notice of proposed rulemaking (REG–209743–94, formerly FI–59–94) cross-referencing the temporary regulations was published in the **Federal Register** for the same day (61 FR 32728). No public hearing was requested or held.

Written comments responding to the notice were received. After consideration of the comments, the regulations proposed by REG–209743–94 are adopted by this Treasury decision, and the corresponding temporary regulations are removed.

Explanation of Provisions

The preamble to the temporary regulations sets forth limited circumstances under which a taxpayer will be permitted to deduct an amount on account of a partially worthless debt even though an amount has not been charged off within the taxable year.

Section 166(a)(2) and § 1.166–3(a) provide that a deduction for a partially worthless debt is allowed only to the extent the debt is charged off in the taxable year. The charge-off requirement is satisfied when a portion of the debt is removed from the taxpayer's books and records. This generally is accomplished by reducing the debt's book basis. Thus, when an amount has been deducted for partial worthlessness, there is generally a reduction of both the book basis and the tax basis of a debt.

When a taxpayer is required to recognize gain under § 1.1001–1 because of a modification of a debt instrument, the taxpayer's tax basis in the debt is increased by the amount of gain recognized. However, regulatory and general accounting principles generally would not permit a corresponding increase in the book basis of the debt. Because the prior charge-off is not restored (that is, the book basis of the debt is not increased), there is no opportunity for the taxpayer to take a new charge-off for pre-existing worthlessness.

The purpose of the temporary regulations is to preserve a portion of a taxpayer's bad debt deduction with respect to a partially worthless debt. The portion preserved corresponds to the amount the taxpayer would have been entitled to deduct for partial worthlessness with respect to the modified debt if the book basis of the modified debt were increased to the same extent as the tax basis of that debt. Thus, if all the conditions of the temporary regulations are satisfied, then a modified debt is deemed to have been charged off in the year in which gain is recognized. The amount of the deemed charge-off, however, is limited to the difference between the tax basis of the debt and the greater of the book basis or the fair market value of the debt. The temporary regulations also address debt that constitutes transferred basis property under section 7701(a)(43).

In addition, the temporary regulations provide a limited rule dealing with a dealer's assignment of its position in an interest rate swap, commodity swap, or other notional principal contract to another dealer. If the assignment is permitted by the terms of the contract, the assignment is not treated as a deemed exchange by the nonassigning party of the original contract for a new contract that differs materially either in kind or in extent. Thus, an assignment to which the rule applies does not trigger gain or loss to the dealer's counterparty.

Three comments were received on the § 1.166–3T regulations. The first comment requests a deemed charge-off for a taxpayer that purchased at a discount debt for which a previous deduction for partial worthlessness was claimed, and then significantly modified the debt under § 1.1001–3 and recognized gain on the modification. Whenever debt is purchased for less than the stated redemption price, recognized gain from a significant modification is attributable to market discount as defined in section 1278(a)(2)(A) and not to a previously claimed deduction for partial worthlessness. In addition, the temporary regulations refer to § 1.166–3(a) (1) and (2) for guidance relating to prior charge-offs and deductions for partial worthlessness. Extending the temporary regulations to cover a discount purchase would significantly expand the regulations beyond their intended scope and create a situation that would be extremely difficult to administer. The regulations do not adopt the request to extend the regulations to cover such a purchase.

The second comment requests a deemed charge-off for a member of a consolidated group that purchased debt, for which a previous deduction for partial worthlessness was claimed, from another member of the group, then significantly modified the debt under § 1.1001–3 and recognized gain on the modification. Whenever debt is purchased for less than the stated redemption price, subsequently recognized gain from a significant modification is attributable to market discount as defined in section 1278(a)(2)(A) and not to a previously claimed deduction for partial worthlessness. Extending the temporary regulations to cover a purchase from another member of the consolidated group would significantly expand the regulations beyond their intended scope. The regulations do not adopt the request to extend the regulations to cover an intercompany transaction.

The third comment requests expanding the temporary regulations to include other situations in which a taxpayer has tax basis in a debt but no corresponding book basis. The first situation involves the accrual of interest income on loans that have been placed on non-accrual status for book purposes. The second situation involves the requirement to accrue interest on original issue discount obligations even if the loan has become uncollectible. This comment deals with situations other than the modification of a debt instrument and is beyond the scope of this regulation project.

Special Analyses

It has been determined that this Treasury decision is not a significant regulatory action as defined in EO 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of

VOL
63
ISS
19
JA
29
1998
UMI

the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations, and because the regulation does not impose a collection of information on small entities, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f) of the Internal Revenue Code, the notice of proposed rulemaking preceding these regulations was submitted to the Small Business Administration for comment on its impact on small business.

Drafting Information: The principal author of the regulations concerning the modifications of bad debts is Craig Wojay, Office of the Assistant Chief Counsel (Financial Institutions and Products), IRS. The principal author of the regulations concerning the dealer assignments of notional principal contracts is Thomas M. Preston, Office of the Assistant Chief Counsel (Financial Institutions and Products), IRS. However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. In § 1.166–3, paragraph (a)(3) is added to read as follows:

§ 1.166–3 Partial or total worthlessness.

(a) * * *

(3) *Significantly modified debt*—(i) *Deemed charge-off.* If a significant modification of a debt instrument (within the meaning of § 1.1001–3) during a taxable year results in the recognition of gain by a taxpayer under § 1.1001–1(a), and if the requirements of paragraph (a)(3)(ii) of this section are met, there is a deemed charge-off of the debt during that taxable year in the amount specified in paragraph (a)(3)(iii) of this section.

(ii) *Requirements for deemed charge-off.* A debt is deemed to have been charged off only if—

(A) The taxpayer (or, in the case of a debt that constitutes transferred basis property within the meaning of section 7701(a)(43), a transferor taxpayer) has claimed a deduction for partial worthlessness of the debt in any prior taxable year; and

(B) Each prior charge-off and deduction for partial worthlessness satisfied the requirements of paragraphs (a) (1) and (2) of this section.

(iii) *Amount of deemed charge-off.* The amount of the deemed charge-off, if any, is the amount by which the tax basis of the debt exceeds the greater of the fair market value of the debt or the amount of the debt recorded on the taxpayer's books and records reduced as appropriate for a specific allowance for loan losses. The amount of the deemed charge-off, however, may not exceed the amount of recognized gain described in paragraph (a)(3)(i) of this section.

(iv) *Effective date.* This paragraph (a)(3) applies to significant modifications of debt instruments occurring on or after September 23, 1996.

* * * * *

§ 1.166–3T [Removed]

Par. 3. Section 1.166–3T is removed.

Par. 4. Section 1.1001–4 is added to read as follows:

§ 1.1001–4 Modifications of certain notional principal contracts.

(a) *Dealer assignments.* For purposes of § 1.1001–1(a), the substitution of a new party on an interest rate or commodity swap, or other notional principal contract (as defined in § 1.446–3(c)(1)), is not treated as a deemed exchange by the nonassigning party of the original contract for a modified contract that differs materially either in kind or in extent if—

(1) The party assigning its rights and obligations under the contract and the party to which the rights and obligations are assigned are both dealers in notional principal contracts, as defined in § 1.446–3(c)(4)(iii); and

(2) The terms of the contract permit the substitution.

(b) *Effective date.* This section applies to assignments of interest rate swaps, commodity swaps, and other notional principal contracts occurring on or after September 23, 1996.

§ 1.1001–4T [Removed]

Par. 5. Section 1.1001–4T is removed.

Michael P. Dolan,

Deputy Commissioner of Internal Revenue.

Approved: January 14, 1998.

Donald C. Lubick,

Acting Assistant Secretary of the Treasury.

BILLING CODE 4830–01–U

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[LA–33–1–7374; FRL–5955–9]

Approval and Promulgation of State Implementation Plans (SIP) for Louisiana: Motor Vehicle Inspection and Maintenance (I/M) Program; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; correction.

SUMMARY: This document corrects the section number in subpart T of part 40 of the Code of Federal Regulations (CFR) citation published in the **Federal Register** (FR) of November 19, 1997, regarding final disapproval of the Louisiana I/M SIP. Section 52.994 was inadvertently chosen for Disapprovals, when it had previously been assigned to Conditional Approvals. This document changes the section number for Disapprovals to 52.996.

DATES: Effective on January 29, 1998.

FOR FURTHER INFORMATION CONTACT: Ms. Sandra G. Rennie, Air Planning Section (6PD–L), EPA Region 6, 1445 Ross Avenue, Dallas, Texas 75202–2733, telephone (214)665–7367.

SUPPLEMENTARY INFORMATION:

I. Background

The EPA published document 97–30376 in the November 19, 1997, **Federal Register** (FR), finalizing disapproval of the I/M program in the Baton Rouge ozone nonattainment area. See 62 FR 61633 for the background and rulemaking for that action.

In amending part 52 of 40 CFR, a section was added in subpart T—Louisiana, for Disapprovals. Inadvertently, the section number chosen was already in use for Conditional Approvals. The purpose of this action is to change the section number for Disapprovals from 52.994 to 52.996.

II. Administrative Requirements

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a "significant regulatory action" and is, therefore, not subject to review by the Office of Management and Budget. In addition, this action does not impose any enforceable duty or contain any unfunded mandates as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4), or require prior consultation with State officials as specified by Executive Order 12898 (59 FR 7629, February 16, 1994).

Because this action is not subject to notice-and-comment requirements under the Administrative Procedure Act or any other statute, it is not subject to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) Under 5 U.S.C. 801(a)(1)(A) as added by the Small Business Regulatory Enforcement Fairness Act of 1996, EPA submitted a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives and the Comptroller General of the General Accounting Office prior to publication of this rule in today's **Federal Register**. This rule is not a "major rule" as defined by 5 U.S.C. 804(2).

Lynda F. Carroll,

Acting Regional Administrator, Region 6.

In rule FR Doc. 97–30376, published on November 19, 1997 (62 FR 61633), make the following correction:

1. On page 61634, in the third column, the amendatory instruction is corrected to read as follows:

2. Section 52.996 is added to read as follows:

2. In the text, the section number is changed from 52.994 to 52.996.

[FR Doc. 98–2087 Filed 1–28–98; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 300

[FRL–5954–1]

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List

AGENCY: Environmental Protection Agency.

ACTION: Notice of partial deletion of the Prewitt Abandoned Refinery Superfund Site from the National Priorities List.

SUMMARY: The United States Environmental Protection Agency (EPA) Region 6 announces the deletion of the surface portion of the Prewitt Abandoned Refinery Superfund Site (the Site) from the National Priorities List (NPL). The NPL, promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, 42 U.S.C. 9605, is codified at Appendix B of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), 40 CFR part 300. This partial deletion is consistent with the EPA's Notice of Policy Change: Policy Regarding Partial Deletion of Sites Listed on the National Priorities List. 60 FR 55466 (November 1, 1995). This partial deletion pertains to the surface portion, which includes all surface soils, and also includes the former separator area. This partial deletion does not pertain to the subsurface portion of the Site including without limitation ground water and subsurface soils. The subsurface portion of the Site will remain on the NPL, and response activities will continue at that portion. With the concurrence of the State of New Mexico through the New Mexico Environment Department (NMED), and with the concurrence of the Navajo Nation through the Navajo Nation Superfund Office (NSO), the EPA has determined that responsible parties have implemented all appropriate response actions required at the surface portion of the Site (neither the CERCLA-required five-year reviews, nor operation and maintenance of the constructed remedy is considered further response action for these purposes), that all appropriate Hazardous Substance Response Trust Fund (Fund) financed response actions under CERCLA have been implemented at the surface portion of the Site, and that no further response action by responsible parties is appropriate for the surface portion of the Site. Moreover, the EPA, with State of New Mexico concurrence through the NMED, and with Navajo Nation concurrence through the NSO, has determined that Site investigations show that the surface portion of the Site now poses no significant threat to public health or the environment; consequently, pursuant to CERCLA section 105, and 40 CFR 300.425(e), the surface portion of the Site is hereby deleted from the NPL.

EFFECTIVE DATE: January 29, 1998.

FOR FURTHER INFORMATION CONTACT: Greg J. Lyssy, Remedial Project Manager, (214) 665–8317, United States Environmental Protection Agency, Region 6, Mail Code: 6SF–LT, 1445 Ross Avenue, Dallas, Texas 75202. Information on the Site is available at the local information repository located at: Prewitt Fire House, PO Box 472, Prewitt, New Mexico 87045, (505) 876–4068. Requests for comprehensive copies of documents should be directed formally to the Regional Superfund Management Branch, care of Steve Wyman, (214) 665–2792, EPA Region 6, Mail Code: 6SF–PO, 1445 Ross Avenue, Dallas, Texas 75202.

SUPPLEMENTARY INFORMATION: The site to be partially deleted from the NPL is the Prewitt Abandoned Refinery Superfund Site located near the town of Prewitt, in McKinley County, New Mexico. This partial deletion pertains to the surface portion of the Site, which consists of all surface soils and the former separator area. This partial deletion does not pertain to the subsurface portion of the Site including without limitation ground water and subsurface soils. This Partial Deletion is in accordance with 40 CFR 300.425(e) and the Notice of Policy Change: Partial Deletion of Sites Listed on the National Priorities List, 60 FR 55466 (Nov. 1, 1995). A Notice of Intent for Partial Deletion was published on October 6, 1997 (62 FR 52074). The closing date for comments on the Notice of Intent for Partial Deletion was November 5, 1997. The EPA received two comment letters, both of which supported the partial deletion.

The EPA identifies sites which appear to present a significant risk to public health, welfare, or the environment and it maintains the NPL as the list of those sites. Sites on the NPL may be the subject of Fund-financed remedial actions. Section 300.425(e)(3) of the NCP, 40 CFR 300.425(e)(3), states that Fund-financed actions may be taken at sites deleted from the NPL in the unlikely event that conditions at the site warrant such action. Deletion of a site from the NPL does not affect responsible party liability or impede EPA efforts to recover costs associated with response efforts.

Lists of Subjects in 40 CFR Part 300

Environmental protection, Air pollution control, Chemicals, Hazardous substances, Hazardous waste, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Superfund, Water pollution control, Water supply.

Dated: January 8, 1998.

Lynda F. Carroll,

Acting Regional Administrator (6RA), Region 6.

For the reasons set out in the preamble, 40 CFR part 300 is amended as follows:

PART 300—[AMENDED]

1. The authority citation for Part 300 continues to read as follows:

Authority: 33 U.S.C. 1321(c)(2); 42 U.S.C. 9601–9657; E.O. 12777, 56 FR 54757, 3 CFR 1991 Comp., p. 351; E.O. 12580, 52 FR 2923, 3 CFR 1987 Comp., p. 193.

VOL 63 ISS 19 JA 29 1998 UMI

2. Table 1 of Appendix B to part 300 is amended by revising the entry for "Prewitt Abandoned Refinery" by adding a note "P" so that it reads as follows:

Appendix B—[Amended]

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No.95–74; RM–8579, RM–8690]

Radio Broadcasting Services; Benavides, Bruni, and Rio Grande City, TX

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission denies a petition for rule making filed by Benavides Communications requesting the reallotment of Channel 299C2 from Benavides to Bruni, Texas; the allotment of Channel 254A at Benavides; and the modification of Station KXTM–FM's authorization to specify Bruni as its community of license. *See* 60 FR 29817, June 6, 1995. The proposed reallotment was denied because granting Sound Investments' counterproposal would provide first and second aural reception service to a greater number of people. In response to a counterproposal filed by Sound Investments unlimited, Inc.(RM–8690), the Commission substitutes Channel 298C2 for Channel 276A at Rio Grande City, Texas, and modifies Station KCTM–FM's license in accordance with Section 1.420(g) of the Commission's Rules. Channel 298C2 can be allotted to Rio Grande City in compliance with the Commission's minimum distance separation requirements at coordinates 26–22–42 NL and 98–48–48 WL. Mexican concurrence has been obtained for this allotment as a specially negotiated short-spaced, limited allotment since Rio Grande City is located within 320 kilometers (200 miles) of the U.S.-Mexican border. With this action, this proceeding is terminated.

EFFECTIVE DATE: March 9, 1998.

FOR FURTHER INFORMATION CONTACT: Pam Blumenthal, Mass Media Bureau, 202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 95–74, adopted January 14, 1998, and released January 23, 1998. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Center (Room 239), 1919 M Street, NW, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, ITS, Inc., (202) 857–3800, 1231 20th Street, NW, Washington, DC 20036.

Proposed Rules

Federal Register
Vol. 63, No. 19
Thursday, January 29, 1998

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

7 CFR Parts 406 and 457

Nursery Crop Insurance Regulations; Common Crop Insurance Regulations; and Nursery Crop Insurance Provisions

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Proposed rule.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) proposes to revise and reissue the Nursery Crop Insurance Provisions. The intended effect of this action is to provide policy changes to better meet the needs of insureds, and to restrict the effect of the Nursery Crop Insurance Regulations (7 CFR part 406) to the 1995 and prior crop years.

DATES: Written comments and opinions on this proposed nursery rule will be accepted until the close of business March 16, 1998 and will be considered when the rule is to be made final. The comment period for information collections under the Paperwork Reduction Act of 1995 continues through March 30, 1998.

ADDRESSES: Interested persons are invited to submit written comments to the Director, Product Development Division, Federal Crop Insurance Corporation, United States Department of Agriculture, 9435 Holmes Road, Kansas City, MO 64131. A copy of each response will be available for public inspection and copying from 7 a.m. to 4:30 p.m., EDT, Monday through Friday, except holidays, at the above address.

FOR FURTHER INFORMATION CONTACT: Rob Cerda, Insurance Management Specialist, Research and Evaluation Division, Federal Crop Insurance Corporation, at the Kansas City, MO, address listed above, telephone (816) 926–6343.

SUPPLEMENTARY INFORMATION:

Executive Order 12866

The Office of Management and Budget (OMB) has determined this rule to be not significant and, therefore, this rule has not been reviewed by OMB.

Paperwork Reduction Act of 1995

This rule proposes to amend the information collection requirements previously approved by OMB under OMB control number 0563–0053 through October 31, 2000. This rule increases the producer (respondent) audience participation due to expanded coverage to include in-ground plants and ornamental nurseries; to insure plants that produce edible berries or nuts as long as the fruits or nuts are not intended for sale; and to offer a Peak Inventory Endorsement and Optional Unit Endorsement. All of the forms cleared under OMB control number 0563–0053 represent the minimum requirement for information to determine eligibility and losses qualifying for payment due to nursery coverage.

Revised reporting estimates and requirements for usage of OMB control number 0563–0053 will be submitted to OMB for approval under the provisions of 44 U.S.C., chapter 35. The comment period for information collections under the Paperwork Reduction Act of 1995 continues through March 30, 1998.

The FCIC is seeking comments on the following Information Collection Request (ICR).

Title: Multiple Peril Crop Insurance.

Respondents/Affected Entities: Parties affected by the information collection requirements included in this rule are nursery producers.

Abstract: This rule proposes to expand nursery coverage to include in-ground plants and ornamental nurseries; to insure plants that produce edible berries or nuts as long as the fruits or nuts are not intended for sale; and to offer a Peak Inventory Endorsement and Optional Unit Endorsement. FCIC believes the proposed policy will increase participation in the nursery program and offer a better commodity to nursery producers.

Estimate of Burden: Public reporting burden for this collection of information is estimated at 68.7 minutes per participant because of the high degree of automation associated with the data collection.

Respondents: Nursery growers.

Estimated Number of Respondents: 1,689.

Estimated Number of Responses Per Respondent: 1.7.

Estimated Total Annual Burden on Respondents: 1,935 hours.

FCIC is requesting comments on the following: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information gathering technology.

Comments regarding paperwork reduction should be submitted to the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

The Office of Management and Budget (OMB) is required to make a decision concerning the collections of information contained in this rule between 30 and 60 days after submission to OMB. Therefore, a comment to OMB is best assured of having full effect if OMB receives it within 30 days of publication. This does not affect the deadline for the public to comment on the rule.

Unfunded Mandates Reform Act of 1995

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. This rule contains no Federal mandates (under the regulatory provisions of title II of the UMRA) for State, local, and tribal governments or the private sector. Therefore, this rule is not subject to the requirements of sections 202 and 205 of the UMRA.

Executive Order 12612

It has been determined under section 6(a) of Executive Order 12612, Federalism, that this rule does not have sufficient federalism implication to

VOL 63 ISS 19 JA 29 1998 UMI

warrant the preparation of a Federalism Assessment. The provisions contained in this rule will not have a substantial direct effect on States or their political subdivisions, or on the distribution of power and responsibilities among the various levels of government.

Regulatory Flexibility Act

This regulation will not have a significant economic impact on a substantial number of small entities. New provisions included in this rule will not impact small entities to a greater extent than large entities. Under the current regulations, a producer is required to complete an application and a report of plant inventory. If the crop is damaged or destroyed, the insured is required to give notice of loss and provide the necessary information to complete a claim for indemnity. This regulation does not alter those requirements. The amount of work required of the insurance companies and insured may actually decrease because the plant inventory report has been simplified and insureds no longer have to report all their plants. Therefore, this action is determined to be exempt from the provisions of the Regulatory Flexibility Act (5 U.S.C. 605), and no Regulatory Flexibility Analysis was prepared.

Federal Assistance Program

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

Executive Order 12372

This program is not subject to the provisions of Executive Order 12372, which require intergovernmental consultation with State and local officials. See the Notice related to 7 CFR part 3015, subpart V, published at 48 FR 29115, June 24, 1983.

Executive Order 12988

This rule has been reviewed in accordance with Executive Order 12988 on civil justice reform. The provisions of this rule will not have a retroactive effect. The provisions of this rule will preempt State and local laws to the extent such State and local laws are inconsistent herewith. The administrative appeal provisions published at 7 CFR part 11 must be exhausted before any action against FCIC for judicial review may be brought.

Environmental Evaluation

This action is not expected to have a significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

National Performance Review

This regulatory action is being taken as part of the National Performance Review Initiative to eliminate unnecessary or duplicative regulations and improve those that remain in force.

Background

FCIC proposes to revise and reissue the nursery crop insurance provisions found at 7 CFR 457.114. The new provisions will be effective for the 1999 and succeeding crop years. FCIC also proposes to amend 7 CFR part 406 to limit its effect to the 1995 and prior crop years.

This rule makes minor editorial and format changes to improve the Nursery Crop Insurance Provisions. In addition, FCIC is proposing substantive changes in the provisions for insuring nursery as follows:

1. Section 1—Adds definitions for the terms "amount of insurance," "brownout," "crop year," "crop year deductible," "eligible plant listing," "field grown," "in-ground fabric bag," "irrigated practice," "largest dimension," "nursery," "occurrence deductible," "plant inventory value report," "plant price schedule," "policy renewal date," "price level," "sales closing date," and "stock plants."

The definition of "crop year loss deductible," has been changed to "crop year deductible" for clarification. Revised the definitions of "standard nursery containers," "field market value A," and "field market value B" for clarification.

2. Section 2—Changed "Unit Division" guidelines to permit only one unit per county but allows for optional units by endorsement. Optional units will generally be by plant type unless otherwise provided in the Special Provisions.

3. Section 4—Change the contract change date to March 31 of the crop year for policies with a policy renewal date after July 1. Producers with policy renewal dates between March 31 and June 30 can elect to delay the effect of contract changes until the next crop year.

4. Section 5—Change the cancellation and termination dates to the day preceding the policy renewal dates. This change will give the insured year-round coverage.

5. Section 6(b)—Specify that the nursery plant inventory value report must be submitted with the application or not later than the policy renewal date for subsequent crop years in order to determine the amount of insurance before insurance attaches for the next crop year.

6. Section 6(c)—Add provisions to clarify the nursery inventory will be valued according to the plant price schedule in order to standardize prices and make the program more fair and equitable to all producers and reduce the risk of fraud.

7. Section 6(h)—Specify that the insured must ensure the full value of the insurable nursery plant inventory.

8. Section 7(a)—Add provisions to specify that the "annual premium" for each unit will be calculated by multiplying the amount of insurance by the appropriate premium rate listed on the actuarial documents by the insured share.

9. Section 8(b)—Add provisions to expand coverage to include the ornamental nursery industry as required by the Federal Agricultural Improvement and Reform Act of 1996.

10. Section 8(c)—Add provisions to expand coverage to include plants that produce edible berries or nuts as long as the fruits or nuts are not intended for sale.

11. Section 9—Add provisions specifying that insurance coverage commences on each unit 30 days after the application is signed and submitted, provided the premium has been paid, and at 12:01 a.m. of each subsequent annual policy renewal date. Currently, coverage begins on each unit or part of a unit on the later of October 1 or the date the insurance inventory is accepted. This provision will allow time for the insurance provider to inspect and accept or deny the insurance inventory.

12. Section 10(b)—Add provisions to exclude insects and plant disease as an insurable cause of loss, unless a disease or insect infestation occurs for which no approved control measures exists, or coverage is specifically provided by the Special Provisions.

13. Section 12—Add provisions clarifying indemnity calculations.

14. Section 13—Add provisions making the late and prevented planting provisions in the Basic Provisions not applicable to nursery.

15. Add a new section to include the Nursery Peak Inventory Endorsement.

List of Subjects in 7 CFR Parts 406 and 457

Crop insurance, Nursery, Reporting and record keeping requirements.

Proposed Rule

Accordingly, as set forth in the preamble, the Federal Crop Insurance Corporation hereby proposes to amend the Nursery Crop Insurance Regulations (7 CFR part 406) and revise and reissue the Common Crop Insurance Regulations (7 CFR part 457), effective for the 1999 and succeeding crop years, to read as follows:

PART 406—NURSERY CROP INSURANCE REGULATIONS FOR THE 1989 THROUGH THE 1995 CROP YEARS

1. The authority citation for 7 CFR part 406 is revised to read as follows:

Authority: 7 U.S.C. 1506(1), 1506(p).

2. The part heading is revised to read as set forth above.

3. The subpart heading "Subpart—Regulations for the 1989 and succeeding crop years" is removed.

PART 457—COMMON CROP INSURANCE REGULATIONS; REGULATIONS FOR THE 1994 AND SUBSEQUENT CONTRACT YEARS

4. The authority citation for 7 CFR part 457 continues to read as follows:

Authority: 7 U.S.C. 1506(1), 1506(p).

4a. The part heading is revised as set forth above.

5. Section 457.114 is revised to read as follows:

§ 457.114 Nursery crop insurance provisions.

The Nursery Crop Insurance Provisions for the 1999 and succeeding crop years are as follows:

FCIC policies:

United States Department of Agriculture

Federal Crop Insurance Corporation

Reinsured policies:

(Appropriate title for insurance provider)

Both FCIC and reinsured policies:

Nursery Crop Insurance Provisions

If a conflict exists among the policy provisions, the order of priority is as follows: (1) The Catastrophic Risk Protection Endorsement, if applicable; (2) the Special Provisions; (3) these Crop Provisions, and (4) the Basic Provisions, with (1) controlling (2), etc.

1. *Definitions.*

Amount of insurance. The value reported on the plant inventory value report (including any revised report accepted by us) multiplied by the coverage level percentage you elect, multiplied by the price level you elect, and multiplied by your share.

Crop year. In lieu of the definition in the Basic Provisions, the 12 month period beginning the day we accept the insurance inventory and extending until 11:59 p.m. of the day preceding the policy renewal date and designated by the year in which the insurance period ends.

Crop year deductible. The greater of: (1) The value reported on the plant inventory value report times 100 percent minus your coverage level percentage; or (2) field market value A times 100 percent minus your coverage level percentage.

Eligible plant listing. A listing published by FCIC that specifies the plants eligible for insurance as well as insurability requirements for such plants.

Field grown. Nursery plants planted and grown in the ground without the use of any artificial root containment device. In-ground fabric bags will not be considered as an artificial root containment device.

Field market value A. The value of the insurable plants, based on the plant prices contained in the plant price schedule, in the unit immediately prior to the occurrence of any loss.

Field market value B. The value of the insurable plants, based on the plant prices contained in the plant price schedule, in the unit following the occurrence of a loss, as determined by our appraisal of the crop, plus any loss in value due to an uninsured cause.

In-ground fabric bag. Also called a grow bag or a root control bag, is a porous fabric bag made of a nonbiodegradable material such as polypropylene, that typically has a plastic bottom, and is used for growing woody plants in the ground.

Irrigated practice. In lieu of the definition in the Basic Provisions the application of water, using appropriate systems and at the proper times, to provide the quantity of water needed to maintain your insured plant inventory.

Nursery. A business enterprise that produces nursery plant materials, a majority of which are sold in the wholesale market.

Plant inventory value report. Your report that declares the value of insurable plants in accordance with section 6.

Plant price schedule. A listing provided by FCIC of the maximum amount we will pay for insurable plants.

Policy renewal date. The policy renewal date is each anniversary of the original beginning of the insurance coverage (e.g. if insurance begins on October 1, 1998, the first policy renewal date is October 1, 1999).

Price level. The percentage of the plant price schedule price, up to 100 percent, that you elect and that is used to determine the amount of insurance and any indemnity.

Standard nursery containers. Rigid containers not less than 3 inches across the largest interior dimension at the top of the container, and which are appropriate in size and have drainage holes appropriate for the plant. In-ground fabric bags, trays, and cellpacks with individual cells less than 3 inches across the largest dimension, and burlap are not considered standard nursery containers under these crop provisions.

Stock plants. Plants used solely for propagation that are not intended for sale during the crop year.

2. *Unit Division.*

(a) In lieu of the definition of "basic unit" contained in section 1 of the Basic Provisions, a basic unit consists of all insurable plant inventory in the county in which you have a share.

(b) Inventory that would otherwise be one basic unit may be divided by electing an optional unit endorsement when you submit your application or prior to the policy renewal date for any subsequent crop year.

(c) The optional unit provisions in the Basic Provisions are not applicable.

3. *Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities.*

(a) The production reporting requirements contained in section 3 of the Basic Provisions are not applicable.

(b) In lieu of the requirement in section 3(b) of the Basic Provisions that specifies that changes to the coverage level, price, or amount of insurance must be made by the sales closing date, you must give us written notice of such changes not later than 15 days prior to the policy renewal date.

4. *Contract Changes.*

In accordance with section 4 of the Basic Provisions:

(a) The contract change date is March 31 of each year.

(b) If your policy renewal date is on or after July 1, your insurance coverage will be in accordance with the policy, as changed, if any, by the March 31 contract change date. If your policy renewal date is between March 31 and June 30 inclusive, you may elect to convert your policy to the changed policy or keep your current policy for one year. For the subsequent crop year, the changed policy terms will apply. The election must be made on our form by June 30 and the elected policy terms will be effective July 1.

5. *Cancellation and Termination Dates.*

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are the day preceding the policy renewal date.

6. *Plant Inventory Value Report.*

(a) Section 6 of the Basic Provisions is not applicable.

(b) You must submit a plant inventory value report to us with your application not later than the day preceding each subsequent policy renewal date.

(c) The plant inventory value report must include all growing locations, the value of your inventory, and your share. At our option, you will be required to provide documentation in support of your plant inventory value report including but not limited to a detailed plant inventory listing that includes each type of plant, the number of each plant type, and the value of each plant type; detailed individual sales and purchases of plants for the 3 previous crop years; sales totals for the previous 3 years; purchases of plant material, etc., and your ability to properly obtain and maintain nursery stock.

(d) Your plant inventory value report will be used to determine your premium and amount of insurance. If you do not submit a plant inventory value report or other information that may be required under section 6(c) by the date required, we will determine the plant inventory value or deny liability. Errors in reporting may be corrected by us at the time of loss adjustment.

(e) Your inventory must be valued according to the plant price schedule.

(f) You may revise your plant inventory value report to correct or change the value reported. If you wish to revise your plant inventory value report to reflect an increase in inventory value, you must notify us in writing at least 14 days before the change in inventory value will become effective. We

VOL 63 ISS 19 JA 29 1998 UMI

may inspect the inventory. Insurance will not attach on any proposed increase in inventory value until we accept the plant inventory in writing.

(g) You may choose the optional Peak Inventory Endorsement to cover temporary increases in your inventory value.

(h) You must insure the full value of your insurable plant inventory. Failure to insure the full value of your insurable plant inventory will result in the reduction of any claim in accordance with section 12(b)(1).

7. *Annual Premium.*

In lieu of section 7 of the Basic Provisions:

(a) We will determine your premium for the plant inventory value by multiplying the amount of insurance by the appropriate premium rate for basic units listed on the actuarial documents and by your share.

(b) The annual premium will be earned in full when insurance attaches. It is due and payable as follows:

(1) Forty percent on the date we accept the insurance inventory;

(2) If you apply or your policy renewal date is between January 1 and June 30 inclusive, you must pay the remaining premium by September 30 of the same year; and

(3) If you apply, or your policy renewal date is at any other time, you must pay the remaining premium by March 31 of the following year.

(c) Additional premium from an increase in the plant inventory value report is due and payable when the revised plant inventory value report is accepted by us.

(d) Interest will accrue at the rate of one and one-fourth percent simple interest per calendar month, or any part thereof, on any unpaid amount due us. For the purpose of premium amounts due us, interest will start on the first day of the month following the premium due dates specified in paragraph 7(b) above.

(e) Premium will not be reduced due to a decrease in the plant inventory value once the insurance period has begun.

8. *Insured Plants.*

In lieu of the provisions of sections 8 and 9 of the Basic Provisions, the insured nursery plant inventory will be all the nursery plants in the county that:

(a) Are contained in the eligible plant listing, unless a written agreement provides otherwise;

(b) Are classified as woody, herbaceous or foliage ornamental plants;

(c) Produce edible fruits or nuts, provided the fruit or nuts are not intended for sale;

(d) Are determined by us to be acceptable;

(e) Are grown in a county for which a premium rate is provided in the actuarial documents;

(f) Are grown under an irrigation practice for which you have adequate irrigation equipment and water to carry out a good irrigation practice at the time coverage begins, unless otherwise provided by the actuarial documents or written agreement.

(g) Are not stock plants;

(h) Are grown in accordance with the production practices for which premium rates have been established;

(i) Are grown in an appropriate medium; and

(j) Are grown in nursery facilities or at locations inspected by us and determined to be acceptable.

9. *Insurance Period.*

In lieu of the provisions of section 11 of the Basic Provisions, if you have paid your premium in accordance with section 7(b)(1), coverage begins 30 days after your application is signed by you, or the date the insurance inventory is accepted whichever is later, and at 12:01 a.m. of each subsequent policy renewal date as long as the policy remains in force and your plant inventory value report is received. Insurance ends at the earliest of:

(a) The date of final adjustment of a loss when the total indemnities paid equal the amount of insurance; or

(b) 11:59 p.m. of the day preceding the policy renewal date.

10. *Causes of Loss.*

(a) In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided for unavoidable damage caused only by the following causes of loss that occur within the insurance period:

(1) Adverse weather conditions, except as specified in section 10(b)(4);

(2) Fire, except where weeds and other forms of undergrowth in the vicinity of the plants or buildings on your insured site are not controlled by chemical or mechanical means or by removal;

(3) Wildlife;

(4) Earthquake;

(5) Volcanic eruption; or

(6) Failure of the irrigation water supply due to a cause of loss specified in section 10(a)(1) through (5) that occurs within the insurance period.

(b) In addition to the causes of loss excluded in section 12 of the Basic Provisions, we do not insure against any loss caused by:

(1) Disease or insect infestation, unless:

(i) A disease or insect infestation occurs for which no effective control measure exists; or

(ii) Coverage is specifically provided by the Special Provisions.

(2) A failure of or a reduction in the power supply, unless such failure is due to an insurable cause of loss specified in section 10(a);

(3) The inability to market the nursery plants as a direct result of quarantine, boycott, or refusal of a buyer to accept production;

(4) Frost or freeze, if frost or freeze protection is shown as being required in the eligible plant listing, unless:

(i) You have installed adequate frost or freeze protection equipment or facilities and there is a failure or breakdown that is directly caused by an insurable cause of loss specified in section 10(a). The insured plants must be damaged by cold temperatures and the damage must occur within 72 hours of the failure of such equipment or facilities unless you establish that repair or replacement was not possible between the time of failure or breakdown and the time the damaging temperatures occurred; or

(ii) The lowest temperature reached exceeded the ability of the required frost or freeze protection equipment to keep the insured plants from sustaining cold damage.

(5) Collapse or failure of buildings or structures, unless the damage to the building or structures results from a cause of loss specified in section 10(a).

11. *Duties in the Event of Damage or Loss.*

In addition to your duties contained under section 14 of the Basic Provisions, you must:

(a) Obtain our written consent prior to:

(1) Destroying, selling or otherwise disposing of any plant inventory that is damaged; or

(2) Changing or discontinuing your normal growing practices with respect to care and maintenance of the insured plant inventory.

(b) Failure to obtain our written consent will result in the denial of your claim.

(c) Submit a claim for indemnity to us on our form, not later than 60 days after the date of your loss, but in no event later than 60 days after the end of the insurance period.

12. *Settlement of Claim.*

(a) If at the time of loss, field market value A does not exceed the value on your accepted plant inventory value report, including any peak inventory endorsement, your indemnity will be determined by us for each unit as follows:

(1) Subtract field market value B from field market value A;

(2) Subject to section 12(c), subtract the crop year deductible from the result of section 12(a)(1) to obtain the loss amount;

(3) If the result of section 12(a)(2) is greater than zero, and subject to the limit of section 12(d), your indemnity equals the result of multiplying the result of section 12(a)(2) by your price level and by your share.

(b) If at the time of loss, field market value A exceeds the amount shown on your accepted plant inventory value report, we will pay any indemnity in the following manner:

(1) Divide the value shown on your accepted plant inventory value report by field market value A (rounded off to the nearest hundredth);

(2) Subtract field market value B from field market value A;

(3) Subject to section 12(c), subtract the crop year deductible from the result in section 12(b)(2) to obtain the loss amount; and

(4) If the result of section 12(b)(3) is greater than zero, and subject to the limit of section 12(d), your indemnity equals the result of section 12(b)(3) multiplied by section 12(b)(1), multiplied by your price level, and multiplied by your share.

(c) Individual insured losses occurring during the crop year may be accumulated to satisfy the crop year deductible if you timely report each loss to us. Sections 12(a)(2) and 12(b)(3) will not apply to any subsequent individual loss determinations when the total amount of accumulated losses is equal to or greater than the crop year deductible. However, no indemnities will be paid for subsequent losses after the crop year deductible has been met unless the value of the damaged plants exceeds the lesser of one percent of your inventory value or $250.

(d) The total of all indemnities for the crop year will not exceed the amount of insurance.

(e) The value of any insured plant inventory will be determined on the basis of our appraisals.

13. *Late and prevented planting.*

The late and prevented planting provisions in the Basic Provisions are not applicable.

14. *Written agreements.*

(a) In lieu of section 18(g) of the Basic Provisions each agreement must be applied for by the insured in writing with the application or not later than the policy renewal date;

(b) In addition to the requirements of section 18 of the Basic Provisions:

(1) Any written agreement is valid only until 11:59 p.m. of the day preceding the policy renewal date;

(2) Written agreements will not be approved to insure container plants if the container does not qualify as a standard nursery container; and

(3) In lieu of section 18(c), an application for a written agreement submitted after the year of application for insurance or the policy renewal date may be approved if you demonstrate your physical inability to have applied timely with your application for insurance or provide by the policy renewal date, and after physical inspection of the nursery plant inventory, we determine that the inventory will be salable at the value shown in the plant inventory value report as the actual date of the application.

Nursery Crop Insurance—Peak Inventory Endorsement

This endorsement is not a continuous contract.

In return for payment of premium for the coverage contained herein, this endorsement will be attached to and made part of the Nursery Crop Insurance Policy, subject to the terms and conditions described herein.

1. *Definitions.*

Coverage commencement date. The later of the date you declare as the beginning of the coverage or 30 days after a properly completed peak inventory value report is accepted by us.

Coverage term. The coverage term begins on the coverage commencement date and ends on the coverage termination date. It is calculated in months (rounded to the nearest tenth) by dividing the number of calendar days in the coverage term by 30. The minimum coverage term for premium calculation purposes is one month.

Coverage termination date. The date you declare that the peak amount of insurance for your nursery insurance contract will cease. This date cannot be later than the end of the crop year.

Peak amount of insurance. The additional value reported on the peak inventory value report multiplied by the coverage level and price level you elected under the Crop Provisions, and multiplied by your share.

Peak inventory value report. A report that declares the increase in aggregated wholesale market value of insurable plants over the value reported on the plant inventory value report, the coverage commencement and termination dates, and the other requirements of section 6 of the Nursery Crop Provisions.

2. *Eligibility.*

(a) You must have a Nursery crop insurance policy in effect for the crop year that this endorsement applies;

(b) You must have elected either the limited or additional level of coverage. This endorsement is not available if you have elected the Catastrophic Risk Protection Endorsement.

(c) You must submit a peak inventory value report that will serve as the application for coverage under this endorsement. We may reject the peak inventory value report if all requirements in this endorsement and the Nursery Crop Provisions are not met.

3. *Coverage.*

(a) The amount of insurance provided under the Nursery Crop Provisions is increased by the peak amount of insurance for the coverage term.

(b) Indemnities paid on the peak amount of insurance will apply to your crop year deductible in the same proportion as your peak amount of insurance under this endorsement has to your amount of insurance under the Nursery Crop Provisions.

(c) Except as provided herein, this endorsement does not change, amend or otherwise modify any other provision of your Nursery Crop Insurance Policy.

4. *Peak insurance period.*

Coverage begins on the coverage commencement date, provided you paid the required premium in accordance with section 5, and ends on the coverage termination date.

5. *Premium.*

(a) The premium for this endorsement is determined by multiplying the peak amount of insurance times the appropriate premium rate in the actuarial documents, times the coverage term and times your share.

(b) The premium for this endorsement is due and payable when the peak amount of insurance becomes effective.

6. *Reporting requirements.*

(a) In addition to the reporting requirements of section 6 of the Nursery Crop Provisions, you must submit a peak inventory value report on our form.

(b) If you have in effect an Optional Unit Endorsement, you must submit a peak inventory value report for each unit to which such report is applicable.

7. *Liability limit.*

The peak amount of insurance is limited to an amount equal to the amount of insurance you declare under the Nursery Crop Provisions.

Nursery Crop Insurance—Optional Unit Endorsement

This is a continuous endorsement.

In return for payment of premium for the coverage contained herein, this endorsement will be attached to and made part of the Basic Crop Insurance Policy and the Nursery Crop Provisions subject to the terms and conditions described herein.

1. *Definitions.*

Occurrence Deductible. Field market value A times (100 percent minus your coverage level election percentage.)

2. *Eligibility.*

(a) You must have a Nursery crop insurance policy in effect for the crop year that this endorsement applies.

(b) You must have elected either the limited or additional level of coverage. This endorsement is not available if you have elected the Catastrophic Risk Protection Endorsement.

3. *Reports.*

(a) In addition to information required under section 6 of the Nursery Crop Provisions, you must also provide the maximum value of insurable plants for each unit during the insurance period on the plant inventory value report. We will use no more than the value reported for each unit in calculating a claim under section 12 of the Nursery Crop Provisions.

(b) If you elect to obtain a Peak Inventory Endorsement and you have optional units under this endorsement, you must submit a peak inventory value report for each optional unit to which the Peak Inventory Endorsement will apply.

4. *Unit Division.*

(a) Your indemnity will be determined for each unit.

(b) This endorsement provides optional units for each practice for which a separate rate is established in the actuarial documents and for each plant group listed in section 3(c).

(c) Plant Groups.

1. Deciduous Trees (Shade and Flower);
2. Broadleaf Evergreen Trees;
3. Coniferous Evergreen Trees;
4. Fruit and Nut Trees;
5. Deciduous Shrubs;
6. Broadleaf Evergreen Shrubs;
7. Coniferous Evergreen Shrubs;
8. Small Fruits;
9. Herbaceous Perennials;
10. Roses;
11. Ground Cover and Vines;
12. Annuals;
13. Foliage; and
14. In addition, other plant groupings as listed in the Special Provisions, if the type of plant would meet the criteria for more than one of the plant groups specified in this subsection, you must elect only one plant group and all plants of that type must be included in that group.

5. *Premium.*

In lieu of section 7(a) of the Nursery Crop Provisions, your premium will be calculated by multiplying the amount of insurance determined under the Nursery Crop Provisions by the appropriate premium rate for basic units listed on the actuarial documents, by the premium rate for optional units listed on the actuarial documents, and by your share.

6. *Settlement of claim.*

(a) In lieu of section 12(a)(2) of the Nursery Crop Provisions, and subject to section 12(c), subtract the occurrence deductible from the result of section 12(a)(1).

(b) In lieu of section 12(b)(3) of the Nursery Crop Provisions, and subject to section 12(c), subtract the occurrence deductible from the result of section 12(b)(2).

Signed in Washington, DC, on January 22, 1998.

Kenneth D. Ackerman,

Manager, Federal Crop Insurance Corporation.

BILLING CODE 3410–08–P

VOL 63 ISS 19 JA 29 1998 UMI

FEDERAL ELECTION COMMISSION

11 CFR Chapter I

[Notice 1998—4]

Composition of the Commission

AGENCY: Federal Election Commission.

ACTION: Notice of disposition of petition for rulemaking.

SUMMARY: The Commission announces its disposition of a Petition for Rulemaking filed on December 4, 1997, by John J. Wheeling, Treasurer of the National Reform Party Organizing Committee. The petition asked the Commission to amend its rules to require either that two members of the current six-member Commission be affiliated with minor political parties, or to expand the Commission from six to nine members, with the three new members required to be affiliated with minor political parties. Further information is provided in the supplementary information that follows.

DATES: March 2, 1998.

FOR FURTHER INFORMATION CONTACT: Ms. Susan E. Propper, Assistant General Counsel, or Ms. Rita A. Reimer, Attorney, 999 E Street, N.W., Washington, D.C. 20463, (202) 219–3690 or (800) 424–9530.

SUPPLEMENTARY INFORMATION: On December 4, 1997, the Commission received a Petition for Rulemaking from John J. Wheeling, Treasurer of the National Reform Party Organizing Committee. The Petition asked the Commission to amend its rules to require either that two members of the current six-member Commission be affiliated with minor political parties; or to expand the Commission from six to nine members, with the three new members required to be affiliated with minor political parties. The Petition states that this action is necessary to protect the rights of minor political parties which, it argues, are infringed by what it claims is a statutory requirement at 2 U.S.C. 437c(a)(1) that the six-member Commission be composed of three Commissioners affiliated with the Democratic Party, and three affiliated with the Republican Party.

The Petition does not identify the specific section(s) of the regulations to be affected by these changes, as required by the Commission's rules governing rulemaking petitions at 11 CFR 200.2(b)(3), because the Commission's rules do not address this situation. Nor could they, because the requested actions are outside the scope of the Commission's rulemaking authority. For this reason the Commission did not publish a Notice of Availability in the **Federal Register** seeking comments on the Petition's merits, which action is normally taken pursuant to 11 CFR 200.3(a)(1) for petitions that meet the requirements of paragraph 200.2(b).

The Constitution at Art. II, section 2, cl. 2 provides that the President "shall nominate, and by and with the Advice and Consent of the Senate, shall appoint * * * [all] Officers of the United States, whose Appointments are not herein otherwise provided for, and which shall be established by Law." Congress has by law established a six-member Federal Election Commission, 2 U.S.C. 437c(a)(1); and Congress, not the Commission, has the sole authority to alter its size, either by adding three additional Commissioners or in any other way.

Under the Appointments Clause, the President is entitled to choose the individuals to nominate as Commissioners. However, it has been long recognized that "it is entirely proper for Congress to specify the qualifications for an office that it has created." *Bowsher* v. *Synar*, 478 U.S. 714, 740 (1986) (Stevens, J., concurring). The provision in section 437c(a)(1) that "no more than 3 [of the six] members of the Commission" appointed by the President "may be affiliated with the same political party" simply sets the necessary qualifications for the members of the Commission. Again, it is for Congress, and not the Commission, to determine how, if at all, these qualifications should be changed.

The Commission notes that there is nothing in the text of the law to require that the Commission be made up of three Democrats and three Republicans. The President can comply with this provision by choosing from among millions of persons affiliated with political parties, and millions more not affiliated with any party. The fact that Presidents to date have appointed only Democrats and Republicans as Commissioners does not mean that this will continue in the future, when they may choose to appoint a member of another political party, or an independent affiliated with no political party.

Moreover, contrary to the petitioner's claim, the statutory requirement that no more than three Commissioners be affiliated with the same political party does not discriminate against minor parties. In fact, the reverse is true: By ensuring that no more than three Commissioners be affiliated with the same political party, and at the same time requiring an absolute majority of four votes for the Commission to take formal action, 2 U.S.C. 437c(c), Congress has acted to insure that no political party will be able to single-handedly dictate Commission action. These considerations, however, are secondary to the Constitutional and statutory provisions, discussed above, under which the Commission is powerless to take the requested action.

The Commission's rules governing rulemaking petitions state 11 CFR 200.5 (a) and (d) that the Commission's decision on whether to initiate a rulemaking in response to a rulemaking petition may include, *inter alia*, consideration of the Commission's statutory authority and the necessity of statutory revision to accomplish the requested result. The Commission believe these factors are controlling and, therefore, at its open meeting of January 22, 1998, voted not a initiate a rulemaking to reconstitute the Commission as requested in this Petition.

Dated: January 23, 1998.

Joan D. Aikens,

Chairman, Federal Election Commission.

BILLING CODE 6715–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 97–NM–163–AD]

RIN 2120–AA64

Airworthiness Directives; British Aerospace Model BAe 146–100A, –200A, and –300A and Model Avro 146–RJ Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain British Aerospace Model BAe 146–100A, –200A, and –300A and Model Avro 146–RJ series airplanes. This proposal would require repetitive inspections of the attachment brackets between the horizontal and vertical stabilizers to detect intergranular corrosion, and follow-on actions. This proposal is prompted by issuance of mandatory continuing airworthiness information by a foreign civil airworthiness authority. The actions specified by the proposed AD are intended to detect and correct reduced structural integrity of the stabilizer brackets due to corrosion, which could result in reduced controllability of the airplane.

DATES: Comments must be received by March 2, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 97–NM–163–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from AI(R) American Support, Inc., 13850 Mclearen Road, Herndon, Virginia 20171. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Norman B. Martenson, Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2110; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 97–NM–163–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 97–NM–163–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The Civil Aviation Authority (CAA), which is the airworthiness authority for the United Kingdom, notified the FAA that an unsafe condition may exist on certain British Aerospace Model BAe 146–100A, –200A, and –300A and Model Avro 146–RJ series airplanes. The CAA advises that, during a routine inspection, intergranular corrosion was found on the attachment fittings between the horizontal and vertical stabilizers and on the adjoining vertical stabilizer lugs. Such corrosion may result from improper manufacturing techniques and, therefore, may exist on other airplanes of the same type design. This condition, if not detected and corrected in a timely manner, could reduce the structural integrity of the stabilizer attachment brackets, which could result in reduced controllability of the airplane.

Explanation of Relevant Service Information

British Aerospace has issued Service Bulletin SB.55–15, dated April 14, 1997, which describes procedures for a visual or an ultrasonic inspection of the attachment brackets between the horizontal and vertical stabilizers to detect intergranular corrosion. For airplanes on which no corrosion is found, the service bulletin describes procedures for restoration of the original protective treatment and application of additional surface protection to the attachment brackets. For airplanes on which corrosion is found that is accessible, the service bulletin describes procedures for blending out the corrosion, re-protecting the blended areas, and applying additional surface protection to the attachment brackets. The CAA classified this service bulletin as mandatory and issued British airworthiness directive 001–04–97 in order to assure the continued airworthiness of these airplanes in the United Kingdom.

FAA's Conclusions

These airplane models are manufactured in the United Kingdom and are type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the CAA has kept the FAA informed of the situation described above. The FAA has examined the findings of the CAA, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require accomplishment of the actions specified in the service bulletin described previously, except as discussed below.

Differences Between the Proposed Rule and Relevant Service Information

Operators should note that, although the service bulletin specifies that the manufacturer may be contacted for disposition of certain repair conditions, this proposal would require the repair of those conditions to be accomplished in accordance with a method approved by the FAA.

Operators also should note that the service bulletin and the British airworthiness directive do not specify accomplishment of repetitive inspections after the one-time inspection described in the service bulletin because repetitive inspections are included in a revised Maintenance Review Board (MRB) Report. However, the FAA has determined that it is necessary to mandate the repetitive inspections in paragraph (a) of this AD to ensure continued operational safety of the fleet.

Cost Impact

The FAA estimates that 40 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 1 work hour per airplane to accomplish the proposed actions, and that the average labor rate is $60 per work hour. Based on these figures, the cost impact of the proposed AD on U.S. operators is estimated to be $2,400, or $60 per airplane, per inspection cycle.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

Regulatory Impact

The regulations proposed herein would not have substantial direct effects on the States, on the relationship

VOL
63
ISS
19
JA
29
1998
UMI

between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

British Aerospace Regional Aircraft Limited [Formerly British Aerospace Regional Aircraft Limited, Avro International Division; British Aerospace, PLC; British Aerospace Commercial Aircraft Limited]: Docket 97–NM–163–AD.

Applicability: Model BAe 146–100A, –200A, and –300A and Model Avro 146–RJ series airplanes, certificated in any category, having the following constructors numbers:

Model	*Constructors Nos.*
BAe 146–100A, –200A, and –300A.	All.
Avro 146–RJ70/70A ..	All up to and including E1267.
Avro 146–RJ85/85A ..	All up to and including E2300.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (e) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To detect and correct reduced structural integrity of the stabilizer attachment brackets due to corrosion, which could result in reduced controllability of the airplane, accomplish the following:

(a) Perform an inspection to detect corrosion of the attachment brackets between the horizontal and vertical stabilizers, in accordance with British Aerospace Service Bulletin SB.55–15, dated April 14, 1997, at the time specified in paragraph (a)(1), (a)(2), or (a)(3) of this AD, as applicable. Thereafter, repeat the inspection at intervals not to exceed 12,000 flight cycles or 4 years after the initial inspection, whichever occurs first.

(1) For Model BAe 146–100A, –200A, and –300A series airplanes having constructors numbers identified in paragraph D.(1)(a) of the Planning Information section of the service bulletin: Inspect within 20 months after the effective date of this AD.

(2) For Model BAe 146–100A, –200A, and –300A series airplanes having constructors numbers identified in paragraph D.(1)(b) of the Planning Information section of the service bulletin: Inspect within 32 months after the effective date of this AD.

(3) For Model BAe 146–100A, –200A, and –300A series airplanes and Avro 146–RJ70A, –85A, and –100A airplanes having constructors numbers identified in paragraph D.(1)(c) of the Planning Information section of the service bulletin: Inspect within 44 months after the effective date of this AD.

(b) If no corrosion is detected, prior to further flight, restore the original protective treatment and apply additional surface protection to the attachment brackets in accordance with British Aerospace Service Bulletin SB.55–15, dated April 14, 1997.

(c) If any corrosion is detected and it is accessible, prior to further flight, blend out the corrosion, re-protect the blended areas, and apply additional surface protection to the attachment brackets in accordance with British Aerospace Service Bulletin SB.55–15, dated April 14, 1997.

(d) If any corrosion is detected and it is not accessible or, if after blending, the damage to the attachment brackets is found to be outside the limits identified in British Aerospace Service Bulletin SB.55–15, dated April 14, 1997, prior to further flight, repair in accordance with a method approved by the Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate.

(e) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, International Branch, ANM–116. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, International Branch, ANM–116.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the International Branch, ANM–116.

(f) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Note 3: The subject of this AD is addressed in British airworthiness directive 001–04–97.

Issued in Renton, Washington, on January 22, 1998.

Stewart R. Miller,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[Docket No. 97–NM–278–AD]

RIN 2120–AA64

Airworthiness Directives; Fokker Model F28 Mark 0070 and 0100 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to all Fokker Model F28 Mark 0070 and 0100 series airplanes. This proposal would require a one-time inspection of the torque links of the main landing gear (MLG) assemblies to determine if the lockwire is present on the apex bolt; and corrective action, if necessary. This proposal is prompted by the issuance of mandatory continuing airworthiness information by a foreign civil airworthiness authority. The actions specified by the proposed AD are intended to prevent failure of the MLG due to loose connections between the upper and lower torque links of the MLG.

DATES: Comments must be received by March 2, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 97-NM–278-AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Fokker Services B.V., Technical Support Department, P.O. Box 75047, 1117 ZN Schiphol Airport, the Netherlands. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Norman B. Martenson, Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2110; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 97-NM–278-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 97-NM–278-AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The Rijksluchtvaartdienst (RLD), which is the airworthiness authority for the Netherlands, notified the FAA that an unsafe condition may exist on all Fokker Model F28 Mark 0070 and 0100 series airplanes. The RLD advises that it received a report of an incident involving a Fokker Model F28 Mark 0070 series airplane in which the flight crew aborted takeoff due to excessive vibration. The flight crew suspected that the vibration originated from the main landing gear (MLG). Subsequent investigation of the torque link of the right MLG assembly revealed that the locking bolt and the plate of the apex joint were loose; additionally, the lockwire, which was intended to secure the locking bolt, was missing. Investigation of the left MLG assembly also revealed that the lockwire was missing. Similar discrepancies were noted on other Menasco MLG assemblies during production. In addition, the applicable maintenance documents for Messier-Dowty and Menasco MLG assemblies subsequently were reviewed, and no reference to the lockwire was noted. Such missing lockwire or loose locking bolt, if not corrected, could result in failure of the MLG.

Explanation of Relevant Service Information

The manufacturer has issued Fokker F100 All Operator Message (AOM) AOF100.013, reference TS96.68988, dated December 19, 1996, which describes procedures for a one-time inspection of the torque links of the MLG assembly to determine if lockwire is present on the apex bolt; and for retorquing the apex bolt and installing lockwire, if no lockwire is present. The RLD issued Dutch airworthiness directive 1996–147 (A), dated December 23, 1996, in order to assure the continued airworthiness of these airplanes in the Netherlands. The RLD refers to Menasco Service Bulletin 41050–32–13, dated December 20, 1996, as an additional source of service information for accomplishment of the actions required by this AD.

FAA's Conclusions

This airplane model is manufactured in the Netherlands and is type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the RLD has kept the FAA informed of the situation described above. The FAA has examined the findings of the RLD, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require accomplishment of the actions specified in the AOM described previously.

Cost Impact

The FAA estimates that 131 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 1 work hour per airplane to accomplish the proposed inspection, and that the average labor rate is $60 per work hour. Based on these figures, the cost impact of the proposed AD on U.S. operators is estimated to be $7,860, or $60 per airplane.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

Regulatory Impact

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant

VOL 63 ISS 19 JA 29 1998 UMI

economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Fokker: Docket 97–NM–278–AD.

Applicability: All Model F28 Mark 0070 and 0100 series airplanes, certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent failure of the main landing gear (MLG) due to loose connections between the upper and lower torque links of the MLG, accomplish the following:

(a) Inspect the torque links of the left and right MLG assemblies to determine if the lockwire is installed on the apex bolt, in accordance with Fokker F100 All Operator Message (AOM) AOF100.013, Reference TS96.68988, dated December 19, 1996, at the time specified in paragraph (a)(1) or (a)(2) of this AD, as applicable. If any discrepancy is found, prior to further flight, retorque the apex bolt and install lockwire in accordance with the AOM.

(1) For airplanes equipped with Menasco Aerospace, Ltd., MLG assemblies: Inspect within 5 days after the effective date of this AD.

(2) For airplanes equipped with Messier-Dowty, Ltd., MLG assemblies: Inspect within 30 days after the effective date of this AD.

(b) As of the effective date of this AD, no person shall install on any airplane an MLG torque link unless it has been inspected and corrective action has been accomplished, in accordance with Fokker F100 All Operator Message (AOM) AOF100.013, Reference TS96.68988, dated December 19, 1996.

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, International Branch, ANM–116.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the International Branch, ANM–116.

(d) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Note 3: The subject of this AD is addressed in Dutch airworthiness directive 1996–147 (A), dated December 23, 1996.

Issued in Renton, Washington, on January 22, 1998.

Stewart R. Miller,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[REG–209682–94]

RIN 1545–AS39

Adjustments Following Sales of Partnership Interests

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Partial withdrawal of notice of proposed rulemaking, amendment to notice of proposed rulemaking; notice of proposed rulemaking and notice of public hearing.

SUMMARY: This document withdraws a portion of the notice of proposed rulemaking published in the **Federal Register**, February 16, 1984 (49 FR 5940); contains proposed regulations relating to the optional adjustments to the basis of partnership property following certain transfers of partnership interests under section 743, the calculation of gain or loss under section 751(a) following the sale or exchange of a partnership interest, the allocation of basis adjustments among partnership assets under section 755, and the allocation of a partner's basis in its partnership interest to properties distributed to the partner by the partnership under section 732(c); and, finally, amends proposed regulations relating to the computation of a partner's proportionate share of the adjusted basis of depreciable property (or depreciable real property) under section 1017. The changes are necessary to provide clearer guidance on the proper application of these sections and will effect partnerships and partners where there are transfers of partnership interests, distributions of property, or elections under sections 108(b)(5) or (c). In addition, the proposed regulations under section 732(c) reflect changes to the law made by the Taxpayer Relief Act of 1997.

DATES: Written comments must be received by April 29, 1998. Outlines of topics to be discussed at the public hearing scheduled for Wednesday, July 8, 1998, at 10 a.m. must be received by Wednesday, June 24, 1998.

ADDRESSES: Send submissions to: CC:DOM:CORP:R (REG–209682–94), room 5226, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand delivered between the hours of 8 a.m. and 5 p.m. to: CC:DOM:CORP:R (REG–209682–94), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue, NW, Washington, DC.

Alternatively, taxpayers may submit comments electronically via the internet by selecting the "Tax Regs" option on the IRS Home Page, or by submitting comments directly to the IRS internet site at http://www.irs.ustreas.gov/prod/tax_regs/comments.html. The public hearing will be held in the IRS Auditorium, Internal Revenue Building, 1111 Constitution Avenue, NW, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Concerning the regulations, Terri A. Belanger, (202) 622–3070; concerning submissions and the hearing, LaNita VanDyke, (202) 622–7180 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)). Comments on the collection of information should be sent to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503, with copies to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, T:FP, Washington, DC 20224. Comments on the collection of information should be received by March 30, 1998. Comments are specifically requested concerning:

Whether the proposed collection of information is necessary for the proper performance of the functions of the Internal Revenue Service, including whether the information will have practical utility;

The accuracy of the estimated burden associated with the proposed collection of information (see below);

How the quality, utility, and clarity of the information to be collected may be enhanced;

How the burden of complying with the proposed collection of information may be minimized, including through the application of automated collection techniques or other forms of information technology; and

Estimates of capital or start-up cost and costs of operation, maintenance, and purchase of service to provide information.

The collection of information in this proposed regulation is in §§ 1.743–1(b), 1.743–1(k), and 1.755–1. This information is required in order for partners to have adequate knowledge to comply with section 743 and for the IRS to verify compliance with section 743. This information will be used to determine whether the amount of tax has been computed correctly. Responses to this collection of information are mandatory for partnerships that have made an election under section 754 and for which a section 743 transfer has been made. The likely respondents are businesses or other for-profit institutions.

Estimated total annual recordkeeping burden under § 1.743–1(b): 600,000 hours.

The estimated annual burden per recordkeeper varies from 1 hour to 300 hours, depending on the individual circumstances, with an estimated average of 4 hours.

Estimated number of recordkeepers: 150,000.

Estimated total annual reporting burden under § 1.743–1(k)(1): 225,000 hours.

The estimated annual burden per respondent is estimated at an average of 3 hours.

Estimated number of respondents: 75,000.

Estimated frequency of responses: On occasion.

Estimated total annual reporting burden under § 1.743–1(k)(2): 75,000 hours.

The estimated annual burden per respondent is estimated at an average of 1 hour.

Estimated number of respondents: 75,000.

Estimated frequency of responses: On occasion.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Background

This document proposes to (a) revise §§ 1.743–1 and 1.755–1 of the Income Tax Regulations (26 CFR part 1), (b) withdraw § 1.168–2(n) of the proposed Income Tax Regulations published on February 16, 1984 (49 FR 5940), and (c) amend §§ 1.732–1, 1.732–2, 1.734–1, 1.751–1 of the Income Tax Regulations, and § 1.1017–1 of the proposed Income Tax Regulations published January 7, 1997 (62 FR 955).

Section 743(b) provides for an optional adjustment to the basis of partnership property following certain transfers of partnership interests. The Code provides for basis adjustments in an attempt to coordinate the transferee's tax consequences and economic consequences. The amount of the basis adjustment is the difference between the transferee's basis in the partnership interest (outside basis) and its share of the partnership's basis in the partnership's assets (inside basis). Once the amount of the basis adjustment is determined, it is allocated among the partnership's various assets pursuant to section 755.

The proposed regulations coordinate sections 704(c), 743, 751, and 755, and reflect changes in the Code and Income Tax Regulations since the adoption of the current regulations. The proposed regulations also provide rules concerning adjustments to the basis of partnership property made pursuant to section 1017(b)(3)(C). The proposed regulations describe how to determine a partner's proportionate share of the adjusted basis of depreciable property (or depreciable real property) under section 1017, and clarify that an adjustment to the basis of partnership property made under section 1017(b)(3)(C) is treated in the same manner as an adjustment to the basis of partnership property made under section 743.

Section 732(c) provides for the allocation of a partner's basis in its partnership interest upon certain distributions of property to the partner by the partnership. Section 732(c) was amended by the Taxpayer Relief Act of 1997, Public Law 105–34, section 1061, 111 Stat. 788, 945–46 (1997). Under prior law, the allocation was made based on the adjusted basis of the distributed property to the partnership immediately before the distribution. Under the new law, the allocation is made, in general, based on the fair market value of the distributed property on the date of distribution. The proposed regulations amend the existing regulations under section 732 to reflect this change.

Explanation of Provisions

A. Section 743

In General

If an election is in effect under section 754, section 743 requires the partnership to adjust the basis of partnership property upon the transfer of an interest in the partnership by sale or exchange or on the death of a partner. The partnership is required to increase the adjusted basis of partnership property by the excess of the transferee's basis in the transferred partnership interest over the transferee's share of the adjusted basis to the partnership of the partnership's property. The partnership is also required to decrease the adjusted basis of partnership property by the excess of the transferee's share of the adjusted basis to the partnership of partnership property over the transferee's basis in the transferred partnership interest.

The proposed regulations address a number of issues raised in connection with the calculation, treatment, and reporting of basis adjustments under section 743. In particular, the proposed regulations (i) Clarify the manner in which the partnership calculates a transferee's income, gain, loss, or deduction when the transferee has a

VOL

JA
29
1998
UMI

basis adjustment under section 743 (including the recovery of negative basis adjustments) and (ii) coordinate sections 743 and 704(c) when partnerships elect the remedial allocation method under § 1.704–3(d). The proposed regulations also provide that partnerships (rather than partners) are required to make and report the basis adjustments under section 743(b). Partnerships are required to adjust the transferee's distributive share of partnership tax items so that the information reported on the transferee's Schedule K–1 reflects the adjustments to the transferee's distributive share of the partnership items affected by the basis adjustment.

Determining the Amount of the Basis Adjustment

The amount of the basis adjustment with respect to partnership property under section 743 is the difference between the transferee's share of the partnership's inside basis and the transferee's outside basis. The current regulations provide that a partner's share of the adjusted basis of partnership property is equal to the sum of the partner's interest as a partner in partnership capital and surplus, plus the partner's share of partnership liabilities. The current regulations also provide that where section 704(c) applies to property contributed to the partnership, section 704(c) is taken into account in determining a partner's share of the adjusted basis of partnership property.

The current regulations do not provide, other than by example, specific guidance on how to determine a transferee partner's share of the adjusted basis of partnership property. The proposed regulations provide that a transferee's share of the adjusted basis to the partnership of partnership property is equal to the sum of the transferee's interest as a partner in the partnership's previously taxed capital, plus the transferee's share of partnership liabilities. The partner's share of the partnership's previously taxed capital is determined by reference to a hypothetical transaction in which (immediately after the transfer of the partnership interest) the partnership is assumed to have sold all of its assets in a fully taxable transaction for cash equal to the fair market value of the assets. The partner's share of the partnership's previously taxed capital is equal to: (i) The amount of cash that the transferee would receive on liquidation of the partnership immediately following the hypothetical transaction, increased by (ii) the amount of tax loss that would be allocated to the transferee from the hypothetical transaction, and decreased by (iii) the amount of tax gain that would be allocated to the transferee from the hypothetical transaction.

Calculation of Income, Gain, or Loss

The basis adjustment under section 743, like any other basis amount, is a reference used to calculate income, gain, loss, and deduction. However, generally the basis adjustment under section 743 is an adjustment with respect to the transferee. No adjustment is made to the common basis of partnership property (i.e., the partnership's adjusted basis for the property). Thus, for purposes of income, deduction, gain, loss, and distribution, the transferee will have a special basis for those partnership properties that are adjusted under section 743(b). The proposed regulations clarify the rules contained in the current regulations.

The basis adjustment under section 743 does not affect the partnership's computation of any item under section 703, and does not have any effect on the partners' capital accounts. Partnerships compute their tax items at the partnership level under section 703 without regard to the basis adjustments. Partnership level tax items (including any remedial allocations under § 1.704–3(d)) are then allocated among the partners, including the transferee, in accordance with section 704. Finally, the partnership adjusts the transferee's distributive share of partnership tax items to reflect the transferee's special basis in the properties that give rise to the tax items. A transferee's income, gain, or loss from the sale of partnership property in which the transferee has a basis adjustment is equal to the transferee's distributive share of partnership income, gain, or loss (including any remedial allocations under § 1.704–3(d)) from the sale of the property adjusted to account for the amount of the transferee's basis adjustment with respect to the property.

Coordination of Section 743 With Section 704(c)

Section 704(c) is taken into account in determining a transferee's share of the partnership's basis in the partnership's assets. As a result, some or all of a transferee's basis adjustment may be attributable to section 704(c) built-in gain or loss when a transferee purchases a partnership interest from a partner that contributed section 704(c) property to the partnership. For example, assume that A contributes property with a fair market value of $100 and an adjusted tax basis of $10 to a partnership for a fifty percent interest and B contributes $100 of cash for the remaining fifty percent interest. Immediately after the formation of the partnership, A's share of the partnership's basis in the partnership property is $10, while B's share is $100. The contributed asset then appreciates in value to $120, and A transfers its entire interest to T for $110 while an election is in effect under section 754. T will have a basis adjustment of $100. The first $90 of the basis adjustment is attributable to the section 704(c) built-in gain, while the remaining $10 of the basis adjustment is attributable to T's fifty percent share of the $20 of post-contribution appreciation in the contributed property.

Despite the fact that a portion of the basis adjustment may be attributable to a property's section 704(c) built-in gain, section 704(c) and section 743 operate independently. Section 1.704–1(b)(2)(iv)(g)(3) requires a partnership to recover the value of section 704(c) property on the books of the partnership over the property's remaining useful life, determined with reference to the property's useful life in the hands of the contributing partner. At the same time, § 1.168–2(n)(1) of the proposed Income Tax Regulations provides that the entire basis adjustment is recovered as though it is new property. Cf. Sections 168(i)(7) and 197(f)(2). As a result, the book and tax items representing the section 704(c) built-in gain are recovered over different periods.

Although a portion of the basis adjustment may represent actual tax basis equal to the amount of the section 704(c) built-in gain, the deductions attributable to the basis adjustment cannot be allocated to the noncontributing partner. The basis adjustment does not, therefore, eliminate any book-tax disparities that result from ceiling rule problems relating to the section 704(c) property. Because the basis adjustment only affects the transferee, the Service and Treasury believe that it is appropriate for sections 704(c) and 743(b) to operate independently.

When a partnership adopts the remedial allocation method, however, the partners may be viewed as agreeing to shift, over time, a portion of the partnership's basis in its assets from the noncontributing partner to the contributing partner. Partnership basis that was considered part of the noncontributing partner's share of the partnership's basis at the time the adjustment to basis was made will be transferred to the contributing partner as the property is recovered on the partnership's books. In addition, a partnership that adopts the remedial allocation method with respect to contributed property must depreciate or amortize the portion of the contributed property's book basis that is attributable to section 704(c) built-in gain as though it is new property at the time of contribution. As a result, the Service and Treasury believe that it is appropriate to coordinate the recovery periods of the section 704(c) built-in gain and the built-in gain portion of the basis adjustment where the partnership uses the remedial allocation method.

Where a partnership adopts the remedial allocation method, the proposed regulations treat the portion of any basis adjustment that is attributable to section 704(c) built-in gain differently from the rest of the basis adjustment. Instead of treating the section 704(c) built-in gain portion of the basis adjustment and the basis adjustment in excess of such amount as newly acquired property, the section 704(c) built-in gain portion of the basis adjustment is recovered over the remaining cost recovery period for the section 704(c) built-in gain. The recovery period for the partner's share of common basis continues to be determined by reference to the property's useful life in the hands of the contributing partner, and the remaining basis adjustment in excess of the section 704(c) built-in gain portion of the basis adjustment is recovered as if it were new property.

If a partnership receives remedial allocations of income under § 1.704–3(d) with respect to an item of adjusted partnership property, the partner does not offset the cost recovery deductions from the property against the remedial allocations of income. Rather, the partner will receive an allocation of remedial income and a separate cost recovery deduction. If a partner receives remedial allocations of deductions under § 1.704-3(d) with respect to an item of partnership property that has a negative basis adjustment, the partner first adds the amount of the remedial allocation of deduction to any common basis deductions received from the property. The partner then reduces the total amount of deductions from the property by the amount of the negative basis adjustment recovered in that year.

One result of this proposal is that the interests in a partnership will generally be fungible (i.e. the tax consequences that stem from the purchase of a partnership interest do not vary with the identity of the transferor), if: (i) Each partnership interest has an identical right in capital and profits, and (ii) each item of the partnership's section 704(c) property is subject to the remedial allocation method. The Service and Treasury request comments on situations in which the fungibility of partnership interests may otherwise be accommodated without significantly adding to the complexity of subchapter K. In addition, comments are requested concerning the application of the remedial allocation method to contributed property where there are no distortions caused by the ceiling rule at the time the property is contributed to the partnership.

Recovery of Negative Basis Adjustments

Section 1.168–2(n)(2) of the proposed Income Tax Regulations provides that a negative basis adjustment to depreciable property is recovered over the property's remaining recovery period in the hands of the partnership (i.e., the adjustment made to the common basis of the partnership property). The portion of the adjustment that is recovered in any year is equal to the product of (i) the amount of the decrease to the item's adjusted basis (determined as of the date of the transfer), multiplied by (ii) a fraction, the numerator of which is the portion of the adjusted basis of the item recovered by the partnership in that year, and the denominator of which is the adjusted basis of the item on the date of transfer (determined prior to any basis adjustments).

Because the basis adjustment under section 743 is personal to the transferee, the primary method adopted by the proposed regulations for recovering a negative basis adjustment provides that the basis adjustment does not affect the common basis of partnership property and does not affect the tax consequences of partners other than the transferee. Under this method, the recovery of the negative basis adjustment may generate ordinary income to the extent that it exceeds the transferee's share of the depreciation deductions. The proposed regulations provide that, unless the partnership elects to make a common basis adjustment, as described below, the amount of the basis adjustment recovered in any year first decreases the transferee's distributive share of the partnership's deductions from the adjusted item of property for that year. If, in any year, a partnership does not allocate to a transferee sufficient deductions from the adjusted property to offset the recovery of the negative basis adjustment, then the transferee's distributive share of the deductions from other items of partnership property is decreased. The transferee then recognizes income equal to the excess of the amount of the negative basis adjustment recovered in the year over the transferee's share of deductions from the other items of property for the year.

As an alternative, the proposed regulations also allow partnerships to elect to follow the approach of the old proposed regulations. If this election is made, the partnership treats the amount of the negative basis adjustment as an item of built-in gain, decreasing the total amount of depreciation or amortization that the partnership may allocate for tax purposes. This election would prevent the transferee from ever recognizing income in situations where the partnership did not allocate to the transferee sufficient depreciation to offset the negative basis adjustment. It should be noted, however, that this election has no effect on the partners' capital accounts, which continue to be adjusted to reflect the depreciation or amortization of the adjusted property as though there was no basis adjustment to the property. Consequently, to the extent that the basis adjustment causes the amount of the deductions allocated to the non-transferee partners for book purposes to exceed the amount of tax depreciation available to be allocated to them by the partnership, a book-tax disparity results for the non-transferee partners.

The Service and Treasury request comments concerning the recovery of negative basis adjustments under section 743. Specifically, the Service and Treasury request comments regarding whether there are other possible ways of accounting for the recovery of negative basis adjustments that treat the basis adjustment as personal to the transferee and, at the same time, do not interfere with the economic agreement among the partners.

Reporting and Returns

The statutory language of section 743(b) indicates that partnerships are responsible for making the basis adjustments. This mandate is repeated in the language of the current regulations issued under both sections 743 and 755. Notwithstanding that partnerships are required to make and allocate basis adjustments under the current regulations, transferees are required to report the basis adjustments. Transferees accomplish this by attaching statements to their returns that show how the section 743(b) adjustment was determined and how the adjustment was allocated among the various partnership properties. No existing guidance indicates when (i.e., before or after the Schedule K–1) the effect of the basis adjustment to specific partnership items is to be determined or who is required to make and report the adjustments to the partnership items.

The proposed regulations clarify that partnerships are required to make the basis adjustments. In addition, the

VOL 63 ISS 19 JA 29 1998 UMI

proposed regulations place the responsibility for reporting basis adjustments on partnerships. Partnerships report basis adjustments by attaching statements to their partnership returns when they acquire knowledge of transfers subject to section 743. In addition, partnerships are required to adjust specific partnership items in light of the basis adjustments. Consequently, amounts reported on the transferee's Schedule K–1 are adjusted amounts.

Transferees are subject to an affirmative obligation to notify partnerships of their basis in acquired partnership interests. To accommodate partnership concerns about the reliability of the information provided, partnerships are entitled to rely on the written representations of transferees concerning either the amount paid for the partnership interest or the transferee's basis in the partnership interest under section 1014 (unless clearly erroneous).

B. Section 751

Section 751(a) provides that to the extent an amount realized on the sale or exchange of a partnership interest is attributable to the transferor's interest in unrealized receivables or inventory items of the partnership, the amount realized is considered to be an amount realized from the sale or exchange of property other than a capital asset. Thus, the transferor partner may recognize ordinary income or loss on the sale or exchange of its partnership interest. Under the current section 751 regulations, the amount of income or loss realized by a partner on the sale or exchange of an interest in section 751 property is equal to the difference between: (i) The portion of the total amount realized for the partnership interest allocated to section 751 property, and (ii) the portion of the transferor partner's basis in its partnership interest allocated to the property. Generally, the portion of the total amount realized allocated to section 751 property is determined by the seller and purchaser in an arm's length agreement. The portion of the partner's adjusted basis in the partnership interest allocated to the section 751 property equals the basis that the property would have had under section 732 if the transferor partner had received its proportionate share of the property in a current distribution immediately before the sale.

The proposed regulations amend these rules for determining the transferor partner's gain or loss from the sale or exchange of its interest in section 751 property. Rather than attempting to allocate a portion of the transferor partner's amount realized and adjusted basis to the section 751 property, the proposed regulations adopt a hypothetical sale approach. Thus, the income or loss realized by a partner from section 751 property upon the sale or exchange of its interest is the amount of income or loss that would have been allocated to the partner from section 751 property (to the extent attributable to the partnership interest sold or exchanged) if the partnership had sold all of its property in a fully taxable transaction for fair market value immediately prior to the partner's transfer of the partnership interest.

C. Section 755

In General

The current regulations under section 755 contain a number of problems that prevent partnerships from allocating the section 743(b) basis adjustments to appropriate assets. The proposed regulations resolve these problems and implement the purposes of section 743(b) by focusing on the items that the transferee partner would receive upon a fair market value sale of all of the partnership's assets.

At the same time, the proposed regulations recognize that adjustments under section 734 differ significantly from adjustments under section 743. Specifically, adjustments under section 743(b) are intended to affect the transferee partner only. In contrast, adjustments under section 734 affect all of the partners. As a result, the proposed regulations under section 755 contain two separate regimes—one that applies to adjustments under section 734, and another that applies to adjustments under section 743. While the regime allocating adjustments under section 743 focuses on the transferee, the regime allocating adjustments under section 734 focuses on the difference between value and basis at the partnership entity level.

Allocating Adjustments Under Section 743(b)

The proposed regulations provide that allocations of basis adjustments under section 743 among partnership assets are made based on the amount of income, gain, or loss (including remedial allocations under § 1.704–3(d)) that the transferee would be allocated if, immediately after the section 743(b) transfer, all of the partnership's assets were disposed of in a fully taxable transaction at fair market value. By adopting this method, in some situations the proposed regulations will require adjustments to be made that increase the basis of some assets and decrease the basis of others.

Hypothetical Sale

The current regulations do not take each partner's interest in specific assets into account. The amount of the section 743 adjustment is allocated among partnership properties to reduce the difference between the fair market value and the adjusted basis of partnership properties at the partnership entity level rather than at the partner level. This formulation of the rule fails to take into account special allocations or the varying treatment of different partners by virtue of the operation of section 704(c) or the minimum gain chargeback. Therefore, basis adjustments will often be made to the wrong assets, exposing the partners to tax consequences that may vary significantly from the partners' economic consequences.

Rather than attempt to define a partner's share of the basis or fair market value of a specific partnership asset, the proposed regulations focus on the actual tax items that would be allocated to the transferee in a fully taxable, fair market value sale. Under the proposed regulations, partnerships are required to adjust the basis of partnership assets in a manner that reflects the amount of income, gain, or loss that the transferee would recognize if all of the partnership's assets were sold in the hypothetical transaction.

Two-Way Adjustments

Under the current regulations, the partnership may not increase the basis of assets that have a fair market value in excess of basis and, at the same time, decrease the basis of assets that have a basis in excess of fair market value. Thus, if the section 743(b) adjustment is positive, the partnership may only increase the basis of assets that have a basis that is less than their fair market value. This restriction prevents the partnership from adjusting the basis of its assets in a manner that coordinates a transferee's tax consequences with its economic consequences.

The proposed regulations remove this restriction. Instead, the amount of the section 743 adjustment is viewed as a net adjustment. This net amount is then allocated between the partnership's two classes of assets (capital gain property and ordinary income property). The amount of the adjustment allocated to ordinary income property may be an increase while the amount of the adjustment allocated to capital gain property is a decrease. The amount of the adjustment allocated to each class is then allocated among the assets within each class. The amount of the adjustment allocated to one item within the class may also be an increase even if the amount allocated to another item is a decrease.

Allocation Between Classes

The amount of the basis adjustment allocated to the class of ordinary income property is equal to the total amount of income, gain, or loss (including any remedial allocations under § 1.704–3(d)) that would be allocated to the transferee from the sale of all ordinary income property in the hypothetical transaction.

The amount of the basis adjustment to capital gain property is equal to (i) the total amount of the basis adjustment under section 743, less (ii) the amount of the basis adjustment allocated to ordinary income; provided, however, that in no event may the amount of any decrease in basis allocated to capital gain property exceed the partnership's basis in capital gain property.

In the event that a decrease in basis allocated to capital gain property exceeds the partnership's basis in capital gain property, the excess is applied to reduce the basis of ordinary income property.

Allocation Within Classes

The amount of the basis adjustment allocated to each item of property within the class of ordinary income property equals:

(a) The amount of income, gain, or loss (including any remedial allocations under § 1.704–3(d)) that would be allocated to the transferee from the hypothetical sale of the item, minus

(b) The product of (1) any decrease to the amount of the basis adjustment to ordinary income property required because the partnership did not have enough basis in capital gain property to reduce, multiplied by (2) a fraction, the numerator of which is the fair market value of the item of property to the partnership and the denominator of which is the total fair market value of all items of the partnership's ordinary income property.

The amount of the basis adjustment allocated to each item of property within the class of capital gain property equals:

(a) The amount of income, gain, or loss (including any remedial allocations under § 1.704–3(d)) that would be allocated to the transferee from the hypothetical sale of the item, minus

(b) The product of (1) the total amount of gain or loss (including any remedial allocations under § 1.704–3(d)) that would be allocated to the transferee from the hypothetical sale of all items of capital gain property, minus the amount of the positive basis adjustment to all items of capital gain property or plus the amount of the negative basis adjustment to all items of capital gain property, multiplied by (2) a fraction, the numerator of which is the fair market value of the item of property to the partnership and the denominator of which is the total fair market value of all of the partnership's items of capital gain property.

Allocating Adjustments Under Section 734

As under the current regulations, the proposed regulations provide that allocations of section 734 adjustments among partnership assets are made based on the difference between the value of the property and the property's basis. Where there is a distribution of partnership property resulting in an adjustment to the basis of undistributed partnership property under section 734(b)(1)(B) or (b)(2)(B), the adjustment must be allocated to remaining partnership property of a character similar to that of the distributed property with respect to which the adjustment arose. If there is an increase in basis to be allocated within a class of property, the increase must be allocated first to properties with unrealized appreciation in proportion to their respective amounts of unrealized appreciation before such increase (but only to the extent of each property's unrealized appreciation). Any remaining increase must be allocated among the properties within the class in proportion to their fair market values. If there is a decrease in basis to be allocated within a class, the decrease must be allocated first to properties with unrealized depreciation in proportion to their respective amounts of unrealized depreciation before such decrease (but only to the extent of each property's unrealized depreciation). Any remaining decrease must be allocated among the properties within the class in proportion to their adjusted bases (as adjusted under the preceding sentence).

D. Section 1017

Section 1017 provides rules concerning basis reductions resulting from a taxpayer's exclusion of cancellation of indebtedness income. In general, under § 1.1017–1(f) of the proposed Income Tax Regulations, if a partner makes an election under section 108(b)(5) or section 108(c), the partner may treat a partnership interest as depreciable property (or depreciable real property) to the extent the partnership correspondingly reduces the partner's proportionate share of the adjusted basis of depreciable property (or depreciable real property) held by the partnership. These proposed regulations provide guidance regarding the determination of a partner's proportionate share of the partnership's basis in depreciable property (or depreciable real property) and the consequences of the basis reductions required under sections 108 and 1017.

In general, these proposed regulations provide that a partner's share of the partnership's basis in depreciable property (or depreciable real property) equals the sum of (a) the partner's section 743(b) basis adjustment, if any, in the partnership items of depreciable property (or depreciable real property) and (b) the common basis depreciation deductions (not including remedial allocations of depreciation under § 1.704–3(d)) that are reasonably expected to be allocated to the partner over the partnership property's remaining useful life. The amount of common basis depreciation deductions that a partner may reasonably expect to be allocated over the partnership property's useful life is based on all the facts and circumstances in effect at the time of the basis reduction. It is per se unreasonable, however, for the partnership to treat the same depreciation deductions as "reasonably expected" by more than one partner. Thus, the amount of the partners' total basis reductions under sections 108(b)(5) and 108(c) cannot exceed the partnership's basis in depreciable property (or depreciable real property).

The proposed regulations further provide that any reduction to the basis of depreciable property required under sections 108 and 1017 constitutes an adjustment to the basis of partnership property with respect to the partner only. These adjustments, therefore, are similar to the basis adjustments required under section 743(b). Accordingly, the proposed regulations provide that these adjustments have the same effect and are recovered in the same manner as basis adjustments required under section 743(b); provided, however, that the election to treat the negative basis adjustment as an item of built-in gain (which decreases the amount of depreciation or amortization that the partnership may allocate) is not applicable. Consequently, if a partner's actual share of the partnership's common basis depreciation deductions in any year is less than the amount that was included in determining the partner's proportionate share of the partnership's common basis depreciation deductions for that year, the partner will recognize income.

VOL 63 ISS 19 JA 29 1998 UMI

E. Section 732

In General

With some exceptions, partners generally may receive distributions of partnership property without recognition of gain or loss. Rules are provided for determining the basis of the distributed property in the hands of the distributee. In the event that multiple properties are distributed by a partnership, section 732(c) provides allocation rules for determining their bases in the distributee partner's hands.

Section 732(c) was amended by the Taxpayer Relief Act of 1997, Public Law 105–34, § 1061, 111 Stat. 788, 945–46 (1997). Under prior law, a partner's basis in its partnership interest was allocated among property distributed to the partner based on the distributed properties' adjusted bases. The rules allocated the partner's basis in its partnership interest first to unrealized receivables and inventory items in an amount equal to the partnership's adjusted basis (or if the basis to be allocated was less than the partnership's basis, then in proportion to the partnership's basis). To the extent that there was any basis remaining to be allocated among distributed properties, the basis was allocated among the other properties in proportion to their adjusted bases to the partnership.

Section 1061 of the Taxpayer Relief Act of 1997, Public Law 105–34, section 1061, 111 Stat. 788, 945–46 (1997), revised the allocation rules for determining basis in the distributee partner's hands. As under prior law, basis is allocated first to any distributed unrealized receivables and inventory items before it is allocated to any other distributed property. Basis is then allocated among the other distributed properties to the extent of each such property's adjusted basis to the partnership. Any remaining basis adjustment, if an increase, is allocated among properties with unrealized appreciation in proportion to their respective amounts of unrealized appreciation (to the extent of each property's appreciation), and then in proportion to their respective fair market values. If the remaining basis adjustment is a decrease, it is allocated among properties with unrealized depreciation in proportion to their respective amounts of unrealized depreciation (to the extent of each property's depreciation), and then in proportion to their respective adjusted bases (taking into account the adjustment already made). The proposed regulations amend the current regulations to incorporate these changes to section 732(c).

Section 732(d)

Section 732(d) provides a special rule that applies to determine the basis of property distributed to a transferee partner who acquired any part of its partnership interest in a transfer when an election under section 754 was not in effect. When the special rule applies, the basis of distributed property is adjusted immediately before the distribution to reflect the basis that the property would have had if the partnership had a section 754 election in effect at the time the transferee acquired the partnership interest. As a result, the basis of the distributed property in the hands of the partnership immediately before the distribution more closely approximates its fair market value. Consequently, the transferee's basis in the distributed property will also more closely approximate its fair market value.

Section 1.732–1(d)(4) of the current regulations requires transferees to apply the special basis rule in certain cases. Specifically, transferees are required to apply the special basis rule if at the time of the acquisition of the partnership interest—

(i) The fair market value of all partnership property (other than money) exceeded 110 percent of its adjusted basis to the partnership,

(ii) An allocation of basis under section 732(c) upon a liquidation of the partnership interest immediately after the transfer of the interest would have resulted in a shift of basis from property not subject to an allowance for depreciation, depletion, or amortization, to property subject to such an allowance, and

(iii) A basis adjustment under section 743(b) would change the basis to the transferee partner of the property actually distributed.

The purpose of § 1.732–1(d)(4) was to prevent distortions caused by section 732(c) that might inflate the basis of depreciable, depletable, or amortizable property above its fair market value. At the time that the regulations were adopted, such distortions might occur because section 732(c) allocated basis among distributed properties based on their relative bases. The changes made to section 732(c) by the Taxpayer Relief Act of 1997, Public Law 105–34, section 1061, 111 Stat. 788, 945–46 (1997), make the distortions targeted by the regulations less likely to occur. As a result, the Service and Treasury request comments on the proper scope of section 732(d), and specifically, under what circumstances, if any, the Secretary should exercise its authority to mandate the application of section 732(d) to a transferee.

Proposed Effective Date

The regulations are proposed to be effective: (i) For all transfers of partnership interests on and after the date the regulations are published as final regulations in the **Federal Register**, (ii) for all distributions from partnerships on and after the date the regulations are published as final regulations in the **Federal Register**, and (iii) for all elections under sections 108(b)(5) and 108(c) made on or after the date the regulations are published as final regulations in the **Federal Register**.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in EO 12866. Therefore, a regulatory assessment is not required. An initial regulatory flexibility analysis has been prepared for the collection of information in this notice of proposed rulemaking under 5 U.S.C. 603. A summary of the analysis is set forth below under the heading "Summary of Initial Regulatory Flexibility Analysis." Pursuant to section 7805(f) of the Internal Revenue Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Summary of Initial Regulatory Flexibility Analysis

This initial analysis is prepared pursuant to the Regulatory Flexibility Act (5 U.S.C. chapter 6). In general, the proposed regulations require a transferee that acquires an interest in a partnership with an election under section 754 in effect, to notify the partnership of the transfer. This notification must include the name and taxpayer identification number of the transferee and the transferee's basis in the acquired partnership interest. The partnership is required to include a statement with its Form 1065, U.S. Partnership Return of Income for the taxable year in which the partnership acquires knowledge of the transfer. This statement must identify the name and taxpayer identification number of the transferee and the computation of the basis adjustment and the allocation of that adjustment to partnership properties. These requirements will ensure that the partnership has notice that a transfer has occurred and that the proper basis adjustments are computed. The legal basis for this requirement is contained in sections 743(b), 6001, 7805(a).

There were approximately 1,494,000 partnerships in 1994. However, these proposed regulations apply only to partnerships that have made an election under section 754. The election under section 754 is generally not made unless there has been a transfer of a partnership interest or a distribution by the partnership. Moreover, the effects of the election attach to specific items of partnership property and may provide only temporary benefits for the partners. The election also cannot be revoked without the consent of the Secretary. Accordingly, the Service and Treasury believe that most partnerships do not make the election under section 754. Therefore, most partnerships will not be affected by the proposed regulations in any given year.

After a partner conveys information to the partnership concerning a transfer of a partnership interest, the partnership must adjust the partner's interest in the basis of partnership property. Because these basis adjustments will affect the partner's share of depreciation or amortization deductions and amounts of gain or loss on the disposition of certain items of partnership property, the partnership must prepare and maintain special entries on its books. However, in many cases, partnership returns are prepared using computer software that can prepare and maintain these special entries after the initial year.

The IRS and Treasury Department are not aware of any federal rules that may duplicate, overlap, or conflict with the proposed rule.

As an alternative to the disclosure described above, the Service and Treasury considered, but rejected, a rule that would have required the partners, and not the partnerships, to make the basis reductions and to determine the effects of the basis adjustments on the partner's distributive shares. This alternative was rejected because the Service and Treasury believe that partnerships generally have better access to the information necessary to report section 743 basis adjustments properly. To require the partners rather than the partnerships to bear the burden of reporting would require the partnerships to provide the partners with significant amounts of information not otherwise needed by the partners. There are no known alternative rules that are less burdensome to the partnerships and their partners but that accomplish the purpose of the statute. The Service and Treasury request comments concerning possible alternatives.

Comments and Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written comments (a signed original and eight (8) copies) that are timely submitted to the IRS. All comments will be available for public inspection and copying.

A public hearing has been scheduled for Wednesday, July 8, 1998, at 10 a.m. in the IRS Auditorium of the Internal Revenue Building. Because of access restrictions, visitors will not be admitted beyond the Internal Revenue Building lobby more than 15 minutes before the hearing starts.

The rules of 26 CFR 601.601(a)(3) apply to the hearing. Persons that wish to present oral comments at the hearing must submit written comments by April 29, 1998, and submit an outline of the topics to be discussed and the time to be devoted to each topic (signed original and eight (8) copies) by Wednesday, June 24, 1998.

A period of 10 minutes will be allotted to each person for making comments.

An agenda showing the scheduling of the speakers will be prepared after the deadline for receiving outlines has passed. Copies of the agenda will be available free of charge at the hearing.

Drafting Information

The principal authors of these proposed regulations are Brian M. Blum and Terri A. Belanger of the Office of the Assistant Chief Counsel (Passthroughs and Special Industries). However, personnel from other offices of the Internal Revenue Service and the Treasury Department participated in their development.

Partial Withdrawal of Notice of Proposed Rulemaking

Accordingly, under the authority of 26 U.S.C. 7805, § 1.168–2(n) in the notice of proposed rulemaking published February 16, 1984 (49 FR 5940) is withdrawn.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 is amended by adding entries in numerical order to read as follows:

Authority: 26 U.S.C. 7805 * * *

Section 1.168–2 also issued under 26 U.S.C. 168. * * *

Section 1.732–1 also issued under 26 U.S.C. 732.

Section 1.732–2 also issued under 26 U.S.C. 732.

Section 1.734–1 also issued under 26 U.S.C. 734.

Section 1.743–1 also issued under 26 U.S.C. 743.

Section 1.751–1 also issued under 26 U.S.C. 751.

Section 1.755–1 also issued under 26 U.S.C. 755. * * *

Section 1.1017–1 also issued under 26 U.S.C. 1017. * * *

Par. 2. Section 1.732–1 is amended by revising paragraphs (c), (d)(1)(vi), (d)(4)(iii) and the last sentence of paragraph (d)(1)(v) and removing the undesignated text including the examples immediately following paragraph (d)(4)(iii) to read as follows:

§ 1.732–1 Basis of distributed property other than money.

* * * * *

(c) *Allocation of basis among properties distributed to a partner*—(1) *General rule*—(i) *Unrealized receivables and inventory items.* The basis to be allocated to properties distributed to a partner under section 732(a)(2) or (b) is allocated first to any unrealized receivables (as defined in section 751(c)) and inventory items (as defined in section 751(d)(2)) in an amount equal to the adjusted basis of each such property to the partnership immediately before the distribution. If the basis to be allocated is less than the sum of the adjusted bases to the partnership of the distributed unrealized receivables and inventory items, the adjusted basis of the distributed property must be decreased in the manner provided in paragraph (c)(2)(i) of this section.

(ii) *Other distributed property.* Any basis not allocated to unrealized receivables or inventory items under paragraph (c)(1)(i) of this section is allocated to any other property distributed to the partner in the same transaction by assigning to each distributed property an amount equal to the adjusted basis of the property to the partnership immediately before the distribution. However, if the sum of the adjusted bases to the partnership of such other distributed property does not equal the basis to be allocated among the distributed property, any increase or decrease required to make the amounts equal is allocated among the distributed property as provided in paragraph (c)(2) of this section.

(2) *Adjustment to basis allocation*—(i) *Decrease in basis.*

VOL 63 ISS 19 JA 29 1998 UMI

Any decrease to the basis of distributed property required under paragraph (c)(1) of this section is allocated first to distributed property with unrealized depreciation in proportion to each property's respective amount of unrealized depreciation before any decrease (but only to the extent of each property's unrealized depreciation). If the required decrease exceeds the amount of unrealized depreciation in the distributed property, the excess is allocated to the distributed property in proportion to the adjusted bases of the distributed property, as adjusted pursuant to the immediately preceding sentence.

(ii) *Increase in basis.* Any increase to the basis of distributed property required under paragraph (c)(1)(ii) of this section is allocated first to distributed property (other than unrealized receivables and inventory items) with unrealized appreciation in proportion to each property's respective amount of unrealized appreciation before any increase (but only to the extent of each property's unrealized appreciation). If the required increase exceeds the amount of unrealized appreciation in the distributed property, the excess is allocated to the distributed property (other than unrealized receivables or inventory items) in proportion to the fair market value of the distributed property.

(3) *Unrealized receivables and inventory items.* If the basis to be allocated upon a distribution in liquidation of the partner's entire interest in the partnership is greater than the adjusted basis to the partnership of the unrealized receivables and inventory items distributed to the partner, and if there is no other property distributed to which the excess can be allocated, the distributee partner sustains a capital loss under section 731(a)(2) to the extent of the unallocated basis of the partnership interest.

(4) *Examples.* The provisions of this paragraph (c) are illustrated by the following examples:

Example 1. A is a one-fourth partner in partnership PRS and has an adjusted basis in its partnership interest of $650. PRS distributes inventory items and Assets X and Y to A in liquidation of A's entire partnership interest. The distributed inventory items have a basis to the partnership of $100 and a fair market value of $200. Asset X has an adjusted basis to the partnership of $50 and a value of $400. Asset Y has an adjusted basis to the partnership and value of $100. Neither Asset X nor Asset Y consists of inventory items or unrealized receivables. Under this paragraph (c), A's basis in its partnership interest is allocated first to the inventory items in an amount equal to their adjusted basis to the partnership. A, therefore, has an adjusted basis in the inventory items of $100. The remaining basis, $550, is allocated to the distributed property first in an amount equal to the property's adjusted basis to the partnership. Thus, Asset X is allocated $50 and Asset Y is allocated $100. Asset X is then allocated $350, the amount of unrealized appreciation in Asset X. Finally, the remaining basis, $50, is allocated to Assets X and Y in proportion to their fair market values: $40 to Asset X (400/500 x $50), and $10 to Asset Y (100/500 x $50). Therefore, after the distribution, A has an adjusted basis of $440 in Asset X and $110 in Asset Y.

Example 2. B is a one-fourth partner in partnership PRS and has an adjusted basis in its partnership interest of $200. PRS distributes Asset X and Asset Y to B in liquidation of its entire partnership interest. Asset X has an adjusted basis to the partnership and fair market value of $150. Asset Y has an adjusted basis to the partnership of $150 and a fair market value of $50. Neither of the assets consists of inventory items or unrealized receivables. Under this paragraph (c), B's basis is first assigned to the distributed property to the extent of the partnership's basis in each distributed property. Thus, Asset X and Asset Y are each assigned $150. Because the aggregate adjusted basis of the distributed property, $300, exceeds the basis to be allocated, $200, a decrease of $100 in the basis of the distributed property is required. Assets X and Y have unrealized depreciation of zero and $100, respectively. Thus, the entire decrease is allocated to Asset Y. After the distribution, B has an adjusted basis of $150 in Asset X and $50 in Asset Y.

Example 3. C, a partner in partnership PRS, receives a distribution in liquidation of its entire partnership interest of $6,000 cash, inventory items having an adjusted basis to the partnership of $6,000, and real property having an adjusted basis to the partnership of $4,000. C's basis in its partnership interest is $9,000. The cash distribution reduces C's basis to $3,000, which is allocated entirely to the inventory items. The real property has a zero basis in C's hands. The partnership bases not carried over to C for the distributed properties are lost unless an election under section 754 is in effect requiring the partnership to adjust the bases of remaining partnership properties under section 734(b).

Example 4. Assume the same facts as in *Example 3* of this paragraph except C receives a distribution in liquidation of its entire partnership interest of $1,000 cash and inventory items having a basis to the partnership of $6,000. The cash distribution reduces C's basis to $8,000, which can be allocated only to the extent of $6,000 to the inventory items. The remaining $2,000 basis, not allocable to the distributed property, constitutes a capital loss to partner C under section 731(a)(2). If the election under section 754 is in effect, see section 734(b) for adjustment of the basis of undistributed partnership property.

(5) *Effective date.* This paragraph (c) applies to distributions of property from a partnership that occur on or after the date final regulations are published in the **Federal Register**.

(d) * * *

(1) * * *

(v) * * * (For a shift of transferee's basis adjustment to like property, see § 1.743–1(g).)

(vi) The provisions of this paragraph (d)(1) may be illustrated by the following example:

Example. (i) Transferee partner, T, purchased a one-fourth interest in partnership PRS for $17,000. At the time T purchased the partnership interest, the election under section 754 was not in effect and the partnership inventory had a basis to the partnership of $14,000 and a value of $16,000. T's purchase price reflected $500 of this difference. Thus, $4,000 of the $17,000 paid by T for the partnership interest was attributable to T's share of partnership inventory with a basis of $3,500. Within 2 years after T acquired the partnership interest, T retired from the partnership and received in liquidation of its entire partnership interest the following property:

	Assets	
	Adjusted basis to PRS	Market value
Cash	$1,500	$1,500
Inventory	3,500	4,000
Asset X	2,000	4,000
Asset Y	4,000	5,000

(ii) The value of the inventory received by T was one-fourth of the value of all partnership inventory and was T's share of such property. It is immaterial whether the inventory T received was on hand when T acquired the interest. In accordance with T's election under section 732(d), the amount of T's share of partnership basis that is attributable to partnership inventory is increased by $500 (one-fourth of the $2,000 difference between the value of the property, $16,000, and its $14,000 basis to the partnership at the time T purchased its interest). This adjustment under section 732(d) applies only for purposes of distributions to T, and not for purposes of partnership depreciation, depletion, or gain or loss on disposition. Thus, the amount to be allocated among the properties received by T in the liquidating distribution is $15,500 ($17,000, T's basis for the partnership interest, reduced by the amount of cash received, $1,500). This amount is allocated as follows: The basis of the inventory items received is $4,000, consisting of the $3,500 common partnership basis, plus the basis adjustment of $500 which T would have had under section 743(b). The remaining basis of $11,500 ($15,500 minus $4,000) is allocated among the remaining property distributed to T by assigning to each property the adjusted basis to the partnership of such property and adjusting that basis by any required increase or decrease. Thus, the adjusted basis to T of Asset X is $5,111 ($2,000, the adjusted basis of Asset X to the partnership, plus $2,000, the amount of unrealized appreciation in Asset X, plus $1,111 ($4,000/$9,000 multiplied by $2,500). Similarly, the adjusted basis of Asset Y to T is $6,389 ($4,000, the adjusted basis of Asset Y to the partnership, plus $1,000, the amount of unrealized appreciation in Asset Y, plus, $1,389 ($5,000/$9,000 multiplied by $2,500).

* * * * *

(4) * * *

(iii) A basis adjustment under section 743(b) would change the basis to the transferee partner of the property actually distributed.

* * * * *

Par. 3. Section 1.732–2 is amended by adding a new sentence at the end of the *Example* in paragraph (b) to read as follows:

§ 1.732–2 Special partnership basis of distributed property.

* * * * *

(b) * * *

Example. * * * See § 1.743–1(g).

* * * * *

Par. 4. In § 1.734–1, paragraph (e) is added to read as follows:

§ 1.734–1 Optional adjustment to basis of undistributed partnership property.

* * * * *

(e) *Recovery of adjustments to basis of partnership property*—(1) *Increases in basis.* For purposes of section 168, if the basis of a partnership's recovery property is increased as a result of the distribution of property to a partner, then the increased portion of the basis must be taken into account as if it were newly-purchased recovery property placed in service when the distribution occurs. Consequently, any applicable recovery period and method may be used to determine the recovery allowance with respect to the increased portion of the basis. However, no change is made for purposes of determining the recovery allowance under section 168 for the portion of the basis for which there is no increase.

(2) *Decreases in basis.* For purposes of section 168, if the basis of a partnership's recovery property is decreased as a result of the distribution of property to a partner, then the decrease in basis must be accounted for over the remaining recovery period of the property beginning with the recovery period in which the basis is decreased.

(3) *Effective date.* This paragraph (e) applies to distributions of property from a partnership that occur on or after the date final regulations are published in the **Federal Register**.

Par. 5. Section 1.743–1 is revised to read as follows:

§ 1.743–1 Optional adjustment to basis of partnership property.

(a) *Generally.* The basis of partnership property is adjusted as a result of the transfer of an interest in a partnership by sale or exchange or on the death of a partner only if the election provided by section 754 (relating to optional adjustments to the basis of partnership property) is in effect with respect to the partnership. Whether or not the election provided in section 754 is in effect, the basis of partnership property is not adjusted as the result of a contribution of property, including money, to the partnership.

(b) *Determination of adjustment.* In the case of the transfer of an interest in a partnership, either by sale or exchange or as a result of the death of a partner, a partnership that has an election under section 754 in effect—

(1) Increases the adjusted basis of partnership property by the excess of the transferee's basis for the transferred partnership interest over the transferee's share of the adjusted basis to the partnership of the partnership's property; or

(2) Decreases the adjusted basis of partnership property by the excess of the transferee's share of the adjusted basis to the partnership of the partnership's property over the transferee's basis for the transferred partnership interest.

(c) *Determination of transferee's basis in the transferred partnership interest.* In the case of the transfer of a partnership interest by sale or exchange or as a result of the death of a partner, the transferee's basis in the transferred partnership interest is determined under section 742. See also section 752 and §§ 1.752–1 through 1.752–5.

(d) *Determination of transferee's share of the adjusted basis to the partnership of the partnership's property*—(1) *Generally.* A transferee's share of the adjusted basis to the partnership of partnership property is equal to the sum of the transferee's interest as a partner in the partnership's previously taxed capital, plus the transferee's share of partnership liabilities. Generally, a transferee's interest as a partner in the partnership's previously taxed capital is equal to—

(i) The amount of cash that the transferee would receive on a liquidation of the partnership following the hypothetical transaction, as defined in paragraph (d)(2) of this section; increased by

(ii) The amount of tax loss (including any remedial allocations under § 1.704–3(d)) that would be allocated to the transferee from the hypothetical transaction, as defined in paragraph (d)(2) of this section; and decreased by

(iii) The amount of tax gain (including any remedial allocations under § 1.704–3(d)) that would be allocated to the transferee from the hypothetical transaction, as defined in paragraph (d)(2) of this section.

(2) *Hypothetical transaction defined.* For purposes of paragraph (d)(1) of this section, the hypothetical transaction means the disposition by the partnership of all of the partnership's assets, immediately after the transfer of the partnership interest, in a fully taxable transaction for cash equal to the fair market value of the assets. For example, if the partnership properly maintains capital accounts under the rules of § 1.704–1(b)(2)(iv), the transferee's interest as a partner in the partnership's previously taxed capital is equal to—

(i) The transferee's capital account adjusted for the hypothetical transaction; increased by

(ii) The amount of tax loss (including any remedial allocations under § 1.704–3(d)) that would be allocated to the transferee from the hypothetical transaction; and decreased by

(iii) The amount of tax gain (including any remedial allocations under § 1.704–3(d)) that would be allocated to the transferee from the hypothetical transaction.

(3) *Examples.* The provisions of this paragraph (d) are illustrated by the following examples:

Example 1. (i) A is a member of partnership PRS in which the partners have equal interests in capital and profits. The partnership has made an election under section 754, relating to the optional adjustment to the basis of partnership property. A sells its interest to T for $22,000. The balance sheet of the partnership at the date of sale shows the following:

	Assets	
	Adjusted basis	Market value
Cash	$ 5,000	$5,000
Accounts receivable	10,000	10,000
Inventory	20,000	21,000
Depreciable assets	20,000	40,000
Total	55,000	76,000

	Liabilities and capital	
	Adjusted per books	Market value
Liabilities	$10,000	$10,000
Capital:		
A	15,000	22,000
B	15,000	22,000

VOL 63 ISS 19 JA 29 1998 UMI

	Liabilities and capital	
	Adjusted per books	Market value
C	15,000	22,000
Total	55,000	76,000

(ii) The amount of the basis adjustment under section 743(b) is the difference between the basis of T's interest in the partnership and T's share of the adjusted basis to the partnership of the partnership's property. Under section 742, the basis of T's interest is $25,333 (the cash paid for A's interest, $22,000, plus $3,333, T's share of partnership liabilities). T's interest in the partnership's previously taxed capital is $15,000 ($22,000, the amount of cash T would receive if PRS liquidated immediately after the hypothetical transaction, decreased by $7,000, the amount of tax gain allocated to T from the hypothetical transaction). T's share of the adjusted basis to the partnership of the partnership's property is $18,333 ($15,000 share of previously taxed capital, plus $3,333 share of the partnership's liabilities). The amount of the basis adjustment to partnership property therefore, is $7,000, the difference between $25,333 and $18,333.

Example 2. A, B, and C form partnership PRS, to which A contributes land worth $1,000 (Asset 1) with an adjusted basis to A of $400, and B and C each contribute $1,000 cash. Each partner has $1,000 credited to it on the books of the partnership as its capital contribution. The partners share in profits equally. During the partnership's first taxable year, Asset 1 appreciates in value to $1,300. A sells its one-third interest in the partnership to T for $1,100, when an election under section 754 is in effect. The amount of tax gain that would be allocated to T from the hypothetical transaction is $700 ($600 section 704(c) built-in gain, plus one-third of the additional gain). Thus, T's interest in the partnership's previously taxed capital is $400 ($1,100, the amount of cash T would receive if PRS liquidated immediately after the hypothetical transaction, decreased by $700, T's share of gain from the hypothetical transaction). The amount of T's basis adjustment to partnership property is $700 (the excess of $1,100, T's cost basis for its interest, over $400, T's share of the adjusted basis to the partnership of partnership property).

(e) *Allocation of basis adjustment.* For the allocation of the basis adjustment under this section among the individual items of partnership property, see section 755 and the regulations thereunder.

(f) *Subsequent transfers.* Where there has been more than one transfer of a partnership interest, a transferee's basis adjustment is determined without regard to any prior transferee's basis adjustment. In the case of a gift of an interest in a partnership, the donor is treated as transferring, and the donee as receiving, that portion of the basis adjustment attributable to the gifted partnership interest. The provisions of this paragraph (f) may be illustrated by the following example:

Example. (i) A, B, and C form partnership PRS. A and B each contribute $1,000 cash and C contributes land with a basis and value of $1,000. When the land has appreciated in value to $1,300, A sells its interest to T1 for $1,100 (one-third of $3,300, the value of the partnership property). An election under section 754 is in effect; therefore, T1 has a basis adjustment of $100.

(ii) After the land has further appreciated in value to $1,600, T1 sells its interest to T2 for $1,200 (one-third of $3,600, the value of the partnership property). T2 has a basis adjustment of $200. This amount is determined without regard to any basis adjustment that T1 may have had in the partnership assets.

(iii) During the following year, T2 makes a gift to T3 of fifty percent of T2's interest in PRS. At the time of the transfer, T2 has a $200 basis adjustment. T2 is treated as transferring $100 of the basis adjustment to T3 with the gift of the partnership interest.

(g) *Distributions*—(1) *Distribution of adjusted property to the transferee*—(i) *Coordination with section 732.* If a partnership distributes property to a transferee and the transferee has a basis adjustment for the property, the basis adjustment is taken into account under section 732. See § 1.732–2(b).

(ii) *Coordination with section 734.* For certain adjustments to the common basis of remaining partnership property after the distribution of adjusted property to a transferee, see § 1.734–2(b).

(2) *Distribution of adjusted property to another partner*—(i) *Coordination with section 732.* If a partner receives a distribution of property with respect to which another partner has a basis adjustment, the distributee does not take the basis adjustment into account under section 732.

(ii) *Reallocation of basis.* A transferee with a basis adjustment in property that is distributed to another partner reallocates the basis adjustment among the remaining items of partnership property pursuant to § 1.755–1(c).

(3) *Distributions in complete liquidation of a partner's interest.* If a transferee receives a distribution of property (whether or not the transferee has a basis adjustment in such property) in liquidation of its interest in the partnership, the adjusted basis to the partnership of the distributed property immediately before the distribution includes the transferee's basis adjustment for the property in which the transferee relinquished an interest (either because it remained in the partnership or was distributed to another partner). Any basis adjustment to property in which the transferee is deemed to relinquish its interest is reallocated among the properties distributed to the transferee under § 1.755–1(c).

(4) *Coordination with other provisions.* The rules of sections 704(c)(1)(B), 731, 737, and 751 apply before the rules of this paragraph (g).

(5) *Example.* The provisions of this paragraph (g) are illustrated by the following example:

Example. (i) A, B, and C are equal partners in partnership PRS. Each partner originally contributed $10,000 in cash, and PRS used the contributions to purchase five nondepreciable capital assets. PRS has no liabilities. After five years, PRS's balance sheet appears as follows:

	Assets	
	Adjusted basis	Market value
Asset 1	$10,000	$10,000
Asset 2	4,000	6,000
Asset 3	6,000	6,000
Asset 4	7,000	4,000
Asset 5	3,000	13,000
Total	30,000	39,000

	Capital	
	Adjusted per books	Market value
Partner A	$10,000	$13,000
Partner B	10,000	13,000
Partner C	10,000	13,000
Total	30,000	39,000

(ii) A sells its interest to T for $13,000 when PRS has an election in effect under section 754. T receives a basis adjustment in the partnership property that is equal to $3,000 (the excess of T's basis in the partnership interest, $13,000, over T's share of the adjusted basis to the partnership of partnership property, $10,000). The basis adjustment is allocated under section 755, and the partnership's balance sheet appears as follows:

	Assets		
	Adjusted basis	Market value	Basis adjustment
Asset 1	$10,000	$10,000	0.00
Asset 2	4,000	6,000	666.67
Asset 3	6,000	6,000	0.00
Asset 4	7,000	4,000	(1,000.00)
Asset 5	3,000	13,000	3,333.33
Total	30,000	39,000	4,000.00

	Capital		
	Adjusted per books	Market value	Special basis
Partner T	$10,000	$13,000	$3,000
Partner B	10,000	13,000	0
Partner C	10,000	13,000	0
Total	30,000	39,000	3,000

(iii) Assume that PRS distributes Asset 2 to T in partial liquidation of T's interest in the partnership. T has a basis adjustment of $666.67 in Asset 2. Under paragraph (g)(1)(i) of this section, T takes the basis adjustment into account under section 732. Therefore, T will have a basis in Asset 2 of $4,666.67 following the distribution.

(iv) Assume instead that PRS distributes Asset 5 to C in complete liquidation of C's interest in PRS. T has a basis adjustment of $3,333.33 in Asset 5. Under paragraph (g)(2)(i) of this section, C does not take T's basis adjustment into account under section 732. Therefore, the partnership's basis for purposes of sections 732 and 734 is $3,000. Under paragraph (g)(2)(ii) of this section, T's $3,333.33 basis adjustment is reallocated among the remaining partnership assets under § 1.755–1(c).

(v) Assume instead that PRS distributes Asset 5 to T in complete liquidation of its interest in PRS. Under paragraph (g)(3) of this section, immediately prior to the distribution of Asset 5 to T, PRS must adjust the basis of Asset 5. Therefore, immediately prior to the distribution, PRS's basis in Asset 5 is equal to $6,000, which is the sum of (A) $3,000, PRS's common basis in Asset 5, plus (B) $3,333.33, T's basis adjustment to Asset 5, plus (C) ($333.33), the sum of T's basis adjustments in Assets 2 and 4. For purposes of sections 732 and 734, therefore, PRS will be treated as having a basis in Asset 5 equal to $6,000.

(h) *Contributions of adjusted property*—(1) *Section 721(a) transactions.* If, in a transaction described in section 721(a), a partnership (the upper tier) contributes to another partnership (the lower tier) property with respect to which a basis adjustment has been made, the basis adjustment is treated as contributed to the lower tier, regardless of whether the lower tier partnership makes a section 754 election. The lower tier's basis in the contributed assets and the upper tier's basis in the partnership interest received in the transaction are determined with reference to the basis adjustment. However, that portion of the basis of the upper tier's interest in the lower tier attributable to the basis adjustment must be segregated and allocated solely to the transferee partner for whom the basis adjustment was made. Similarly, that portion of the lower tier's basis in its assets attributable to the basis adjustment must be segregated and allocated solely to the upper tier and the transferee. A partner with a basis adjustment in property held by a partnership that terminates under section 708(b)(1)(B) will continue to have the same basis adjustment with respect to property deemed contributed by the terminated partnership to the new partnership under § 1.708–1(b)(1)(iv), regardless of whether the new partnership makes a section 754 election.

(2) *Section 351 transactions*—(i) *Basis in transferred property.* A corporation's adjusted tax basis in property transferred to the corporation by a partnership in a transaction described in section 351 is determined with reference to any basis adjustment to the property under section 743(b) (other than any basis adjustment that reduces a partner's gain under paragraph (h)(2)(ii) of this section).

(ii) *Partnership gain.* The amount of gain, if any, recognized by the partnership on a transfer of property by the partnership to a corporation in a transfer described in section 351 is determined without reference to any basis adjustment to the transferred property under section 743(b). The amount of gain, if any, recognized by the partnership on the transfer that is allocated to a partner with a basis adjustment in the transferred property is adjusted to reflect the partner's basis adjustment in the transferred property.

(iii) *Basis in stock.* The partnership's adjusted tax basis in stock received from a corporation in a transfer described in section 351 is determined without reference to the basis adjustment in property transferred to the corporation in the section 351 exchange. A partner with a basis adjustment in property transferred to the corporation, however, has a special basis adjustment in the stock received by the partnership in the section 351 exchange in an amount equal to the partner's basis adjustment in the transferred property, reduced by any basis adjustment that reduced the partner's gain under paragraph (h)(2)(ii) of this section.

(i) [Reserved].

(j) *Effect of basis adjustment*—(1) *In general.* The basis adjustment constitutes an adjustment to the basis of partnership property with respect to the transferee only. No adjustment is made to the common basis of partnership property. Thus, for purposes of income, deduction, gain, loss, and distribution, the transferee will have a special basis for those partnership properties the bases of which are adjusted under section 743(b) and this section. The adjustment to the basis of partnership property under section 743 has no effect on the partnership's computation of any item under section 703.

(2) *Computation of partner's distributive share of partnership items.* The partnership first computes its items of income, deduction, gain, or loss at the partnership level under section 703. The partnership then allocates the partnership items among the partners, including the transferee, in accordance

VOL 63 ISS 19 JA 29 1998 UMI

with section 704, and adjusts the partners' capital accounts accordingly. The partnership then adjusts the transferee's distributive share of the items of partnership income, deduction, gain, or loss, in accordance with paragraphs (j)(3) and (4) of this section, to reflect the effects of the transferee's basis adjustment to the property that is the source of the item of partnership income, deduction, gain, or loss. These adjustments to the transferee's distributive shares do not affect the transferee's capital account.

(3) *Effect of basis adjustment in determining items of income, gain, or loss*—(i) *In general.* The amount of a transferee's income, gain, or loss from the sale or exchange of a partnership asset in which the transferee has a basis adjustment is equal to the transferee's share of the partnership's gain or loss from the sale of the asset (including any remedial allocations of gain or loss under § 1.704–3(d)), minus the amount of the transferee's positive basis adjustment for the partnership asset (determined by taking into account the recovery of the basis adjustment under paragraph (j)(4)(i)(B) of this section) or plus the amount of the transferee's negative basis adjustment for the partnership asset (determined by taking into the account the recovery of the basis adjustment under paragraph (j)(4)(ii)(B) of this section).

(ii) *Examples.* The following examples illustrate the principles of this paragraph (j)(3):

Example 1. A and B form equal partnership PRS. A contributes nondepreciable property with a fair market value of $50 and an adjusted tax basis of $100. PRS will use the traditional allocation method under § 1.704–3(b). B contributes $50 cash. A sells its interest to T for $50. PRS has an election in effect to adjust the basis of partnership property under section 754. T receives a negative $50 basis adjustment that, under section 755, is allocated to the nondepreciable property. PRS then sells the property for $60. PRS recognizes a book gain of $10 and a tax loss of $40. T will receive an allocation of $40 of tax loss under the principles of section 704(c). Because T has a negative $50 basis adjustment in the nondepreciable property, T recognizes a $10 gain from the partnership's sale of the property.

Example 2. A and B form equal partnership PRS. A contributes nondepreciable property with a fair market value of $100 and an adjusted tax basis of $50. B contributes $100 cash. PRS will use the traditional allocation method under § 1.704–3(b). A sells its interest to T for $100. PRS has an election in effect to adjust the basis of partnership property under section 754. Therefore, T receives a $50 basis adjustment that, under section 755, is allocated to the nondepreciable property. PRS then sells the nondepreciable property for $90. PRS recognizes a book loss of $10 and a tax gain of $40. T will receive an allocation of the entire $40 of tax gain under the principles of section 704(c). Because T has a $50 basis adjustment in the property, T recognizes a $10 loss from the partnership's sale of the property.

Example 3. A and B form equal partnership PRS. PRS will make allocations under section 704(c) using the remedial allocation method described in § 1.704–3(d). A contributes property with a fair market value of $100 and an adjusted tax basis of $150. B contributes $100 cash. A sells its partnership interest to T for $100. PRS has an election in effect to adjust the basis of partnership property under section 754. T receives a negative $50 basis adjustment that, under section 755, is allocated to the property. The partnership then sells the property for $120. The partnership recognizes a $20 book gain and a $30 tax loss. The book gain will be allocated equally between the partners. The entire $30 tax loss will be allocated to T under the principles of section 704(c). To match its $10 share of book gain, B will be allocated $10 of remedial gain and T will be allocated an offsetting $10 of remedial loss. T was allocated a total of $40 of tax loss with respect to the property. Because T has a negative $50 basis adjustment to the property, T recognizes a $10 gain from the partnership's sale of the property.

(4) *Effect of basis adjustment in determining items of deduction*—(i) *Increases*—(A) *Additional deduction.* The amount of any positive basis adjustment that is recovered by the transferee in any year is added to the transferee's distributive share of the partnership's depreciation or amortization deductions for the year. The basis adjustment is adjusted under section 1016(a)(2) to reflect the recovery of the basis adjustment.

(B) *Recovery period*—(*1*) *In general.* Except as provided in paragraph (j)(4)(i)(B)(*2*) of this section, for purposes of section 168, if the basis of a partnership's recovery property is increased as a result of the transfer of a partnership interest, then the increased portion of the basis is taken into account as if it were newly-purchased recovery property placed in service when the transfer occurs. Consequently, any applicable recovery period and method may be used to determine the recovery allowance with respect to the increased portion of the basis. However, no change is made for purposes of determining the recovery allowance under section 168 for the portion of the basis for which there is no increase.

(*2*) *Remedial allocation method.* If a partnership elects to use the remedial allocation method described in § 1.704–3(d) with respect to an item of the partnership's recovery property, then the portion of any increase in the basis of the item of the partnership's recovery property under section 743(b) that is attributable to section 704(c) built-in gain is recovered over the remaining recovery period for the partnership's excess book basis in the property as determined in the final sentence of § 1.704–3(d)(2). Any remaining portion of the basis increase is recovered under paragraph (j)(4)(i)(B)(*1*) of this section.

(C) *Examples.* The provisions of this paragraph (j)(4)(i) are illustrated by the following examples:

Example 1. (i) A, B, and C are equal partners in partnership PRS, which owns Asset 1, an item of depreciable property that has a fair market value in excess of its adjusted tax basis. C sells its interest in PRS to T while PRS has an election in effect under section 754. PRS, therefore, increases the basis of Asset 1 with respect to T.

(ii) Assume that in the year following the transfer of the partnership interest to T, T's distributive share of the partnership's common basis depreciation deductions from Asset 1 is $1,000. Also assume that, under paragraph (j)(4)(i)(B) of this section, the amount of the basis adjustment that T recovers during the year is $500. The total amount of depreciation deductions from Asset 1 reported by T is equal to $1,500.

Example 2. (i) A and B form equal partnership PRS. A contributes property with an adjusted basis of $100,000 and a fair market value of $500,000. B contributes $500,000 cash. When PRS is formed, the property has five years remaining in its recovery period. The partnership's adjusted basis of $100,000 will, therefore, be recovered over the five years remaining in the property's recovery period. PRS elects to use the remedial allocation method under § 1.704–3(d) with respect to the property. If PRS had purchased the property at the time of the partnership's formation, the basis of the property would have been recovered over a 10 year period. The $400,000 of section 704(c) built-in gain will, therefore, be amortized under § 1.704–3(d) over a 10 year period beginning at the time of the partnership's formation.

(ii) Except for the depreciation deductions, PRS's expenses equal its income in each year of the first two years commencing with the year the partnership is formed. After two years, A's share of the adjusted basis of partnership property is $120,000, while B's is $440,000.

CAPITAL ACCOUNTS

	A		B	
	Book	Tax	Book	Tax
Initial Contribution	$500,000	$100,000	$500,000	$500,000
Depreciation Year 1	(30,000)		(30,000)	(20,000)
Remedial		10,000		(10,000)
Subtotal	470,000	110,000	470,000	470,000
Depreciation Year 2	(30,000)		(30,000)	(20,000)
Remedial		10,000		(10,000)
Total	440,000	120,000	440,000	440,000

(iii) A sells its interest in PRS to T for its fair market value of $440,000. A valid election under section 754 is in effect with respect to the sale of the partnership interest. Accordingly, PRS makes an adjustment, pursuant to section 743(b), to increase the basis of partnership property. Under section 743(b), the amount of the basis adjustment is equal to $320,000. Under section 755, the entire basis adjustment is allocated to the property.

(iv) At the time of the transfer, $320,000 of section 704(c) built-in gain from the property was still reflected on the partnership's books, and all of the basis adjustment is attributable to section 704(c) built-in gain. Therefore, the basis adjustment will be recovered over the remaining recovery period for the section 704(c) built-in gain under § 1.704–3(d).

(ii) *Decreases*—(A) *Effect on depreciation deductions—(1)—Reduced deduction to transferee. Except as provided in paragraph (j)(4)(ii)(A)(2)* of this section, the amount of the basis adjustment to an item of depreciable or amortizable property that is recovered in any year first decreases the transferee's distributive share of the partnership's depreciation or amortization deductions from that item of property for the year. If the amount of the basis adjustment recovered in any year exceeds the transferee's distributive share of the partnership's depreciation or amortization deductions from the item of property, then the transferee's distributive share of the partnership's depreciation or amortization deductions from other items of partnership property is decreased. The transferee then recognizes ordinary income to the extent of the excess, if any, of the amount of the basis adjustment recovered in any year over the transferee's distributive share of the partnership's depreciation or amortization deductions from all items of property.

(*2*) *Election to reduce deduction of other partners by excess adjustment.* The partnership may elect to treat the amount of the basis adjustment as an item of built-in gain, decreasing the amount of depreciation or amortization that the partnership may allocate for tax purposes. This election has no effect on the depreciation or amortization of the property on the books of the partnership. The partnership must make this election on the statement required to be attached to its return pursuant to paragraph (k) of this section for the year that the adjustment is made to the item of property.

(B) *Recovery period.* For purposes of section 168, if the basis of an item of a partnership's recovery property is decreased as the result of the transfer of an interest in the partnership then the decrease is recovered over the remaining useful life of the item of the partnership's recovery property. The portion of the decrease that is recovered in any year during the recovery period is equal to the product of—

(*1*) The amount of the decrease to the item's adjusted basis (determined as of the date of the transfer); multiplied by

(*2*) A fraction, the numerator of which is the portion of the adjusted basis of the item recovered by the partnership in that year, and the denominator of which is the adjusted basis of the item on the date of the transfer (determined prior to any basis adjustments).

(C) *Examples.* The provisions of this paragraph (j)(4)(ii) are illustrated by the following examples:

Example 1. (i) A, B, and C are equal partners in partnership PRS, which owns Asset 2, an item of depreciable property that has a fair market value that is less than its adjusted tax basis. C sells its interest in PRS to T while PRS has an election in effect under section 754. PRS, therefore, decreases the basis of Asset 2 with respect to T.

(ii) Assume that in the year following the transfer of the partnership interest to T, T's distributive share of the partnership's common basis depreciation deducations from Asset 2 is $1,000. Also assume that, under paragraph (j)(4)(ii)(B) of this section, the amount of the basis adjustment that T recovers during the year is $500. The total amount of depreciation deductions from Asset 2 reported by T is equal to $500.

Example 2. (i) A and B form equal partnership PRS. A contributes property with an adjusted basis of $100,000 and a fair market value of $50,000. B contributes $50,000 cash. When PRS is formed, the property has five years remaining in its recovery period. The partnership's adjusted basis of $100,000 will, therefore, be recovered over the five years remaining in the property's recovery period. PRS uses the traditional allocation method under § 1.704–3(b) with respect to the property. As a result, B will receive $5,000 of depreciation deductions from the property in each of years 1–5, and A, as the contributing partner, will receive $15,000 of depreciation deductions in each of these years.

(ii) Except for the depreciation deductions, PRS's expenses equal its income in each of the first two years commencing with the year the partnership is formed. After two years, A's share of the adjusted basis of partnership property is $70,000, while B's is $40,000. A sells its interest in PRS to T for its fair market value of $40,000. A valid election under section 754 is in effect with respect to the sale of the partnership interest. Accordingly, PRS makes an adjustment, pursuant to section 743(b), to decrease the basis of partnership property. Under section 743(b), the amount of the adjustment is equal to ($30,000). Under section 755, the entire adjustment is allocated to the property.

(iii) The basis of the property at the time of the transfer of the partnership interest was $60,000. In each of years 3 through 5, the partnership will realize depreciation deductions of $20,000 from the property. Thus, one third of the negative basis adjustment ($10,000) will be recovered in each of years 3 through 5. Consequently, T will be allocated for tax purposes depreciation of $15,000 each year from the partnership and will recover $10,000 of its negative basis adjustment. Thus, T's net depreciation deducation from the partnership in each year is $5,000.

Example 3. (i) A, B, and C are equal partners in partnership PRS, which owns Asset 2, an item of depreciable property that has a fair market value that is less than its adjusted tax basis. C sells its interest in PRS to T while PRS has an election in effect under section 754. PRS, therefore, decreases the basis of Asset 2 with respect to T.

(ii) Assume that in the year following the transfer of the partnership interest to T, T's distributive share of the partnership's common basis depreciation deductions from Asset 2 is $500. PRS allocates no other depreciation to T. Also assume that, under paragraph (j)(4)(ii)(B) of this section, the amount of the negative basis adjustment that

VOL 63 ISS 19 JA 29 1998 UMI

T recovers during the year is $1,000. T will report $500 of ordinary income because the amount of the negative basis adjustment recovered during the year exceeds T's distributive share of the partnership's common basis depreciation deductions from Asset 2.

Example 4. (i) A and B are equal partners in partnership PRS. PRS has one depreciable asset that it purchased with cash. On the first day of a year, A transfers its interest to T at a time when the fair market value of the depreciable asset is $50 and its adjusted tax basis is $200. The partnership has an election in effect under section 754, resulting in a $75 decrease in the basis of the depreciable asset to T under section 743.

(ii) The depreciable asset has a remaining useful life of two years and is being recovered using the straight-line method. The partnership elects, under paragraph (j)(4)(ii)(A)(*2*) of this section, to treat the decrease in basis under section 743 as an item of built-in gain, decreasing the amount of depreciation that the partnership can allocate from $200 to $125. This reduces the amount of depreciation available to be allocated to the partners in each year from $100 to $62.50. This election has no effect on the depreciation or amortization of the property on the books of the partnership. Therefore, the partnership will recover $100 of depreciation on its books in each year.

(iii) At the end of the year, the partnership allocates each partner $50 of depreciation for book purposes. Under the principles of section 704(c), the first $50 of tax depreciation is allocated to B. The remaining $12.50 of tax depreciation is allocated to T.

(5) *Depletion.* Where an adjustment is made under section 743(b) to the basis of partnership property subject to depletion, any depletion allowance is determined separately for each partner, including the transferee partner, based on the partner's interest in such property. See § 1.702–1(a)(8).

(6) *Example.* The provisions of paragraph (j)(5) of this section are illustrated by the following example:

Example. A, B, and C each contributes $5,000 cash to form partnership PRS, which purchases oil property for $15,000. A, B, and C have equal interests in capital and profits. C subsequently sells its partnership interest to T for $100,000 when the election under section 754 is in effect. T has a basis adjustment for the oil property of $95,000 (the difference between T's basis, $100,000, and its share of the basis of partnership property, $5,000). Assume that the depletion allowance computed under the percentage method would be $21,000 for the taxable year so that each partner would be entitled to $7,000 as its share of the deduction for depletion. However, under the cost depletion method, at an assumed rate of 10 percent, the allowance with respect to T's one-third interest which has a basis to him of $100,000 ($5,000, plus its basis adjustment of $95,000) is $10,000, although the cost depletion allowance with respect to the one-third interest of A and B in the oil property, each of which has a basis of $5,000, is only $500. For partners A and B, the percentage depletion is greater than cost depletion and each will deduct $7,000 based on the percentage depletion method. However, as to T, the transferee partner, the cost depletion method results in a greater allowance and T will, therefore, deduct $10,000 based on cost depletion. See section 613(a).

(k) *Returns*—(1) *Statement of adjustments.* A partnership that must adjust the bases of partnership properties under section 743 must attach a statement to the partnership return for the year of the transfer setting forth the name and taxpayer identification number of the transferee as well as the computation of the adjustment and the partnership properties to which the adjustment has been allocated.

(2) *Requirement that transferee notify partnership*—(i) *Sale or exchange.* A transferee that acquires, by sale or exchange, an interest in a partnership with an election under section 754 in effect, must notify the partnership, in writing, within 30 days of the sale or exchange (or, if earlier, by January 15 of the calendar year following the calendar year in which the sale or exchange occurred). The written notice to the partnership must include the names and addresses of both parties to the sale or exchange, the taxpayer identification numbers of the transferee and (if known) of the transferor, the date of the transfer, and the amount of any money and the fair market value of any other property delivered or to be delivered for the transferred interest in the partnership.

(ii) *Transfer on death.* A transferee that acquires, on the death of a partner, an interest in a partnership with an election under section 754 in effect, must notify the partnership, in writing, within one year of the death of the deceased partner. The written notice to the partnership must include the names and addresses of the deceased partner and the transferee, the taxpayer identification numbers of the deceased partner and the transferee, the date on which the transferee became the owner of the partnership interest, the fair market value of the partnership interest on the applicable date of valuation set forth in section 1014, and the manner in which the fair market value of the partnership interest was determined.

(3) *Reliance.* In making the adjustments under section 743 and any statement or return relating to such adjustments under this section, a partnership may rely on the written notice provided by a transferee pursuant to paragraph (k)(2) of this section to determine the transferee's basis in a partnership interest. The previous sentence shall not apply if the tax matters partner (as defined under section 6231(a)(7)) or any other partner who has responsibility for federal income tax reporting by the partnership has knowledge of facts indicating that the statement is clearly erroneous.

(4) *Partnership not required to make or report adjustments under section 743 until it has notice of the transfer.* A partnership is not required to make the adjustments under section 743 (or any statement or return relating to those adjustments) with respect to any transfer until it has been notified of the transfer. For purposes of this section, a partnership is notified of a transfer when either—

(i) The partnership receives the written notice from the transferee required under paragraph (k)(2) of this section; or

(ii) The tax matters partner (as defined under section 6231(a)(7)) or any other partner who has responsibility for federal income tax reporting by the partnership has knowledge that there has been a transfer of a partnership interest.

(5) *Effect on partnership of the failure of the transferee to comply.* If the transferee fails to provide the partnership with the written notice required by paragraph (k)(2) of this section, the partnership must attach a statement to its return in the year that the partnership is otherwise notified of the transfer. This statement must set forth the name and taxpayer identification number (if known) of the transferee. In addition, the following statement must be prominently displayed in capital letters on the first page of the partnership's return for such year, and on the first page of any schedule or information statement relating to such transferee's share of income, credits, deductions, etc.: "RETURN FILED PURSUANT TO § 1.743–1(k)(5)." The partnership will then be entitled to report the transferee's share of partnership items without adjustment to reflect the transferee's basis adjustment in partnership property. If, following the filing of a return pursuant to this paragraph (k)(5), the transferee provides the applicable written notice to the partnership, the partnership must make such adjustments as are necessary to adjust the basis of partnership property (as of the date of the transfer) in any amended return otherwise to be filed by the partnership or in the next annual partnership return of income to be regularly filed by the partnership. At such time, the partnership must also provide the transferee with such information as is necessary for the transferee to amend its prior returns to properly reflect the adjustment under section 743.

(l) *Effective date.* This section applies to transfers of partnership interests that occur on or after the date final regulations are published in the **Federal Register**.

Par. 6. Section 1.751–1 is amended by:

1. Revising paragraphs (a)(2) and (a)(3) and *Example 1* of paragraph (g).

2. Adding a sentence at the end of paragraph (f).

The addition and revisions read as follows:

§ 1.751–1 Unrealized receivables and inventory items.

(a) * * *

(2) *Determination of gain or loss.* The income or loss realized by a partner upon the sale or exchange of its interest in section 751 property is the amount of income or loss from section 751 property (including any remedial allocation under § 1.704–3(d)) that would have been allocated to the partner (to the extent attributable to the partnership interest sold or exchanged) if the partnership had sold all of its property in a fully taxable transaction immediately prior to the partner's transfer of the interest in the partnership. Any gain or loss recognized that is attributable to section 751 property will be ordinary gain or loss. The difference between the amount of capital gain or loss that the partner would realize in the absence of section 751 and the amount of ordinary income or loss determined under this paragraph (a)(2) is the transferor's capital gain or loss on the sale of its partnership interest.

(3) *Statement required.* A partner selling or exchanging any part of an interest in a partnership that has any section 751 property at the time of sale or exchange must submit with its income tax return for the taxable year in which the sale or exchange occurs a statement setting forth separately the following information—

(i) The date of the sale or exchange;

(ii) The amount of any gain or loss attributable to the section 751 property; and

(iii) The amount of any gain or loss attributable to capital gain or loss on the sale of the partnership interest.

* * * * *

(f) * * * The rules contained in paragraphs (a) (2) and (3) of this section apply to transfers of partnership interests that occur on or after the date final regulations are published in the **Federal Register**.

(g) * * *

Example 1. (i) A and B are equal partners in personal service partnership PRS. B transfers its interest in PRS to T for $15,000 when PRS's balance sheet (reflecting a cash receipts and disbursements method of accounting) is as follows:

	Assets	
	Adjusted basis	Market value
Cash	$3,000	$3,000
Loans Receivable	10,000	10,000
Capital Assets	7,000	5,000
Unrealized receivables	0	14,000
Total	20,000	32,000

	Liabilities and capital	
	Adjusted per books	Market value
Liabilities	$2,000	$2,000
Capital:		
A	9,000	15,000
B	9,000	15,000
Total	20,000	32,000

(ii) None of the assets owned by PRS is section 704(c) property. The total amount realized by B is $16,000, consisting of the cash received, $15,000, plus $1,000, B's share of the partnership liabilities assumed by T. See section 752. B's undivided half-interest in the partnership property includes a half-interest in the partnership's unrealized receivables items. B's basis for its partnership interest is $10,000 ($9,000, plus $1,000, B's share of partnership liabilities). If section 751(a) did not apply to the sale, B would recognize $6,000 of capital gain from the sale of the interest in PRS. However, section 751(a) does apply to the sale.

(iii) If PRS sold all of its section 751 property in a fully taxable transaction immediately prior to the transfer of B's partnership interest to T, B would have been allocated $7,000 of ordinary income from the sale of PRS's unrealized receivables. Therefore, B will recognize $7,000 of ordinary income with respect to the unrealized receivables. The difference between the amount of capital gain or loss that the partner would realize in the absence of section 751 ($6,000) and the amount of ordinary income or loss determined under paragraph (a)(2) of this section ($7,000) is the transferor's capital gain or loss on the sale of its partnership interest. In this case, B will recognize a $1,000 capital loss.

* * * * *

Par. 7. Section 1.755–1 is revised to read as follows:

§ 1.755–1 Rules for allocation of basis.

(a) *Generally.* A partnership that has an election in effect under section 754 must adjust the basis of partnership property under the provisions of section 734(b) and section 743(b) pursuant to the provisions of this section. The basis adjustment is first allocated between the two classes of property described in section 755(b). These classes of property consist of—

(1) Capital assets and section 1231(b) property (capital gain property); and

(2) Any other property of the partnership (ordinary income property). The portion of the basis adjustment allocated to each class is then allocated among the items within the class. Adjustments under section 743(b) are allocated under paragraph (b) of this section. Adjustments under section 734(b) are allocated under paragraph (c) of this section.

(b) *Adjustments under section 743(b)*—(1) *Generally.* In general, the allocation of the basis adjustment under section 743 between the classes of property and among the items of property within each class are made based on the allocations of income, gain, or loss (including remedial allocations under § 1.704–3(d)) that the transferee partner would receive (to the extent attributable to the acquired partnership interest) if, immediately after the transfer of the partnership interest, all of the partnership's assets were disposed of in a fully taxable transaction for fair market value (the hypothetical transaction). The portion of the basis adjustment allocated to one class of property may be an increase while the portion allocated to the other class is a decrease. This would be the case even though the total amount of the basis adjustment is zero. The portion of the basis adjustment allocated to one item of property within a class may be an increase while the portion allocated to another is a decrease. This would be the case even though the basis adjustment allocated to the class is zero.

(2) *Allocations between classes of property*—(i) *In general.* The amount of the basis adjustment allocated to the class of ordinary income property is equal to the total amount of income, gain, or loss (including any remedial allocations under § 1.704–3(d)) that would be allocated to the transferee (to the extent attributable to the acquired partnership interest) from the sale of all ordinary income property in the hypothetical transaction. The amount of the basis adjustment to capital gain property is equal to—

(A) The total amount of the basis adjustment under section 743; less

(B) The amount of the basis adjustment allocated to ordinary income property under the preceding sentence; provided, however, that in no event may the amount of any decrease in basis allocated to capital gain property exceed the partnership's basis (or in the case of

VOL 63 ISS 19 JA 29 1998 UMI

property subject to the remedial allocation method, the transferee's share of any remedial loss under § 1.704-3(d) from the hypothetical transaction) in capital gain property. In the event that a decrease in basis allocated to capital gain property would otherwise exceed the partnership's basis in capital gain property, the excess must be applied to reduce the basis of ordinary income property.

(ii) *Examples.* The provisions of this paragraph (b)(2) are illustrated by the following example:

Example 1. (i) A and B form equal partnership PRS. A contributes $50,000 and Asset 1, a capital asset with a fair market value of $50,000 and an adjusted tax basis of $25,000. B contributes $100,000. PRS uses the cash to purchase Assets 2, 3, and 4. After a year, A sells its interest in PRS to T for $120,000. At the time of the transfer, A's share of the partnership's basis in partnership assets is $75,000. Therefore, T receives a $45,000 basis adjustment.

(ii) Immediately after the transfer of the partnership interest to T, the adjusted basis and fair market value of PRS's assets are as follows:

	Assets	
	Adjusted basis	Market value
Capital Gain Property:		
Asset 1	$25,000	$75,000
Asset 2	100,000	117,500
Ordinary Income Property:		
Asset 3	40,000	45,000
Asset 4	10,000	2,500
Total	175,000	240,000

(iii) If PRS sold all of its assets in a fully taxable transaction at fair market value immediately after the transfer of the partnership interest to T, the total amount of capital gain that would be allocated to T is equal to $46,250 ($25,000 section 704(c) built-in gain from Asset 1, plus fifty percent of the $42,500 appreciation in capital gain property). T would also be allocated a $1,250 ordinary loss from the sale of the ordinary income property.

(iv) The amount of the basis adjustment that is allocated to ordinary income property is equal to ($1,250) (the amount of the loss allocated to T from the hypothetical sale of the ordinary income property).

(v) The amount of the basis adjustment that is allocated to capital gain property is equal to $46,250 (the amount of the basis adjustment, $45,000, less ($1,250), the amount of loss allocated to T from the hypothetical sale of the ordinary income property).

Example 2. (i) A and B form equal partnership PRS. A and B each contribute $1,000 cash which the partnership uses to purchase Assets 1, 2, 3, and 4. After a year, A sells its partnership interest to T for $1,000. T's basis adjustment under section 743 is zero.

(ii) Immediately after the transfer of the partnership interest to T, the adjusted basis and fair market value of PRS' assets are as follows:

	Assets	
	Adjusted basis	Market value
Capital Gain Property:		
Asset 1	$500	$750
Asset 2	500	500
Ordinary Income Property:		
Asset 3	500	250
Asset 4	500	500
Total	2,000	2,000

(iii) If, immediately after the transfer of the partnership interest to T, PRS sold all of its assets in a fully taxable transaction at fair market value, T would be allocated a loss of $125 from the sale of the ordinary income property. Thus, the amount of the basis adjustment to ordinary income property is ($125). The amount of the basis adjustment to capital gain property is $125 (zero, the amount of the basis adjustment under section 743, less ($125), amount of the basis adjustment allocated to ordinary income property).

(3) *Allocation within the class*—(i) *Ordinary income property.* The amount of the basis adjustment to each item of property within the class of ordinary income property is equal to—

(A) The amount of income, gain, or loss (including any remedial allocations under § 1.704–3(d)) that would be allocated to the transferee (to the extent attributable to the acquired partnership interest) from the hypothetical sale of the item; reduced by

(B) The product of—

(*1*) Any decrease to the amount of the basis adjustment to ordinary income property required pursuant to the last sentence of paragraph (b)(2)(i) of this section; multiplied by

(*2*) A fraction, the numerator of which is the fair market value of the item of property to the partnership and the denominator of which is the total fair market value of all of the partnership's items of ordinary income property.

(ii) *Capital gain property.* The amount of the basis adjustment to each item of property within the class of capital gain property is equal to—

(A) The amount of income, gain, or loss (including any remedial allocations under § 1.704–3(d)) that would be allocated to the transferee (to the extent attributable to the acquired partnership interest) from the hypothetical sale of the item; minus

(B) The product of—

(*1*) The total amount of gain or loss (including any remedial allocations under § 1.704–3(d)) that would be allocated to the transferee (to the extent attributable to the acquired partnership interest) from the hypothetical sale of all items of capital gain property, minus the amount of the positive basis adjustment to all items of capital gain property or plus the amount of the negative basis adjustment to capital gain property; multiplied by

(*2*) A fraction, the numerator of which is the fair market value of the item of property to the partnership and the denominator of which is the total fair market value of all of the partnership's items of capital gain property.

(iii) *Examples.* The provisions of this paragraph (b)(3) are illustrated by the following example:

Example 1. (i) Assume the same facts as Example 1 in paragraph (b)(2)(ii) of this section. Of the $45,000 basis adjustment, $46,250 was allocated to capital gain property. The amount allocated to ordinary income property was ($1,250).

(ii) Asset 1 is a capital gain asset, and T would be allocated $37,500 from the sale of Asset 1 in the hypothetical transaction. Therefore, the amount of the adjustment to Asset 1 is $37,500.

(iii) Asset 2 is a capital gain asset, and T would be allocated $8,750 from the sale of Asset 2 in the hypothetical transaction. Therefore, the amount of the adjustment to Asset 2 is $8,750.

(iv) Asset 3 is ordinary income property, and T would be allocated $2,500 from the sale of Asset 3 in the hypothetical transaction. Therefore, the amount of the adjustment to Asset 3 is $2,500.

(v) Asset 4 is ordinary income property, and T would be allocated ($3,750) from the sale of Asset 4 in the hypothetical transaction. Therefore, the amount of the adjustment to Asset 4 is ($3,750).

Example 2. (i) Assume the same facts as Example 1 in paragraph (b)(2)(ii) of this section, except that A sold its interest in PRS to T for $110,000 rather than $120,000. T, therefore, receives a basis adjustment under section 743 of $35,000. Of the $35,000 basis adjustment, ($1,250) is allocated to ordinary income property, and $36,250 is allocated to capital gain property.

(ii) Asset 3 is ordinary income property, and T would be allocated $2,500 from the sale of Asset 3 in the hypothetical transaction. Therefore, the amount of the adjustment to Asset 3 is $2,500.

(iii) Asset 4 is ordinary income property, and T would be allocated ($3,750) from the sale of Asset 4 in the hypothetical transaction. Therefore, the amount of the adjustment to Asset 4 is ($3,750).

(iv) Asset 1 is a capital gain asset, and T would be allocated $37,500 from the sale of Asset 1 in the hypothetical transaction. Asset 2 is a capital gain asset, and T would be allocated $8,750 from the sale of Asset 2 in the hypothetical transaction. The total amount of gain that would be allocated to T from the sale of the capital gain assets in the hypothetical transaction is $46,250, which exceeds the amount of the basis adjustment allocated to capital gain property. The amount of the adjustment to Asset 1 is $33,604 (the sum of $37,500, less $3,896 ($10,000 x $75,000/192,500)). The amount of the basis adjustment to Asset 2 is $2,646 (the sum of $8,750, less $6,104 ($10,000 x $117,500/192,500)).

(c) *Adjustments under section 734(b)*—(1) *Allocations between classes of property*—(i) *General rule.* Where there is a distribution of partnership property resulting in an adjustment to the basis of undistributed partnership property under section 734(b)(1)(B) or (b)(2)(B), the adjustment must be allocated to remaining partnership property of a character similar to that of the distributed property with respect to which the adjustment arose. Thus, when the partnership's adjusted basis of distributed capital gain property immediately prior to distribution exceeds the basis of the property to the distributee partner (as determined under section 732), the basis of the undistributed capital gain property remaining in the partnership is increased by an amount equal to the excess. Conversely, when the basis to the distributee partner (as determined under section 732) of distributed capital gain property exceeds the partnership's adjusted basis of such property immediately prior to the distribution, the basis of the undistributed capital gain property remaining in the partnership is decreased by an amount equal to such excess. Similarly, where there is a distribution of ordinary income property, and the basis of the property to the distributee partner (as determined under section 732) is not the same as the partnership's adjusted basis of the property immediately prior to distribution, the adjustment is made only to undistributed property of the same class remaining in the partnership.

(ii) *Special rule.* Where there is a distribution resulting in an adjustment under section 734(b)(1)(A) or (b)(2)(A) to the basis of undistributed partnership property, the adjustment is allocated only to capital gain property.

(2) *Allocations within the classes*—(i) *Increases.* If there is an increase in basis to be allocated within a class, the increase must be allocated first to properties with unrealized appreciation in proportion to their respective amounts of unrealized appreciation before such increase (but only to the extent of each property's unrealized appreciation). Any remaining increase must be allocated among the properties within the class in proportion to their fair market values.

(ii) *Decreases.* If there is a decrease in basis to be allocated within a class, the decrease must be allocated first to properties with unrealized depreciation in proportion to their respective amounts of unrealized depreciation before such decrease (but only to the extent of each property's unrealized depreciation). Any remaining decrease must be allocated among the properties within the class in proportion to their adjusted bases (as adjusted under the preceding sentence).

(3) *Limitation in decrease of basis.* Where a decrease in the basis of partnership assets is required under section 734(b)(2) and the amount of the decrease exceeds the adjusted basis to the partnership of property of the required character, the basis of such property is reduced to zero (but not below zero).

(4) *Carryover adjustment.* Where, in the case of a distribution, an increase or a decrease in the basis of undistributed property cannot be made because the partnership owns no property of the character required to be adjusted, or because the basis of all the property of a like character has been reduced to zero, the adjustment is made when the partnership subsequently acquires property of a like character to which an adjustment can be made.

(5) *Goodwill.* The application of the rules with respect to the allocation of an adjustment in basis under this paragraph (c) requires that a portion of the adjustment be allocated to partnership goodwill, to the extent that goodwill exists and is reflected in the value of the property distributed in accordance with the difference between such value of the goodwill and its adjusted basis at the time of the distribution.

(6) *Example.* The following example illustrates this paragraph (c):

Example. (i) A, B, and C form equal partnership PRS. A contributes $50,000 and Asset 1, capital gain property with a fair market value of $50,000 and an adjusted tax basis of $25,000. B and C each contributes $100,000. PRS uses the cash to purchase Assets 2, 3, 4, 5, and 6. None of the partnership's assets are section 751 property. The partnership has an election in effect under section 754. After five years, the adjusted basis and fair market value of PRS's assets are as follows:

	Assets	
	Adjusted basis	Market value
Capital Gain Property:		
Asset 1	$25,000	$75,000
Asset 2	100,000	117,500
Asset 3	50,000	60,000
Ordinary Income Property:		
Asset 4	40,000	45,000
Asset 5	50,000	60,000
Asset 6	10,000	2,500
Total	275,000	360,000

(ii) *Allocation between classes.* Assume that PRS distributes Assets 3 and 5 to A in complete liquidation of A's interest in the partnership. A's basis in the partnership interest was $75,000. The partnership's basis in Assets 3 and 5 was $50,000 each. A's $75,000 basis in its partnership interest is allocated between Assets 3 and 5 under sections 732(b) and (c). A will, therefore, have a basis of $37,500 in each of Assets 3 and 5. The distribution results in a $12,500 increase in the basis of both capital gain property and ordinary income property.

(iii) *Allocation within classes*—(A) *Capital gain property.* The amount of the basis increase to capital gain property is $12,500, and must be allocated among the remaining capital gain assets in proportion to the difference between the value and basis of each. The fair market value of Asset 1 exceeds its basis by $50,000. The fair market value of Asset 2 exceeds its basis by $17,500. Therefore, the basis of Asset 1 will be increased by $9,260 ($12,500, multiplied by $50,000, divided by $67,500), and the basis of Asset 2 will be increased by $3,240 ($12,500 multiplied by $17,500, divided by $67,500).

(B) *Ordinary income property.* The amount of the basis increase to ordinary income property is $12,500, and must be allocated among the remaining ordinary income assets in proportion to the difference between the value and basis of each. Because the basis of Asset 6 exceeds its fair market value, no part of the basis adjustment will be allocated to Asset 6. The fair market value of Asset 4, $45,000, exceeds its basis, $40,000, by $5,000. Because the partnership owns no other ordinary income property that has a value in excess of its basis, the entire basis adjustment will be allocated to Asset 4, increasing its basis from $40,000 to $52,500.

(d) *Effective date.* This section applies to transfers of partnership interests and distributions of property from a partnership that occur on or after the date final regulations are published in the **Federal Register**.

Par. 8. Section 1.1017–1 as proposed to be revised at 62 FR 958, January 7, 1997, is amended by:

1. Revising paragraph (f)(2)(iv).
2. Adding paragraph (f)(2)(v).

The addition and revision read as follows:

§ 1.1017–1 Basis reductions following a discharge of indebtedness.

* * * * *

VOL 63 ISS 19 JA 29 1998 UMI

(f) * * *
(2) * * *

(iv) *Partner's share of partnership basis*—(A) *In general.* For purposes of this paragraph (f), a partner's proportionate share of the partnership's basis in depreciable property (or depreciable real property) is equal to the sum of—

(*1*) The partner's section 743(b) basis adjustments to items of partnership depreciable property (or depreciable real property); and

(*2*) The common basis depreciation deductions (but not including remedial allocations of depreciation deductions under § 1.704–3(d)) that, under the terms of the partnership agreement, are reasonably expected to be allocated to the partner over the property's remaining useful life. The assumptions made by a partnership in determining the reasonably expected allocation of depreciation deductions must be consistent for each partner. For example, a partnership may not treat the same depreciation deductions as being reasonably expected by more than one partner.

(B) *Effective date.* This paragraph (f)(2)(iv) applies to elections made under sections 108(b)(5) and 108(c) on or after the date the regulations are published as final regulations in the **Federal Register**.

(v) *Treatment of basis reduction*—(A) *Basis adjustment.* The amount of the reduction to the basis of depreciable partnership property constitutes an adjustment to the basis of partnership property with respect to the partner only. No adjustment is made to the common basis of partnership property. Thus, for purposes of income, deduction, gain, loss, and distribution, the partner will have a special basis for those partnership properties the bases of which are adjusted under section 1017 and this section.

(B) *Recovery of adjustments to basis of partnership property.* Adjustments to the basis of partnership property under this section are recovered in the manner described in § 1.743–1.

(C) *Effect of basis reduction.* Adjustments to the basis of partnership property under this section are treated in the same manner and have the same effect as an adjustment to the basis of partnership property under section 743, provided, however, that the election in § 1.743–1(j)(4)(ii)(A)(*2*) is not available. The following example illustrates this paragraph (f)(2)(v):

Example. (i) A, B, and C are equal partners in partnership PRS, which owns (among other things) Asset 1, an item of depreciable property with a basis of $30,000. A's basis in its partnership interest is $20,000. Under the terms of the partnership agreement, A's share of the depreciation deductions from Asset 1 over its remaining useful life will be $10,000. Under section 1017, A requests, and PRS agrees to decrease the basis of Asset 1 with respect to A by $10,000.

(ii) In the year following the reduction of basis under section 1017, PRS amends its partnership agreement to provide that items of depreciation and loss from Asset 1 will be allocated equally between B and C. In that year, A's distributive share of the partnership's common basis depreciation deductions from Asset 1 is now $0. Under § 1.743–1(j)(4)(ii)(B), the amount of the section 1017 basis adjustment that A recovers during the year is $1,000. A will report $1,000 of ordinary income because A's distributive share of the partnership's common basis depreciation deductions from Asset 1 ($0) is insufficient to offset the amount of the section 1017 basis adjustment recovered by A during the year ($1,000).

(iii) In the following year, PRS sells Asset 1 for $15,000 and recognizes a $12,000 loss. This loss is allocated equally between B and C, and A's share of the loss is $0. Upon the sale of Asset 1, A recovers its entire remaining section 1017 basis adjustment ($9,000). A will report $9,000 of ordinary income.

(D) *Effective date.* This paragraph (f)(2)(v) applies to elections made under sections 108(b)(5) and 108(c) on or after the date the regulations are published as final regulations in the **Federal Register**.

* * * * *

Michael P. Dolan,

Deputy Commissioner of Internal Revenue.

BILLING CODE 4830–01–U

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1915

Fire Protection for Shipyard Employment Negotiated Rulemaking Advisory Committee; Notice of Meeting

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Fire protection for shipyard employment negotiated rulemaking advisory committee; notice of open meeting.

SUMMARY: The Occupational Safety and Health Administration announces a meeting of the Negotiated Rulemaking Advisory Committee for Fire Protection for Shipyard Employment. OSHA invites all interested persons to attend. The committee members represent groups interested in, or significantly affected by, the outcome of the rulemaking: They come from shipyards, labor unions, professional associations, and government agencies. The committee will continue its discussions on scope and application, administrative, engineering, and work practice controls, fire brigades, written fire plans, technological advances, costs of fire protection, and the content of appendices for a proposed standard to protect workers from hazards in shipyard employment. The committee's goal is to recommend to the Assistant Secretary a safety standard and explanatory preamble that the members support.

DATES: The meeting dates are Tuesday, February 24, 1998, through Thursday, February 26, 1998, from 9:00 a.m. to about 5:00 p.m. daily. Submit comments, requests for oral presentation, and requests for disability accommodations by February 10, 1998.

ADDRESSES: The meeting will be held at the Holiday Inn on the Bay, 1355 North Harbor Drive at the Embarcadero, San Diego, CA, 92101; telephone 619–232–3861. Mail comments and requests for oral presentations to Ms. Odet Shaw, U.S. Dapartment of Labor, OSHA Office of Maritime Standards, 200 Constitution Avenue, NW, Room N–3647, Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT: Mr. Joseph V. Daddura, Project Officer, Office of Maritime Standards, OSHA (202–219–7234 ext. 123). For disability accommodations, contact Ms. Theda Kenney (202–219–8061 ext. 100; FAX: 202–219–7477).

SUPPLEMENTARY INFORMATION:

Meeting Agenda. The Committee will focus its discussions on fire brigades and current rules.

Public Participation. Interested persons may send written comments, data, views, or statements for consideration by the Fire Protection for Shipyard Employment Negotiated Rulemaking Committee to Ms. Odet Shaw. Interested persons may also submit requests for presentations by providing to Ms. Shaw a summary of the proposed presentation, an estimate of the time desired, and a statement of the interest that the person represents.

Authority. This notice is issued under the authority of Section 3 of the Negotiated Rulemaking Act of 1990 (104 Stat. 4969; Title 5 U.S.C. 561 *et seq.*) and Section 7(b) of the Occupational Safety and Health Act of 1970 (84 Stat. 1597; Title 29 U.S.C. 656).

Signed at Washington, D.C., this 23rd day of January, 1998.

Charles N. Jeffress,

Assistant Secretary of Labor.

[FR Doc. 98–2097 Filed 1–28–98; 8:45 am]

BILLING CODE 4510–26–M

Notices

Federal Register
Vol. 63, No. 19
Thursday, January 29, 1998

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Pines Coal Lease Tract, UTU–76195, Manti-La Sal National Forest, Sanpete, Sevier, and Emery Counties, Utah

ACTION: Notice of Intent to Prepare a Third-Party Environmental Impact Statement.

SUMMARY: The Forest Service and Bureau of Land Management will direct preparation of a Third-Party Environmental Impact Statement (EIS) to document the analysis and disclose the environmental and human effects of proposed actions to offer the Pines Coal Lease Tract for competitive bidding in accordance with 43 CFR part 3425. As the surface management agency, the Forest Service will be the lead agency for preparation of the EIS and the Bureau of Land Management will be a joint or cooperating agency. The Office of Surface Mining will also participate as a cooperating agency.

The coal lease tract, as delineated by the Tract Delineation Team, encompasses 7,311 acres of Federal coal lands on the Manti-La Sal National Forest as follows:

T. 20 E., R. 5 E., SLM,
Sec. 36: W½S, ¼, SE¼SW¼, NE¼SW¼, S½SW¼, SE¼;
T. 21 S., R. 5 E., SLM,
Sec. 1: lots 3–4, S½SW¼, SW¼SE¼;
Sec. 2: lots 1–4, S½S½;
Sec. 3: lots 1–2, S½SE¼;
Sec. 10: E½;
Sec. 11–14: All;
Sec. 15: E½;
Sec. 22, E½;
Sec. 23–24: All;
Sec. 25: N½, N½S½;
Sec. 25: N½, NE¼SW¼, E½NW¼SW¼, SE¼.
T. 21 S., R. 6 E., SLM,
Sec. 19, lots 3–4, E½SW¼;
Sec. 30, lots 1–3, E½NW¼, NE¼SW¼.

Additions and/or deletions could be considered in alternatives to the proposed action to be developed and analyzed based on issues and management needs.

Canyon Fuel Company, LLC applied to the Bureau of Land Management for the lease to obtain additional coal reserves to increase the production life of their SUFCO Mine. The tract lies directly adjacent to the east boundary of the existing approved permit area for this underground mine. If Canyon Fuel obtains the tract, it would be mined by longwall and room-and pillar methods from underground workings in the existing permit area. The existing portal facilities in Convulsion Canyon would be used. If another company obtains the tract, it is most likely that new portal facilities would be required at the coal outcrop in Link Canyon. The underground mining methods and layout would be similar. The EIS would consider the effects of both scenarios, the No Action Alternative, and other alternatives to be developed after completion of project scoping.

AGENCY DECISIONS: In accordance with the Mineral Leasing Act of 1920, as amended, the Utah State Director of the Bureau of Land Management must decide whether or not to offer the tract for competitive leasing and under what terms, conditions, and stipulations.

In accordance with the Coal Leasing Amendments Act of 1975, which amended the Mineral Leasing Act of 1920, the Forest Supervisor, Manti-La Sal National Forest, must decide whether or not to consent to leasing by the Bureau of Land Management and identify special coal lease stipulations needed to protect non-mineral resources.

DATES: Written comments concerning the scope of the analysis described in this Notice should be received on or before March 2, 1998.

ADDRESSES: Send written comments to Manti-La Sal National Forest, 599 West Price River Drive, Price, Utah 84501.

FOR FURTHER INFORMATION: Questions concerning the proposed action and EIS should be addressed to Carter Reed or Aaron Howe, Manti-La Sal National Forest, phone (435) 637–2817.

SUPPLEMENTARY INFORMATION: This EIS will tier to the Final EIS and Record of Decision for the Manti-La Sal National Forest Land and Resource Management Plan (Forest Plan). The Manti-La Sal Forest Plan provides the overall guidance (Goals, Objectives, Standards, and Management Area Direction) to achieve the Desired Future Condition for the area being analyzed, and contains specific management area prescriptions for the entire Forest. The proposed lease tract is available for further consideration for coal leasing. The Forest Service and Bureau of Land Management have determined that data is available to meet the Data Adequacy Standards for Federal Coal Leasing, Uinta-Southwestern Utah Coal Region.

Issues and alternatives to be evaluated in the analysis will be determined through public scoping. The major issues are expected to include the socioeconomic benefits of mining; the potential impacts of underground mining and mining-induced subsidence to surface and ground water, vegetation, wildlife, cultural/paleontological resources, range improvements, and other land uses; and the potential impacts of any new surface facilities to the Forest and human environments.

The Forest Service is seeking information and comments from Federal, State, and local agencies as well as individuals and organizations who may be interested in, or effected by the proposed action. The Forest Service invites written comments and suggestions on the issues related to the proposal and the area being analyzed.

Information received will be used in preparation of the Draft EIS and Final EIS. For most effective use, comments would be submitted to the Forest Service within 30 days from the date of publication of this Notice in the **Federal Register**. Preparation of the EIS will include the following steps:

1. Define the purpose of and need for action.
2. Identify potential issues.
3. Eliminate issues of minor importance or those that have been covered by previous and relevant environmental analysis.
4. Select issues to be analyzed in depth.
5. Identify reasonable alternatives to the proposed action.
6. Describe the affected environment.
7. Identify the potential environmental effects of the alternatives.

Steps 2, 3, and 4 will be completed through the scoping process.

Step 5 will consider a range of alternative developed from the key issues and management needs. At a minimum, the "No Action" and "Proposed Action" Alternatives will be

VOL 63 ISS 19 JA 29 1998 UMI

analyzed. Other alternatives could involve modified tract boundaries (additions and/or reductions) and different sets of special lease stipulations for the protection of non-mineral resources. Alternatives may also be developed to include analysis of mining in the existing adjacent lease area and a potential modification of adjacent existing leases to add up to 160 acres/lease to prevent bypassing minable reserves.

Step 6 will describe the physical attributes of the area to be affected by this proposal, with special attention to the environmental factors that could be adversely affected.

Step 7 will analyze the environmental effects of each alternative. This analysis will be consistent with management direction outlined in the Forest Plan. The direct, indirect, and cumulative effects of each alternative will be analyzed and documented. In addition, the site specific mitigation measures for each alternative will be identified and the effectiveness of these mitigation measures will be disclosed.

Agency representatives and other interested people are invited to visit with Forest Service officials at any time during the EIS process. Two specific time periods are identified for the receipt of formal comments on the analysis. The two comment periods are, (1) During the scoping process, the next 30 days following publication of this Notice in the **Federal Register**, and (2) during the formal review period of the Draft EIS.

The Draft EIS is estimated to be filed with the Environmental Protection Agency (EPA) and available for public review in July, 1998. At this time the EPA will publish an availability notice of the Draft EIS in the **Federal Register**.

The comment period on the Draft EIS will be 45 days from the date the Environmental Protection Agency's notice of availability appears in the **Federal Register**. It is very important that those interested in this proposed action participate at that time. To be the most helpful, comments on the Draft EIS should be as specific as possible and may address the adequacy of the statement or the merits of the alternatives discussed (See The Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3).

In addition, Federal court decisions have established that reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewers' position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC, 435 U.S. 519, 553 (1978).* Environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the final environmental impact statement. *City of Angoon* v. *Hodel, (9th Circuit, 1986), and Wisconsin Heritages, Inc.* v. *Harris, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980).* The reason for this is to ensure that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final document.

To assist the Forest Service in identifying and considering issues and concerns related to the proposed action, comments on the Draft EIS should be as specific as possible. Referring to specific pages or chapters of the Draft EIS is most helpful. Comments may also address the adequacy of the Draft EIS or the merits of the alternatives formulated and discussed in the statement. (Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act, 40 CFR 1503.3, in addressing these points.)

The final EIS is expected to be released in October, 1998.

The Forest Supervisor for the Manti-La Sal National Forest and Utah State Director of the Bureau of Land Management, who are the responsible officials for the EIS, will then make their respective decisions regarding this proposal, after considering the comments, responses, and environmental consequences discussed in the Final Environmental Impact Statement, and applicable laws, regulations, and policies. The rationale for the respective agency decisions will be documented in the Record(s) of Decisions.

Dated: January 20, 1998.

Janette S. Kaiser,

Forest Supervisor, Manti-La Sal National Forest.

DEPARTMENT OF COMMERCE

Submission for OMB Review: Comment Request

The Department of Commerce has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). This collection has been submitted under the emergency Paperwork Reduction Act procedures.

Agency: Bureau of Export Administration.

Title: Reporting and Recordkeeping Requirements Under the National Defense Authorization Act.

Agency Form Number: None.

OMB Approval Number: 0694–.

Type of Request: New Collection—Emergency Review—Request approval by January 30, 1998.

Burden: 782 hours.

Number of Respondents: 2,800.

Average time per response: 5 to 52 minutes.

Needs and uses: The information required by this collection is required biannually from all exporters of certain items specified in § 743.1 of the Export Administration Regulations controlled for national security reasons on the Commerce Control List and exported under certain License Exceptions.

Affected Public: Individuals, businesses or other for-profit and not-for-profit institutions.

Frequency: On occasion.

Respondents Obligation: Mandatory.

OMB Desk Officer: Victoria Wassmer, (202) 395–7340.

Copies of the above information collection proposal can be obtained by calling or writing Linda Engelmeier, DOC Forms Clearance officer, (202) 482–3272, Department of Commerce, Room 5327, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written or oral comments and recommendations for the proposed information collection should be sent to Victoria Wassmer, OMB Desk Officer, Room 10202, New Executive Office Building, Washington, DC 20503, telephone (202) 395–7340. Comments should be provided no later than January 30, 1998.

Dated: January 23, 1998.

Wilson D. Haigler, Jr.,

Chief, Management Control Division, Office of Management and Organization.

Economic Development Administration

Notice of Petitions by Producing Firms for Determination of Eligibility to Apply for Trade Adjustment Assistance

AGENCY: Economic Development Administration (EDA), Commerce.

ACTION: To Give Firms an Opportunity to Comment.

Petitions have been accepted for filing on the dates indicated from the firms listed below.

LIST OF PETITION ACTION BY TRADE ADJUSTMENT ASSISTANCE FOR PERIOD 12/18/97–01/15/98

Firm name	Address	Date petition accepted	Product
Dina, Inc	303 Coons Avenue, Oswego, KS 67356.	01/02/98	Cultured Marble Home Accessories—Picture Frames, Mirror Frames and Inspirational Statuettes.
E.C.C. Corporation	P.O. Box 176, Jefferson, MA 01522.	12/23/97	Printed Circuit Boards for Computers and Electronic Devices, Including but not Limited to Scanners.
Fox Press, Inc. (The)	P.O. Box 458, Windsor, CT 06095.	12/23/97	Commercial Printed Materials—Trade Advertising, Brochures, Leaflets, Etc.
Form-a-Chem, Inc	10834 Ambassador Boulevard, St. Louis, MO 63132.	12/29/97	Personal Care Products—Shampoos and Hair Conditioners and Industrial Cleaners—Oven, Window, Etc.
Insport International, Inc	1870 NW 173rd Avenue, Beaverton, MA 97006.	01/02/98	Men's and Women's Jackets and Pants.
Republic Container Company	P.O. Box 37, Nitro, WV 25143	01/02/98	Fifty Five Gallon Drums and Misc. Containers—Trash Drums and Bulk and Plastic Containers.
T.C. Corporation	814 North Hayden Meadows Drive, Portland, OR 97217.	01/02/98	Textile Bags—Industrial Cases, Travel Bags and Mis Advertising Specialty Items.
Fuzetron, Inc. dba Creative Industries.	1946 John Towers Avenue, El Cajon, CA 92020.	01/06/98	Electronic Pottery Wheels.
Higbee, Inc	P.O. Box 4882, Syracuse, NY 13221.	01/06/98	Gaskets.
Lift Industries, Inc	2322 I–70 Frontage Road, Grand Junction, CO 81505.	01/13/98	Industrial Machinery for the Production of Semi-Conductor Devices.
Southwest American Manufacturing Co., Inc.	1623 E. Apache, Tulsa, OK 74106.	01/13/98	Shampoo and Hair Kits.
Gulf Coast Laboratories, Inc	2410 Broadwalk, San Antonio, TX 78217.	01/14/98	Printed Circuit Boards.
Sylvia, Inc	1520 Washington Avenue, 7th Floor, St. Louis, MO 63103.	01/15/98	Millinery.

The petitions were submitted pursuant to Section 251 of the Trade Act of 1974 (19 U.S.C. 2341). Consequently, the United States Department of Commerce has initiated separate investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by Trade Adjustment Assistance, Room 7315, Economic Development Administration, U.S. Department of Commerce, Washington, D.C. 20230, no later than the close of business of the tenth calendar day following the publication of this notice.

The Catalog of Federal Domestic Assistance official program number and title of the program under which these petitions are submitted is 11.313, Trade Adjustment Assistance.

Dated: January 16, 1998.

Brenda A. Johnson,

Technical Assistance Specialist, Planning and Development Assistance.

Certain Cut-to-Length Carbon Steel Plate From Germany; Notice of Rescission of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of rescission of antidumping duty administrative review.

EFFECTIVE DATE: January 29, 1998.

SUMMARY: On September 25, 1997, the Department of Commerce ("the

VOL 63 ISS 19 JA 29 1998 UMI

Department") published in the **Federal Register** (62 FR 50292) a notice announcing the initiation of an administrative review of the antidumping duty order on Certain Cut-to-Length Carbon Steel Plate (Carbon Steel Plate) from Germany. This review covered the period August 1, 1996 through July 31, 1997. This review has now been rescinded as a result of the absence of shipments and entries into the United States of subject merchandise during the period of review.

FOR FURTHER INFORMATION CONTACT:

Nancy Decker or Linda Ludwig, Group III, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 482–0196 or 482–3833, respectively.

SUPPLEMENTARY INFORMATION:

Background

On September 2, 1997, Dewey Ballantine, on behalf of petitioners in this proceeding, requested a review of sales made by AG Der Dillinger Huttenwerke (Dillinger). On September 16, 1997, and September 22, 1997, Dillinger filed letters certifying to the Department that there had been no sales or entries of subject merchandise during the period of review (POR). The Department sent a no-shipment inquiry regarding Dillinger to U.S. Customs on October 16, 1997. Customs did not indicate that there were any such entries.

Because Dillinger made no entries into the customs territory of the United States during the POR, the Department is therefore rescinding this review.

This administrative review is being rescinded in accordance with Section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 351.213(d)(3).

Dated: January 22, 1998.

Joseph A. Spetrini,

Deputy Assistant Secretary, Enforcement Group III.

Porcelain-on-Steel Cooking Ware From the People's Republic of China: Preliminary Results of Changed Circumstances Antidumping Duty Administrative Review And Intent Not To Revoke Antidumping Duty Order, In Part

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of preliminary results of changed circumstances antidumping duty administrative review and intent not to revoke antidumping duty order, in part.

SUMMARY: The Department of Commerce is conducting a changed circumstances administrative review of the antidumping duty order on porcelain-on-steel cooking ware from the People's Republic of China to determine whether to revoke partially the order with respect to porcelain-on-steel tea kettles. General Housewares Corp., the petitioner and sole U.S. producer of porcelain-on-steel cooking ware, has expressed interest in maintaining the order with respect to porcelain-on-steel tea kettles from the People's Republic of China, and objects to the partial revocation of this order with respect to porcelain-on-steel tea kettles. We preliminarily determine not to revoke the order, in part, with respect to porcelain-on-steel tea kettles. We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: January 29, 1998.

FOR FURTHER INFORMATION CONTACT:

Suzanne King or Lorenza Olivas, Office of CVD/AD Enforcement 6, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482–2786.

SUPPLEMENTARY INFORMATION:

The Applicable Statute and Regulations

Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930 (the Act) by the Uruguay Round Agreements Act. In addition, unless otherwise indicated, all citations to the Department's regulations are to the regulations as set forth at 19 CFR 353.1, *et seq.*, as amended by the interim regulations published in the **Federal Register** on May 11, 1995 (60 FR 25130), which were applicable on May 30, 1997, the date of the respondents' request for a changed circumstances administrative review of the antidumping duty order on porcelain-on-steel cooking ware from the PRC.

Background

On December 2, 1986, the Department of Commerce (the Department) published in the **Federal Register** (51 FR 43414) an antidumping duty order on porcelain-on-steel (POS) cooking ware from the People's Republic of China (PRC).

On May 30, 1997, Clover Enamelware Enterprises Ltd. and Lucky Enamelware Factory Ltd. (Clover/Lucky) requested that the Department conduct a changed circumstances administrative review to determine, pursuant to 19 CFR 353.25(d), whether to revoke partially the antidumping duty order on POS cooking ware from the PRC with regard to POS tea kettles. The basis for Clover/Lucky's request was that the sole U.S. producer of POS cooking ware, General Housewares Corp. (GHC), affirmatively stated in its request for a changed circumstances review of the antidumping duty order on POS cooking ware from Taiwan, that it no longer manufactured POS tea kettles and thus had no interest in the importation or sale of POS tea kettles. Based on GHC's affirmative statement of no interest, with respect to tea kettles, submitted in the antidumping proceeding on POS cooking ware from Taiwan, the Department revoked the antidumping order on POS cooking ware from Taiwan, with respect to tea kettles. See Porcelain on Steel Cooking Ware from Taiwan: Final Results of Changed Circumstances Antidumping Administrative Review, and Revocation in Part of Antidumping Duty Order, 62 FR 10024 (March 5, 1997). Clover/Lucky asserted that GHC's statements in the Taiwan case should also be the basis for revoking, in part, the antidumping duty order on POS cooking ware from the PRC with respect to tea kettles.

On August 27, 1997, the Department published in the **Federal Register** (62 FR 45395) a notice of initiation of changed circumstances review of the antidumping duty order on POS cooking ware from the PRC, based on the information contained in Clover/Lucky's May 30, 1997 request. On September 11, 1997, the Department issued a questionnaire to GHC, the sole U.S. producer of POS cooking ware, to determine whether GHC is interested in retaining POS tea kettles within the scope of the antidumping duty order on POS cooking ware from the PRC. In its September 25, 1997 response, GHC stated that it is interested in the antidumping order with regard to POS tea kettles from the PRC, and objected to the partial revocation of the order with respect to POS tea kettles.

Scope of Review

The products covered by this antidumping duty order are POS cooking ware, including tea kettles, which do not have self-contained electric heating elements. All of the foregoing are constructed of steel and are enameled or glazed with vitreous glasses. Kitchenware is not subject to this order. See Antidumping Duty Order: Porcelain-on-Steel Cooking Ware from the People's Republic of China, 51 FR 43414 (December 2, 1986).

The products covered by this changed circumstances review are POS tea kettles from the PRC. Imports of POS tea kettles are currently classifiable under the harmonized tariff schedule (HTS) subheading 7323.94.00.10. The HTS subheading is provided for convenience and Customs purposes. Our written description of the scope of this proceeding is dispositive. The order with regard to imports of other POS cooking ware is not affected by this changed circumstances review.

Preliminary Results of Changed Circumstances Antidumping Duty Administrative Review

Pursuant to section 751(d) of the Act, the Department may partially revoke an antidumping duty order based on a review under section 751(b) of the Act. Section 782(h) of the Act and § 353.25(d)(1) of the Department's regulations provide that the Department may revoke an order, or revoke an order in part, if it determines that changed circumstances sufficient to warrant revocation of the order, or part of the order, exist. The petitioner and sole U.S. producer of POS cooking ware submitted an affirmative statement of interest in this order with respect to POS tea kettles. On the basis of the record developed in this proceeding, we preliminarily determine that changed circumstances sufficient to warrant partial revocation of the antidumping duty order on POS cooking ware from the PRC with respect to POS tea kettles do not exist.

The current requirements for the cash deposit of estimated antidumping duties on all subject merchandise will remain in effect until the publication of the final results of the next administrative review.

Public Comment

Any interested party may request a hearing within 10 days of publication of this notice. Any hearing, if requested, will be held no later than 28 days after the date of publication of this notice, or the first working day thereafter. Case briefs and/or written comments from interested parties may be submitted no later than 30 days after the date of publication of this notice. As part of the case brief, petitioners are encouraged to provide a summary of the arguments not to exceed five pages and a table of statutes, regulations, and cases cited. Rebuttal briefs and rebuttals to written comments, limited to the issues raised in those case briefs or comments, may be filed no later than 37 days after the publication of this notice. All written comments must be submitted in accordance with 19 CFR 353.31(e) and must be served on all interested parties on the Department's service list in accordance with 19 CFR 353.31(g). Persons interested in attending the hearing should contact the Department for the date and time of the hearing. The Department will publish in the **Federal Register** a notice of final results of this changed circumstances antidumping duty administrative review, including the results of its analysis of any issues raised in any written comments.

This notice is in accordance with sections 751 (b)(1) and (d) and 777(i) of the Act and 19 CFR 353.22(f)(1).

Dated: January 22, 1998.

Robert S. LaRussa,

Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 010998C]

Magnuson-Stevens Act Provisions; Atlantic Shark Fisheries; Exempted Fishing Permits (EFPs)

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Applications for EFPs; deadline for receipt of EFP applications; request for comments.

SUMMARY: NMFS announces the receipt of three applications for EFPs. If granted, these EFPs would authorize, over a period of 1 year, collections for public display of a limited number of sharks from the large coastal and prohibited species groups from Federal waters in the Atlantic Ocean. NMFS also announces the deadline for receipt of exempted fishing permit applications for the 1998 fishing year.

DATES: Written comments on the applications must be received on or before February 13, 1998. Applications for EFPs must be received on or before April 29, 1998.

ADDRESSES: Send comments to Rebecca Lent, Chief, Highly Migratory Species Management Division (F/SF1), NMFS, 1315 East-West Highway, Silver Spring, MD 20910. The applications and related documents and copies of the regulations under which exempted fishing permits are subject may also be requested from this address.

FOR FURTHER INFORMATION CONTACT:

Sarah McLaughlin or Margo Schulze, 301–713–2347; fax: 301–713–1917.

SUPPLEMENTARY INFORMATION: These EFPs are requested under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*) and regulations at 50 CFR 600.745 concerning scientific research activity, exempted fishing, and exempted educational activity.

Dynasty Marine Associates, Inc., in Marathon, FL, intends to collect four nurse sharks, two lemon sharks, three sandbar sharks, and four sand tiger sharks for public display by using a single hook and line as well as a short longline not consisting of more than 50 hooks. Fishing will occur in the Florida Bay and in the Atlantic Ocean off the middle Florida Keys area, in New Jersey, and in Maryland. Issuance of an EFP is necessary, according to the applicant, because the commercial season for large coastal sharks is closed for long periods of time and because possession of sand tiger sharks is prohibited. The applicant also requested an EFP to collect one sawfish; however, as NMFS does not regulate sawfish at this time, no EFP is necessary to collect this species in Federal waters.

Charles Jamison, in Summerland Key, FL, intends to collect an unspecified number of nurse and lemon sharks for schools and public display by using a short fishing line or cast net, or by hand in the Florida Keys. The applicant requested the issuance of an EFP to collect nurse and lemon sharks because the commercial season for large coastal sharks is closed for long periods of time. The applicant also requested an EFP to collect bonnethead sharks; however, as the commercial season for small coastal sharks has not closed to date, this species may be possessed legally by

VOL 63 ISS 19 JA 29 1998 UMI

obtaining a Federal commercial shark permit and an EFP is not required.

Carolina Sharks, in Georgetown, SC, intends to collect an unspecified number of large coastal sharks, including bull, sandbar, blacktip, and nurse sharks, as well as an unspecified number of sand tiger sharks for public display. The applicant intends to collect specimens by using hand rod and reels, longlines no greater than 2.4 kilometers, anchor hooks, and gillnets of unspecified length with 10–33 centimeter stretch mesh. Fishing will occur from February through October in Federal waters off New York, North Carolina, South Carolina, Georgia, and Florida, as well as in the Chesapeake Bay. Issuance of an EFP is necessary, according to the applicant, because the commercial season for large coastal sharks is closed for long periods of time and because possession of sand tiger sharks is prohibited.

The proposed collections for public display involve activities otherwise prohibited by regulations implementing the Fishery Management Plan for Sharks of the Atlantic Ocean. The applicants require authorization to fish for and to possess large coastal sharks outside the Federal commercial seasons and to fish for and to possess prohibited species.

Based on a preliminary review, NMFS finds that these applications warrant further consideration. A final decision on issuance of EFPs will depend on the submission of all required information and on NMFS' review of public comments received on the applications, conclusions of any environmental analyses conducted pursuant to the National Environmental Policy Act, and any consultations with any appropriate Regional Fishery Management Councils, states, or Federal agencies.

Authority: 16 U.S.C. 1801 *et seq.*

BILLING CODE 1450–01–M

DEPARTMENT OF EDUCATION

Notice of Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Acting Deputy Chief Information Officer, Office of the Chief Information Officer, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1995.

DATES: An emergency review has been requested in accordance with the Act (44 U.S.C. Chapter 3507 (j)), since public harm is reasonably likely to result if normal clearance procedures are followed. Approval by the Office of Management and Budget (OMB) has been requested by February 4, 1998.

ADDRESSES: Written comments regarding the emergency review should be addressed to the Office of Information and Regulatory Affairs, Attention: Dan Chenok, Desk Officer: Department of Education, Office of Management and Budget, 725 17th Street, NW., Room 10235, New Executive Office Building, Washington, D.C. 20503. Requests for copies of the proposed information collection request should be addressed to Patrick J. Sherrill, Department of Education, 7th & D Streets, S.W., Room 5624, Regional Office Building 3, Washington, D.C. 20202–4651.

FOR FURTHER INFORMATION CONTACT: Patrick J. Sherrill (202) 708–8196. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: Section 3506 (c)(2)(A) of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 3506 (c)(2)(A) requires that the Director of OMB provide interested Federal agencies and the public an early opportunity to comment on information collection requests. The Office of Management and Budget (OMB) may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Acting Deputy Chief Information Officer, Office of the Chief Information Officer, publishes this notice containing proposed information collection requests at the beginning of the Departmental review of the information collection. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. ED invites public comment at the address specified above. Copies of the requests are available from Patrick J. Sherrill at the address specified above.

The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department, (2) will this information be processed and used in a timely manner, (3) is the estimate of burden accurate, (4) how might the Department enhance the quality, utility, and clarity of the information to be collected, and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology.

Dated: January 23, 1998.

Linda Tague,

Acting Deputy Chief Information Officer, Office of the Chief Information Officer.

Office of Elementary and Secondary Education

Type of Review: New.

Title: Advanced Placement Fee Payment Program.

Abstract: States must submit an application in order to participate in the Advanced Placement Fee Payment. The Department will award grants to States to enable States to reimburse individuals to cover part or all of the cost of advanced placement test fees to low income student who are enrolled in an advanced placement class, and who plan to take an advanced placement test.

Additional Information: An emergency clearance is requested by February 4, 1998, due to an unanticipated event. Congress appropriated funds to be used to pay Advanced Placement examination fees for low income students in the FY 1998 appropriations bill. The Department has worked closely with Congress and other groups to develop the program and fulfill the intent of Congress. The Department needs to make awards to States in sufficient time for States to use the funds this school year for students who are currently enrolled in Advanced Placement courses. If the normal clearance process were followed, awards would not be made.

Frequency: Biennially.

Affected Public: Individual or households; State, local or Tribal Government, SEAs or LEAs.

Reporting and Recordkeeping Hour Burden:

Responses: 4,057.

VOL 63 ISS 19 JA 29 1998 UMI

Burden Hours: 44,627.

President's Board of Advisors on Historically Black Colleges and Universities, Department of Education

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and agenda of the forthcoming meeting of the President's Board of Advisors on Historically Black Colleges and Universities. This notice also describes the functions of the Board. Notice of this meeting is also required under Section 10(a)(2) of the Federal Advisory Committee Act.

DATES AND TIMES: February 5, 1998 from 9:00 a.m. to 5:00 p.m.

ADDRESSES: The meeting will be held at the Sheraton City Centre Hotel located at 1143 New Hampshire Avenue, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Sterling Henry, White House Initiative on Historically Black Colleges and Universities, U.S. Department of Education, 600 Independence Avenue, SW., the Portals Building, Suite 605, Washington, DC 20202–5120. Telephone: (202) 708–8667.

SUPPLEMENTARY INFORMATION: The President's Board of Advisors on Historically Black Colleges and Universities was established under Executive Order 12876 of November 1, 1993. The Board is established to advise on the financial stability of Historically Black Colleges and Universities, to issue an annual report to the President on HBCU participation in Federal programs, and to advise the Secretary of Education on increasing the private sector role in strengthening HBCUs.

The meeting of the Board is open to the public. The meeting will be primarily devoted to: Reauthorization of the Higher Education Act, and Federal Agency Performance Reports.

Records are kept of all Board procedures, and are available for public inspection at the White House Initiative on Historically Black Colleges and Universities located at 1250 Maryland Avenue, SW., the Portals Building, Suite 605, Washington, DC 20202, from the hours of 8:30 a.m. to 5:00 p.m.

Dated: January 23, 1998.

David A. Longanecker,

Assistant Secretary for Postsecondary Education.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP98–186–000]

K N Interstate Gas Transmission Company; Notice of Request Under Blanket Authorization

January 23, 1998.

Take notice that on January 15, 1998, K N Interstate Gas Transmission Company (K N Interstate), Post Office Box 281304, Lakewood, Colorado 80228, filed in Docket No. CP98–186–000 a request pursuant to §§ 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 157.212) for authorization to install and operate two new delivery taps and appurtenant facilities, to accommodate deliveries to K N Energy, Inc. (K N Energy). K N Interstate make such request under its blanket certificate issued in Docket Nos. CP83–140–000 and CP83–140–001 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

K N Interstate avers that K N Energy, a local distribution company, has requested the addition of new delivery points under K N Energy's existing transportation service agreement with K N Interstate. Specifically, K N Interstate proposes to install:

1. A delivery point in Grant County, Kansas at an estimated cost of $29,000—to serve an irrigation customer. The quantities of gas to be delivered through that proposed point will be approximately 4,800 Mcf on a peak day and 158,400 Mcf annually, and

2. A delivery point in Deuel County, Nebraska at an estimated cost of $20,000—to serve a commercial customer. The quantities of gas to be delivered through that proposed point will be approximately 24 Mcf on a peak day and 1,440 Mcf annually.

K N Interstate states that it provides open-access transportation services, pursuant to a certificate issued by the Commission in Docket No. CP89–1043–000, and the Commission's Regulations found at 18 CFR Part 284. It is stated that since the delivery volumes are within the current maximum transportation quantities set forth in K N Interstate's transportation service agreement with K N Energy, that the addition of the proposed delivery points will not have any adverse impact, on a daily or annual basis upon K N Interstate's existing customers.

It is further stated that the addition of the proposed delivery points would provide K N Interstate with additional outlets for natural gas transported through its system and would provide K N Energy with the opportunity to serve additional direct retail sales customers.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

David P. Boergers,

Acting Secretary.

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP98–190–000]

Koch Gateway Pipeline Company; Notice of Request Under Blanket Authorization

January 23, 1998.

Take notice that on January 16, 1998, Koch Gateway Pipeline Company (Koch Gateway), P.O. Box 1478, Houston, Texas 77251–1478, filed in Docket No. CP98–190–000 a request pursuant to §§ 157.205 and 157.216 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 157.216) for approval to abandon by removal a 2-inch delivery tap and riser, under the blanket certificate issued in Docket No. CP82–430–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Koch Gateway proposes to abandon by removal a 2-inch tap and riser that formerly served the Horseshoe Lake Road town border station on behalf of Louisiana Gas Services (LGS), a local distribution company in Ouachita Parish, Louisiana. LGS no longer requires gas service at this point because it has extended its own distribution system to reach customers in this area.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

[Docket No. RP97–373–009]

Koch Gateway Pipeline Company; Notice of Proposed Changes to FERC Gas Tariff

January 23, 1998.

Take notice that on January 20, 1998, Koch Gateway Pipeline Company (Koch) tendered for filing as part of its FERC Gas Tariff, Fifth Revised Volume No. 1, the following tariff sheet to be effective December 1, 1997:

Substitute Sixth Revised Sheet No. 2707

Koch states that it is submitting this substitute tariff sheet to revise a previously suspended version of Sheet 2707 with a modification that was made and accepted during its suspension period.

Koch states that copies of this filing have been served upon each party contained in the official service list as compiled by the Secretary in the above captioned proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's regulations. All such protests must be filed as provided in Section 154.210 of the Commission's regulations. Protests will be considered by the Commission in determining appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection.

Northeast Empire Limited Partnership #2; Notice of Filing

January 23, 1998.

On January 20, 1998, Northeast Empire Limited Partnership #2 (NELP#2), petitioned the Commission for an order accepting rate schedule for filing and granting waivers and blanket approvals.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before February 4, 1998. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Northern Natural Gas Company; Notice of Compliance Filing

January 23, 1998.

Take notice that on October 31, 1997, Northern Natural Gas Company (Northern) tendered for filing additional information pertaining to the July 1, 1997, Carlton Resolution surcharge refund report. The instant report was made to comply with a director letter order issued on October 21, 1997 (81 FERC ¶ 61,078 (1997).

Northern states the report is in response to the protests filed by Northern Municipal Distributors Group and the Midwest Region Gas Task Force Association and Minnegasco, a Division of NorAm Energy Corp. The information provided in the report pertains to buyout allocations, commodity surcharge allocation, carrying charge allocation, and Market Area volumes.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests should be filed on or before January 30, 1998. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP98–184–000]

Southern Natural Gas Company; Notice of Application

January 23, 1998.

Take notice that on January 14, 1998 Southern Natural Gas Company (Southern), P.O. Box 2563 Smith, Birmingham, Alabama 35202–2563 filed in Docket No. CP98–184–000 an application pursuant to Section 7(b) and 7(c) of the Natural Gas Act for permission and approval for Southern to abandon certain pipeline and appurtenant facilities and to construct, install, and operate certain new facilities, all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Southern requests authority to abandon in place approximately 1.567 miles of Southern's 20-inch North Main Line extending from Mile Post 340.948 to Mile Post 342.525 in St. Clair County, Alabama. Southern also requests authority to replace the proposed abandoned segment with a new 20-inch pipeline segment to be constructed outside the existing right-of-way. Southern states that the segment to be replaced has begun to deteriorate, as a result of corrosion, to the point that it needs to be replaced. Southern estimates the cost of the project to be $1,482,500 and requests that the Commission issue a predetermination that rolled-in rates are appropriate for the proposed facilities.

Any person desiring to participate in the hearing process or to make any protest with reference to said application should on or before February 13, 1998, file with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

A person obtaining intervenor status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by every one of the intervenors. An intervenor can file for rehearing of any Commission order and can petition for court review of any such order. However, an intervenor must submit copies of comments or any other filing it makes with the Commission to every other intervenor in the proceeding, as well as 14 copies with the Commission.

A person does not have to intervene, however, in order to have comments considered. A person, instead, may submit two copies of comments to the Secretary of the Commission. Commenters will be placed on the Commission's environmental mailing list, will receive copies of environmental documents and will be able to participate in meetings associated with the Commission's environmental review process. Commenters will not be required to serve copies of filed documents on all other parties. However, commenters will not receive copies of all documents filed by other parties or issued by the Commission and will not have the right to seek rehearing or appeal the Commission's final order to a federal court.

The Commission will consider all comments and concerns equally, whether filed by commenters or those requesting intervenor status.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Southern to appear or be represented at the hearing.

David P. Boergers,

Acting Secretary.

[Docket No. TM98–6–29–000]

Transcontinental Gas Pipe Line Corporation; Notice of Proposed Changes in FERC Gas Tariff

January 23, 1998.

Take notice that on January 8, 1998, Transcontinental Gas Pipe Line Corporation tendered for filing as part of its FERC Gas Tariff, Third Revised Volume No. 1, certain revised tariff sheets which are enumerated in Appendix A to the filing.

Transco states that the purpose of the filing is to track rate and fuel changes attributable to storage service purchased from Texas Eastern Transmission Corporation (TETCO) under its Rate Schedule X–28, the costs of which are included in the rates and charges payable under Transco's Rate Schedule S–2 and transportation service purchased from Texas Gas Transmission Corporation (Texas Gas) under its Rate Schedule FT, the costs of which are included in the rates and charges payable under Transco's Rate Schedule FT–NT.

Transco states that the filing is being made pursuant to tracking provisions under Section 26 of the General Terms and Conditions of Transco's Volume No. 1 Tariff and Section 4 of Transco's Rate Schedule FT-NT.

Transco states that included in Appendices B and C attached to the filing are explanations of the rate and fuel charges and details regarding the computation of the revised Rate Schedule S–2 and FT–NT rates.

Transco states that copies of the filing are being mailed to its affected customers and interested State Commissions.

Any person desiring to be heard or to protest this filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.214 and Section 385.211 of the Commission's Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Transcontinental Gas Pipe Line Corporation; Notice of Proposed Changes in FERC Gas Tariff

January 23, 1998.

Take notice that on January 20, 1998 Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing as part of its FERC Gas Tariff, Third Revised Volume No. 1, Tenth Revised Sheet No. 50, to be effective December 1, 1997.

Transco states that the purpose of the instant filing is to track rate changes attributable to transportation service purchased from Texas Gas Transmission Corporation (Texas Gas) under its Rate Schedule FT the costs of which are included in the rates and charges payable under Transco's Rate Schedule FT–NT. The filing is being made pursuant to tracking provisions under Section 4 of Transco's Rate Schedule FT–NT.

Transco states that included in Appendix B attached to the filing is the explanation of the rate changes and details regarding the computation of the revised Rate Schedule FT–NT rates.

Transco states that copies of the filing are being mailed to each of its FT–NT customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street N.E., Washington, D.C. 20426, in accordance with Sections 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed as provided in Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Docket No. RP98–55–002]

Transwestern Pipeline Company; Notice of Compliance Filing

January 23, 1998.

Take notice that on January 20, 1998, Transwestern Pipeline Company (Transwestern), tendered for filing to become part of Transwestern's FERC Gas Tariff the following tariff sheets proposed to become effective on December 20, 1997:

Second Revised Volume No. 1

First Revised Sheet No. 116C

Transwestern states that the instant filing is made in compliance with the Commission's Letter Order accepting tariff sheets, subject to conditions, issued on December 18, 1997 in Docket No. RP98–55–000.

Transwestern states that copies of the filing were served upon Transwestern's customers and interested State Commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C., 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed in accordance with Section 154.210 of the Commission's Regulations. All protests will be considered by the Commission in determining the appropriate action to be taken in this proceeding, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for inspection.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP98–181–000]

Trunkline Gas Company, Notice of Request Under Blanket Authorization

January 23, 1998.

Take notice that on January 13, 1998, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77251–1642, filed in Docket No. CP98–181–000 a request pursuant to §§ 157.205 and 157.211 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.211) for authorization to construct, own and operate certain facilities to be located in Harris County, Texas, under Trunkline's blanket certificate issued in Docket No. CP83–84–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Trunkline proposes to install a 2″ hot tap, check valve, insulating flange and associated facilities on its 24″ Line 100–1 in Harris County at milepost 1.53, and install electronic gas measurement equipment (EGM) to establish a delivery point to Cypress Public Service, L.P. The new interconnect will have a design capacity up to 2,000 Mcf/d. The estimated cost of the proposed facilities is approximately $38,820.

Trunkline states that the construction of the proposed facilities will have no effect on its peak day and annual deliveries, that its existing tariff does not prohibit additional facilities, that deliveries will be accomplished without detriment or disadvantage to its other customers and that the total volumes delivered will not exceed total volumes authorized prior to this request.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for

VOL 63 ISS 19 JA 29 1998 UMI

authorization pursuant to Section 7 of the Natural Gas Act.

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. DR98–19–000, et al.]

Minnesota Power Company, et al.; Electric Rate and Corporate Regulation Filings

January 22, 1998.

Take notice that the following filings have been made with the Commission:

1. Minnesota Power Company

[Docket No. DR98–19–000]

Take notice that on December 19, 1997, Minnesota Power tendered for filing a petition for approval of a change in depreciation rates for accounting purposes only. Copies of the filing have been served on the Minnesota Public Utilities Commission.

Comment date: February 20, 1998, in accordance with Standard Paragraph E at the end of this notice.

2. Entergy Gulf States, Inc. and Entergy Louisiana, Inc.

[Docket No. DR98–17–000]

Take notice that on December 19, 1997, Entergy Services, Inc. (ESI), on behalf of its public utility affiliates, Entergy Gulf States, Inc., and Entergy Louisiana, Inc., submitted an application for approval of changes in depreciation rates for accounting purposes implemented after April 19, 1994.

Comment date: February 20, 1998, in accordance with Standard Paragraph E at the end of this notice.

3. Tampa Electric Company

[Docket No. DR98–20–000]

Take notice that on December 23, 1997, Tampa Electric Company (Tampa Electric), filed an application for approval of changes to depreciation rates and amortization schedules that occurred on or after April 19, 1994, and prior to May 22, 1997. Tampa Electric proposes an effective date of January 1, 1996, for the changes. Tampa Electric states that the changes did not affect any wholesale electric power or transmission rate on file with the Commission.

Comment date: February 20, 1998, in accordance with Standard Paragraph E at the end of this notice.

4. Wisconsin Electric Power Company

[Docket No. DR98–21–000]

Take notice that Wisconsin Electric Power Company (Wisconsin Electric) on December 23, 1997, tendered for filing a petition for approval of a change in depreciation rates for accounting purposes only. Copies of the filing have been served on the Michigan Public Service Commission and the Public Service Commission of Wisconsin.

Comment date: February 20, 1998, in accordance with Standard Paragraph E at the end of this notice.

5. The Empire District Electric Company

[Docket No. DR98–22–000]

Take notice that on December 23, 1997, The Empire District Electric Company (EDE) tendered for filing an application pursuant to Rule 204 of the Commission Rules of Practice and Procedures, 18 CFR 385.204 seeking approval by the Federal Energy Regulatory Commission of a change in depreciation rates for production, transmission, distribution, and general plant utilized by EDE.

Comment date: February 20, 1998, in accordance with Standard Paragraph E at the end of this notice.

6. Orange and Rockland Utilities, Inc.

[Docket No. DR98–23–000]

Take notice that on December 24, 1997, Orange and Rockland Utilities, Inc. (Orange and Rockland), tendered for filing a change in depreciation rates for its wholesale jurisdiction. Orange and Rockland requests that the depreciation rate changes be made effective as of May 3, 1996.

Comment date: February 20, 1998, in accordance with Standard Paragraph E at the end of this notice.

7. West Texas Utilities

[Docket No. DR98–48–000]

Take notice that on January 5, 1998, West Texas Utilities (WTU), filed a request, pursuant to Section 302 of the Federal Power Act, for approval to continue utilizing a blended rate approach to allocate depreciation expense to its retail and wholesale customers.

Comment date: February 20, 1998, in accordance with Standard Paragraph E at the end of this notice.

8. Boston Edison Company

[Docket No. EC98–16–000]

Take notice that on January 16, 1998, Boston Edison Company (Boston Edison) and Sithe Energies, Inc. (Sithe), supplemented Boston Edison's application in this docket, seeking the Commission's approval for the sale of transmission facilities, such as step-up transformers, to be sold as part of the divestiture of Boston Edison's fossil generating units. In the supplemental filing Boston Edison and Sithe provide the Commission with a Purchase and Sale Agreement and information concerning Sithe and join in requesting the Commission to approve the sale at the earliest possible date and not later than March 16, 1998, 60 days after the filing of the supplement.

Comment date: February 17, 1998, in accordance with Standard Paragraph E at the end of this notice.

9. The Cincinnati Gas & Electric Co., Commonwealth Edison Company, Commonwealth Edison Company of Indiana, Illinois Power Company, PSI Energy, Inc., Wisconsin Electric Power Company, Union Electric Co., Central Illinois Public Service Co., Louisville Gas & Electric Company, and Kentucky Utilities Company

[Docket No. EC98–24–000]

Take notice that on January 15, 1998, the Midwest ISO Public Utilities, pursuant to Section 203 of the Federal Power Act, 16 U.S.C. § 824b, filed an Application for approval to transfer operational control over the Midwest ISO Public Utilities' identified transmission facilities to the Midwest Independent Transmission System Operator, Inc. (Midwest ISO).

The Midwest ISO Public Utilities state that their Application is a companion to, and a necessary part of, the Midwest ISO's concurrent filing, under Section 205 of the Federal Power Act, 16 U.S.C. § 824d, to establish an independent transmission system operator.

Comment date: March 16, 1998, in accordance with Standard Paragraph E at the end of this notice.

10. Southwestern Power Administration

[Docket No. EF98–4011–000]

Take notice that the Deputy Secretary, U.S. Department of Energy, on January 8, 1998, submitted to the Federal Energy Regulatory Commission (FERC) for confirmation and approval on a final basis, pursuant to the authority vested in the FERC by Delegation Order No. 0204–108, as amended November 10, 1993, 58 FR 59717, the following Southwestern Power Administration (Southwestern), Integrated System rate schedules:

Rate Schedule P–98A, Wholesale Rates for Hydro Peaking Power
Rate Schedule NFTS–98, Wholesale Rates for Point-to-Point and Network Transmission Service
Rate Schedule EE–98, Wholesale Rate for Excess Energy

The Integrated System rate schedules were confirmed and approved on an interim basis by the Deputy Secretary in Rate Order No. SWPA–37 for the period January 1, 1998, through September 30, 2001, and have been submitted to the FERC for confirmation and approval on a final basis for the same period. The System rate schedules would increase ultimate annual revenue by $1,805,772, or 1.9 percent, from $96,344,200 to $98,149,972 effective January 1, 1998, in part to recover increases in Corps of Engineers and Southwestern investments. Southwestern has changed the rate structure to conform with the intent of the FERC's Order No. 888 consequently, the actual rate impact on each customer will vary based on the type of service requested and provided. Also, a credit, specifically designed for each customer, will apply against the purchased power adder component of the rate schedules to refund both excess revenues and interest accruing on such revenues in the purchased power deferral account during recent years of favorable water conditions. This credit is intended to equalize the customer's average purchased power adder cost. These credits will be provided to each customer over a 6-month service period beginning January 1, 1998. This customer specific credit, along with the Administrator's discretionary purchased power adder adjustment, will offset the immediate impact of increasing the purchased power adder to 1.1 mills/kWh, for those applicable customers. This rate proposal also includes a provision to continue and increase the Administrator's Discretionary Purchased Power Adder Adjustment, from up to $0.0005 to up to $0.0011 per kilowatthour, as necessary, to adjust the purchased power adder annually, under a formula-type rate, with notification to the FERC.

The Deputy Secretary has also submitted for confirmation and approval on a final basis the previous extensions of the Integrated System rates. The extensions were confirmed and approved on an interim basis by the Deputy Secretary in Rate Order Nos. SWPA–29 effective October 1, 1994, through September 30, 1995; SWPA–32 effective October 1, 1995, through September 30, 1996; SWPA–34 effective October 1, 1996, through September 30, 1997; and SWPA–35 effective October 1, 1997, through March 31, 1998.

Comment date: February 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

11. Southwestern Power Administration

[Docket No. EF98–4081–000]

Take notice that the Deputy Secretary, U.S. Department of Energy, on January 8, 1998, submitted to the Federal Energy Regulatory Commission (Commission) for confirmation and approval on a final basis, pursuant to the authority vested in the Commission by Delegation Order No. 0204–108, as amended November 10, 1993, 58 FR 59717, an annual power rate of $302,928 for the sale of power and energy by the Southwestern Power Administration (Southwestern) from the Robert Douglas Willis Hydropower Project (Robert D. Willis) to the Sam Rayburn Municipal Power Agency (SRMA). The rate was confirmed and approved on an interim basis by the Deputy Secretary in Rate Order No. SWPA–36 for the period January 1, 1998, through September 30, 2001, and has been submitted to the Commission for confirmation and approval on a final basis for the same period. The rate supersedes the annual power rate of $266,928, which the Commission approved on a final basis January 28, 1997, under Docket No. EF96–4081–000 for the period October 1, 1996, through September 30, 2000. The annual rate of $302,928 is based on the 1997 Revised Power Repayment Study for Robert D. Willis and represents an annual increase in revenue of $36,000, or 13.5 percent, to satisfy repayment criteria.

Comment date: February 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

12. Enron Power Marketing, Inc. v. Pennsylvania-New Jersey-Maryland Interconnection and PECO Energy Company

[Docket No. EL98–12–000]

Take notice that on January 12, 1998, Enron Power Marketing, Inc., filed a

VOL 63 ISS 19 JA 29 1998 UMI

corrected copy of Exhibits 13 to its Complaint filed on December 15, 1997, in the above-referenced docket.

Comment date: February 5, 1998, in accordance with Standard Paragraph E at the end of this notice.

13. Montana-Dakota Utilities Company

[Docket No. ER97–940–002]

Take notice that on December 31, 1997, Montana-Dakota Utilities Company tendered for filing its refund report in the above-referenced docket.

Comment date: February 5, 1998, in accordance with Standard Paragraph E at the end of this notice.

14. Montana-Dakota Utilities Company

[Docket No. ER97–2618–002]

Take notice that on December 31, 1997, Montana-Dakota Utilities Company tendered for filing its refund report in the above-referenced docket.

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

15. Orange and Rockland Utilities, Inc.

[Docket No. ER98–353–001]

Take notice that on December 29, 1997, Orange and Rockland Utilities, Inc., acting on behalf of itself and its wholly owned subsidiaries, Rockland Electric Company and Pike County Light & Power Company, filed a revised Open Access Transmission Service Tariff which incorporates changes to its Energy Imbalance Service.

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

16. Wolverine Power Supply Cooperative, Inc.

[Docket No. ER98–411–001]

Take notice that on January 15, 1998, Wolverine Power Supply Cooperative, Inc., tendered for filing its compliance filing in the above-referenced docket.

Comment date: Febrary 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

17. Boston Edison Company

[Docket No. ER98–507–001]

Take notice that on January 14, 1998, Boston Edison Company tendered for filing its refund report in the above-referenced docket.

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

18. Cinergy Services, Inc.

[Docket No. ER98–523–001]

Take notice that on January 6, 1998, Cinergy Services, Inc., on behalf of The Cincinnati Gas & Electric Company and PSI Energy, Inc. (The Cinergy Operating Companies), filed an amended unexecuted blanket form of Service Agreement under their Open Access Transmission Tariff.

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

19. Consumers Energy Company

[Docket No. ER98–742–001]

Take notice that on January 9, 1998, Consumers Energy Company (CECo), tendered for filing a letter stating that the service was provided by CECo and the Detroit Edison Company to Wabash Valley Power Association, Inc., or Electric Clearinghouse, Inc., under the Transmission Service Agreements accepted to refund conditions by the Commission January 2, 1998, letter order in the above-referenced docket.

Comment date: February 5, 1998, in accordance with Standard Paragraph E at the end of this notice.

20. Unitil Power Corp.

[Docket No. ER98–1194–000]

Take notice that on December 23, 1997, Unitil Power Corp. (UPC), tendered for filing three service agreements between UPC and Green Mountain Power, Inc., New England Power Company, and New Energy Ventures for service under UPC's Market-Based Power Sales Tariff. This Tariff was accepted for filing by the Commission on September 25, 1997, in [Docket No. ER97–2460–000.

UPC requests an effective date of November 23, 1997, for Green Mountain Power, Inc., and New England Power Company, and an effective date of December 26, 1997, for New Energy Ventures.

Comment date: February 5, 1998, in accordance with Standard Paragraph E at the end of this notice.

21. Cinergy Services, Inc.

[Docket No. ER98–1206–000]

Take notice that on December 24, 1997, Cinergy Services, Inc. (Cinergy), tendered for filing a service agreement under Cinergy's Open Access Transmission Service Tariff (the Tariff) entered into between Cinergy and Hoosier Energy Rural Electric Cooperative, Inc., (Hoosier).

Cinergy and Hoosier are requesting an effective date of December 15, 1997.

Comment date: February 5, 1998, in accordance with Standard Paragraph E at the end of this notice.

22. Central Illinois Light Company

[Docket No. ER98–1207–000]

Take notice that on December 24, 1997, Central Illinois Light Company (CILCO), 300 Liberty Street, Peoria, Illinois 61602, tendered for filing with the Commission a substitute Index of Point-To-Point Transmission Service Customers under its Open Access Transmission Tariff and service agreements for two new customers, Williams Energy Services Company and Griffin Energy Marketing, L.L.C.

CILCO requested an effective date of December 12, 1997.

Copies of the filing were served on the affected customers and the Illinois Commerce Commission.

Comment date: February 5, 1998, in accordance with Standard Paragraph E at the end of this notice.

23. PP&L, Inc.

[Docket No. ER98–1208–000]

Take Notice that on December 24, 1997, PP&L, Inc. (formerly known as Pennsylvania Power & Light Company)(PP&L), filed a Service Agreement dated December 22, 1997, with Orange and Rockland Utilities, Inc. (O&R), under PP&L's FERC Electric Tariff, Original Volume No. 5. The Service Agreement adds O&R as an eligible customer under the Tariff.

PP&L requests an effective date of December 24, 1997, for the Service Agreement.

PP&L states that copies of this filing have been supplied to O&R and to the Pennsylvania Public Utility Commission.

Comment date: February 5, 1998, in accordance with Standard Paragraph E at the end of this notice.

24. Wisconsin Power and Light Company

[Docket No. ER98–1209–000]

Take notice that on December 24, 1997, Wisconsin Power and Light Company (WP&L), tendered for filing an executed Form Of Service Agreement for Firm Point-to-Point Transmission Service between Wisconsin Power and Light Company and Wisconsin Power and Light Company. The Form Of Service Agreement for Firm Point-to-Point Transmission Service provides firm transmission service under WPL's Open Access Transmission Tariff.

WP&L requests an effective date of January 1, 1998, and accordingly, seeks waiver of the Commission's notice requirements. A copy of this filing has been served upon the Public Service Commission of Wisconsin.

Comment date: February 5, 1998, in accordance with Standard Paragraph E at the end of this notice.

25. Cinergy Services, Inc.

[Docket No. ER98–1210–000]

Take notice that on December 24, 1997, Cinergy Services, Inc. (Cinergy), tendered for filing a service agreement under Cinergy's Open Access Transmission Service Tariff (the Tariff) entered into between Cinergy and Continental Energy Services, L.L.C. (Continental).

Cinergy and Continental are requesting an effective date of December 1, 1997.

Comment date: February 5, 1998, in accordance with Standard Paragraph E at the end of this notice.

26. Cinergy Services, Inc.

[Docket No. ER98–1211–000]

Take notice that on December 24, 1997, Cinergy Services, Inc. (Cinergy), tendered for filing a service agreement under Cinergy's Open Access Transmission Service Tariff (the Tariff) entered into between Cinergy and Continental Energy Services, L.L.C. (Continental).

Cinergy and Continental are requesting an effective date of December 1, 1997.

Comment date: February 5, 1998, in accordance with Standard Paragraph E at the end of this notice.

27. Cinergy Services, Inc.

[Docket No. ER98–1213–000]

Take notice that on December 24, 1997, Cinergy Services, Inc. (Cinergy), tendered for filing a service agreement under Cinergy's Open Access Transmission Service Tariff (the Tariff) entered into between Cinergy and Hoosier Energy Rural Electric Cooperative, Inc. (Hoosier).

Cinergy and Hoosier are requesting an effective date of December 15, 1997.

Comment date: February 5, 1998, in accordance with Standard Paragraph E at the end of this notice.

28. Louisville Gas and Electric Company

[Docket No. ER98–1214–000]

Take notice that on December 29, 1997, Louisville Gas and Electric Company (LG&E), tendered for filing an executed Non-Firm Point-To-Point Transmission Service Agreement between LG&E and AES Power, Inc., under LG&E's Open Access Transmission Tariff.

Comment date: February 5, 1998, in accordance with Standard Paragraph E at the end of this notice.

29. Louisville Gas and Electric Company

[Docket No. ER98–1215–000]

Take notice that on December 29, 1997, Louisville Gas and Electric Company (LG&E), tendered for filing an executed Short-Term Firm Point-To-Point Transmission Service Agreement between LG&E and Commonwealth Edison Company under LG&E's Open Access Transmission Tariff.

Comment date: February 5, 1998, in accordance with Standard Paragraph E at the end of this notice.

30. Louisville Gas and Electric Company

[Docket No. ER98–1216–000]

Take notice that on December 29, 1997, Louisville Gas and Electric Company (LG&E), tendered for filing an executed Short-Term Firm Point-To-Point Transmission Service Agreement between LG&E and Coral Power L.L.C., under LG&E's Open Access Transmission Tariff.

Comment date: February 5, 1998, in accordance with Standard Paragraph E at the end of this notice.

31. Louisville Gas and Electric Company

[Docket No. ER98–1217–000]

Take notice that on December 29, 1997, Louisville Gas and Electric Company (LG&E), tendered for filing an executed Short-Term Firm Point-To-Point Transmission Service Agreement between LG&E and LG&E Energy Marketing, Inc., under LG&E's Open Access Transmission Tariff.

Comment date: February 5, 1998, in accordance with Standard Paragraph E at the end of this notice.

32. Illinois Power Company

[Docket No. ER98–1218–000]

Take notice that on December 29, 1997, Illinois Power Company (Illinois Power), 500 South 27th Street, Decatur, Illinois 62526, tendered for filing firm and non-firm transmission agreements under which Entergy Power Marketing Corporation will take transmission service pursuant to its open access transmission tariff. The agreements are based on the Form of Service Agreement in Illinois Power's tariff.

Illinois Power has requested an effective date of December 10, 1997.

Comment date: February 5, 1998, in accordance with Standard Paragraph E at the end of this notice.

33. Great Bay Power Corporation

[Docket No. ER98–1219–000]

Take notice that on December 29, 1997, Great Bay Power Corporation (Great Bay), tendered for filing a service agreement between PacifiCorp Power Marketing, Inc., and Great Bay for service under Great Bay's revised Tariff for Short Term Sales. This Tariff was accepted for filing by the Commission on May 17, 1996, in Docket No. ER96–726–000. The service agreement is proposed to be effective December 18, 1997.

Comment date: February 5, 1998, in accordance with Standard Paragraph E at the end of this notice.

34. Maine Public Service Company

[Docket No. ER98–1220–000]

Take notice that on December 29, 1997, Maine Public Service Company (Maine Public), filed an executed Service Agreement for non-firm point-to-point transmission service under Maine Public's open access transmission tariff with Cinergy Capital & Trading, Inc.

Comment date: February 5, 1998, in accordance with Standard Paragraph E at the end of this notice.

35. Micah Tech Industries, Inc., Power Marketing Division

[Docket No. ER98–1221–000]

Take notice that on December 29, 1997, Micah Tech Industries, Inc., Power Marketing Division, petitioned the Commission for acceptance of Micah Tech Rate Schedule FERC No. 1; the granting of certain blanket approvals, including the authority to sell electricity at market-based rates; and the waiver of certain Commission regulations.

Micah Tech intends to engage in wholesale electric power and energy purchases and sales as a marketer. Micah Tech is not in the business of generating or transmitting electric power.

Comment date: February 5, 1998, in accordance with Standard Paragraph E at the end of this notice.

36. Houston Lighting & Power Company

[Docket No. ER98–1222–000]

Take notice that on December 29, 1997, Houston Lighting & Power Company (HL&P), tendered for filing an executed transmission service agreement (TSA), with Engage Energy US, L.P. (Engage), for Non-Firm Transmission Service under HL&P's FERC Electric Tariff, Third Revised Volume No. 1, for Transmission Service To, From and Over Certain HVDC Interconnections. HL&P has requested an effective date of December 29, 1997.

Copies of the filing were served on Engage and the Public Utility Commission of Texas.

VOL 63 ISS 19 JA 29 1998 UMI

Comment date: February 5, 1998, in accordance with Standard Paragraph E at the end of this notice.

37. Houston Lighting & Power Company

[Docket No. ER98–1223–000]

Take notice that on December 29, 1997, Houston Lighting & Power Company (HL&P), tendered for filing an executed transmission service agreement (TSA), with Tenaska Power Services Co. (Tenaska), for Non-Firm Transmission Service under HL&P's FERC Electric Tariff, Third Revised Volume No. 1, for Transmission Service To, From and Over Certain HVDC Interconnections. HL&P has requested an effective date of December 29, 1997.

Copies of the filing were served on Tenaska and the Public Utility Commission of Texas.

Comment date: February 5, 1998, in accordance with Standard Paragraph E at the end of this notice.

38. Southern California Edison Company

[Docket No. ER98–1224–000]

Take notice that on December 29, 1997, Southern California Edison Company (Edison), tendered for filing revised Radial Lines Agreements (Revised Agreements) for Mandalay and Cool Water Generating Stations to be executed by Edison and Houston Industries Power Generation, Inc.

Edison requests waiver of the Commission's 60-day notice requirements and that the Commission accept the Revised Agreements for filing, unexecuted.

Copies of this filing were served upon the Public Utilities Commission of the State of California and all interested parties.

Comment date: February 5, 1998, in accordance with Standard Paragraph E at the end of this notice.

39. Northern California Power Agency

[Docket No. OA98–7–000]

Take notice that on December 2, 1997, the Northern California Power Agency has filed a request for waiver of separation of functions requirements under Order Nos. 888 and 888–A and under Orders 889 and 889–A.

Comment date: February 11, 1998, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of these filings are on file with the Commission and are available for public inspection.

David P. Boergers,

Acting Secretary.

[FR Doc. 98–2196 Filed 1–28–98; 8:45 am]

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER98–537–000, et al.]

Western Energy Marketers, Inc., et al. Electric Rate and Corporate Regulation Filings

January 23, 1998.

Take notice that the following filings have been made with the Commission:

1. Western Energy Marketers, Inc.

[Docket No. ER98–537–000]

Take notice that on December 29, 1997, Western Energy Marketers, Inc., tendered for filing an amendment in the above-referenced docket.

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

2. Jersey Central Power & Light Company, Metropolitan Edison Company, and Pennsylvania Electric Company

[Docket No. ER98–433–001]

Take notice that on December 29, 1997, Jersey Central Power & Light Company, Metropolitan Edison Company and Pennsylvania Electric Company (GPU Energy), tendered for filing its compliance filing in the above-referenced docket.

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

3. Wisconsin Power & Light Company

[Docket No. ER98–1225–000]

Take notice that on December 29, 1997, Wisconsin Power & Light Company (WPL), tendered for filing an Amendment to Common Use Transmission Facility Agreement dated March 13, 1997, between Adams-Columbia Electric Cooperative (ACEC) and WPL. WPL states that this Amendment revises the previous agreement between the two parties dated December 1, 1975.

The parties have amended the previous agreement to outline the terms and conditions whereby WPL will tap an ACEC transmission line. Service provided by ACEC under this Amendment in no way affects the electric service that WPL provides to ACEC pursuant to rate schedule FERC No. 144.

WPL requests that an effective date concurrent with the planned construction completion date be assigned. WP&L indicates that copies of the filing have been provided to ACEC and to the Public Service Commission of Wisconsin.

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

4. Florida Power & Light Company

[Docket No. ER98–1226–000]

Take notice that on December 29, 1997, Florida Power & Light Company (FPL), tendered for filing a proposed notice of cancellation of an umbrella service agreement with PanEnergy Power Services, Inc., for Non-Firm transmission service under FPL's Open Access Transmission Tariff.

FPL requests that the proposed cancellation be permitted to become effective on December 31, 1997.

FPL states that this filing is in accordance with Part 35 of the Commission's Regulations.

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

5. Commonwealth Edison Company

[Docket No. ER98–1227–000]

Take notice that on December 29, 1997, Commonwealth Edison Company (ComEd), submitted for filing one Service Agreements, establishing one Service Agreement, establishing Plum Street Energy Marketing, Inc. (PSEM), as customers under the terms of ComEd's Power Sales and Reassignment of Transmission Rights Tariff PSRT–1 (PSRT–1 Tariff). The Commission has previously designated the PSRT–1 Tariff as FERC Electric Tariff, First Revised Volume No. 2.

ComEd requests an effective date of December 5, 1997, and accordingly seeks waiver of the Commission's requirements. Copies of this filing were served upon PSEM, and the Illinois Commerce Commission.

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

6. Entergy Services, Inc.

[Docket No. ER98–1228–000]

Take notice that on December 29, 1997, Entergy Services, Inc. (Entergy Services), on behalf of Entergy Arkansas, Inc., Entergy Gulf States, Inc., (Entergy Gulf States), Entergy Louisiana, Inc. (Entergy Louisiana), Entergy Mississippi, Inc., and Entergy New Orleans, Inc. (collectively, the Entergy Operating Companies), tendered for filing a Network Integration Transmission Service Agreement, a Network Operating Agreement, a Firm Point-to-Point Transmission Service Agreement, a Non-Firm Point-to-Point Transmission Service Agreement, and an Interchange Agreement, each between Entergy Services, as agent for the Entergy Operating Companies and Cajun Electric Power Cooperative, Inc., (Cajun). The agreements are intended to supersede existing transmission and interconnection agreements that Entergy Gulf States and Entergy Louisiana have with Cajun.

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

7. Allegheny Power Service Corporation, on behalf of Monongahela Power Company, The Potomac Edison Company and West Penn Power Company (Allegheny Power)

[Docket No. ER98–1229–000]

Take notice that on December 29, 1997, Allegheny Power Service Corporation on behalf of Monongahela Power Company, The Potomac Edison Company and West Penn Power Company (Allegheny Power) filed Supplement No. 36 to add two (2) new Customers to the Standard Generation Service Rate Schedule under which Allegheny Power offers standard generation and emergency service on an hourly, daily, weekly, monthly or yearly basis. Allegheny Power requests a waiver of notice requirements to make service available as of December 1, 1997, to CNG Retail Services Corporation; and as of December 24, 1997, to Equitable Power Services Company.

Copies of the filing have been provided to the Public Utilities Commission of Ohio, the Pennsylvania Public Utility Commission, the Maryland Public Service Commission, the Virginia State Corporation Commission, the West Virginia Public Service Commission, and all parties of record.

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

8. Florida Power & Light Company

[Docket No. ER98–1230–000]

Take notice that on December 29, 1997, Florida Power & Light Company (FPL), tendered for filing proposed service agreements with Duke Energy Trading and Marketing, L.L.C., for Short-Term Firm and Non-Firm transmission service under FPL's Open Access Transmission Tariff.

FPL requests that the proposed service agreements be permitted to become effective on January 1, 1998.

FPL states that this filing is in accordance with Part 35 of the Commission's Regulations.

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

9. Orange and Rockland Utilities, Inc.

[Docket No. ER98–1231–000]

Take notice that on December 29, 1997, Orange and Rockland Utilities, Inc. (Orange and Rockland), filed a Service Agreement between Orange and Rockland and PacifiCorp Power Marketing, Inc., (Customer). This Service Agreement specifies that the Customer has agreed to the rates, terms and conditions of Orange and Rockland Open Access Transmission Tariff filed on July 9, 1996 in Docket No. OA96–210–000.

Orange and Rockland requests waiver of the Commission's sixty-day notice requirements and an effective date of November 21, 1997, for the Service Agreement. Orange and Rockland has served copies of the filing on The New York State Public Service Commission and on the Customer.

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

10. New England Power Company

[Docket No. ER98–1232–000]

Take notice that on December 29, 1997, New England Power Company (NEP), tendered for filing an Interconnection Service Agreement with Millennium Power Partners, L.P.

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

11. New England Power Company

[Docket No. ER98–1233–000]

Take notice that on December 29, 1997, New England Power Company (NEP), tendered a supplement to an amendment to The Narragansett Electric Company's service agreement under NEP's FERC Electric Tariff, Original Volume No. 1. NEP requests an effective date of January 1, 1998, for the Supplement.

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

12. Central Power and Light Company, West Texas Utilities Company, Public Service Company of Oklahoma, and Southwestern Electric Power Company

[Docket No. ER98–1234–000]

Take notice that on December 24, 1997, Central Power and Light Company (CPL), West Texas Utilities Company (WTU), Public Service Company of Oklahoma (PSO), and Southwestern Electric Power Company (SWEPCO) (collectively, the CSW Operating Companies) submitted for filing service agreements under which the CSW Operating Companies will provide firm point-to-point transmission service to WTU in accordance with the CSW Operating Companies' open access transmission service tariff. The CSW Operating Companies also submitted a notice of cancellation for each firm point-to-point transmission service agreement.

The CSW Operating Companies state that a copy of the filing has been served on WTU.

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

13. The Montana Power Trading & Marketing Company

[Docket No. ER98–1235–000]

Take notice that on December 24, 1997, MP Energy Inc., tendered for filing a letter of Change of Name to The Montana Power Trading & Marketing Company. This action was simply a name change. The ownership of MP Energy Inc., (now the Montana Power Trading & Marketing Company) has not changed.

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

14. Consolidated Edison Company of New York, Inc.

[Docket No. ER98–1236–000]

Take notice that on December 29, 1997, consolidated Edison Company of New York, Inc. (Con Edison), tendered for filing a Supplement to its Rate Schedule, Con Edison Rate Schedule FERC No. 123, a facilities agreement with Central Hudson Gas and Electric Corporation (CH). The Supplement provides for an increase in the monthly carrying charges. Con Edison has requested that this decrease take effect as of September 1, 1997.

Con Edison states that a copy of this filing has been served by mail upon CH.

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

15. Consolidated Edison Company of New York, Inc.

[Docket No. ER98–1237–000]

Take notice that on December 29, 1997, Consolidated Edison Company of New York, Inc. (Con Edison), tendered for filing, pursuant to its FERC Electric Tariff Rate Schedule No. 2, a service agreement for the New England Power Company to purchase electric capacity and energy pursuant at negotiated rates, terms, and conditions.

Con Edison states that a copy of this filing has been served by mail upon the New England Power Company.

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

16. New England Power Pool

[Docket No. ER98–1238–000]

Take notice that on December 29, 1997, the New England Power Pool Executive Committee filed for acceptance a signature page to the New England Power Pool (NEPOOL), Agreement dated September 1, 1971, as amended, signed by Energis Resources Incorporated (Energis Resources). The NEPOOL Agreement has been designated NEPOOL FPC No. 2.

The Executive Committee states that the Commission's acceptance of Energis Resources' signature page would permit NEPOOL to expand its membership to include Energis Resources. NEPOOL further states that the filed signature page does not change the NEPOOL Agreement in any manner, other than to make Energis Resources a member in NEPOOL. NEPOOL requests an effective date of January 1, 1998, for commencement of participation in NEPOOL by Energis Resources.

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

17. PacifiCorp

[Docket No. ER98–1239–000]

Take notice that on December 29, 1997, PacifiCorp's Merchant Function, tendered for filing in accordance with 18 CFR 35 of the Commission's Rules and Regulations, PacifiCorp's FERC Electric Tariff, First Revised Volume No. 12 (Tariff). The tariff has been revised to provide for the sale or assignment of transmission service by PacifiCorp's Merchant Function.

Copies of this filing were supplied to the Public Utility Commission of Oregon and the Washington Utilities and Transportation Commission.

A copy of this filing may be obtained from PacifiCorp's Regulatory Administration Department's Bulletin Board System through a personal computer by calling (503) 464–6122 (9600 baud, 8 bits, no parity, 1 stop bit).

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

18. Cinergy Services, Inc.

[Docket No. ER98–1240–000]

Take notice that on December 29, 1997, Cinergy Services, Inc. (Cinergy), tendered for filing a refund report in the above-referenced docket.

Copies of the filing were served on the Public Utilities Commission of Ohio, the Kentucky Public Service Commission, the Indiana Utility Regulatory Commission and Mr. John P. Cook, Deputy Consumer Counselor for Federal Affairs.

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

19. New England Power Pool

[Docket No. ER98–1241–000]

Take notice that on December 29, 1997, the New England Power Pool Executive Committee filed for acceptance a signature page to the New England Power Pool (NEPOOL), Agreement dated September 1, 1971, as amended, signed by Cinergy Capital & Trading, Inc., (CC&T). The NEPOOL Agreement has been designated NEPOOL FPC No. 2.

The Executive Committee states that the Commission's acceptance of CC&T's signature page would permit NEPOOL to expand its membership to include CC&T. NEPOOL further states that the filed signature page does not change the NEPOOL Agreement in any manner, other than to make CC&T a member in NEPOOL. NEPOOL requests an effective date of January 1, 1998, for commencement of participation in NEPOOL by CC&T.

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

20. Arizona Public Service Company

[Docket No. ER98–1242–000]

Take notice that on December 30, 1997, Arizona Public Service Company (APS), tendered for filing a Service Agreement to provide Network Integration Transmission Service under APS' Open Access Transmission Tariff to the Arizona Public Service Company—Merchant Group.

A copy of this filing has been served on APS' Merchant Group and the Arizona Corporation Commission.

Comment date: February 6, 1998, in accordance with Standard Paragraph E at the end of this notice.

21. Citizens Utilities Company

[Docket No. ES98–19–000]

Take notice that on December 22, 1997, Citizens Utilities Company filed an application, under Section 204 of the Federal Power Act, seeking authorization to act as guarantor, from time to time during a two year period, of obligations of its subsidiaries in an aggregate principal amount not to exceed $500 million outstanding at any one time.

Comment date: February 12, 1998, in accordance with Standard Paragraph E at the end of this notice.

22. Maine Public Service Company

[Docket No. FA96–26–001

Take notice that on January 20, 1998, Maine Public Service Company tendered for filing its refund report in the above-referenced docket.

Comment date: February 20, 1998, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of these filings are on file with the Commission and are available for public inspection.

David P. Boergers,

Acting Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 11072–001 New York]

Trenton Falls Hydroelectric Company, Inc.; Notice of Availability of Draft Environmental Assessment

January 23, 1998.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the application for original license for the Boye Dam Hydroelectric Project, located on the East Branch of the Fish Creek in Lewis County, New York, and has prepared a Draft Environmental Assessment (DEA) for the project.

Copies of the DEA are available in the Public Reference Branch, Room 2–A, of the Commission's offices at 888 First Street, N.E., Washington, D.C. 20426.

Any comments should be filed within 45 days from the date of this notice and should be addressed to David P. Boergers, Acting Secretary, Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426. For further information, contact William Diehl at (202) 219–2813 or Ed Lee at (202) 219–2809.

David P. Boergers,

Acting Secretary.

BILLING CODE 6717–01–M

ENVIRONMENTAL PROTECTION AGENCY

[FRL–5956–6]

Agency Information Collection Activities; Proposed Collection; Comment Request; Landfill Methane Outreach Program ICR

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that EPA is planning to submit the following proposed Information Collection Request (ICR) to the Office of Management and Budget (OMB): The Landfill Methane Outreach Program ICR, EPA ICR #1849.01. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection described below.

DATES: Comments must be submitted on or before March 2, 1998.

ADDRESSES: Comments may be mailed to The Docket Clerk, Docket #A–98–06, located in the U.S. EPA Office of Air & Radiation. One original and two copies of each comment should be submitted. Hand delivery of comments should be made to: Air Docket, USEPA, MC 6102, 401 M Street, SW, Room M1500, Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Tom Kerr, U.S. Environmental Protection Agency, Atmospheric Pollution Prevention Division, (6202J), 401 M St., SW, Washington, DC 20460, or call (202) 564–9768.

SUPPLEMENTARY INFORMATION: EPA is seeking comment on the ICR for the Landfill Methane Outreach Program (EPA ICR #1849.01).

Affected Entities: Entities affected by this action are landfill gas-to-energy project developers, landfill owners and landfill gas energy customers that have joined the Landfill Methane Outreach Program.

Abstract: The Landfill Methane Outreach Program is an EPA-sponsored voluntary program that encourages landfill owners, communities and project developers to implement methane recovery technologies to utilize the methane as a source of fuel and to reduce emissions of landfill methane, a potent greenhouse gas. The Landfill Methane Outreach Program further encourages utilities and other energy customers to support and promote the use of landfill methane at their facilities. The Landfill Methane Outreach Program signs voluntary Memoranda of Understanding with these organizations to enlist their support in promoting cost-effective landfill gas utilization. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15.

The EPA would like to solicit comments to:

(i) evaluate whether the proposed information collection is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, clarity and utility of the information to be collected; and

(iv) minimize the burden of the collection of information on those who are to respond including the use of electronic, Internet-based or other technological collection techniques.

Burden Statement: The estimated average public burden per respondent for new Allies is 5 hours per response, including time for reviewing instructions, searching existing data sources, gathering the necessary data, and completing the collection of information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing or providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents: Landfill owners, landfill gas energy purchasers, and landfill gas project developers.

Estimated number of respondents: 500.

Estimated Total Annual Burden on Respondents: 2,500 hours.

Frequency of Collection: as needed.

Dated: January 16, 1998.

Edward Callahan,

Acting Director, Office of Atmospheric Programs, Office of Air and Radiation.

[FRL–5956–2]

Retrofit/Rebuild Requirements for 1993 and Earlier Model Year Urban Buses; Approval of an Application for Certification of Equipment and Amendment to a Previously-Approved Certification

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of agency approval of an application for equipment certification.

SUMMARY: The Agency received a notification of intent to certify urban

VOL 63 ISS 19 JA 29 1998 UMI

bus retrofit/rebuild equipment for 4-stroke petroleum fueled diesel engines pursuant to 40 CFR part 85, subpart O from Engine Control Systems Ltd. (ECS). Pursuant to section 85.1407(a)(7), a June 16, 1997 **Federal Register** document summarized the notification and announced that the notification would be available for public review and comment, and initiated a 45-day period during which comments could be submitted. In the notice the Agency stated it would review this notification of intent to certify, as well as comments received, to determine whether the equipment should be certified.

This action also notified the public that ECS proposed to amend its' two-stroke engine certification. On January 6, 1997, EPA approved certification of the ECS retrofit kit which demonstrated a 25% reduction in PM for 1979 to 1993 Detroit Diesel Corporation (DDC) 2-stroke engines. On February 11, 1997, ECS requested that this certification be modified to also include 8V71N engines for model years 1973 to 1984.

SUPPLEMENTARY INFORMATION: The Agency received an application dated October 31, 1996, from Engine Control Systems Ltd. with principal place of business at 165 Pony Drive, Newmarket, Ontario, Canada for certification of urban bus retrofit/rebuild equipment pursuant to 40 CFR sections 85.1401–85.1415. On June 16, 1997, EPA published notification that the application had been received and made the application available for public review and comment for a period of 45 days (62 FR 32602). EPA has completed its review of this application and the Director of the Engine Program & Compliance Division (EPCD) has determined that it meets the requirements for certification. Testing demonstrated that the equipment reduced particulate matter (PM) by 18% for petroleum fueled diesel Cummins L–10 engines and all other 4-stroke engines that were originally manufactured prior to and including 1993 engines and is certified for Program 2 only. It does not apply for operators utilizing Program 1 as ECS did not demonstrate the minimum 25% reduction in PM necessary for Program 1 certification.

In addition, EPA has completed its review of ECS' February 11, 1997 request to modify the certification approved by EPA on January 6, 1997 (62 FR 46) which demonstrated a 25% reduction in PM for 1979 to 1993 DDC 2-stroke engines to also include 8V71N engines for model years 1973 to 1984. EPA published notice of this amendment request and requested comments for a period on 45 days in the same notice cited above. EPA has completed its review of this request and the Director of EPCD approves the certification amendment to include the 8V71N model for model years 1973 to 1984 for both programs 1 and 2.

DATES: The date of this document, January 29, 1998, is the official certification date for both the application and the amendment approval.

ADDRESSES: The ECS applications, as well as other materials specifically relevant to them, are contained in Public Docket A–93–42 (Category XIV–A or XVI–A), entitled "Certification of Urban Bus Retrofit/Rebuild Equipment." This docket is located in room M–1500, Waterside Mall (Ground Floor), U.S. Environmental Protection Agency, 401 M Street SW, Washington, DC 20460.

Docket items may be inspected from 8:00 a.m. until 5:30 p.m., Monday through Friday. As provided in 40 CFR part 2, a reasonable fee may be charged by the Agency for copying docket materials.

FOR FURTHER INFORMATION CONTACT: Anthony Erb, Engine Compliance Programs Group, Engine Programs & Compliance Division (6403J), U.S. Environmental Protection Agency, 401 M St. SW, Washington, D.C. 20460. Telephone: (202) 233–9259.

SUPPLEMENTARY INFORMATION:

I. Background

On October 31, 1996 ECS applied for certification of a kit, for use on 4-cycle petroleum fueled diesel Cummins L–10 and all other 4-stroke petroleum fuel urban bus engines that were originally manufactured prior to and including the 1993 model year. The kit includes a diesel oxidation converter muffler (CM). The application was submitted under EPA's Urban Bus/Retrofit program under Program 2 only.[1]

The CM functions as a catalytic converter and a muffler. It takes the place of the original muffler in the engine exhaust system. Through testing in accordance with the Federal Test Procedure for heavy-duty diesel engines, ECS documented that emissions of particulate matter (PM) were reduced by 19% with the candidate equipment installed on the test engine. The CM is certified for use with Program 2 to provide an 18% reduction relative to the original engine configuration. Additionally, the equipment is certified to provide an 18% reduction on engines equipped with certified rebuild kits that do not include a converter muffler. This equipment is certified to the PM emission levels as specified in Table A. below.

TABLE A.—ECS RETROFIT/REBUILD CERTIFICATION LEVELS FOR CUMMINS ENGINES[2]

Engine family	Control parts list (CPL)	Manufacture dates	New engine PM level	Retrofit PM level with CM	Retrofit PM level with CM and Cummins kit
343B	780	11/20/85 to 12/31/87 ...	0.58	0.48	0.28
343B	781	11/20/85 to 12/31/87 ...	.59	.48	.28
343C	0774	11/20/85 to 12/31/89 ...	.46	.38	.28
343C	0777	11/20/85 to 12/31/89 ...	.61	.50	.28
343C	0996	12/04/87 to 08/19/88 ...	.61	.50	.28
343C	1226	07/26/88 to 12/31/90 ...	.50	.41	.28
343F	1226	07/12/90 to 08/26/92 ...	.45	.37	.28
343F	1441	12/18/90 to 12/31/92 ...	.46	.38	.28
343F	1622	04/24/92 to 12/31/92 ...	.46	.38	.28
343F	1624	04/24/92 to 12/31/92 ...	.45	.37	.28

[1] EPA promulgated the Retrofit/Rebuild Requirements for 1993 and Earlier Model Year Urban Buses on April 23, 1993 (58 FR 21359). This final rule established the provisions for an urban bus retrofit/rebuild program as required by section 219(d) of the Clean Air Act Amendments (CAAA) of 1990.

TABLE A.—ECS RETROFIT/REBUILD CERTIFICATION LEVELS FOR CUMMINS ENGINES[2]—Continued

Engine family	Control parts list (CPL)	Manufacture dates	New engine PM level	Retrofit PM level with CM	Retrofit PM level with CM and Cummins kit
Other 4-stroke engines		1985 to 1993		18% reduction from original PM levels.	N/A

[2] The New Engine PM certification levels are based on the certification level or the average test audit result for each engine family. It is noted that for engine family 343F, although the PM standard for 1991 and 1992 was 0.25 g/bhp-hr and the NO_x standard was 5.0 g/bhp-hr, Cummins certified the 1226, 1441, 1622, and 1624 CPLs to a Federal Emission Limit (FEL) of 0.49 g/bhp-hr PM and 5.6 g/bhp-hr NO_x under the averaging, banking and trading program.

Urban bus operators who choose to comply with Program 2 and use the ECS equipment will use the PM emission value from Table A when calculating their average fleet PM level.

In addition, EPA has completed its review of ECS' February 11, 1997 request to amend the kit approved by EPA on January 6, 1997 (62 FR 46) which demonstrated a 25% reduction in PM for 1979 to 1993 DDC 2-stroke engines to also include 8V71N engines for model years 1973 to 1984. The certification covers those engines that are rebuilt to original specifications or in-use engines that are not rebuilt at the time the CM is installed provided the engine meets specified oil consumption limits. This certification does not trigger any new rebuild requirements for applicable engines because the requirement to use equipment certified to achieve at least a 25% reduction has already been triggered for the 8V71N engines. The PM certification levels are provided in Table B. below.

TABLE B.—ECS RETROFIT/REBUILD CERTIFICATION LEVELS FOR DDC 8V71N MODELS

DDC engine model	Model year	PM level with converter muffler	Code/family
8V71N	1973–84	0.38	All.

II. Summary and Analysis of Comments

EPA received comments from one party on the ECS application during the comment period. The Chicago Transit Authority commented on the backpressure shown in the data for the 4-stroke kit noting the increase by 4.7% (from 2.36" Hg to 2.47" Hg with a *new* catalytic converter. The CTA expressed concerns about the increase in backpressure restriction of the engine and the negative effects, as the catalytic converter accumulates mileage in service. The CTA also commented that the fuel consumption increased from 0.397 lb/bhp-hr in the baseline engine test to 0.403 lb/bhp-hr in the test with the catalyst by 1.51%. It was noted by CTA that if the increase in fuel consumption in a 4-stroke Cummins engine also applies to the 2-stroke DDC engine, CTA will incur an additional expense of approximately $122,766 based on it's operation of 1,115 buses with DDC 6V92TA diesel engines. CTA also commented that the catalytic converter should be tested for structural durability to ensure it will hold up in service and that in the absence of a durability test structural failure of the catalytic muffler should be covered for 150,000 miles with no time limitation.

In regard to concerns expressed relative to the backpressure concern, ECS indicates in a letter to EPA dated September 17, 1997, that it designs its catalyst units to provide backpressure comparable to the original muffler. The test catalyst utilized the minimum catalyst volume in what ECS termed the poorest flowpath that could be used for Cummins L10 engines according to ECS. ECS reported that all tests to date have shown that the converter muffler designs maintain exhaust system backpressure under the maximum level recommended by Cummins (3 inches of Mercury). The catalyst used by ECS for exhaust testing had been degreened, that is, put in place on an exhaust system for 100 hours under steady state conditions to more closely represent the performance of an in-use catalyst.

With regard to comments on fuel consumption, the CTA noted that if the 1.51% increase in fuel consumption seen in the 4-stroke testing were applicable to the 2-stroke engines, CTA would incur additional fuel expenses for a large number of engines in its fleet. Since the certification being discussed herein relative the 4-stroke application and the testing performed on the 4-stroke engine is relevant only to the 4-stroke application, the discussion of the application of the 4-stroke catalyst and its application and effects on fuel economy on a 2-stroke engine would not be pertinent. Therefore, this comment does not address the 4-stroke application. Further, since the 4-stroke application being reviewed herein is for certification under Program 2 only, operators are not required to purchase this equipment as it is not trigger technology. Any decision by an operator to purchase this equipment can be made by an operator based on individual fleet composition and evaluation of the costs associated with available compliance options.

With regard to CTA's concern that the catalytic converter should be tested for structural durability to ensure it will hold up in service and that in the absence of the durability test structural failure of the catalytic muffler should be covered for 150,000 miles with no time limitation, the regulations at section 85.1409(a) require that the certifier shall warrant the retrofit/rebuild equipment will not cause an urban bus engine to exceed emission requirements for a period of 150,000 miles from when the equipment is installed. Section 85.1409(b) requires that the certifier shall replace all defective parts, free of charge for a period of 100,000 miles from when the equipment is installed. There is no time limitation on the time the warranties are in effect. In addition, there is no requirement in the regulations that the certifier shall provide durability data on the equipment. As discussed in the preamble to the final rule (58 FR page 21379, April 21, 1993) EPA decided not to require durability testing for this program. Any change to the warranty requirements can be made only through a regulatory amendment process which is beyond the scope of the certification decision being made in this document.

With regard to the ECS request to amend the previously certified kit to include the DDC 8V71N, CTA commented on engine exhaust backpressure restriction and structural durability of the catalytic converter. Again, in the absence of a durability test, CTA recommended that the structural failure of the catalytic converter muffler should be covered for 150,000 miles with no time limitation.

ECS has stated that it designs the systems to include a larger catalyst

VOL 63 ISS 19 JA 29 1998 UMI

volume which results in lower particulate mass flow through each individual substrate cell and a greater catalyst volume to ensure the substrate remains free from excessive carbon build up. According to ECS, this ensures that the converter muffler exhaust backpressure will remain within acceptable levels throughout the normal life. With regard to the request to perform durability testing and to require that the converter muffler should be warranted for 150,000 miles, please refer to the discussion of these concerns in the section above.

III. Certification Approval

The Agency has reviewed this application, along with comments received from interested parties, and finds that this equipment reduces particulate matter emissions without causing urban bus engines to fail to meet other applicable Federal emission requirements. Additionally, EPA finds that installation of this equipment will not cause or contribute to an unreasonable risk to the public health, welfare or safety, or result in any additional range of parameter adjustability or accessibility to adjustment than that of the engine manufacturer's emission related part. The application meets the requirements for certification under the Retrofit/Rebuild Requirements for 1993 and Earlier Model Year Urban Buses (40 CFR sections 85.1401 and 85.1415). Thus, the Agency hereby approves the certification of this equipment.

IV. Operator Requirements and Responsibilities

With regard to the 4-stroke kit, for operators who have chosen to comply with Program 2, this equipment is immediately available for use and those who use this certified kit may claim the PM emissions reduction as stated in Table A when calculating their Fleet Level Attained. With regard to the 2-stroke amendment for the previously certified kit, the kit may be used to meet the requirements of both Programs 1 and 2 for the 8V71N engine family for model years 1973–84.

As stated in the regulations, operators should maintain records for each engine in their fleet to demonstrate that they are in compliance with the requirements, beginning January 1, 1995. These records include purchase records, receipts, and part numbers for the parts and components used in the rebuilding of urban bus engines.

Dated: January 20, 1998.

Richard D. Wilson,

Acting Assistant Administrator for Air and Radiation.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–5956–5]

Meeting of the Ozone Transport Commission for the Northeast United States

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of meeting.

SUMMARY: The United States Environmental Protection Agency is announcing the Winter meeting of the Ozone Transport Commission to be held on February 10, 1998.

This meeting is for the Ozone Transport Commission to deal with appropriate matters within the transport region, as provided for under the Clean Air Act Amendments of 1990. This meeting is not subject to the provisions of the Federal Advisory Committee Act, Public Law 92–463, as amended.

DATES: The meeting will be held on February 10, 1998, from 9:00 a.m. to 3:30 p.m.

ADDRESSES: The meeting will be held at: Hotel du Pont, 7th and Market Streets, Wilmington, DE 19801, (302) 594–3100.

FOR FURTHER INFORMATION CONTACT:

EPA: Susan Studlien, Region I, U.S. Environmental Protection Agency, John F. Kennedy Federal Building, Boston, MA 02203, (617) 565–3800.

THE STATE CONTACT:

Host Agency: Carol Brown, Delaware Department of Natural Resources and Environmental Conservation, 89 Kings Highway, Dover, DE 19903, (302) 739–4403.

FOR DOCUMENTS AND PRESS INQUIRIES CONTACT: Stephanie A. Cooper, Ozone Transport Commission, 444 North Capitol Street, NW., Suite 638, Washington, DC 20001, (202) 508–3840, e-mail: ozone@sso.org.

SUPPLEMENTARY INFORMATION: The Clean Air Act Amendments of 1990 contain at section 184 provisions for the "Control of Interstate Ozone Air Pollution." Section 184(a) establishes an ozone transport region comprised of the States of Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, parts of Virginia and the District of Columbia.

The Assistant Administrator for Air and Radiation of the Environmental Protection Agency convened the first meeting of the commission in New York City on May 7, 1991. The purpose of the Transport Commission is to deal with ground level ozone formation, transport, and control within the transport region.

The purpose of this notice is to announce that this Commission will meet on February 10, 1998. The meeting will be held at the address noted earlier in this notice.

Section 176A(b)(2) of the Clean Air Act Amendments of 1990 specifies that the meetings of Transport Commissions are not subject to the provisions of the Federal Advisory Committee Act. This meeting will be open to the public as space permits.

Type of Meeting: Open.

Agenda: Copies of the final agenda will be available from Stephanie Cooper of the OTC office (202) 508–3840 (or by e-mail: ozone@sso.org) on Tuesday, February 3, 1998. The purpose of this meeting is to review air quality needs within the Northeast and Mid-Atlantic States, including reduction of motor vehicle and stationary source air pollution. The OTC is also expected to address issues related to the transport of ozone into its region, including actions by EPA under sections 110 and 126 of the Clean Air Act, and to discuss market-based programs to reduce pollutants that cause ozone.

John DeVillars,

Regional Administrator, EPA Region I.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–5956–3]

Proposed CERCLA Prospective Lessee Agreement for the True Temper Sports Facility Site

AGENCY: Environmental Protection Agency ("EPA").

ACTION: Proposal of CERCLA prospective lessee agreement for the True Temper Sports Facility site.

SUMMARY: In accordance with the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 ("CERCLA"), 42 U.S.C. 9601 *et seq.*, as amended by the Superfund Amendments and Reauthorization Act of 1986 ("SARA"), Public Law 99–499, notice is hereby given that a proposed lessee agreement ("PLA") for the True Temper Sports Facility Removal Action Site ("the Site") located in Geneva, Ohio, has been executed by Tackle Hill Limited Liability Company. The proposed PLA has been submitted to the Attorney General for approval.

Two potentially responsible parties ("PRPs") are currently conducting a removal action at the True Temper Sports Facility Site under an Administrative Order on Consent, issued pursuant to sections 106, 107, and 122 of CERCLA, 42 U.S.C. 9606, 9607 and 9622. Tackle Hill Limited Liability Company is leasing a small portion of the Site, an access road. The proposed PLA would require Tackle Hill Limited Liability Company to pay the United States $7,000 to be applied toward response costs incurred by the United States in conducting groundwater monitoring activities at the Site after the removal action is completed by the PRPs. The Site is not on the National Priorities List, and, after the groundwater monitoring, no further response activities at the Site are anticipated at this time.

DATES: Comments on the proposed PLA must be received on or before March 2, 1998.

ADDRESSES: A copy of the proposed PLA is available for review at U.S. EPA, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604. Please contact Gaylene Vasaturo at (312) 886–1811, prior to visiting the Region 5 office.

Comments on the proposed PLA should be addressed to Gaylene Vasaturo, Office of Regional Counsel, U.S. EPA, Region 5, 77 West Jackson Boulevard (Mail Code C–14J), Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Gaylene Vasaturo at (312) 886–1811, of the U.S. EPA Region 5 Office of Regional Counsel.

A 30-day period, commencing on the date of publication of this document, is open for comments on the proposed PLA. Comments should be sent to the addressee identified in this notice.

William E. Muno,

Director, Superfund Division, Region 5.

[FR Doc. 98–2210 Filed 1–28–98; 8:45 am]

BILLING CODE 6560–50–M

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission

January 22, 1998.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act of 1995, Pub. L. 104–13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written comments should be submitted on or before March 30, 1998. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all comments to Judy Boley, Federal Communications Commission, Room 234, 1919 M St., N.W., Washington, DC 20554 or via internet to jboley@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection(s), contact Judy Boley at 202–418–0214 or via internet at jboley@fcc.gov.

SUPPLEMENTARY INFORMATION:

OMB Approval Number: 3060–XXXX.

Title: Revision of the Commission's Rules to Ensure Compatibility with Enhanced 911 Emergency Calling System (Memorandum Opinion and Order, CC Docket 94–102).

Form Number: N/A.

Type of Review: New collection.

Respondents: Cellular, broadband PCS, and SMR carriers subject to the modified rules; State and local government entities; Public Safety Answering Points.

Number of Respondents: 42,031.

Estimated Time Per Response:

a. Two time notification burden on 4,700 PSAPs @ 1 hr per=9,400 hours.

b. Two time response burden on carriers @ 1 hr per=9,400 hours.

c. One time review or establishment of cost recovery program by 375 government entities @ 10 hrs per=3,750 hours.

One time burden for consultation for remaining 125 government entities using contractors to review and/or establish cost recovery program @ 1 hr per=125 hours.

d. One time burden for 3,469 digital licensees to place notification information in digital user manuals or service contracts @ ½ hr per=1,735 hours.

e. One time burden on 3,469 digital licensees to notify existing digital subscribers @ ¼ hr per=868 hours.

f. One time burden on 7 representative organizations to draft survey for quarterly TTY report @ 1 hr per=7 hours.

Quarterly burden on 7 representative organizations to review survey results @ 12 hrs per=84 hours.

Quarterly burden on 7 representative organizations to draft joint quarterly TTY report @ 20 hrs. per=140 hours.

Quarterly burden on 3,469 licensees to respond to survey @ 8 hrs. per=27,752 hours.

g. One time burden on 31,530 SMR licensees offering direct dispatch capability to place notification in user manuals and service agreements @ ½ hour per=15,765 hours.

h. One time burden on 31,530 SMR licensees offering direct dispatch capability to notify existing customers @ ¼ hr per=7,884.

i. One time burden on 35,424 carriers to consult on determining a designated PSAP @ 1 hr per=35,424 hours.

j. One time burden on 500 government entities to consult with 35,424 carriers in determining a designated PSAP @ 1 hr per=35,424 hours.

k. One time burden on 1,400 telephone systems to consult on definition of pseudo-ANI @ 3 hr per=4,200 hours.

l. One time burden on 8,500 licensees to prepare a deployment schedule to accompany a waiver request @ 4 hours per=34,000 hours.

One time burden on 8,500 licensees to consult with a contract engineer to prepare a deployment schedule to accompany a waiver request @ 1 hr per=8,500 hours.

Total Annual Burden: 194,457 hours.

Frequency of Response: One time and on occasion reporting requirements; quarterly reporting requirements.

Estimated Cost Per Respondent: $7,050,000.

Review and/or establishment of cost recovery program to 125 state and local entities using contract CPAs @ $200 per hour=$2000 per entity.

Preparation of deployment schedule to 8,500 licensees using contract engineers @ $100 per hour=$800.

UMI

Needs and Uses: The notification burden on PSAPs will be used by carriers to verify that wireless 911 calls are referred to PSAPs who have the technical capability to use the data to the caller's benefit. TTY and dispatch notification requirements will be used to avoid consumer confusion as to the ability to reach 911 services using their wireless handsets. These notifications will also avoid delays in emergency response time. The quarterly reports will be used to monitor the progress of TTY compatibility. Consultations on the specific meaning assigned to pseudo-ANI are appropriate to ensure that all parties are working with the same information. Coordination between carriers and State and local entities to determine the PSAPs that are appropriate to receive 911 calls is necessary because of the difficulty in assigning PSAPs based on the location of the caller. The deployment schedule that should be submitted by carriers seeking a waiver of the Phase I or Phase II schedule will be used by the Commission to guarantee that the rules adopted in this proceeding are enforced in as timely a manner as possible within technological constraints.

OMB Control No.: 3060–0179.
Title: Section 73.1590, Equipment Performance Measurements.
Form No.: N/A.
Type of Review: Extension of a currently approved collection.
Respondents: Businesses or other for profit; not-for-profit institutions.
Number of Respondents: 5,052 AM stations, 7,787 FM stations and 312 TV stations.
Estimated Time Per Response: 0.5 hours for AM/FM stations and 18 hours for TV stations.
Frequency of Response: On occasion reporting requirement and recordkeeping requirement.
Estimated Cost Per Respondent: N/A.
Total Annual Burden: 12,036 hours.
Needs and Uses: Section 73.1590 requires licensees of AM, FM and TV stations to make audio and video equipment performance measurements for each main transmitter. These measurements and a description of the equipment and procedure used in making the measurements must be kept on file at the transmitter for two years. In addition, this information must be made available to the FCC upon request. The data is used by station licensees to minimize the potential for interference to other stations and by the FCC staff in field investigations to identify sources of interference.

OMB Control No.: 3060–0210.
Title: Section 73.1930, Political Editorials.
Form No.: N/A.
Type of Review: Extension of a currently approved collection.
Respondents: Businesses or other for profit; not-for-profit institutions.
Number of Respondents: 2,758.
Estimated Time Per Response: 3.0 hours.
Frequency of Response: On occasion reporting requirement.
Estimated Cost Per Respondent: N/A.
Total Annual Burden: 8,274 hours.
Needs and Uses: Section 73.1930 requires that when a commercial licensee in an editorial endorses or opposes a candidate, the licensee must notify the other qualified candidate(s) for the same office or the candidate opposed, of the date and time of editorial, provide a script or tape of editorial, and offer reasonable opportunity to respond over licensee's facility. This information is used to provide a qualified candidate reasonable opportunity to respond to a political editorial.

FEDERAL RESERVE SYSTEM

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Board of Governors of the Federal Reserve System.
ACTION: Notice.

SUMMARY: On June 15, 1984, the Office of Management and Budget (OMB) delegated to the Board of Governors of the Federal Reserve System (Board) its approval authority under the Paperwork Reduction Act, as per 5 CFR 1320.16, to approve of and assign OMB control numbers to collection of information requests and requirements conducted or sponsored by the Board under conditions set forth in 5 CFR 1320 Appendix A.1. The Federal Reserve may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended, revised, or implemented on or after October 1, 1995, unless it displays a currently valid OMB control number. Board-approved collections of information will be incorporated into the official OMB inventory of currently approved collections of information. Copies of the OMB 83–Is, supporting statements, and the approved collection of information instruments will be placed into OMB's public docket files. The following information collections, which are being handled under this delegated authority, have received initial Board approval and are hereby published for comment. At the end of the comment period, the proposed information collections, along with an analysis of comments and recommendations received, will be submitted to the Board for final approval under OMB delegated authority. Comments are invited on the following: a. Whether the proposed collections of information are necessary for the proper performance of the Federal Reserve's functions; including whether the information has practical utility; b. the accuracy of the Federal Reserve's estimates of the burden of the proposed information collection, including the validity of the methodology and assumptions used; c. ways to enhance the quality, utility, and clarity of the information to be collected; and d. ways to minimize the burden of information collection on

respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Comments must be submitted on or before March 30, 1998.

ADDRESSES: Comments, which should refer to the OMB control number or agency form number, should be addressed to William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, 20th and C Streets, N.W., Washington, DC 20551, or delivered to the Board's mail room between 8:45 a.m. and 5:15 p.m., and to the security control room outside of those hours. Both the mail room and the security control room are accessible from the courtyard entrance on 20th Street between Constitution Avenue and C Street, N.W. Comments received may be inspected in room M–P–500 between 9:00 a.m. and 5:00 p.m., except as provided in § 261.8 of the Board's Rules Regarding Availability of Information, 12 CFR 261.8(a).

A copy of the comments may also be submitted to the OMB desk officer for the Board: Alexander T. Hunt, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: A copy of the proposed form and instructions, the Paperwork Reduction Act Submission (OMB 83–I), supporting statement, and other documents that will be placed into OMB's public docket files once approved may be requested from the agency clearance officer, whose name appears below.

Mary M. McLaughlin, Chief, Financial Reports Section (202–452–3829), Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, DC 20551.

Telecommunications Device for the Deaf (TDD) users may contact Diane Jenkins (202–452–3544), Board of Governors of the Federal Reserve System, Washington, DC 20551.

For further information on the proposals concerning the FR Y–9 reports, contact Robert T. Maahs, Senior Supervisory Financial Analyst (202–872–4935). For further information on the proposals concerning the FR Y–11 reports, contact Tina Robertson, Supervisory Financial Analyst (202–452–2949).

General Information

The FR Y–9 and FR Y–11 series of reports have historically been, and continue to be, the primary source of financial information on bank holding companies and their nonbanking activities between on-site inspections. Financial information are used to detect emerging financial problems, to review performance for pre-inspection analysis, to monitor and evaluate capital adequacy, to evaluate bank holding company mergers and acquisitions, and to analyze holding companies overall financial condition and performance as part of the Federal Reserve System's overall supervisory responsibilities.

Proposal To Approve Under OMB Delegated Authority the Revision of the Following Reports

1. *Report title:* Consolidated Financial Statements for Bank Holding Companies.
Agency form number: FR Y–9C.
OMB control number: 7100–0128.
Frequency: Quarterly.
Reporters: Bank holding companies.
Annual reporting hours: 196,578.
Estimated average hours per response: Ranges from 5 to 1,250 hours.
Number of respondents: 1,457.
Small businesses are affected.
General description of report: The information collection is mandatory 12 U.S.C. 1844(b) and (c) and 12 CFR 225.5(b). Confidential treatment is not routinely given to the data in these reports. However, confidential treatment for the reporting information, in whole or in part, can be requested in accordance with the instructions to the form. Data reported on the FR Y–9C, Schedule HC–H, Column A, requiring information on "assets past due 30 through 89 days and still accruing" and memoranda item 2 are confidential pursuant to Section (b)(8) of the Freedom of Information Act 5 U.S.C. 552(b)(8).

The FR Y–9C consists of standardized financial statements similar to the commercial bank Report of Condition and Income (Call Report)(FFIEC 031–034; OMB No. 7100–0036). The FR Y–9C is filed quarterly by top-tier bank holding companies with total consolidated assets of $150 million or more and by lower-tier bank holding companies that have total consolidated assets of $1 billion or more. In addition, multibank holding companies with total consolidated assets of less than $150 million with debt outstanding to the general public or engaged in certain nonbank activities must file the FR Y–9C.

The Federal Reserve proposes to make the following changes to the FR Y–9C effective with the March 31, 1998, reporting date to parallel proposed and recent changes to the Call Report.

Schedule HC–B, Part II—Trading Assets and Liabilities

Eliminate the separate reporting of item 6, "Certificates of deposit in domestic offices," item 7, "Commercial paper in domestic offices," and item 8, "Bankers acceptances in domestic offices." Instead, existing items 6 and 8 would be included in existing item 9, "Other trading assets in domestic offices." Commercial paper held for trading would begin to be reported as part of the bank holding company's trading account securities, in existing item 5, "Other debt securities in domestic offices," consistent with the change in balance sheet classification of commercial paper not held for trading and the elimination of the loan schedule memorandum item for commercial paper, both of which took effect as of March 31, 1997.

Schedule HC–I—Risk-Based Capital

(1) Add an item for the reporting of the "Maximum contractual dollar amount of recourse exposure in low level recourse transactions" to allow respondents to report low level recourse for capital purposes under the "direct reduction method." Currently, bank holding companies can only report its low level recourse transactions using the "gross-up" method. In general, the gross-up method requires the bank holding company to multiply the maximum amount of its recourse exposure by the reciprocal of the full effective minimum risk-based capital requirement for the assets transferred and to report the resulting dollar amount as an off-balance sheet credit equivalent amount in the risk weight category appropriate to the assets transferred. However, the greater the volume of a bank holding company's low level recourse transactions and the higher the bank holding company's risk-based capital in relation to the minimum requirement, the more the bank holding company's calculated risk-based capital ratios become distorted as a result of applying the gross-up method. In these situations, another method of handling the bank holding company's low level recourse transactions, the so-called direct reduction method, results in a more accurate measure of the bank holding company's risk-based capital ratios.

(2) Add two items to incorporate new capital requirements for the measurement of market risk. These items are: "Market risk equivalent assets" and "Tier 3 Capital." In addition, include an item to report the amount of "Tier 2 Capital."

(3) Revise the caption of Item 3 of Part III to read "Net risk-weighted assets (gross risk-weighted assets less excess allowance [amount that exceeds 1.25% of gross risk-weighted assets] and all other deductions)."

VOL 63 ISS 19 JA 29 1998 UMI

Allowance for Credit Losses

The American Institute of Certified Public Accountants' (AICPA) Industry Audit Guide for Banks and Savings Institutions, issued as of April 1, 1996, requires the allocation on the balance sheet of the allowance for credit losses between on-balance sheet financial instruments and off-balance sheet credit exposures. Previously, these allowance components often were reported in the aggregate in the allowance for loan and lease losses (ALLL).

Bank holding companies have been advised to allocate the allowance for credit losses on Schedule HC—Balance Sheet consistent with their allocation methodology for other financial reporting purposes. For example, portions of the allowance for credit losses related to off-balance sheet exposures that are reported as liabilities are to be included in Schedule HC, item 23, "Other liabilities." Bank holding companies have also been advised to aggregate these components of the allowance for credit losses when completing Schedule HI–B, Part II,—Allowance for Loan and Lease Losses. In addition, bank holding companies were advised to disclose the amounts of these components in the "Notes to the Balance Sheet."

The Federal Reserve proposes to retain this methodology of reporting the allowance for credit losses. In doing so, Schedule HI–B, Part II would be retitled "Allowance for Credit Losses," and item 4.a, of Schedule HI—Income Statement would be recaptioned "Provision for credit losses." However, Schedule HI–B, Part I—Charge Offs and Recoveries on Loans and Leases would not be changed, that is, bank holding companies would continue to disclose their loan and lease charge-offs and recoveries only.

Schedule HI—Income Statement

Add a memorandum item to determine whether the bank holding company has made a Subchapter S selection for the purposes of the current tax year.

Instructions

Instructional revisions and clarifications would be made as necessary, particularly with respect to implementing certain deferred provisions of Financial Accounting Standards Board Statement No. 125, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities," that become effective in 1998. Instructional revisions and clarifications will be done in accordance with changes made to the Call Report instructions and revisions, if any, to the Capital Guidelines.

2. *Report title:* Parent Company Only Financial Statements for Large Bank Holding Companies.
Agency form number: FR Y–9LP.
OMB control number: 7100–0128.
Frequency: Quarterly.
Reporters: Bank holding companies.
Annual reporting hours: 33,032.
Estimated average hours per response: Range from 2.0 to 13.5 hours.
Number of respondents: 1,807.
Small businesses are affected.
General description of report: The information collection is mandatory 12 U.S.C. 1844(b) and (c) and 12 CFR 225.5(b). Confidential treatment is not routinely given to the information in these reports. However, confidential treatment for the report information, in whole or in part, can be requested in accordance with the instructions to the form.

The FR Y–9LP includes standardized financial statements filed quarterly on a parent company only basis from each bank holding company that files the FR Y–9C. In addition, for tiered bank holding companies, a separate FR Y–9LP must be filed for each lower tier bank holding company.

The Federal Reserve proposes the following revisions to the FR Y–9LP effective with the March 31, 1998, reporting date.

Schedule PC–B—Memoranda

Revise item 9, "Total combined nonbank assets of nonbank subsidiaries," and expand the information reported about nonbank subsidiaries. In addition, instructional clarifications would be made to the existing item related to combined nonbank assets of nonbank subsidiaries. Existing item 9 would be moved to a new item (item 15), and additional reporting items would be included. However, all of these items would only be reported by the top-tier bank holding company in a multi-tier bank holding company. In addition to reporting the total combined nonbank assets of nonbank subsidiaries, the top-tier bank holding company would report separately the amount of combined thrift assets and the combined foreign subsidiary assets that are included in the total combined nonbank assets of nonbank subsidiaries. The top-tier bank holding company would also report the total *number* of nonbank subsidiaries that are included in the combined total assets, combined thrift, and combined foreign nonbank asset balances.

Schedule PI—Income Statement

Change item 2(c)(1), "Provision for possible loan and lease losses" to the "Provision for credit losses" to parallel the revision made to Schedule HI—Income Statement of the FR Y–9C.

Instructions

Instructional revisions and clarifications would be made as necessary, particularly with respect to the reporting of goodwill, negative goodwill, and other identifiable intangible assets on Schedule PC and Schedule PC–A.

3. *Report title:* Parent Company Only Financial Statements for Small Bank Holding Companies.
Agency form number: FR Y–9SP.
OMB control number: 7100–0128.
Frequency: Semiannual.
Reporters: Bank holding companies.
Annual reporting hours: 31,912.
Estimated average hours per response: Range from 1.5 to 6.0 hours.
Number of respondents: 4,166.
Small businesses are affected.
General description of report: The information collection is mandatory 12 U.S.C. 1844(b) and (c) and 12 CFR 225.5(b). Confidential treatment is not routinely given to the information in these reports. However, confidential treatment for the report information, in whole or in part, can be requested in accordance with the instructions to the form.

The FR Y–9SP is a parent company only financial statement filed on a semiannual basis by one-bank holding companies with total consolidated assets of less than $150 million, and multibank holding companies with total consolidated assets of less than $150 million that meet certain other criteria. This report, an abbreviated version of the more extensive FR Y–9LP, is designed to obtain basic balance sheet and income statement information for the parent company, information on intercompany transactions, and data for capital adequacy evaluation.

The Federal Reserve proposes the following revisions to the FR Y–9SP effective with the June 30, 1998, reporting date.

Balance Sheet

Expand memorandum item 8 for the reporting of additional information about nonbank subsidiaries. Specifically, existing memorandum item 8 would be moved to memorandum item 16, and this item would be completed only by the top-tier bank holding company in a multi-tiered bank holding company. In addition, the top-tier bank holding company would disclose the combined thrift assets included in total combined nonbank assets, as well as the total number of nonbank entities (and separately the number of thrifts) that are included in the amount of total combined nonbank assets reported. Instructional clarifications would also be made to the existing item related to combined nonbank assets of nonbank subsidiaries.

Income Statement

Add a memorandum item to ask whether the bank holding company has made a Subchapter S selection for the purposes of the current tax year.

Instructions

Instructional revisions and clarifications would be made as necessary, particularly with respect to the reporting of goodwill, negative goodwill, and other identifiable intangible assets on the balance sheet.

Proposal To Approve Under OMB Delegated Authority the Extension for Three Years, With Revision, of the Following Reports

1. *Report title:* Quarterly Financial Statements of Nonbank Subsidiaries of Bank Holding Companies.
Agency form number: FR Y–11Q.
OMB control number: 7100–0244.
Frequency: Quarterly.
Reporters: Bank holding companies.
Annual reporting hours: 7,589.
Estimated average hours per response: Range from 3.0 to 8.0 hours.
Number of respondents: 306.
Small businesses are affected.
General description of report: The information collection is mandatory 12 U.S.C. 1844(b) and (c) and 12 CFR 225.5(b). Confidential treatment is not routinely given to most of the data in these reports. However, confidential treatment for the report information, in whole or in part, can be requested in accordance with the instructions to the form. FR Y–11Q, memorandum item 7.a, "loans and leases past due 30 through 89 days" and FR Y–11Q, memorandum item 7.d, "loans and leases restructured and included in past due and nonaccrual loans" are confidential pursuant to Section (b)(8) of the Freedom of Information Act 5 U.S.C. 552(b)(8).

The FR Y–11Q is filed quarterly by the top tier bank holding companies for each nonbank subsidiary of a bank holding company with total consolidated assets of $150 million or more in which the nonbank subsidiary has total assets of 5 percent or more of the top-tier bank holding company's consolidated Tier 1 capital, or where the nonbank subsidiary's total operating revenue equals 5 percent or more of the top-tier bank holding company's consolidated total operating revenue. The report consists of a balance sheet, income statement, off-balance-sheet items, information on changes in equity capital, and a memoranda section.

The Federal Reserve proposes a minor revision to the FR Y–11Q effective with the March 31, 1998, reporting date.

Income Statement

Item 4, "Provision for loan and lease losses" would be changed to "Provision for credit losses." This revision, which would parallel a proposed change to the FR Y–9C, would conform with the requirements of the American Institute of Certified Public Accountants' (AICPA) Industry Audit Guide for Banks and Savings Institutions that was issued as of April 1, 1996.

2. *Report title:* Annual Financial Statements of Nonbank Subsidiaries.
Agency form number: FR Y–11I.
OMB control number: 7100–0244.
Frequency: Annual.
Reporters: Bank holding companies.
Annual reporting hours: 6,720.
Estimated average hours per response: Range from .4 to 8.0 hours.
Number of respondents: 2,100.
Small businesses are affected.
General description of report: The information collection is mandatory 12 U.S.C. 1844(b) and (c) and 12 CFR 225.5(b). Confidential treatment is not routinely given to the data in these reports. However, confidential treatment for the report information, in whole or in part, can be requested in accordance with the instructions to the form. FR Y–11I, Schedule A, item 7.a, "loans and leases past due 30 through 89 days" and FR Y–11I, Schedule A, item 7.d, "loans and leases restructured and included in past due and nonaccrual loans" are confidential pursuant to Section (b)(8) of the Freedom of Information Act 5 U.S.C. 552(b)(8).

The FR Y–11I is filed annually by the top tier bank holding companies for each of their nonbank subsidiaries that are not required to file a quarterly FR Y–11Q. The FR Y–11I report consists of similar balance sheet, income statement, off-balance-sheet, and change in equity capital information that is included on the FR Y–11Q. In addition, the FR Y–11I also includes a loan schedule to be submitted only by respondents engaged in credit extending activities.

The Federal Reserve proposes a minor revision to the FR Y–11I effective with the December 31, 1998, reporting date.

Income Statement

Item 4, "Provision for loan and lease losses" would be changed to "Provision for credit losses." This revision, which would parallel a proposed change to the FR Y–9C, would conform with the requirements of the American Institute of Certified Public Accountants' (AICPA) Industry Audit Guide for Banks and Savings Institutions that was issued as of April 1, 1996.

Board of Governors of the Federal Reserve System, January 26, 1998.

Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than February 13, 1998.

A. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63102-2034:

1. Sam Bryan Cook, St. Louis, Missouri, and Robert Marion Robuck, Jefferson City, Missouri; both individually to retain voting shares of, and jointly, through Trust, to acquire additional voting shares of Central Bancompany, Inc., and thereby indirectly control shares of Central Trust Bank, Jefferson City, Missouri.

Board of Governors of the Federal Reserve System, January 26, 1998.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Health Care Policy and Research; Contract Review Meeting

In accordance with Section 10(a) of the Federal Advisory Committee Act (5 U.S.C. Appendix 2), the Agency for Health Care Policy and Research

VOL 63 ISS 19 JA 29 1998 UMI

(AHCPR) announces the following technical review committee to meet during the month of February 1998:

Name: Exhibit Logistics Support.

Date and Time: February 5, 1998, 9:30 a.m.–12:00 p.m.

Place: Agency for Health Care Policy and Research, Executive Office Building, 5th floor (East Wing) OHID Conference Room, 2101 East Jefferson Street, Rockville, MD 20852.

This meeting will be closed to the public.

Purpose: The technical Review Committee's charge is to provide, on behalf of the AHCPR Contracts Review Committee, recommendations to the Administrator, AHCPR, regarding the technical merit of contract proposals submitted in response to a specific Request for Proposal for the Exhibit Logistics Support contract. The purpose of this contract is to continue the provision of logistical support services for AHCPR exhibits. The support services include pre-exhibit negotiations with professional organizations concerning logistical requirements; arrangements for space, furniture, equipment rentals,and on-site services; arrangements for shipping of appropriate publications and support materials; arrangements for booth set up and tear down, recrating and return shipping when the exhibit is over; providing knowledgeable professionals to staff exhibits during meetings when required; and evaluation/analysis of the impact of each exhibit in terms of exhibit strategy in reaching audiences and in generating interest in programs.

Agenda: The Committee meeting will be devoted entirely to the technical review and evaluation of the contract proposal submitted in response to the above referenced Request for Proposal. The Administrator, AHCPR, has made a formal determination that this meeting will not be open to the public. This action is necessary to protect the free and full exchange of views in the contract evaluation process and safeguard confidential proprietary information, and personal information concerning individuals associated with the proposal that may be revealed during the meeting. This action is taken in accordance with section 10(d) of the Federal Advisory Committee Act, 5 U.S.C., Appendix 2, 5 U.S.C. 522 (b)(c)(6), 41 CFR 101–6.1023 and Department procurement regulations, 48 CFR 315.604(d).

Anyone wishing to obtain information regarding this meeting should contact Sandra Shane, Office for Health Information Dissemination, Agency for Health Care Policy and Research, 2101 East Jefferson Street, Suite 501, Rockville, Maryland 20852, 301/594–1364, X1377.

Dated: January 23, 1998.

John M. Eisenberg,

Administrator.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Health Care Policy and Research

Notices of Meetings

In accordance with section 10(a) of the Federal Advisory Committee Act (5 U.S.C., Appendix 2) announcement is made of the following subcommittees schedules to meet during the month of February 1998:

Name: Health Care Quality and Effectiveness Research.

Date and Time: February 2, 1998, 8:00 a.m.

Place: Holiday Inn Bethesda, 8120 Wisconsin Avenue, Delaware Room, Bethesda, Maryland 20814.

Open February 2, 8:00 a.m. to 8:15 a.m.

Closed for remainder of meeting.

Name: Health System Research.

Date and Time: February 13, 1998, 8:00 a.m.

Place: Holiday Inn Bethesda, 8120 Wisconsin Avenue, Delaware Room, Bethesda, Maryland 20814.

Open February 13, 8:00 a.m. to 8:15 a.m.

Closed for remainder of meeting.

Name: Health Care Technology and Decision Sciences.

Date and Time: February 26, 1998, 1:00 p.m.

Place: Agency for Health Care Policy and Research, 2101 East Jefferson Street, Suite 602, Conference Room 1, Rockville, Maryland 20852.

Open February 26, 1:00 p.m. to 1:15 p.m.

Closed for remainder or meeting.

Name: Health Research Dissemination and Implementation.

Date and Time: February 27, 1998, 9:00 a.m.

Place: Ramada Inn, 1775 Rockville Pike, Montrose Room, Rockville, Maryland 20852.

Open February 27, 9:00 a.m. to 9:15 a.m.

Closed remainder of meeting.

Purpose: To review and evaluate grant applications.

Agenda: The open session of the meetings will be devoted to business covering administrative matters and reports. During the closed sessions, the Subcommittees will be reviewing and discussing grant applications dealing with health services research issues. In accordance with the Federal Advisory Committee Act, section 10(d) of 5 U.S.C., Appendix 2 and 5 U.S.C. 552b(c)(6), the Administrator, Agency for Health Care Policy and Research, has made a formal determination that these latter sessions will be closed because the discussions are likely to reveal personal information concerning individuals associations with the grant applications. This information is exempt from mandatory disclosure.

Anyone wishing to obtain a roster of members, minutes of the meeting, or other relevant information should contact Mrs. Sheila Simmons, Committee Management Officer, Office of Scientific Affairs, Agency for Health Care Policy and Research, 2101 East Jefferson Street, Suite 400, Rockville, Maryland 20852, Telephone (301) 594–1452×1627.

Agenda items for this meeting are subject to change as priorities dictate.

Dated: January 23, 1998.

John Eisenberg,

Administrator.

[INFO–98–10]

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) and the Agency for Toxic Substances and Disease Registry (ATSDR) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC/ATSDR Reports Clearance Officer on (404) 639–7090.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques for other forms of information technology. Send comments to Wilma Johnson, CDC/ATSDR Reports Clearance Officer, 1600 Clifton Road, MS–D24, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

Proposed Projects

1. Project Intensive Care Antimicrobial Resistance Epidemiology (ICARE), Phase 3—Reinstatement—The Hospital Infections Program, National Center for Infectious Diseases, Centers for Disease Control and Prevention, is proposing a study to investigate the relationship between use of antimicrobial agents and the incidence of antimicrobial resistance at 40 U.S. hospitals. The proposed Phase 3 study of Project ICARE will be very similar to Phase 2 ICARE with minor revisions. We hope to enroll 40 hospitals and address many confounding factors of antimicrobial resistance. In addition, these hospitals will serve as a sentinel surveillance system for different antimicrobial resistant pathogens, such as vancomycin resistant staphylococci. About half of the hospitals have participated in Phase 2 of Project ICARE. Participating hospitals will all be active participants of the CDC's National Nosocomial Infections Surveillance (NNIS) system. Phase 3 of Project ICARE is a refinement of the Phase 2 study and will allow interhospital comparison of data (i.e., sending interim reports back to study hospitals) facilitated by incorporating differences in culturing frequency, case-mix by ICU type and speciality wards (i.e., internal organization), barrier precautions, and prescribing practice policies. Phase 3 will also allow for valid comparison of attempts at reducing antimicrobial resistance in study hospitals (i.e., publish results of interventions to reduce antimicrobials resistance at study hospitals). Also, key parameters of antimicrobial use could be correlated with antimicrobial resistance levels and tracked through the hospital's quality improvement indicator process, pharmacy and therapeutics committee, or medical staff. Unnecessary use of antimicrobials may be reduced by these efforts if the information can be provided to hospitals. Average cost to respondents is $17.18.

Form name	Number of respondents	Number responses/respondent	Average burden/response (in hours)	Total burden (in hours)
Primary contact	40	12	1	480
Pharmacy	40	48 (median)	2.0	3,840
Microbiology	40	60 (median)	0.5	1,200
Isolates	40	80 (maximum)	0.20	640
Total				6,160

Dated: January 23, 1998.

Charles Gollmar,

Acting Associate Director for Policy Planning And Evaluation, Centers for Disease Control and Prevention (CDC).

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Office of Child Support Enforcement; Statement of Organization, Functions, and Delegations of Authority

This notice amends Part K of the Statement of Organization, Functions, and Delegations of Authority of the Department of Health and Human Services (DHHS), Administration for Children and Families (ACF) as follows: Chapter KF, The Office of Child Support Enforcement (OCSE) (62 FR 14152), as last amended, March 25, 1997. This reorganization will establish two new offices within the OCSE, Office of Central Office Operations and Office of Automation and Special Projects.

I. Amend Chapter KF as follows:

a. KF.00 Mission. Delete in its entirety and replace with the following:

KF.00 Mission. The Office of Child Support Enforcement (OCSE) advises the Secretary, through the Assistant Secretary for Children and Families, on matters relating to child support enforcement. The Office, in conjunction with Regional Offices, provides direction, guidance and oversight to State Child Support Enforcement (CSE) program offices and for activities authorized and directed by title IV–D of the Social Security Act and other pertinent legislation. The general purpose of the CSE legislation is to permit States to develop programs for establishing and enforcing support obligations by locating absent parents, establishing paternity when necessary, obtaining child support orders, and enforcing those orders. The specific responsibilities of this Office are to: Develop, recommend and issue policies, procedures and interpretations for State programs for locating non-custodial parents, establishing paternity, and obtaining child support; develop procedures for review and approval or disapproval of State plan material; conduct audits of child support programs; assist States in establishing adequate reporting procedures and maintaining records for the operation of the CSE programs and of amounts collected and disbursed under the CSE program and the costs incurred in collecting such amounts; provide technical assistance and training to the States to help them develop effective procedures and systems for establishing paternity, establishing support orders and collecting child support; certify applications from States for permission to utilize the courts of the United States to enforce court orders for support against absent parents; operate the Federal Parent Locator Service; certify to the Secretary of the Treasury amounts of child support obligations that require collection in appropriate instances; submit an annual report to Congress on all activities undertaken relative to the CSE program; approve advanced data processing planning documents; and review, assess and inspect planning, design and operation of state management information systems.

b. KF.10 Organization. Delete in its entirety and replace with the following:

KF.10 Organization. The Office of Child Support Enforcement is headed by a Director and consists of:

Office of the Director (KFA)
Office of Central Office Operations (KFB)
Division of Audit (KFB1)
Division of Program Operations (KFB2)
Division of Policy and Planning (KFB3)
Division of Consumer Services (KFB4)
Division of State and Local Assistance (KFB5)
Office of Automation and Special Projects (KFC)
Division of Child Support Information Systems (KFC1)

c. KF.20 Functions. Delete in its entirety and replace with the following:

KF.20 Functions. A. Office of the Director. The Director is also the Assistant Secretary for Children and Families and is directly responsible to the Secretary for carrying out OCSE's mission. The Deputy Director/Commissioner has day-to-day operational responsibility for Child Support Enforcement programs. The Deputy Director/Commissioner assists the Director in carrying out responsibilities of the Office and provides direction and leadership to the

Office of Central Office Operations and Office of Automation and Special Projects.

The Office is responsible for developing regulations, guidance and standards for States to observe in locating absent parents; establishing paternity and support obligations and enforcing support obligations; maintaining relationships with Department officials, other federal departments, State and local officials, and private organizations and individuals interested in the CSE program; coordinating and planning child support enforcement activities to maximize program effectiveness; and approving all instructions, policies and publications issued by OCSE staff.

B. Office of Central Office Operations is headed by an Associate Commissioner who reports to the Deputy Director/Commissioner and provides leadership and direction to the divisions of Audit, Program Operations, Policy and Planning, Consumer Services, and State and Local Assistance.

Within the Office of Central Office Operations, an administrative staff assists the Associate Commissioner in managing the formulation and execution of program and salaries and expense budgets and in providing administrative, personnel and data processing support services to OCSE staff.

1. Division of Audit, as required by section 452(a)(4) of the Social Security Act (the Act), develops, plans, schedules and conducts periodic audits of State CSE programs in accordance with audit standards promulgated by the Comptroller General of the United States.

The Division will audit, at least once every three years (or more frequently in the case of a State which fails to meet the performance standards and the tests of the reliability of program data), the reliability of the State's financial and statistical data reporting systems used in calculating the paternity establishment percentage and the performance indicators used as the basis for the payments of performance based financial incentives to the States. These audits will examine the computer systems general and application controls and include in depth testing of the data produced by the system to ensure that it is valid, complete and reliable. The Division will also conduct financial audits to determine whether federal and other funds made available to carry out the State programs are being appropriately expended, and properly and fully accounted for. These audits will also examine collections and disbursements of support payments for proper processing and accounting treatment.

The Division will also provide technical assistance to States in developing their self-assessment capabilities and implementing the annual reporting requirements contained in the Personal Responsibility and Work Opportunity Reconciliation Act (PRWORA) of 1996.

In addition, the Division will also conduct other audits and examinations of program operations as may be necessary or requested by program officials for the purpose of improving the efficiency, effectiveness and economy of State and local child support activities; develops consolidated reports for the Director and Deputy Director/Commissioner, OCSE based on findings; provides specifications for the development of audit regulations and requirements for audits of State CSE programs; and coordinates and maintains effective liaison with the HHS Inspector General's Office and with the General Accounting Office.

2. Division of Program Operations is responsible for the day-to-day operation of the Federal Parent Locator Service (FPLS), the Federal Tax Refund Offset Program and Project 1099, the IRS Full Collection Project, and the SSN Enumeration Verification System. The Division is also responsible for the design, development, implementation and operation of the Federal Case Registry and the National Directory of New Hires within the expanded FPLS. It is responsible for monitoring contracts with vendors who provide automated systems support and quality assurance to these programs; working with vendors to define scope of work to be performed and by whom; negotiating interagency agreements; and providing contract oversight. The Division, in consultation with the Division of State and Local Assistance, also provides technical assistance to State and local child support enforcement agencies and other State agencies involved in these program areas. The Division provides guidance and expertise to States concerning other State, interstate and national locate networks and sources. In addition, the Division works with the U.S. Department of State on passport revocation.

3. Division of Policy and Planning proposes and implements national policy on the CSE program and provides policy guidance and interpretations to States in developing and operating their programs according to federal law. It develops legislative proposals and regulations to implement new legislation, court decisions or directives from higher authority. The Division develops procedures for review and approval of State plans by the OCSE regional offices. It develops and monitors research, interstate, and other demonstration and evaluation studies and publishes program statistics. The Division is also responsible for strategic planning and performance measurements and standards development. It prepares legislative cost estimates and is responsible for national child support budget formulation.

4. Division of Consumer Services provides direction and leadership for a variety of consumer affairs activities in support of the nationwide child support enforcement program. Provides advice on strategies and approaches to be used to improve public understanding of and access to OCSE programs and policies. Develops and publishes informational materials and disseminates through the National Reference Center. Promotes "best" child support practices to the public through monthly publication of the Child Support Report. Advises the Deputy Director/Commissioner through the Associate Commissioner of the impact of child support enforcement policy and program upon consumers and provides a focal point for intergovernmental and consumer relations and consultation. The Division is also responsible for national electronic communications activities including disseminating information and operation of the OCSE Homepage on the internet and insuring that the information is placed thereon in a timely and accurate manner.

5. Division of State and Local Assistance, in concert with regional offices, provides information and assistance on State Child Support Enforcement operations. It provides national direction and leadership for training and technical assistance activities to increase Child Support Enforcement (CSE) program effectiveness both at Federal and State levels; develops guides and resource materials and serves as a clearinghouse for specialized program techniques for use by ACF regional offices and States; and ensures transfer of best practices among State and local CSE enforcement agencies. The Division operates a national CSE training center; provides logistical support for both training events and meetings; and monitors contracts with organizations affiliated with child support enforcement programs in the areas of training and technical assistance. The Division provides outreach and liaison services to a variety of special interest populations concerning establishment of paternity and collection of child support. The Division, in consultation with the Division of Consumer Services, develops informational materials.

C. Office of Automation and Special Projects is headed by an Associate Commissioner who reports to the Deputy Director/Commissioner and provides leadership and direction to the Division of Child Support Information Systems. In addition, the Office of Automation and Special Projects has responsibility for implementation of the International Child Support Program, Native American Child Support Program, Advocacy Relations, Data Center Coordination, Grants Preparation and other projects and task forces appointed by the Deputy Director/Commissioner from time to time.

1. Division of Child Support Information Systems reviews, analyzes, and approves/disapproves State requests for Federal financial participation for automated systems development activities which support the Child Support program. It provides assistance to States in developing or modifying automation plans to conform to Federal requirements. It monitors approved State systems development activities; certifies state-wide automated systems; conducts periodic reviews to assure State compliance with regulatory requirements applicable to automated systems supported by Federal financial participation. It provides guidance to States on functional requirements for these automated information systems. It promotes interstate transfer of existing automated systems and provides assistance and guidance to improve ACF's programs through the use of automated systems.

II. Amend Notice 63 FR 81, dated January 2, 1998, Roman numeral III, Chapter KL, replace the term "Office of the Assistant Secretary for Policy and External Affairs" with "Office of the Deputy Assistant Secretary for Policy and External Affairs."

Date: January 25, 1998.

Olivia A. Golden,

Assistant Secretary for Children and Families.

BILLING CODE 4184–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 98M–0037]

Medtronic, Inc.; Premarket Approval of the Interstim® Sacral Nerve Stimulation (SNS)™ System

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by Medtronic, Inc., Minneapolis, MN, for premarket approval, under the Federal Food, Drug, and Cosmetic Act (the act), of the Interstim® Sacral Nerve Stimulation (SNS)™ System. After reviewing the recommendation of the Gastroenterology and Urology Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant, by letter of September 29, 1997, of the approval of the application.

DATES: Petitions for administrative review by March 2, 1998.

ADDRESSES: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA–305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1–23, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Laura J. Byrd, Center for Devices and Radiological Health (HFZ–472), Food and Drug Administration, 9200 Corporate Blvd., Rockville, MD 20850, 301–594–2194.

SUPPLEMENTARY INFORMATION: On January 30, 1997, Medtronic, Inc., Minneapolis, MN 55432–3576, submitted to CDRH an application for premarket approval of the Interstim® Sacral Nerve Stimulation (SNS)™ System. The device is an implantable sacral nerve electrical stimulation system and is indicated for the treatment of urinary urge incontinence in patients who have failed or could not tolerate more conservative treatments.

On August 6, 1997, the Gastroenterology and Urology Devices Panel of the Medical Devices Advisory Committee, an FDA advisory committee, reviewed and recommended approval of the application. On September 29, 1997, CDRH approved the application by a letter to the applicant from the Deputy Director of Clinical and Review Policy, Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

Opportunity for Administrative Review

Section 515(d)(3) of the act (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act, for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under 21 CFR part 12 of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under 21 CFR 10.33(b). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the **Federal Register**. If FDA grants the petition, the notice will state the issue to be reviewed, the form of the review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before March 2, 1998, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h) (21 U.S.C. 360e(d), 360j(h))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: January 5, 1998.

Joseph A. Levitt,

Deputy Director for Regulations Policy, Center for Devices and Radiological Health.

[FR Doc. 98–2114 Filed 1–28–98; 8:45 am]

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Joint Meeting of the Microbiology Devices Panel, the Clinical Chemistry and Clinical Toxicology Devices Panel, the Hematology and Pathology Devices Panel, and the Immunology Devices Panel of the Medical Devices Advisory Committee; Notice of Meeting

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

This notice announces a forthcoming meeting of a public advisory committee of the Food and Drug Administration (FDA). The meeting will be open to the public.

Name of Committee: Joint meeting of the Microbiology Devices Panel, the Clinical Chemistry and Clinical Toxicology Devices Panel, the Hematology and Pathology Devices Panel, and the Immunology Devices Panel of the Medical Devices Advisory Committee.

General Function of the Committee: To provide advice and recommendations to the agency on FDA regulatory issues.

Date and Time: The meeting will be held on February 11, 1998, 11 a.m. to 5 p.m.

Location: Corporate Bldg., conference room 020B, 9200 Corporate Blvd., Rockville, MD.

Contact Person: Freddie M. Poole, Center for Devices and Radiological Health (HFZ–440). Food and Drug Administration, 2098 Gaither Rd., Rockville, MD 20850, 301–594–2096, or FDA Advisory Committee Information Line, 1–800–741–8138 (301–443–0572 in the Washington, DC area), code 12517. Please call the Information Line for up-to-date information on this meeting.

Agenda: The committee will provide advice and recommendations to the agency on issues concerning appropriate data collection, analysis, and resolution of discrepant results, using sound scientific and statistical analysis to support indications for use of in vitro diagnostic devices. After hearing a series of presentations on the subject, the committee will discuss appropriate recommended analysis of data when the new device is compared to another device, a recognized reference method or "gold standard," other procedures not commonly used, and/or clinical criteria for diagnosis. The committee will be asked: (1) How the FDA should proceed in this area of discrepant resolution when new technology such as nucleic acid amplification is perceived to be more accurate than the reference or "gold standard" methods, (2) for guidance to implement their recommendations, and (3) for the appropriate approach to address these issues in the product labeling (package insert). These draft questions proposed for discussion may be subject to modifications or additions prior to the advisory committee meeting. FDA will consider these recommendations in the future development of review criteria for the collection and analysis of data to support the indications for use of in vitro diagnostic devices.

Procedure: Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Written submissions may be made to the contact person by January 28, 1998. Oral presentations from the public will be scheduled between approximately 1:45 p.m. and 2:45 p.m. Time allotted for each presentation may be limited. Those desiring to make formal oral presentations should notify the contact person before January 28, 1998 and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation.

FDA regrets that it was unable to publish this notice 15 days prior to the February 11, 1998, Joint meeting of the Microbiology Devices Panel, the Clinical Chemistry and Clinical Toxicology Devices Panel, the Hematology and Pathology Devices Panel, and the Immunology Devices Panel of the Medical Devices Advisory Committee meeting. Because the agency believes there is some urgency to bring these issues to public discussion and qualified members of the Joint meeting of the Microbiology Devices Panel, the Clinical Chemistry and Clinical Toxicology Devices Panel, the Hematology and Pathology Devices Panel, and the Immunology Devices Panel of the Medical Devices Advisory Committee were available at this time, the Commissioner concluded that it was in the public interest to hold this meeting even if there was not sufficient time for the customary 15-day public notice.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. app. 2).

Dated: January 23, 1998.

Michael A. Friedman,

Deputy Commissioner for Operations.

[Docket No. 97N–0022]

Agency Information Collection Activities; Announcement of OMB Approval

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a collection of information entitled "Hearing Aid Devices: Professional and Patient Package Labeling and Conditions for Sale—21 CFR 801.420 and 801.421" has been approved by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (the PRA).

FOR FURTHER INFORMATION CONTACT: Margaret R. Schlosburg, Office of Information Resources Management (HFA–250), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–827–1223.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of September 15, 1997 (62 FR 48291), the agency announced that the proposed information collection had been submitted to OMB for review and clearance under section 3507 of the PRA (44 U.S.C. 3507). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. OMB has now approved the information collection and has assigned OMB control number 0910–0171. The approval expires on November 30, 1998.

Dated: January 21, 1998.

William K. Hubbard,

Associate Commissioner for Policy Coordination.

BILLING CODE 4160–01–F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

[HCFA–R–118]

Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Health Care Financing Administration (HCFA), Department of Health and Human Services, is publishing the following summary of proposed collections for public comment. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Type of Information Collection Request: Reinstatement without change of a previously approved collection for which approval has expired; *Title of Information Collection:* Peer Review Organization Contracts; Solicitation Statements of Interest from In-State Organizations, General Notice; *Form No.:* HCFA–R–118; *Use:* This notice is a solicitation of sources sought for the procurement of medical review services. This information is required for potential contractors to demonstrate that they meet the statutory requirements as a Peer Review Organization; *Frequency:* On occasion; *Affected Public:* Business or other for-profit; *Total Annual Hours:* 1.

To obtain copies of the supporting statement for the proposed paperwork collections referenced above, or to obtain the supporting statement and any related forms, E-mail your request, including your address and phone number, to Paperwork@hcfa.gov, or call the Reports Clearance Office on (410) 786–1326. Written comments and recommendations for the proposed information collections must be mailed within 60 days of this notice directly to the HCFA Paperwork Clearance Officer designated at the following address: HCFA, Office of Information Services, Information Technology Investment Management Group, Division of HCFA Enterprise Standards, Attention: John Rudolph, Room C2–26–17, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

Dated: January 20, 1998.

John P. Burke III,

HCFA Reports Clearance Officer, Division of HCFA Enterprise Standards, Health Care Financing Administration.

[FR Doc. 98–2125 Filed 1–28–98; 8:45 am]

BILLING CODE 4120–03–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

[Form # HCFA–1500; OMB #0938–0008]

Emergency Clearance: Public Information Collection Requirements Submitted to the Office of Management and Budget (OMB)

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Health Care Financing Administration (HCFA), Department of Health and Human Services (DHHS), has submitted to the Office of Management and Budget (OMB) the following request for Emergency review. We are requesting an emergency review because the collection of this information is needed prior to the expiration of the normal time limits under OMB's regulations at 5 CFR, part 1320. The HCFA–1500 is used to determine proper payment for certain Medicare services rendered to Medicare beneficiaries. Without this information HCFA would not be able to obtain the information necessary to reimburse providers. The Agency cannot reasonably comply with the normal clearance procedures because public harm is likely to result due to the possibility of providers not rendering services to Medicare beneficiaries due to the possibility of non-payment.

HCFA is requesting OMB review and approval of this collection by February 28, 1998, with a 180-day approval period. During this 180-day period HCFA will publish a separate **Federal Register** notice announcing the initiation of an extensive 60-day agency review and public comment period on these requirements. Then HCFA will submit the requirements for OMB review and an extension of this emergency approval. In this submission HCFA will respond as appropriate to the public comments received in response to the October 24, 1996 **Federal Register** notice requesting public comment on the continued use of the HCFA–1500 and related data.

1. *Type of Information Collection Request:* Extension of a currently approved collection, without change; *Title of Information Collection:* Medicare/Medicaid Health Insurance Common Claim Form and Instructions, and Supporting Regulations 42 CFR 424.32 (Basic Requirements for all Claims) and 42 CFR 414.40 (Coding and Ancillary Policies); *Form No.:* HCFA–1500 (OMB #0938–0008); *Use:* This form and instructions are standardized for use in the Medicare/Medicaid programs to apply for reimbursement for covered services. HCFA does not require exclusive use of this form for Medicaid. 42 CFR 424.32 and 42 CFR 414.40 are regulations underlying the use of the form HCFA–1500 and the information captured on the form HCFA–1500, including the use of diagnostic and procedural coding systems. HCFA solicits comments on any and all aspects of the HCFA–1500, and the use of diagnostic and procedural coding systems: HCFA currently uses the most current version of the ICD–9–CM and CPT/HCPCS; *Frequency:* On occasion; *Affected Public:* Business or other for profit, not for profit institutions, State, local or tribal government; *Number of Respondents:* 976,239; *Total Annual Responses:* 644,802,413; *Total Annual Hours:* 46,797,008.

To obtain copies of the supporting statement and any related forms and instructions for the proposed paperwork collection referenced above, E-mail your request, including your address and phone number, to Paperwork@hcfa.gov, or call the Reports Clearance Office on (410) 786–1326.

HCFA is requesting OMB review and approval of this collection by February 28, 1998, with a 180-day approval period.

Written comments and recommendations for the proposed information collection should be faxed (202) 395–6974 or sent directly to the OMB Desk Officer designated at the following address, by February 27, 1998. OMB Human Resources and Housing Branch, Attention: Allison Eydt, New Executive Office Building, Room 10235, Washington, DC 20503.

Dated: January 22, 1998.

John P. Burke III,

HCFA Reports Clearance Officer, Office of Information Services, Information Technology Investment Management Group, Division of HCFA Enterprise Standards, Health Care Financing Administration.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

National Practitioner Data Bank; Change in User Fee and Elimination of Diskette Queries

The Health Resources and Services Administration (HRSA), Department of Health and Human Services (DHHS), is announcing a one dollar increase in the fee charged to entities authorized to request information from the National Practitioner Data Bank (Data Bank) for all queries. Concurrently, HRSA is announcing that the Data Bank will no longer accept queries submitted via diskette.

The current fee structure was announced in the **Federal Register** on January 21, 1997 (62 FR 3048). The user fee is $3.00 per name per query fee for queries submitted via telecommunications network and paid via an electronic funds transfer or credit card, with query response sent via the telecommunications network. A three dollar surcharge is applied when queries are submitted electronically on a diskette to pay for the extra handling and mailing costs for these queries. An additional $4.00 is charged for all queries which are paid for by check or money order rather than by electronic funds transfer or credit card to cover the cost of debt management.

The Data Bank is authorized by the Health Care Quality Improvement Act of 1986 (the Act), title IV of Public Law 99–660, as amended (42 U.S.C. 11101 *et seq.*). Section 427(b)(4) of the Act authorizes the establishment of fees for the costs of processing requests for disclosure and of providing such information.

Final regulations at 45 CFR part 60 set forth the criteria and procedures for information to be reported to and disclosed by the Data Bank. Section 60.3 of these regulations defines the terms used in this announcement.

In determining any changes in the amount of the user fee, the Department uses the criteria set forth in § 60.12 (b) of the regulations, as well as allowable costs pursuant to the DHHS Appropriations Act of 1998, Public Law 105–78, enacted November 13, 1997. This Act requires that the Department recover the full costs of operating the Data Bank through user fees. Paragraph (b) of the regulations states:

> The amount of each fee will be determined based on the following criteria:
> (1) Use of electronic data processing equipment to obtain information—the actual cost for the service, including computer search time, runs, printouts, and time of computer programmers and operators, or other employees,
> (2) Photocopying or other forms of reproduction, such as magnetic tapes—actual cost of the operator's time, plus the cost of the machine time and the materials used,
> (3) Postage—actual cost, and
> (4) Sending information by special methods requested by the applicant, such as express mail or electronic transfer—the actual cost of the special service.

Based on analysis of the comparative costs of the various methods for filing and paying for queries, the Department is raising all query fees by $1.00 per name. This price increase is necessitated by increased labor costs and escalating costs for the Data Bank's telecommunications network and data transmission services.

Despite the one dollar increase, electronic querying (telecommunications network) and electronic payment continue to be the most cost-effective methods for requesting information from the Data Bank. The new fee for electronic queries (telecommunications network) with electronic payment will be $4.00. The fee for querying the Data Bank by telecommunications network and non-electronic payment will be $8.00. This change is effective March 2, 1998.

When a query is for information on one or more physicians, dentists, or other health care practitioners, the appropriate total fee will be $4.00 (plus a $4.00 surcharge for submission and payment as described above) multiplied by the number of individuals about whom information is being requested. For examples, see the table below.

Additionally, due to the continuing decrease in the number of queries submitted via diskette and the wider availability of the telecommunications network, the Department is discontinuing its support for the diskette option. Fewer than 2% of queries are currently submitted via diskette. Therefore, the Department has determined that it is no longer cost-efficient for the Data Bank to accept for processing queries submitted via diskette. The Department recognizes that a few entities may have technical difficulties, the remedies for which may be beyond their control, that preclude successful transmission via the telecommunications network. The Data Bank will attempt to work out appropriate accommodations with these entities. Entities experiencing difficulties submitting queries via the telecommunications network should contact the Data Bank Helpline at 1–800–767–6732 for assistance.

The Department will continue to review the user fee periodically, and will revise it as necessary. Any changes in the fee and their effective date will be announced in the **Federal Register**.

Query method	Fee per name in query, by method of payment	Examples
Electronic query (Telecommunications network) with electronic payment.	$4.00 (if paid electronically via credit card or other electronic means and response received electronically).	10 names in query. 10x$4=$40.00.
Electronic query (Telecommunications network) with non-electronic payment.	$8.00 (if not paid via credit card or other electronic means) ($4.00 fee plus $4.00 surcharge).	10 names in query. 10x$8=$80.00.

Dated: January 23, 1998.

Claude Earl Fox,

Acting Administrator.

National Institutes of Health

National Cancer Institute; Notice of Meeting of the National Cancer Advisory Board and its Subcommittees

Pursuant to the Federal Advisory Committee Act, as amended, notice is hereby given of the meeting of the National Cancer Advisory Board (Board), National Cancer Institute (NCI), and its Subcommittees on February 2–4, 1998. The meetings of the Board and its Subcommittees will be open to the public as indicated below. Attendance by the public will be limited to space available.

A portion of the Board meeting will be closed to the public in accordance with the provisions set forth in sections 552b (c)(4) and 552b(c)(6), Title 5 U.S.C. and section 10(d) of Public Law 92–463, for the review, discussion and evaluation of individual grant applications and for discussion of issues pertaining to programmatic areas and/or NCI personnel. These applications and discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning the individuals associated with the applications or programs, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

The Committee Management Office, National Cancer Institute, National Institutes of Health, Executive Plaza North, Room 609, 6130 Executive Boulevard, MSC 7410, Bethesda, Maryland 20892–7410, (301) 496–5708 will provide summaries of the meetings and rosters of the Board members, upon request.

Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should contact Mrs. Linda Quick-Cameron, Committee Management Officer, at (301) 496–5708 in advance of the meeting.

Name of Committee: Subcommittee on Cancer Centers.

Contact Person: Dr. Brian Kimes, Executive Secretary, National Cancer Institute, NIH, Executive Plaza North, Room 502, 6130 Executive Blvd., Bethesda, MD 20892, (301) 496–8537.

Date of Meeting: February 2, 1998.

Place of Meeting: Hyatt Regency Bethesda, One Bethesda Metro, Bethesda, MD 20814.

Open: 7:00 p.m. to 8:00 p.m.

Agenda: To Discuss Policies and Procedures of Cancer Programs.

Name of Committee: Subcommittee on Planning and Budget.

Contact Person: Ms. Cherie Nichols, Executive Secretary, National Cancer Institute, NIH, 7550 Wisconsin Avenue, Room 312, MSC 9010, Bethesda, MD 20892–9010, (301) 496–5515.

Date of Meeting: February 3, 1998.

Place of Meeting: Natcher Building, Atlanta Room, National Institutes of Health, 9000 Rockville Pike, Bethesda, MD 20892.

Agenda: To Discuss the NCI Budget and Various Planning Issues.

Name of Committee: Subcommittee on Clinical Investigations.

Contact Person: Dr. Philip Shein, Executive Secretary, National Cancer Institute, NIH, Building 31, Room 3A44, MSC 2440, 9000 Rockville Pike, (301) 496–4291.

Date of Meeting: February 3, 1998.

Place of Meeting: Natcher Building, Conference Room F, National Institutes of Health, 9000 Rockville Pike, Bethesda, MD 20892.

Open: Approximately 5:15 p.m. to Adjournment.

Agenda: To Discuss the Design of Prospective Studies of the Impact of Managed Care on Cancer Clinical Investigations, Education and Training.

Name of Committee: National Cancer Advisory Board.

Contact Person: Dr. Marvin R. Kalt, Executive Secretary, National Cancer Institute, NIH, Executive Plaza North, Room 600, 6130 Executive Blvd., MSC 7405, Bethesda, MD 20892–7405, (301) 496–5147.

Dates of Meeting: February 3–4, 1998.

Place of Meeting: Natcher Building, Conference Room E1 & E2, National Institutes of Health, 9000 Rockville Pike, Bethesda, MD 20892.

Open: February 3—9:00 a.m. to 4:00 p.m.; February 4—9:00 a.m. to 11:45 a.m.

Agenda: Report of the Deputy Director, National Cancer Institute; Legislative Update; Report of the President's Cancer Panel; Remarks by the President, American Association for Cancer Research; Updates, Bishop/Calabresi: Closure; NCI Office of Special Populations Research; Status Report: Director, Center for Scientific Review; Mini Symposium; Evidence/Based Medicine & The Cocharan Collaboration; Implementation of Program Review Group Recommendations; Director's Consumer Liaison Group; Subcommittee Reports; Annual Delegations of Authority; Extramural Reports and Other NCAB Business.

Closed: February 3—4:15 p.m. to Approximately 5:15 p.m.

Agenda: Review and Discussion of Grant Applications and Extramural/Intramural, Programmatic and Personnel Policies.

This notice is being published less than 15 days prior to the meeting due to the urgent need to meet timing limitations imposed by the review and funding cycle.

(Catalog of Federal Domestic Assistance Program Numbers (93.393, Cancer Cause and Prevention Research: 93.392, Cancer Detection and Diagnosis Research; 93.394, Cancer Treatment Research; 93.396, Cancer Biology Research; 93.397, Cancer Centers Support; 93.398, Cancer Research Manpower; 93.399, Cancer Control)

BILLING CODE 4140–01–M

DEPARTMENT OF THE INTERIOR

Office of the Assistant Secretary—Water and Science; Central Utah Project Completion Act

AGENCY: Office of the Assistant Secretary—Water and Science, Department of the Interior.

ACTION: Notice of intent to negotiate a contract between the Strawberry Water Users Association (SWUA) and the Department of the Interior for the conversion of a portion of Strawberry Valley Project (SVP) water from irrigation to municipal and industrial (M&I) use.

SUMMARY: The SVP, authorized December 15, 1905, is one of the earliest Reclamation Projects. The SVP stores water from the Colorado River Basin in the Strawberry Reservoir. The stored water is then conveyed through the Syar Tunnel/Sixth Water Aqueduct into the Great Basin where it is delivered through natural stream courses to a Spanish Fork River diversion structure and into the Strawberry Service Canal. The SVP service area is located in south Utah County, Utah. The SWUA has operational responsibilities for the SVP and contractually uses Central Utah Project (CUP) facilities to store and convey SVP water.

Suburban development in the SVP service area has resulted in agricultural land being taken out of production, annexed into the cities, and developed into residential areas. Under the authority of the Water for Miscellaneous Purposes Act of 1920 (43 U.S.C. 521), the Secretary of Interior has authority to approve converting a portion of the SVP water from irrigation to M&I use. This conversion will: (1) Allow the SWUA to provide M&I water to the cities in south Utah County ; (2) ensure the orderly marketing of CUP and SVP M&I water; (3) provide an adequate water supply to the cities; (4) generate revenue to fund the rehabilitation of SVP facilities; and (5) eliminate unauthorized use of SVP water within the service area. Of the total SVP annual average water supply of about 71,000 acre-feet, 7,000 to 8,000 acre-feet of SVP water presently appurtenant to non-agricultural lands will be converted from irrigation to M&I use in the near future with the opportunity to gradually convert additional amounts as growth continues in the area.

The negotiation process will define the terms and conditions whereby the conversion of SVP water from irrigation to M&I use will be allowed.

DATES: Dates for public negotiation sessions will be announced in local newspapers.

FOR FURTHER INFORMATION: Additional information on matters related to this **Federal Register** notice can be obtained at the address and telephone number set forth below:

Mr. Reed Murray, Program Coordinator, CUP Completion Act Office, Department of the Interior, 302 East 1860 South, Provo UT 84606–6154, Telephone: (801) 379–1237, E-Mail address: rmurray@uc.usbr.gov

Dated: January 23, 1998.

Ronald Johnston,

CUP Program Director, Department of the Interior.

Fish and Wildlife Service

Notice of Receipt of Applications for Permit

The following applicants have applied for a permit to conduct certain activities with endangered species. This notice is provided pursuant to Section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

RT–838490

Applicant: Veterinary Genetics Laboratory, Ann Bowling, Davis, CA.

The applicant requests a permit to import hair samples collected from captive born Przewalski's horse (*Equus przewalskii*) collected by Dr. W. Zimmermann, Curator of Mammals, Cologne Zoo, Germany for the purpose of scientific research.

PRT–832442

Applicant: Centers for Disease Control & Prevention Division of Parasitic Diseases, Atlanta, GA.

The applicant requests a permit to import biological samples from endangered Primates, obtained incidental to other research activities for wild and captive-held primates, for the purpose of scientific research.

PRT–838696

Applicant: Patrick F. Taylor, Foxworth, MS.

The applicant requests a permit to import the sport-hunted trophy of one male bontebok (*Damaliscus pygargus dorcas*) culled from a captive herd maintained under the management program of the Republic of South Africa, for the purpose of enhancement of the survival of the species.

PRT–838453

Applicant: William J. Coppola, Santa Fe, NM.

The applicant requests a permit to import the sport-hunted trophy of one male bontebok (*Damaliscus pygargus dorcas*) culled from a captive herd maintained under the management program of the Republic of South Africa, for the purpose of enhancement of the survival of the species.

PRT–838217

Applicant: Columbus Zoo, Powell, OH.

The applicant requests a permit to import samples from Mexico taken from captive-held and captive-born bonobo (*Pan paniscus*) for the purpose of scientific research.

PRT–835371

Applicant: Ken Wilson, Kerrville, TX.

The applicant requests a permit to import the sport-hunted trophy of one male bontebok (*Damaliscus pygargus dorcas*) culled from a captive herd maintained under the management program of the Republic of South Africa, for the purpose of enhancement of the survival of the species.

PRT–821764

Applicant: Erik D. Keyster, Tremont, IL.

The applicant requests a permit to import four Chinese giant salamanders (*Andrias davidianus*) from Klaus Haker, Hilden, Germany, for the purpose of enhancement of the species through captive propagation.

Written data or comments should be submitted to the Director, U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, Room 700, Arlington, Virginia 22203 and must be received by the Director on or before March 2, 1998.

The public is invited to comment on the following applications for permits to conduct certain activities with marine mammals. The application was submitted to satisfy requirements of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*) and the regulations governing marine mammals (50 CFR 18).

PRT–838243

Applicant: Robert C. Senter, Sr., Plaistow, NH.

The applicant requests a permit to import a polar bear (*Ursus maritimus*) sport-hunted prior to April 30, 1994 from the Viscount Melville polar bear

Endangered and Threatened Species Permit Applications

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of permit applications.

SUMMARY: The following applicants have applied for a scientific research permit to conduct certain activities with endangered species pursuant to section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended (16 USC 1531 *et seq.*).

Permit No. 777965

LSA, Riverside, California

The applicant requests an amendment to his permit to take (harass by survey) the Quino checkerspot butterfly (*Euphydryas editha quino*) in conjunction with presence or absence surveys throughout the species range in California for the purpose of enhancing its survival.

Permit No. 780566

Applicant: Ruben Ramirez, Diamond Bar, California

The applicant requests an amendment to his permit to take (harass by survey) the Quino checkerspot butterfly (*Euphydryas editha quino*) and the Laguna Mountain skipper (*Pyrgus ruralis lagunae*) in conjunction with presence or absence surveys throughout the species range in California for the purpose of enhancing its survival.

Permit No. 838742

Applicant: Michelle Dohran, Glendale, California

The applicant requests a permit to take (harass by survey) the Quino checkerspot butterfly (*Euphydryas editha quino*) in conjunction with presence or absence surveys throughout the species range in California for the purpose of enhancing its survival.

DATES: Written comments on these permit applications must be received on or before March 2, 1998.

ADDRESSES: Written data or comments should be submitted to the Chief, Division of Consultation and Conservation Planning, Ecological Services, Fish and Wildlife Service, 911 N.E. 11th Avenue, Portland, Oregon 97232–4181; FAX: (503) 231–6243. Please refer to the respective permit number for each application when submitting comments. All comments, including names and addresses, received will become part of the official administrative record and may be made available to the public.

FOR FURTHER INFORMATION CONTACT: Documents and other information submitted with these applications are available for review, subject to the requirements of the Privacy Act and Freedom of Information Act, by any party who submits a written request for a copy of such documents within 20 days of the date of publication of this notice to the address above; telephone: (503) 231–2063. Please refer to the respective permit number for each application when requesting copies of documents.

Dated: January 23, 1998.

Issuance of Permit for Marine Mammals

On November 14,1997, a notice was published in the **Federal Register**, Vol. 62, No. 220, Page 61139, that an application had been filed with the Fish and Wildlife Service by Charles L. Chappell for a permit (PRT–836256) to import a sport-hunted polar bear (*Ursus maritimus*) trophy, taken from the Lancaster Sound population, Northwest Territories, Canada, prior to April 30, 1994 for personal use.

Notice is hereby given that on January 9,1998, as authorized by the provisions of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*) the Fish and Wildlife Service authorized the requested permit subject to certain conditions set forth therein.

On November 14, 1997, a notice was published in the **Federal Register**, Vol. 62, No. 220, Page 61139, that an application had been filed with the Fish and Wildlife Service by Robert E. Chappell for a permit (PRT–836255) to import a sport-hunted polar bear (*Ursus maritimus*) trophy, taken from the Lancaster Sound population, Northwest Territories, Canada, prior to April 30, 1994 for personal use.

Notice is hereby given that on January 9,1998, as authorized by the provisions of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*) the Fish and Wildlife Service authorized the requested permit subject to certain conditions set forth therein.

On November 14, 1997, a notice was published in the **Federal Register**, Vol. 62, No. 220, Page 61139, that an application had been filed with the Fish and Wildlife Service by Richard N. Biewer, St. Clair, MI for a permit (PRT–836264) to import a sport-hunted polar bear (*Ursus maritimus*) trophy, taken from the Lancaster Sound population, Northwest Territories, Canada, prior to April 30, 1994, for personal use.

Notice is hereby given that on January 9, 1998, as authorized by the provisions of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*) the Fish and Wildlife Service authorized the requested permit subject to certain conditions set forth therein.

On November 20, 1997, a notice was published in the **Federal Register**, Vol. 62, No. 224, Page 62068, that an application had been filed with the Fish and Wildlife Service by Taylor Mills for a permit (PRT 836587) to import a sport-hunted polar bear (*Ursus maritimus*) trophy, taken from the Gulf of Bothia population, Northwest Territories, Canada, prior to April 30, 1994 for personal use.

Notice is hereby given that on January 6, 1998, as authorized by the provisions of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*) the Fish and Wildlife Service authorized the requested permit subject to certain conditions set forth therein.

Documents and other information submitted for these applications are available for review by any party who submits a written request to the U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, Rm 700, Arlington, Virginia 22203. Phone (703) 358–2104 or Fax (703) 358–2281.

Dated: January 23, 1998.

MaryEllen Amtower,

Acting Chief, Branch of Permits, Office of Management Authority.

Geological Survey

Request for Public Comments on Extension of Existing Information Collection Submitted to OMB for Review Under the Paperwork Reduction Act

A request extending the information collection described below has been submitted to the Office of Management and Budget (OMB) for approval under the provisions of the Paperwork Act of 1995 (44 U.S.C. 3506(c)(2)). Copies of the proposed collection may be obtained by contacting the Bureau's clearance officer at the phone number listed below. OMB has up to 60 days to approve or disapprove the information collection but may respond after 30 days; therefore, public comments should be submitted to OMB within 30 days in order to assure their maximum consideration. Public comments on the proposal should be made directly to the Desk office for the Interior Department, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 and to the Bureau Clearance Officer, U.S. Geological Survey, 807 National Center, Reston, VA 20192.

As required by OMB regulations at 5 CFR 1320.8(d)(1), the U.S. Geological Survey solicits specific public comments as to:

1. Whether the collection of information is necessary for the proper performance of the functions on the bureaus, including whether the information will have practical utility;

2. The accuracy of the bureau's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

3. The quality, utility, and clarity of the information to be collected; and

4. How to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other forms of information technology.

Title: North American Reporting Center for Amphibian Malformations.

OMB Approval No: 1028–0056.

Summary: The collection of information referred herein applies to a World-Wide Web site that permits individuals who observed malformed amphibians or who inspect substantial numbers of normal or malformed amphibians to report those observations and related information. The Web-site is termed the North American Reporting Center for Amphibian Malformations. Information will be used by scientists and federal, state, and local agencies to identify areas where malformed amphibians occur and the rates of occurrence.

Estimated Completion Time: 20 minutes.

Estimated Annual Number of Respondents: 900.

Frequency: Once.

Estimated Annual Burden Hours: 300 hours.

Affected Public: Primarily U.S. and Canadian residents.

FOR FURTHER INFORMATION CONTACT: To obtain copies of the survey, contact the Bureau clearance officer, U.S. Geological Survey, 807 National Center, 12201 Sunrise Valley Drive, Reston, Virginia, 20192, telephone (703) 648–7313, or go to the Website (http://www.npsc.nbs.gov./narcam).

Dated: January 12, 1998.

Dennis B. Fenn,

Chief Biologist.

Geological Survey

Advisory Committee on Water Information; Meeting

BUREAU: Geological Survey (USGS), Interior.

ACTION: Notice of a meeting of the Advisory Committee on Water Information (ACWI).

SUMMARY: This is to inform the public about the February 1998 meeting of the ACWI. The meeting is open to the public.

DATE: The meeting will begin on February 17, 1998, at 9 a.m. EST, and will adjourn on February 18 at 12:45 p.m.

LOCATION: Sheraton Reston Hotel, 11810 Sunrise Valley Drive, Reston, VA.

FOR FURTHER INFORMATION CONTACT: Nancy Lopez, Executive Secretary of the ACWI, at telephone number: (703) 648–5014 or facsimile number: (703) 648–5644. Her address is 417 National Center, U.S. Geological Survey, Reston, VA 20192. Anyone needing special arrangements of services to participate effectively in the meeting is requested to inform Beth Cox at telephone number (703) 648–6832. For special arrangements please let Ms. Cox know by noon EST, Friday 13, so that your needs can be accommodated.

SUPPLEMENTARY INFORMATION: The ACWI is the major national mechanism for implementing Office of Management and Budget Memorandum No. 92–01, Coordination of Water Resources Information. With over 30 member organizations, the ACWI represents a wide range of water-resources interests and functions. The members include all levels of government and the private sector. The ACWI advises the Federal Government on activities and plans related to Federal water-information programs and the effectiveness of those programs in meeting the Nation's water information needs. Also, member organizations of the ACWI collaborate with others to sponsor workshops, symposia, and other forums to foster better communication among Federal and non-Federal sectors about water-information activities and needs.

At this meeting, the ACWI will discuss a variety of topics including water-resources aspects of the President's Fiscal Year 1999 Budget Request, the Clean Water Action Plan, water-resources decision support systems, geospatial data priorities for water-resources management, streamgaging concerns, the need for a subordinate group to address water quantity information issues, and water-quality monitoring and assessment. For more detailed information about the program, please contact Ms. Lopez as shown above.

The meeting will include an opportunity for public comments. To make public comments, please provide a written request by noon EST, February 12, 1998, to Ms. Lopez. The request should include the name of the person that will be speaking and the general topic. Verbal comments to the ACWI should not exceed 5 minutes. At the meeting please provide 40 written copies of the comments to the registration desk for distribution and archiving as required by law. Anyone wishing to provide written information to the ACWI may do so at anytime by providing 40 copies to Ms. Lopez.

Dated: January 23, 1998.

Lewis Wade,

Acting Assistant Chief Hydrologist, Office of Information.

BILLING CODE 4310–31–M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

National Tribal Consultation; Meeting

AGENCY: Office of the Secretary, Interior.

ACTION: Notice of Tribal Consultation Meeting—Tribal Trust Account Holders and Allottees.

SUMMARY: Notice is hereby given that the Office of the Secretary will conduct four (4) consultation meetings with any Indian tribe, band, nation, allottee group, individual allottee, other organized group or community, including any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (85 Stat. 688), which is recognized as eligible for the trust programs and services provided by the United States to Indians because of their status as Indians.

The purpose of these consultation meetings is to obtain oral comments regarding the Recommendations of the Secretary of the Interior for Settlement of Disputed Tribal Trust Fund Accounts, which were delivered to the U.S. Congress on November 13, 1997. The Recommendations of the Department were based on comments received in a prior consultation process in January 1997, on legislative options for settling tribal trust fund claims. The Recommendations developed by the Department of the Interior consist of a report and legislative proposals aimed at settling more than two decades of disputed balances in Tribal Trust Fund accounts.

The Administration is pursuing a three-pronged strategy to address issues related to the Department of the Interior's administration and management of Indian trust funds. First, it is proposing this legislative approach that utilizes informal dispute resolution mechanisms to address claims that tribes may have with regard to the Department's past management of tribal trust fund accounts. Second, in conjunction with the special Trustee for American Indians, the Department has developed recommendations for improving the underlying trust management and accounting systems. Third, the Department has proposed legislation to end the increasing fractionation of ownership of Indian allotted lands.

The consultation meetings will be held to receive tribal comments on the first part of this strategy—the Secretary's Recommendations for settlement of disputed tribal trust funds accounts. Tribes may attend any of the consultation sessions.

DATES (1998): Four consultation sessions will be conducted:

February 9, 1998, Portland, OR, Airport Sheraton Hotel, 8235 NE Airport Way, Portland OR, 503–281–2500.

February 10, 1998, Albuquerque, NM, Sheraton Uptown Albuquerque, 2600 Louisiana Blvd., NE., Albuquerque, NM, 505–881–0000.

February 11, 1998, Oklahoma City, OK, Radisson Inn Hotel, West Interstate 40 & Meridian Ave., Oklahoma City, OK, 405–947–7681.

February 12, 1998, Minneapolis, MN, Minneapolis/St Paul Hilton, 3800 East 80th Street, Minneapolis, MN, 612–854–2100 or 800–637–7453.

All sessions will begin at 9 AM and continue until completed, except the Albuquerque, NM meeting which will begin at 8 AM. Public attendance may be limited to the space available.

FOR FURTHER INFORMATION CONTACT: Deputy Commissioner, Bureau of Indian Affairs, Department of the Interior, 1849 C Street, NW., Washington, DC 20240, 202–208–5116, FAX 202–208–6334.

SUPPLEMENTARY INFORMATION: The purpose of these consultation meetings is to provide Indian Tribal trust account holders and Allottees an opportunity to provide comments regarding the "Recommendations of the Secretary of the Interior for Settlement of Disputed Tribal Trust Fund Accounts." The objectives of the Recommendations are:

- Acknowledge and respect tribal sovereignty.
- Achieve a settlement that is fair to both the Indian community and the general public.
- Achieve the most resource-efficient settlement of claims (in terms of conserving federal government and tribal time, money, and staff).
- Encourage settlement by providing incentives to settle and disincentives to litigate.
- Use the most informal settlement processes available rather than litigation to encourage tribal participation.
- Obtain funding for the settlement without reducing appropriations for the BIA and Special Trustee budgets and tribal programs.
- Achieve agreement on account balances through September 30, 1992, or the date of settlement, as an agreed-upon starting point for the future.

The Department's Recommendations build on the legislative options for settlement that the Department submitted to Congress on December 11, 1996, and that we sent to you at the same time. After submitting the options to Congress, the Department consulted with and provided an opportunity for written comments from tribal representatives throughout the country about the approaches we were considering. A copy of the Report on the Recommendations of the Department was distributed to all Tribal Leaders on November 13, 1997.

All oral comments presented by tribes and individuals at these consultation meetings will be recorded and transcribed.

Summaries of the meetings will be available for public inspection and copying ten days following the meeting.

Dated: January 23, 1998.

Kevin Gover,

Assistant Secretary—Indian Affairs.

BILLING CODE 4310–02–U

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Order of Temporary Closure to Non-Authorized Use of Certain Public Lands in Ward Valley, San Bernardino County, CA

AGENCY: Bureau of Land Management, Needles Field Office.

ACTION: Order of temporary closure to non-authorized uses of public lands.

SUMMARY: This order closes approximately 2,000 acres within Ward Valley, California to all uses, including but not limited to camping, motorized vehicle use, recreation, and casual use, unless those uses are otherwise specifically authorized by the Bureau of Land Management. This closure does not affect uses authorized by any right-of-way, permit, or other valid authorization approved by the BLM authorized officer for the public lands described in this order, except that the existing protest encampment maintained by the Fort Mojave Tribe under BLM permit CA–37890 shall be relocated to site E, as described in permit CA–37890, consistent with the terms provided in permit CA–37890. No activities authorized by the encampment permit shall be undertaken outside the cleared area of site E on any lands closed pursuant to this notice. The closure covers the following public lands:

T. 9. N., R. 19 E., SBM
Sec 22, S½;
Sec 23, W½ of SW¼;
Sec 26, W½ of W½;
Sec 27, all;
Sec 34, all;
Sec 35, W½W½.

EFFECTIVE DATE: The closure will become effective February 13, 1998 and will remain effective for a period of six months from the effective date, unless terminated earlier through an order reopening the lands upon completion of the drilling activities referenced below.

SUPPLEMENTARY INFORMATION: The purpose of this temporary closure is to ensure that drilling and related activities to be undertaken by the Department of the Interior and the California Department of Health Services pursuant to a decision record issued January 16, 1998, at the Ward Valley site are carried out under conditions which will ensure public safety, promote site security, and provide for integrity of the sampling activities. Authority for this closure may be found in Title 43 Code of Federal Regulations 8364.1. The closure effected by this order is the minimum necessary for effective law enforcement because it is the minimum which will allow for control of access from Interstate 40.

This closure was analyzed in environmental assessment CA–069–EA7–42. The closure is within the scope of the Finding of No Significant Impacts prepared on EA CA–069–EA7–42. The impacts identified were temporary and minor.

This order constitutes the final decision of the Department.

FOR FURTHER INFORMATION CONTACT: Molly Brady, Field Manager, U.S. D.I., Bureau of Land Management, Needles Field Office, 101 West Spikes Road, Needles, California 92363, tel: (760) 326–7000.

Approved: January 26, 1998.

Bob Armstrong,

Assistant Secretary, Lands and Minerals Management.

BILLING CODE 4310–40–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[WY–985–0777–66]

Intent to Prepare an Environmental Impact Statement for Coalbed Methane Development Projects South of Gillette, Wyoming

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Intent to Prepare an Environmental Impact Statement for Coalbed Methane Development Projects South of Gillette, Wyoming, in Campbell County.

SUMMARY: The Bureau of Land Management (BLM) under the National Environmental Policy Act (NEPA) must analyze the impacts of actions we permit on Federal lands and minerals. As part of this analysis, the cumulative affects of the proposed action and other activities occurring in the area must be considered. Three Environmental Assessments (EA) (Pistol Point, Marquiss, and Lighthouse) and one Environmental Impact Statement (EIS) (Gillette South) to address proposed coalbed methane (CBM) development have been completed for the area south of Gillette. When we completed the EIS in October of 1997, the apparent success of the coalbed methane play was drawing additional operators into the basin.

Feedback we received from industry indicated we could see an additional 2,600 to 3,000 CBM wells south of Gillette by the year 2007 if development success continues as it has been. With this information, BLM decided another EIS would be necessary to address this additional interest.

DATES: Comments to be considered in the draft EIS should be submitted by March 2, 1998. The draft EIS should be available for public review by October of 1998.

ADDRESSES: Questions or concerns should be addressed to Richard Zander in the BLM Buffalo Resource Area Office, 1425 Fort Street, Buffalo, WY 82834.

FOR FURTHER INFORMATION CONTACT: Richard Zander, phone 307–684–1100.

VOL 63 ISS 19 JA 29 1998 UMI

SUPPLEMENTARY INFORMATION: When we began preparation of the Gillette South CBM EIS in June of 1996, we had developed a proposed action to analyze a total of 640 CBM wells. This proposed action was based on the best available information we had from industry at that time. It took into account potential development based on depth to coal and what industry knew at that time about the potential to produce methane from the coal. The proposed action also included the prior Marquiss and Lighthouse CBM projects to address developmental changes which had occurred since these two projects had been analyzed by EAs. When we completed the EIS in October of 1997, the apparent success of the coalbed methane play was drawing additional operators into the basin. The following are some of the major issues raised during the preparation of the Gillette South CBM EIS. These issues are provided to help you understand what has occurred in past environmental documents and perhaps stimulate addition thoughts, questions, and issues.

- People were concerned with the loss of hydraulic head related to groundwater associated with the coal seam. Concerns related to lowering of water levels and increased pumping costs because water would have to be pumped from greater depths.
- Concerns were voiced on how the differentiation would be made between coal mine-caused and coalbed methane-caused impacts to the lowering of the water in the coal seam. How would the responsible entity be identified?
- Questions were posed on what effects the coalbed methane development would have on air quality. Of concern were possible hazardous emissions and pollutants released as a result of compressor emissions.
- Disposing water on the surface raised concerns about water quality due to possible increased erosion and possible weed infestations because of water flow fluctuations.
- Questions were raised about the use of produced water for dust control, stock watering, and the creation of wetlands. What were the ramifications of using this water in this manner?
- Concern was voiced that the mines had been venting methane for years and now we had companies working to recover the methane and pay royalty on production. Were we going to make the mines pay back royalty and future royalty for the methane they vent?
- There were concerns that we had not done further groundwater modeling to predict possible drawdowns and impacts.
- Concern was voiced about the use of the 1988 CHIA (Cumulative Potential Hydrologic Impacts of Surface Coal Mining in the Eastern Powder River Structural Basin, Northeastern Wyoming) and how this affected cumulative impacts.
- Concerns were voiced that previous documents had underestimated the magnitude of impacts when in actuality we had underestimated rate of impact occurrence.
- Concerns were raised that we had not addressed impacts to threatened and endangered species, raptors, and fisheries.
- Concern was expressed about the effects of surface disposal of water and operating a ranch with ongoing methane development operations.

BLM held a meeting with companies on November 19, 1997, to discuss the implications of the recently signed Record of Decision for the Gillette South EIS. This meeting covered the mitigation steps that would be required of those operators developing Federal minerals. Specifically covered were monitoring requirements, use of the Water Well Agreement, and the formation of a groundwater monitoring group similar to the coal industry's Gillette Area Groundwater Monitoring Organization (GAGMO) Group. Another topic of discussion was the question of where the CBM operators thought development was headed. No specifics were voiced at this meeting, but the general consensus was that development over and above that analyzed in the Gillette South EIS was a certainty. BLM asked the operators to provide us feedback on their development plans so we could plan for future environmental analysis needs.

Feedback we received from industry indicated we could see an additional 2,600 to 3,000 CBM wells south of Gillette by the year 2007 if development success continues as it has been. With this information, BLM decided another EIS would be necessary to address this additional interest.

A public scoping meeting will be held on February 5, 1998, at 7 p.m., at the Holiday Inn in Gillette, Wyoming, to discuss this increased industry interest and solicit comments, questions, issues, or concerns you may have. We will use the feedback in the preparation of the EIS.

Dated: January 22, 1998.

Alan R. Pierson,

State Director.

[FR Doc. 98–2156 Filed 1–28–98; 8:45 am]

BILLING CODE 4310–22–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Notice of Intent To Prepare a Joint Environmental Impact Report/ Environmental Impact Statement on a Proposed 30-year Expansion and Waste Management Plan for the Molycorp Mountain Pass Mine, Mountain Pass, California

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent to prepare a Joint Environmental Impact Report (EIR)/Environmental Impact Statement (EIS) on a proposed 30-year expansion and waste management plan for the Molycorp Mountain Pass Mine, Mountain Pass, California and notice of scoping meeting.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Bureau of Land Management (BLM), Needles Field Office, and the County of San Bernardino, in accordance with the California Environmental Quality Act, will be directing the preparation of a joint EIR/EIS to be prepared by a third-party contractor on the impacts of a proposed 30-year mine expansion and waste management plan for the Molycorp Mountain Pass Mine, located in Mountain Pass, San Bernardino County, California.

DATES: Written comments will be accepted until February 28, 1998. A public scoping meeting will be held beginning at 7 p.m. on February 3, 1998, at the Baker Community Center, 73730 Baker Boulevard, Unit C, Baker, California.

ADDRESSES: Comments should be sent to the Needles Field Office, Bureau of Land Management, 101 West Spike's Road, Needles, California 92363, ATTN: Molycorp Mountain Pass Mine Project.

FOR FURTHER INFORMATION, CONTACT: George R. Meckfessel, Planning and Environmental Coordinator, at (760) 326–7000.

SUPPLEMENTARY INFORMATION: In the early 1990s, Molycorp Inc. (Molycorp) developed a plan to expand its mining operations for an additional 30 years. Because the expansion area would exceed 25 percent of the vested area, Molycorp was required to obtain a Mining Conditional Use Permit from the County of San Bernardino. At the time that Molycorp proposed to expand its mining operations, portions of the main mine site were located on public land managed by BLM. Therefore, the original environmental review for the project was planned to be an EIR/EIS.

However, in 1992, Molycorp and BLM entered into a land transfer, which exchanged 879 acres of public land for 1,920 acres of private land. Due to the land transfer the environmental review was conducted as an EIR, with the County as the Lead Agency.

A Draft EIR was circulated for public review in December 1996. The comment period closed on February 12, 1997. Numerous comments were received from public agencies and private individuals, including the following:

- BLM
- U.S. Geological Survey
- National Park Service
- U.S. Fish and Wildlife Service
- California Regional Water Quality Control Board
- California Department of Transportation
- Mojave Desert Air Quality Management District
- County of San Bernardino Fire Department Hazardous Materials Division
- San Bernardino County Museum
- County of San Bernardino Division of Environmental Health Services
- The Desert Tortoise Council
- The Wilderness Society
- The Sierra Club, San Gorgonio Chapter
- Desert Survivors
- National Outdoor Coalition
- People Against Radioactive Dumps
- Best, Best & Krieger representing Primadonna Corporation
- Marjorie Mikels
- Dr. Howard Wilshire

The predominant issues identified by commentors involved waste discharges, off-site groundwater contamination, potential air contamination, and full disclosure of mine components and processes. Upon review of the numerous comments received, the County determined that additional technical analysis would be required to adequately address the issues raised by those commenting on the Draft EIR. The County concluded that the Draft EIR would need to be recirculated to provide for proper public review of the additional analysis.

During the summers of 1995 and 1996, releases were experienced in the 13-mile-long pipeline that carries waste discharges from the main mine processing area to the existing New Ivanpah Evaporation Pond. The New Ivanpah Evaporation Pond is located approximately 9 miles to the northeast of the main mine processing area. This pipeline crosses lands managed by the BLM and the NPS. The releases and subsequent issues related to integrity of the Ivanpah evaporation ponds heightened concerns about waste management and disposal. Molycorp indicated a desire to replace the discharge pipeline. The BLM felt that the environmental review process for considering a replacement pipeline would best be accomplished in concert with the County's consideration of the proposed expansion. Discussions with the County subsequently led to the decision to conduct a joint environmental review and to recirculate the 1996 Draft EIR as a Draft EIR/EIS that would add to the existing project the analysis of potential environmental impacts associated with replacing the waste discharge pipeline, and would also address issues of impacts to public lands from existing and potential contaminant migration from the main mine site and the existing New Ivanpah Evaporation Pond.

Comments received on the Draft EIR/EIS will be addressed in the Final EIR/EIS. Commentors on the December 1996 Draft EIR will be included in the distribution of the Draft EIR/EIS and are invited to provide comments on the Draft EIR/EIS.

Molycorp is proposing to continue its current lanthanide (rare-earth elements) mining operation at its Mountain Pass Mine facility for the next 30 years. This continued effort would result in an expansion of the open pit, overburden storage areas, and mill tailings storage areas. Plant production rates would not increase as a result of the project. Expansion of the mine would consist of enlarging the surface area and depth of the open pit, expanding existing overburden stockpiles, expanding the existing North Tailings Pond or constructing a new tailings pond, and replacing the existing waste discharge pipeline to the existing New Ivanpah Evaporation Pond, either through pipeline replacement, or the construction of an on-site effluent treatment facility, or a combination of both.

As described in the December 1996 Draft EIR, the mine expansion would occur over 30 years in three phases of 10 years each, with a final monitoring phase of 5 years. Phase I would include the following activities:

- Revisions to the existing means of waste disposal to the existing New Ivanpah Evaporation Pond, either through replacement of the existing pipeline, on-site effluent treatment, or a combination of both and potential modifications to or closure of the evaporation pond
- Continued mining and expansion of the pit westward by approximately 10 acres
- Realignment of power distribution lines
- Expansion of the west Overburden Stockpile by approximately 80 acres and realignment of the AT&T access road
- Expansion of the North Tailings Pond after retrofitting with a liner or design and construction of a new tailings pond and closure of the North Tailings Pond
- Relocation and expansion of the mine equipment yard
- Stockpiling of surface material from pit and overburden expansion for future reclamation of the tailings pond and overburden stockpiles.

Phase 2 would include the following:

- Expansion of the open pit by 35 acres
- Expansion of Overburden Stockpile by 125 acres
- Increase tailings pond by 60 acres
- Relocation of Shadow Valley water supply line and explosives magazine
- Initiation of reclamation and revegetation of tailings pond and Overburden Stockpile

Phase 3 would include the following:

- Expansion of the open pit by 35 acres
- Expansion of the Overburden Stockpile by 125 acres
- Increase tailings pond by 50 acres
- Continued reclamation and revegetation of tailings pond and Overburden Stockpile

Phase 4 would include the following:

- Termination of mining and contouring of pit slopes
- Closure of tailings pond
- Closure of hazardous waste holding area
- Final reclamation and revegetation of Overburden Stockpile and previously vegetated disturbed surfaces.

The Draft EIR/EIS will present final proposed acreages of mine facilities subject to final mine design.

The components of the project remain the same as those described in the December 1996 Draft EIR, with the exception of Molycorp facilities occurring on federally administered lands. Such facilities include the replacement of the waste discharge pipeline to the existing New Ivanpah Evaporation Pond and the replacement of the existing fresh water pipeline. Alternatives to the expansion project, as identified in the December 1996 EIR, include a No Project Alternative, a Reduced Project Alternative, and an Underground Mining Alternative. Other alternatives addressing the waste management plans will be included. These alternatives will include three waste discharge pipeline alternative alignments, two on-site treatment alternatives, including (1) full treatment at the main mine site with no discharge to the existing New Ivanpah

VOL 63 ISS 19 JA 29 1998 UMI

Evaporation Pond and closure of the evaporation pond and (2) partial treatment at the main mine site with continued discharge to the existing New Ivanpah Evaporation Pond, and a No Project alternative, whereby no action would be taken to replace the pipeline or provide on-site treatment.

During preparation of the December 1996 Draft EIR, significant impacts to the environment from the project and the project alternatives were identified in the following issue areas: Geologic Hazards, Flood Hazards, Biological Resources, Cultural Resources, Air Quality, Scenic Resources, Soil Resources, and Hazardous/Radioactive Materials. Cumulative impacts were also identified in these issue areas. The Draft EIR/EIS will review the impact assessment provided in the December 1996 Draft EIR in light of comments received from agencies and the public during the December 1996 Draft EIR circulation period and will revise the impact assessment in accordance with the components and activities of the redesigned project.

The Draft EIR/EIS will also evaluate potential impacts of the pipeline replacement project and alternatives as well as the potential impacts from continuing contaminant migration from the main mine site from continuing operations. Technical studies are planned or underway in the following areas:

- Survey of the existing waste discharge pipeline for contamination from potential past releases
- Evaluation of the biological resources along the corridors of the pipeline alternatives
- Evaluation of cultural and paleontological resources in the area of the pipeline replacement alternatives
- Hydrology studies of the main mine site and nearby washes
- Hydrology studies of the existing New Ivanpah Evaporation Pond
- Waste discharge treatment alternatives
- Pipeline alignment alternatives
- Human health and ecological risk assessments
- Pit lake water quality modeling

The Draft EIR/EIS will use the data provided in the technical reports to analyze the potential impacts to the environment from the proposed project and alternatives.

A public scoping meeting will be held at the Baker Community Center, 73730 Baker Boulevard, Unit C, Baker, California, on February 3, 1998 at 7 p.m. Upon close of the comment period for the joint Notice of Preparation (NOP)/ Notice of Intent (NOI), the County and BLM will direct the preparation of the Draft EIR/EIS. It is anticipated that the Draft document will be available for circulation within 6 to 8 months. The Draft EIR/EIS will be circulated for 60 days, during which time comments will be solicited from interested parties and organizations and a public hearing will be held. The Final EIR/EIS is expected to be completed within 3 to 4 months following close of the comment period.

The BLM scoping process for this EIR/EIS will include the following: (1) Identification of issues to be addressed, (2) identification of viable alternatives, and (3) notification of interest groups, individuals, and agencies so that additional information concerning these issues can be obtained.

The scoping process will consist of a news release announcing the start of the EIR/EIS process and letters of invitation to participate in the scoping process.

Molly S. Brady,

Manager, Needles Field Office.

BILLING CODE 4310–40–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NM–070–7110–8389; NMNM97589]

Notice of Realty Action—Recreation and Public Purpose (R&PP) Act Classification, New Mexico

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of R&PP lease/patent of public land in San Juan County, New Mexico.

SUMMARY: The following described public land is determined suitable for classification for leasing and patenting to the Lee/Hammond Water Treatment Plant (Lee/Hammond), Bloomfield, New Mexico under the provisions of the R&PP Act, as amended (43 U.S.C. 869 *et seq.*). Lee/Hammond proposes to use the land for water treatment facilities.

New Mexico Principal Meridian

T. 29 N., R. 11 W.,
Sec. 28, SE¼SW¼
Containing 40 acres, more or less.

DATES: On or before March 16, 1998, interested parties may submit comments regarding the proposed leasing and conveyance, or classification of the lands to the Bureau of Land Management at the following address. Any adverse comments will be reviewed by the Bureau of Land Management, Farmington District Manager, 1235 LaPlata Highway, Suite A, Farmington, NM 87401, who may sustain, vacate, or modify this realty action. In the absence of any adverse comments, this realty action becomes the final determination of the Department of the Interior and effective 60 days from publication date.

FOR FURTHER INFORMATION CONTACT: Information related to this action, including the environmental assessment, is available for review at the Bureau of Land Management, Farmington District Office, 1235 LaPlata Highway, Suite A, Farmington, NM 87401.

SUPPLEMENTARY INFORMATION: Publication of this notice segregates the public land described above from all other forms of appropriation under the public land laws, including the general mining laws, except for leasing and conveyance under the R&PP Act and leasing under the mineral leasing laws for a period of two (2) years from date of this publication in the **Federal Register**. The segregative affect will terminate upon issuance of the lease and patent to Lee/Hammond, or two (2) years from the date of this publication, whichever occurs first.

The lease, when issued, will be subject to the following terms:

1. Provisions of the R&PP Act and to all applicable regulations of the Secretary of the Interior.
2. Provisions of the Resource Conservation and Recovery Act of 1976 (RCRA) as amended, 42 U.S.C. 6901–6987 and the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA) as amended, 42 U.S.C. 9601 and all applicable regulations.
3. Provisions of Title VI of the Civil Rights Act of 1964.
4. Provisions that the lease be operated in compliance with the approved Development Plan.

The patent, when issued, will be subject to the following terms:

1. Reservation to the United States of a right-of-way for ditches and canals in accordance with 43 U.S.C. 945.
2. Reservation to the United States of all minerals.
3. All valid existing rights, e.g., rights-of-way and leases of record.
4. Provisions that if the patentee or its successor attempts to transfer title to or control over the land to another or the land is devoted to a use other than that for which the land was conveyed, without the consent of the Secretary of the Interior or his delegate, or prohibits or restricts, directly or indirectly, or permits it agents, employees, contractors, or subcontractors, including without limitation, lessees, sublessees and permittees), to prohibit or restrict, directly or indirectly, the use of any part of the patented lands or any of the facilities whereon by any person because of such person's race, creed, color, or national origin, title shall revert to the United States.

The lands are not needed for Federal purposes. Leasing and later patenting is consistent with current Bureau of Land Management policies and land use planning. The estimated intended time of lease issuance is April 15, 1998, with the patent being issued upon substantial development taking place. The proposal serves the public interest since it would provide modern water treatment facilities that would meet the water needs of the public.

Dated: January 22, 1998.

Joel Farrell,

Assistant District Manager for Resources.

Minerals Management Service

Marine Transportation of Federal Outer Continental Shelf (OCS) Crude Oil Produced Offshore California

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Extending comment period for proposed Notice to Lessees and Operators (NTL).

SUMMARY: This document extends to April 6, 1998, the deadline for the submission of comments on the proposed NTL on Marine Transportation of Federal OCS Crude Oil Produced Offshore California published December 5, 1997 (62 FR 64399).

DATES: We will consider all comments received by April 6, 1998.

ADDRESSES: Mail or hand-carry written comments to MMS Pacific Region; 770 Paseo Camarillo; Camarillo, CA 93010; Attention: E. Aronson. E-mail comments to transportation.ntl@mms.gov.

FOR FURTHER INFORMATION CONTACT: Ellen Aronson, Office of the Regional Director, at (805) 389–7502.

SUPPLEMENTARY INFORMATION: The MMS received several requests for extending the comment period. To provide the necessary time for commenters to prepare detailed and comprehensive comments, MMS is extending the comment period 62 days from the original February 3, 1998, deadline.

Dated: January 23, 1998.

J. Lisle Reed,

Regional Director, Pacific OCS Region, Minerals Management Service.

BILLING CODE 4310–MR–M

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

DEPARTMENT OF DEFENSE

Department of the Army; Corps of Engineers

Final Environmental Impact Report/ Final Environmental Impact Statement (FEIR/FEIS) for the Hamilton City Pumping Plant Fish Screen Improvement Project, Central Valley, California

AGENCIES: Bureau of Reclamation, Interior, and the U.S. Army Corps of Engineers, Defense.

ACTION: Notice of availability of final environmental impact report/final environmental impact statement (FEIR/FEIS) FES 98 02.

SUMMARY: Pursuant to Section 102(2)(c) of the National Environmental Policy Act (NEPA) of 1969 (as amended), the Bureau of Reclamation (Reclamation), the U.S. Army Corps of Engineers (Corps), the Glenn-Colusa Irrigation District (GCID), and the California Department of Fish and Game (DFG) have prepared a FEIR/FEIS for the Hamilton City Pumping Plant Fish Improvement Screen Project (Project). The Project responds to concerns about impacts to salmon and other fish species from water diversion operations at the Hamilton City Pumping Plant.

The FEIR/FEIS analyzes the no-action alternative as well as three action alternatives. The action alternatives would minimize loss of all fish species in the vicinity of the pumping plant diversion while maximizing GCID's capability to divert the full quantity of water to which it is entitled to divert to meet its water supply delivery obligations. The agency-preferred alternative would include an extension of the existing fish screen, internal fish bypasses, improvements to the intake and bypass channel, and a gradient facility.

DATES: No decision will be made on the proposed action until 30 days after release of the FEIR/FEIS. After the 30-day waiting period, Reclamation and the Corps will complete a Record of Decision which states the action that will be implemented and discusses all factors leading to the decision.

ADDRESSES: Requests for copies of the FEIR/FEIS should be submitted to the Fish Screen Improvement Project, Attention: Rick Lind, 455 Capitol Mall, Suite 600, Sacramento, California 95814. His telephone number is (916) 325–4050.

FOR FURTHER INFORMATION CONTACT: Mr. Kurt Flynn, Reclamation, (916) 275–1554; Mr. Matt Davis, Corps, (916) 557–6708; Ms. Sandra Dunn, GCID, (916) 446–7979; or Nick Villa, DFG, (916) 358–2943.

VOL 63 ISS 19 JA 29 1998 UMI

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

Notice of Proposed Information Collection

AGENCY: Office of Surface Mining Reclamation and Enforcement.

ACTION: Notice and request for comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, the Office of Surface Mining Reclamation and Enforcement (OSM) is announcing its intention to request approval for the collection of information for the permanent program performance standards—underground mining activities at 30 CFR Part 817.

DATES: Comments on the proposed information collection must be received by March 30, 1998, to be assured of consideration.

ADDRESSES: Comments may be mailed to John A. Trelease, Office of Surface Mining Reclamation and Enforcement, 1951 Constitution Ave., NW, Room 210–SIB, Washington, DC 20240. Comments may also be submitted electronically to jtreleas@osmre.gov.

FOR FURTHER INFORMATION CONTACT: To request a copy of the information collection request, explanatory information and related form, contact John A. Trelease, at (202) 208–2783.

SUPPLEMENTARY INFORMATION: The Office of Management and Budget (OMB) regulations at 5 CFR 1320, which implementing provisions of the Paperwork Reduction Act of 1995 (Pub. L. 104–13), require that interested members of the public and affected agencies have an opportunity to comment on information collection and recordkeeping activities (see 5 CFR 1320.8 (d)). This notice identifies information collections that OSM will be submitting to OMB for extension. These collections are contained in 30 CFR 817.

OSM has revised burden estimates, where appropriate, to reflect current reporting levels or adjustments based on reestimates of burden or respondents. OSM will request at 3-year term of approval for this information collection activity.

Comments are invited on: (1) The need for the collection of information for the performance of the functions of the agency; (2) the accuracy of the agency's burden estimates; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the information collection burden on respondents, such as use of automated means of collection of the information. A summary of the public comments will accompany OSM's submission of the information collection request to OMB.

This notice provides the public with 60 days in which to comment on the following information collection activity:

Title: Permanent Program Performance Standards—Underground Mining Activities, 30 CFR Part 817.

OMB Control Number: 1029–0048.

Summary: Sections 515 and 516 of the Surface Mining Control and Reclamation Act of 1977 provide that permittees conducting surface coal mining operations with underground mining activities shall meet all applicable performance standards of the Act. The information collected is used by the regulatory authority in monitoring and inspecting surface coal mining activities to ensure that they are conducted in compliance with the requirements of the Act.

Bureau Form Number: None.

Frequency of Collection: On occasion, quarterly and annually.

Description of Respondents: Underground coal mining operators.

Total Annual Responses: 52,690.

Total Annual Burden Hours: 183,284.

Dated: January 26, 1998.

Richard G. Bryson,

Chief, Division of Regulatory Support.

BILLING CODE 4310–05–M

DEPARTMENT OF JUSTICE

Office of Community Oriented Policing Services; Agency Information Collection Activities; Proposed Collection; Comment Request

ACTION: Notice of new information collection under emergency review; COPS monitoring visit satisfaction survey.

The Department of Justice, Office of Community Oriented Policing Services (COPS) has submitted the following information collection request utilizing emergency review procedures, to OMB for review and clearance in accordance with sections 1320.13 (a)(1)(ii) and (a)(2)(iii) of the Paperwork Reduction Act of 1995. The COPS has determined that it cannot reasonably comply with the normal clearance procedures under this Part because normal clearance procedures are reasonably likely to prevent or disrupt the collection of information. Therefore, OMB approval has been requested by January 31, 1998. If granted the emergency approval is only valid for 180 days. All comments and questions pertaining to this pending request for emergency approval must be directed to OMB, Office of Information and Regulatory Affairs, Attention: Department of Justice Desk Officer (Ms. Victoria Wassmer), Washington, DC, 20503. Comments regarding the emergency submission of this information collection may also be submitted to OMB via facsimile at 202–395–7285.

During the first 60 days of this same review period, a regular review of this information collection is also being undertaken. All comments and suggestions, or questions regarding additional information, to include obtaining a copy of the proposed information collection instrument with instructions, should be directed to: U.S. Department of Justice, Office of Community Oriented Policing Services, Attention: Jody Nescola, 202–616–9606, 1100 Vermont Avenue, NW, Washington, DC 20530.

Comments are encouraged and will be accepted until March 30, 1998. Your comments should address one or more of the following four points:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and the assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected, and

4. Evaluate whether the data collection instrument will minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Additionally, comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time should be directed to Bob Briggs, U.S. Department of Justice, Office of Community Oriented Policing Services, 1100 Vermont Avenue, NW, Washington, D.C. 20530.

Overview of this information collection:

(1) Type of Information Collection: New collection.

(2) Title of the Form/Collection: Community Oriented Policing Services (COPS) Monitoring Visit Satisfaction Survey.

(3) Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection: Form: 23/01. Office of Community Oriented Policing Services, U.S. Department of Justice.

(4) Affected public who will be asked or required to respond, as well as a brief abstract: Primary: State, local, or tribal governments. Other: None. The information collected may be used to determine Monitoring Division best practices and to evaluate the strengths and weaknesses of the site visit process in order to make adjustments that would improve grantee satisfaction.

(5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond: 300 respondents at 5 minutes per response. The information will be collected once from each respondent.

(6) An estimate of the total public burden (in hours) associated with the collection: 25 annual burden hours.

If additional information is required contact: Mr. Robert B. Briggs, Clearance Officer, United States Department of Justice, Information Management and Security Staff, Justice Management Division, Suite 850, Washington Center, 1001 G Street, NW, Washington, DC 20530.

Dated: January 23, 1998.

Robert B. Briggs,

Department Clearance Officer, United States Department of Justice.

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Safe Drinking Water Act, as Amended

Notice is hereby given that on January 5, 1998, a proposed consent decree in *United States* v. *Andover Water District*, Civil Action No. 98–3–PC, was lodged with the United States District Court for the District of Maine.

In this action, the United States alleged that the Andover Water District (District) failed to comply with requirements of the Safe Drinking Water Act, 42 U.S.C. 300f–300j–26, as amended by the Safe Drinking Water Act Amendments of 1996, Public Law 104–182 (1996) (Act), and the regulations promulgated thereunder, including the Surface Water Treatment Rule (SWTR), 40 CFR 141.71. The complaint alleges, *inter alia*, that the District: failed to meet the filtration requirements of the SWTR; failed to comply with an administrative order issued by the United States Environmental Protection Agency with respect to that violation; and, failed to fulfill certain public education and notice requirements. The proposed consent decree resolves the United States' claims against the District. Under the terms of the proposed consent decree, the District will, *inter alia*, construct a new ground water well to supply drinking water to its users, comply with other provisions of the Act, including public education and notification requirements, and pay a $5,000 civil penalty.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed partial consent decree. Comments should be addressed to the assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Andover Water District*, Civil Action No. 98–3–PC, D.J. Ref. 90–5–1–1–4379.

The proposed consent decree may be examined at the Office of the United States Attorney, District of Maine, East Tower, 100 Middle Street Plaza, Portland, Maine 14101, at U.S. EPA Region I, J.F.K. Federal Building, Boston, Massachusetts 02203, and at the Consent Decree Library, 1120 G Street, NW., 4th Floor, Washington, DC 20005. A copy of the proposed consent decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, NW., 4th Floor, Washington, DC 20005. In requesting a copy, please enclose a check in the amount of $7.50 (25 cent per page reproduction cost).

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Clean Air Act

In accordance with Departmental policy, 28 C.F.R. 50.7, notice is hereby given that a proposed Consent Decree in *United States* v. *The University of Notre Dame Du Lac*, 2:98CV007RL was lodged on Jan. 8, 1998, with the United States District Court for the Northern District of Indiana. The proposed Consent Decree settles the injunctive relief and civil penalty claims of Plaintiff, the United States of America, regarding Defendant's violations at its powerplant in Notre Dame, Indiana, of the federally-approved State of Indiana Air Pollution Implementation Plan ("Indiana SIP"). The proposed settlement requires Defendant to operate and test boilers 2, 3 and 4 of its powerplant in compliance with the Clean Air Act and specifications set forth in the proposed settlement, and to pay civil penalty of $250,000.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed partial consent decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States* v. *The University of Notre Dame Du Lac*, DOJ Ref. #90–5–2–1–2103.

The proposed consent decree may be examined at the office of the United States Attorney, Joseph Cooley, Assistant United States Attorney, Northern District of Indiana, 507 State Street, 4th Floor, Hammond, Indiana 46320; the Region 5 Office of the Environmental Protection Agency, 77 West Jackson Boulevard, Chicago, Illinois 60604; and at the Consent Decree Library, 1120 G Street, N.W., 4th Floor, Washington, D.C. 20005, (202) 624–0892. A copy of the proposed consent decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, N.W., 4th Floor, Washington, D.C. 20005. In requesting a copy please refer to the referenced case and enclose a check in the amount of $8.00, (25 cents per page reproduction costs), payable to the Consent Decree Library.

Joel M. Gross,

Chief Environment and Natural Resources Division.

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Federal Bureau of Investigation

Criminal Justice Information Services; Agency Information Collection Activities: Proposed Collection: Comment Request

ACTION: Notice of Information Collection Under Review: Supplementary Homicide Report.

The proposed information collection is published to obtain comments from the public and affected agencies. Comments are encouraged and will be accepted until March 2, 1998.

Request written comments and suggestions from the public and affected agencies concerning the proposed collection of information. Your comments should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

All comments and questions pertaining to this pending request for approval must be directed to OMB, Office of Information and Regulatory Affairs, Attention: Department of Justice Desk Officer (Ms. Victoria Wassmer), Washington, DC 20503. Comments regarding the submission of this information collection may also be submitted to OMB via facsimile at 202–395–7285.

Overview of this information collection:

(1) Type of information collection: Extension of Current Collection.

(2) The title of the form/collection: Supplementary Homicide Report (SHR).

(3) The agency form number, if any, and applicable component of the Department sponsoring the collection. Form: 1–704. Federal Bureau of Investigation, Department of Justice.

(4) Affected public who will be asked or required to respond, as well as brief abstract. Primary: State and Local Law Enforcement Agencies. This collection is needed to provide data regarding age, sex, race, victim/offender relationships, weapons and motives of murders committed throughout the United States. Data are tabulated and published in the annual "Crime in the United States."

(5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond: 17,145 agencies with 205,740 responses which includes Zero reports; and with an average completion time of 9 minutes a month per response.

(6) An estimate of the total public burden (in hours) associated with this collection: 30,861 hours annually.

If additional information is required contact: Mr. Robert B. Briggs, Clearance Officer, United States Department of Justice, Information Management and Security Staff, Justice Management Division, Suite 850, Washington Center, 1001 G Street, NW., Washington, DC 20530.

Dated: January 23, 1998.

Robert B. Briggs,

Department Clearance Officer, United States Department of Justice.

BILLING CODE 4410–02–M

DEPARTMENT OF JUSTICE

National Institute of Justice

Office of Science and Technology; Agency Information Collection Activities: Proposed Collection; Comment Request

ACTION: Notice of information collection under emergency review; survey of force in the arrest of persons with impaired judgment.

The Department of Justice, National Institute of Justice, has submitted the following information request (ICR) utilizing emergency review procedures, to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. OMB approval has been requested by January 31, 1998. If granted, the emergency approval is only valid for 180 days. Comments should be directed to OMB, Office of Information and Regulatory Affairs, Attention: Ms. Victoria Wassmer: 202–395–5871 and Department of Justice Desk Officer, Washington, DC, 20503.

During the first 60 days of this same period a regular review of this information collection is also being undertaken. Comments are encouraged and will be accepted until: March 30, 1998.

Request written comments and suggestions from the public and affected agencies concerning the proposed collection of information. Your comments should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

VOL 63 ISS 19 JA 29 1998 UMI

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g. permitting electronic submission of responses.

Comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time should be directed to Dr. Raymond Downs (phone number and address listed below). If you have additional comments, suggestions, or need a copy of the proposed information collection instrument with instructions, or additional information, please contact Dr. Raymond Downs, (202) 307–0646, Office of Science and Technology, National Institute of Justice, Office of Justice Programs, U.S. Department of Justice, 633 Indiana Avenue, NW, Room 870, Washington, DC 20531. Additionally, comments may also be submitted to OST via facsimile to (202) 307–9907.

Overview of this information collection:

(1) Type of information collection: New collection.

(2) Title of the form/collection: Use of Force in the Arrest of Persons with Impaired Judgement.

(3) Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection: Form: none. Office of Science an Technology, National Institute of Justice, Office of Justice Programs, United States Department of Justice.

(4) Affected public who will be asked or required to respond, as well as a brief abstract: Primary: Law enforcement agencies. Other; none. This survey will be constructed in collaboration with police agencies in a large metropolitan area of the United States. It will compare the force required to arrest persons with impaired judgement to the force required to arrest persons with intact judgement with regard to types of force used and their effectiveness and safety to arrestee and arresting officer. Data collected will help determine if modifications are necessary in training officers in the arrest of persons with impaired judgement or if new methods or technology are required to effect these arrests safely to all concerned.

(5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond: 7,000 respondents at an average of 3 minutes per response.

(6) An estimate of the total public burden (in hours) associated with the collection: 350 burden hours.

If additional information is required contact: Mr. Robert B. Briggs, Clearance Officer, United States Department of Justice, Information Management and Security Staff, Justice Management Division, Suite 850, Washington Center, 1001 G Street, NW, Washington, DC 20530.

Dated: January 23, 1998.

Robert B. Briggs,

Department Clearance Officer, United States Department of Justice.

BILLING CODE 4410–18–M

DEPARTMENT OF LABOR

Office of the Assistant Secretary for Veterans' Employment and Training

Homeless Veterans' Reintegration Project Competitive Grants for Rural Areas

AGENCY: Office of the Assistant Secretary for Veterans' Employment and Training.

ACTION: Notice of availability of funds and solicitation for grant applications for Rural Homeless Veterans Reintegration Projects (SGA 98–02).

SUMMARY: This notice contains all of the necessary information and forms needed to apply for grant funding. All applicants for grant funds should read this notice in its entirety. The U.S. Department of Labor, Veterans' Employment and Training Service (VETS) announces a grant competition for Homeless Veterans Reintegration Projects (HVRP) authorized under the Stewart B. McKinney Homeless Assistance Act to serve rural areas. Such projects will assist eligible veterans who are homeless by providing employment, training, supportive services, and transitional housing assistance where possible. Under this solicitation, VETS expects to award up to five grants in FY 1998.

This notice describes the background, the application process, description of program activities, evaluation criteria, and reporting requirements for Solicitation of Grant Applications (SGA) 98–02. VETS anticipates that up to $300,000 will be available for grant awards under this SGA.

The information and forms contained in the Supplementary Information Section of this announcement constitute the official application package for this Solicitation. In order to receive any amendments to this Solicitation which may be subsequently issued, all applicants must register their name and address with the Procurement Services Center. Please send this information as soon as possible, Attention: Grant Officer, to the following address: U. S. Department of Labor, Procurement Services Center, Room N–5416, 200 Constitution Avenue, N.W., Washington, D.C. 20210. Please reference SGA 98–02.

DATES: One (1) ink-signed original, complete grant application (plus three (3) copies of the Technical Proposal and three (3) copies of the Cost Proposal shall be submitted to the U.S. Department of Labor, Procurement Services Center, Room N–5416, 200 Constitution Avenue, N.W., Washington, D.C. 20210, not later than 4:45 p.m., Eastern Standard Time, March 2, 1998, or be postmarked by the U.S. Postal Service on or before that date. Hand delivered applications must be received by the Procurement Services Center by that time.

ADDRESSES: Applications shall be mailed to the U.S. Department of Labor, Procurement Services Center, Attention: Lisa Harvey, Reference SGA 98–02, Room N–5416, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT: Lisa Harvey, U.S. Department of Labor, Procurement Services Center, telephone (202) 219–6445 [not a toll free number].

SUPPLEMENTARY INFORMATION:

Rural Homeless Veterans Reintergration Project Solicitation

I. Purpose

The U.S. Department of Labor (DOL), Veterans' Employment and Training Service (VETS) is requesting grant applications for the provision of employment and training services in accordance with Title VII, Subtitle C, Section 738 of the Stewart B. McKinney Homeless Assistance Act (MHAA), 42 U.S.C. 11448. These instructions contain general program information, requirements and forms for application for funds to operate a Rural Homeless Veterans Reintegration Project (HVRP).

II. Background

The Stewart B. McKinney Homeless Assistance Act of 1987, enacted on July 22, 1987, under Title VII, Subtitle C, Section 738 provides that "The Secretary shall conduct, directly or through grant or contract, such programs as the Secretary determines appropriate to expedite the reintegration of homeless veterans into the labor force."

This program was reauthorized under Section 621 of the McKinney Homeless Assistance Amendments Act of 1990 (Pub. L. 101–645) for an additional three years, i.e., through FY 1993. Under the Homeless Veterans Comprehensive Service Programs Act of 1992 (Pub. L. 102–590—enacted on November 10, 1992) the Homeless Veterans Reintegration Project was reauthorized through Fiscal Year 1995. However, the program was rescinded in FY 1995. Pub. L. 104–275, dated October 9, 1996, was amended to reauthorize the program through FY 1998. Public Laws 105–41 and 105–114, enacted in 1997, extend the program through FY 1999.

The Homeless Veterans Reintegration Project was the first nationwide Federal program that focused on placing homeless veterans into jobs. In accordance with the MHAA, the Assistant Secretary for Veterans' Employment and Training (ASVET) is making approximately $300,000 of the funds available to award grants for HVRPs in rural area in FY 1998 under this competition. Projects are expected to provide valuable information on approaches that work in a rural environment.

III. Application Process

A. Rural Areas

Under this announcement, applications will be accepted from eligible applicants, (as defined in Section B. of this part) to serve homeless veterans in rural areas.

The Census Bureau has defined "urban" for the 1990 census, and territory, population, and housing units not classified as urban constitute "rural." Most specifically; "urban" consists of territory, persons, and housing units in:

1. Places of 2,500 or more persons incorporated as cities, villages boroughs (except in Alaska and New York), and towns, (except in the six New England States, New York, and Wisconsin), but excluding the rural portions of "extended cities."

2. Census designated places of 2,500 or more persons.

3. Other territory, incorporated or unincorporated, included in urbanized areas.

Those not constituted as "urban" likely fall into the category of "rural." Potential applicants are referred to the Geography Division, U.S. Bureau of the Census, Washington, DC 20233, for any questions or clarification on the Census Bureau's definition. It is expected that an applicant's submission under this solicitation will clearly demonstrate the rural nature of the area to be served.

B. Eligible Applicants

Applications for funds will be accepted from State and local public agencies, Private Industry Councils, and nonprofit organizations as follows:

1. Private Industry Councils (PICS) as defined in Title I, Section 102 of the Job Training Partnership Act (JTPA), Pub. L. 97–300, are eligible applicants, as well as State and local public agencies. "Local public agency" refers to any public agency of a general purpose political subdivision of a State which has the power to levy taxes and spend funds, as well as general corporate and police powers. (This typically refers to cities and counties). A State agency may propose in its application to serve one or more of the potential jurisdictions located in its State. This does not preclude a city or county agency from submitting an application to serve its own jurisdiction. (Although cities are mentioned in the above explanation, this solicitation is limited to rural jurisdictions.)

Applicants are encouraged to utilize, through subgrants, experienced public agencies, private nonprofit organizations, and private businesses which have an understanding of the unemployment and homeless problems of veterans, a familiarity with the area to be served, and the capability to effectively provide the necessary services.

2. Also eligible to apply are nonprofit organizations who have operated an HVRP or similar employment and training program for the homeless or veterans; or have proven capacity to manage Federal grants, and have or will provide the necessary linkages with other service providers. Nonprofit organizations will be required to submit with their application recent (within one year) financial audit statements that attest to the financial responsibility of the organization.

Entities described in Section 501(c)4 of the Internal Revenue Code that engage in lobbying activities are not eligible to receive funds under this announcement. The Lobbying Disclosure Act of 1995, Pub. L. 104–65, 109 Stat. 691, prohibits the award of Federal funds to these entities if they engage in lobbying activities.

C. Funding Levels

The total amount of funds available for this solicitation is $300,000. It is anticipated that up to 5 awards will be made under this solicitation. Awards are expected to range from $50,000 to $75,000. The Federal government reserves the right to negotiate the amounts to be awarded under this competition. Please be advised that requests exceeding this range by 15% or more will be considered non-responsive.

D. Period of Performance

The period of performance will be for one year from date of award. It is expected that successful applicants will commence program operations under this solicitation on or before March 31, 1998. Actual start dates will be negotiated with each successful applicant.

E. Late Proposals

The grant application package must be received at the designated place by the date and time specified or it will not be considered. Any application received at the Office of Procurement Services after 4:45 pm EST, March 2, 1998, will not be considered unless it is received before the award is made and:

1. it was sent by registered or certified mail not later than the fifth calendar day before March 2, 1998;

2. it is determined by the Government that the late receipt was due solely to mishandling by the Government after receipt at the U.S. Department of Labor at the address indicated; or

3. it was sent by U.S. Postal Service Express Mail Next Day Service-Post Office to Addressee, not later than 5:00 pm at the place of mailing two (2) working days, excluding weekends and Federal holidays, prior to March 2, 1998.

The only acceptable evidence to establish the date of mailing of a late application sent by registered or certified mail is the U.S. Postal Service postmark on the envelope or wrapper and on the original receipt from the U.S. Postal Service. If the postmark is not legible, an application received after the above closing time and date shall be processed as if mailed late. "Postmark" means a printed, stamped or otherwise placed impression (not a postage meter machine impression) that is readily identifiable without further action as having been applied and affixed by an employee of the U.S. Postal Service on the date of mailing. Therefore applicants should request that the postal clerk place a legible hand cancellation "bull's-eye" postmark on both the receipt and the envelope or wrapper.

The only acceptable evidence to establish the date of mailing of a late application sent by U.S. Postal Service Express Mail Next Day Service-Post Office to Addressee is the date entered by the Post Office receiving clerk on the "Express Mail Next Day Service-Post Office to Addressee" label and the postmark on the envelope or wrapper

VOL 63 ISS 19 JA 29 1998 UMI

and on the original receipt from the U.S. Postal Service. "Postmark" has the same meaning as defined above. Therefore, applicants should request that the postal clerk place a legible hand cancellation "bull's-eye" postmark on both the receipt and the envelope or wrapper.

The only acceptable evidence to establish the time of receipt at the U.S. Department of Labor is the date/time stamp of the Procurement Services Center on the application wrapper or other documentary evidence or receipt maintained by that office. Applications sent by telegram or facsimile (FAX) will not be accepted.

F. Submission of Proposal

A cover letter, and an original and three (3) copies of the proposal shall be submitted. The proposal shall consist of two(2) separate and distinct parts:

PART I—TECHNICAL PROPOSAL shall consist of a narrative proposal that demonstrates the applicant's knowledge of the need for this particular grant program, its understanding of the services and activities proposed to alleviate the need and its capabilities to accomplish the expected outcomes of the proposed project design. The technical proposal shall consist of a narrative not to exceed fifteen (15) pages double-spaced, typewritten on one side of the paper only. Charts and exhibits are not counted against the page limit. Applicants should be responsive to the Rating Criteria contained in Section VI and address all of the rating factors noted as thoroughly as possible in the narrative. The following format is strongly recommended:

1. Need for the project: The applicant should identify the geographical area to be served and the rural characteristics of the area; provide an estimate of the number of homeless veterans and their needs; poverty and unemployment rates in the area, and gaps in the local community infrastructure the project would fulfill in addressing the employment and other barriers of the targeted veterans. Include the outlook for job opportunities in the service area.

2. Approach or strategy to increase employment and job retention: The applicant should describe the specific supportive services and employment and training services to be provided under this grant and the sequence or flow of such services. Participant flow charts may be provided. Include a description of the relationship with other employment and training programs such as Disabled Veterans' Outreach Program (DVOP) and the Local Veterans' Employment Representative (LVER) program, and programs under the Job Training Partnership Act. Please include a plan for follow up of participants who entered employment at 30 and 90 days and the capacity to assist the Department of Labor in one-year and/or multi-year follow up efforts. (See discussion on results in Section V. D.) Please include the chart of proposed performance goals and planned expenditures listed in Appendix D. Although the form itself is not mandatory, the information called for in Appendix D must be provided by the applicant.

3. Linkages with other providers of employment and training services to the homeless and to veterans: Describe what linkages this programs will have with other providers of services to veterans and to the homeless in the community outside of the HVRP grant. List the types of services provided by each. Note the type of agreement in place if applicable. Any linkages with the workforce development system [inclusive of JTPA and State Employment Security Agencies (SESAs)] and with the Department of Veterans Affairs resources should be delineated.

4. Organizational capability in providing required program activities: The applicant's relevant current or prior experience in operating employment and training or related programs serving the homeless or veterans should be delineated. Provide information denoting outcomes of past programs in terms of enrollments and placements or other measures of success. Applicants who have operated an HVRP program, or more recent Homeless Veterans Employment and Training (HVET) program should include final or most recent technical performance reports. (This information is subject to verification by the Veterans' Employment and Training Service.) Provide evidence of key staff capability. Non-profit organizations should submit evidence of satisfactory financial management capability including recent financial and/or audit statements.

5. Proposed housing strategy for homeless veterans: Describe how housing resources for homeless veterans in the rural area may be obtained or accessed. These resources may be from linkages or sources other than the HVRP grant such as HUD, community housing resources, DVA leasing or other programs. The applicant should explain whether HVRP resources will be used and why this is necessary.

PART II—COST PROPOSAL shall contain the Standard Form (SF) 424, "Application for Federal Assistance," and the Budget Information Sheet in Appendix B. In addition the budget shall include—on a separate page(s)—a detailed cost break-out of each line item on the Budget Information Sheet. Please label this page or pages the "Budget Narrative." Also to be included in this Part is the Assurance and Certification Page, Appendix C. Copies of all required forms with instructions for completion are provided as appendices to this solicitation. The Catalog of Federal Domestic Assistance number for this program is 17.805, which should be entered on the SF 424, Block 10. In Block 11, please enter the following: Homeless Veterans Reintegration Project (RURAL). Please show leveraged resources/matching funds and/or the value of in-kind contributions in Section B of the Budget Information Sheet.

Budget Narrative Information

As an attachment to the Budget Information Sheet, the applicant must provide at a minimum, and on separate sheet(s), the following information:

(a) A breakout of all personnel costs by position, title, salary rates and percent of time of each position to be devoted to the proposed project (including subgrantees);

(b) An explanation of fringe benefit rates and associated charges. Rates exceeding 35% of salaries and wages require justification;

(c) An explanation of the purpose and composition of, and method used to derive the costs of each of the following: travel, equipment, supplies, subgrants/contracts and any other costs. The applicant should include costs of any required travel described in this Solicitation. Mileage charges shall not exceed 31 cents per mile;

(d) Description/specification of and justification for equipment purchases, if any. Tangible, non-expendable, personal property having a useful life of more than one year and a unit acquisition cost of $5,000 or more per unit must be specifically identified; and

(e) Identification of all sources of leveraged or matching funds and an explanation of the derivation of the value of matching/in-kind Services.

IV. Participant Eligibility

To be eligible for participation under HVRP, an individual must be homeless and a veteran defined as follows:

A. The term *homeless or homeless individual* includes persons who lack a fixed, regular, and adequate nighttime residence. It also includes persons whose primary nighttime residence is either a supervised public or private shelter designed to provide temporary living accommodations; an institution that provides a temporary residence for individuals intended to be institutionalized; or a private place not designed for, or ordinarily used as, a regular sleeping accommodation for human beings. (Reference 42 USC 11302).

B. The term *veteran* means a person who served in the active military, naval, or air service, and who was discharged or released therefrom under conditions other than dishonorable. [Reference 38 USC 101(2)]

V. Project Summary

A. Program Concept and Emphasis

The HVRP grants under Section 738 of the Stewart B. McKinney Homeless Assistance Act are intended to address dual objectives:

Provide services to assist in reintegrating homeless veterans into the labor force; and stimulate the development of effective service delivery systems that will seek to address the complex problems facing homeless veterans. These programs are designed to be flexible in addressing the universal as well as local or regional problems barring homeless veterans from the workforce. The program in FY 1998 will continue to strengthen the provision of comprehensive services through a case management approach, the attainment of housing resources for veterans entering the labor force, and strategies for employment and retention.

B. Required Features

1. The HVRP has since its inception featured an outreach component consisting of veterans who have experienced homelessness. In recent years this requirement was modified to allow the projects to utilize formerly homeless veterans in other positions where there is direct client contact if outreach was not needed extensively, such as counseling, peer coaching, intake and follow up. This requirement applies to projects funded under this solicitation.

2. Projects will be required to show linkages with other programs and services which provide support to homeless veterans. Coordination with the Disabled Veterans' Outreach Program (DVOP) Specialists in the jurisdiction is particularly encouraged.

3. Projects will be "employment focused." That is, they will be directed towards (a) increasing the employability of homeless veterans through providing for or arranging for the provision of services which will enable them to work; and (b) matching homeless veterans with potential employers.

C. Scope of Program Design

The HVRP project design should provide or arrange for the following services:

—Outreach, intake, assessment, counseling and employment services. Outreach should, to the degree practical, be provided at shelters, day centers, soup kitchens and/or other locations particular to the rural environment, and other programs for the homeless. Program staff providing outreach services are to be veterans who have experienced homelessness.

Coordination with veterans' services programs and organizations such as:

—Disabled Veterans' Outreach Program (DVOP) Specialists and Local Veterans' Employment Representatives (LVERs) in the State Employment Security/Job Service Agencies (SESAs) or in the newly instituted workforce development system's One-Stop Centers, JTPA Title IV, Part C (IV–C) Veterans' Employment Program

—Department of Veterans' Affairs (DVA) services, including its Health Care for Homeless Veterans, Domiciliary and other programs, including those offering transitional housing

—Veteran service organizations such as The American Legion, Disabled American Veterans, and the Veterans of Foreign Wars, Vietnam Veterans of America, and the American Veterans (AMVETS)

Referral to necessary treatment services, rehabilitative services, and counseling including, but not limited to:

—Alcohol and drug
—Medical
—Post Traumatic Stress Disorder
—Mental Health
—Coordinating with MHAA Title VI programs for health care for the homeless

Referral to housing assistance provided by:

—Local shelters
—Federal Emergency Management Administration (FEMA) food and shelter programs
—Transitional housing programs and single room occupancy housing programs funded under MHAA Title IV
—Permanent housing programs for the handicapped homeless funded under MHAA Title IV
—Department of Veterans' Affairs programs that provide for leasing or sale of acquired homes to homeless providers
—Transitional housing leased by HVRP funds (HVRP funds cannot be used to purchase housing)

Employment and training services such as:

—Basic skills instruction
—Basic literacy instruction
—Remedial education activities
—Job search activities
—Job counseling
—Job preparatory training, including resume writing and interviewing skills
—Subsidized trial employment (Work Experience)
—On-the-Job Training
—Classroom Training
—Job placement in unsubsidized employment
—Placement follow up services
—Services provided under JTPA Program Titles

D. Results-Oriented Model

Based on past experience of grantees working with this target group, a workable program model evolved which is presented for consideration by prospective applicants. No model is mandatory, and the applicant should design a program that is responsive to local needs, but will carry out the objectives of the HVRP to successfully reintegrate homeless veterans into the workforce.

With the advent of implementing the Government Performance and Results Act (GPRA), Congress and the public are looking for results rather than process. While entering employment is a viable outcome, it will be necessary to measure results over a longer term to determine the success of programs. The following program discussion emphasizes that followup is an integral program component.

The first phase of activity consists of the level of outreach that is necessary in the community to reach veterans who are homeless. This may also include establishing contact with other agencies that encounter homeless veterans such as shelters, soup kitchens and other facilities in the rural area. An assessment should be made of the supportive and social rehabilitation needs of the client and referral may take place to services such as drug or alcohol treatment or temporary shelter. When the individual is stabilized, the assessment should focus on the employability of the individual and they are enrolled into the program if they would benefit from pre-employment preparation such as resume writing, job search workshops, related counseling and case management, and initial entry into the job market through temporary jobs, sheltered work environments, or entry into classroom or on-the-job training. Such services should also be noted in an Employability Development Plan so that successful completion of the plan may be monitored by the staff.

Entry into full-time employment or a specific job training program should

VOL 63 ISS 19 JA 29 1998 UMI

follow in keeping with the objective of HVRP to bring the participant closer to self-sufficiency. Transitional housing may assist the participant at this stage or even earlier. Job development is a crucial part of the employability process. Wherever possible, DVOP and LVER staff should be utilized for job development and placement activities for veterans who are ready to enter employment or who are in need of intensive case management services. Many of these staff have received training in case management at the National Veterans' Training Institution and have as a priority of focus, assisting those most at a disadvantage in the labor market. VETS urges working hand-in-hand with DVOP/LVER staff to achieve economies of resources.

Follow up to determine if the veteran is in the same or similar job at the 30 day period after entering employment is required and important in keeping contact with the veterans and so that assistance in keeping the job may be provided. The 90 day followup is fundamental to assessing the results of the program interventions. Grantees should be careful to budget for this activity so that followup can and will occur for those placed at or near the end of the grant period. Such results will be reported in the final technical performance report.

VETS emphasizes in its Strategic Plan to implement GPRA that suitable outcomes involve careers, not just jobs. Successful results are achieved when the veterans is in the same or similar job after one or more years. Towards that end, VETS solicits the cooperation of successful applicants in retaining participant information pertinent to a longitudinal follow up survey, i.e., at least for one year after the grant period ends. Retention of records will be reflected in the Special Provisions at time of award.

E. Related HVRP Program Development Activities

1. Community Awareness Activities

In order to promote linkages between the HVRP program and local service providers (and thereby eliminate gaps or duplication in services and enhance provision of assistance to participants), the grantee should provide project orientation and/or service awareness activities that it determines are the most feasible to local providers of hands-on services to the homeless, Federal, State and local entitlement services (such as the Social Security Administration, DVA, and the local Job Service office(s), and civic and private sector groups to enlist their support for the program.

VI. Rating Criteria for Award

Applications will be reviewed by a DOL panel using the point scoring system specified below. Applications will be ranked based on the score assigned by the panel after careful evaluation by each panel member. The ranking will be the primary basis to identify approximately 5 applicants as potential grantees. Although the Government reserves the right to award on the basis of the initial proposal submissions, the Government may establish a competitive range, based upon the proposal evaluation, for the purpose of selecting qualified applicants. The panel's conclusions are advisory in nature and not binding on the Grant Officer. The government reserves the right to ask for clarification or hold discussions, but is not obligated to do so. The Government further reserves the right to select applicants out of rank order if such a selection would, in its opinion, result in the most effective and appropriate combination of funding, program models, and geographical service areas. The Grant Officer's determination for award under SGA 98–02 is the final agency action. The submission of the same proposal from any prior year HVRP or HVET competition does not guarantee an award under this Solicitation.

Panel Review Criteria

1. Need for the Project: 15 Points

The applicant shall document the extent of need for this project, as demonstrated by: (1) The potential number or concentration of homeless individuals and homeless veterans in the proposed project area relative to other similar areas of jurisdiction; (2) the high rates of poverty and/or unemployment in the proposed project area as determined by the census or other surveys; and (3) the extent of gaps in the local infrastructure the program would fill to effectively address the employment barriers which characterize the target population in the rural area.

2. Overall Strategy to Increase Employment and Retention: 30 Points

The application must include a description of the proposed approach to providing comprehensive employment and training services, including job training, job development, placement and post placement follow up services. The supportive services to be provided as part of the strategy of promoting job readiness and job retention should be indicated. The applicant should identify the local human resources and sources of training to be used for participants. A description of the relationship, if any, with other employment and training program such as SESAs (DVOP and LVER Programs), JTPA IV–C, other JTPA programs, and Workforce Development Boards or entities where in place, should be presented. It should be indicated how the activities will be tailored or responsive to the needs of homeless veterans in the rural area. A participant flow chart may be used to show the sequence and mix of services.

Note: The applicant MUST complete the chart of proposed program outcomes to include participants served, and job retention. (See Appendix D)

3. Quality and Extent of Linkages With Other Providers of Services to the Homeless and to Veterans: 20 Points

The application should provide information on the quality and extent of the linkages this program will have with other providers of services to benefit the homeless or veterans in the local community outside of the HVRP grant. For each service, it should be specified who the provider is, the source of funding (if known), and the type of linkages/referral system established or proposed. Describe to the extent possible, how the project would fit into the community's approach to respond to homelessness.

4. Demonstrated Capability in Providing Required Program Services: 20 Points

The applicant should describe its relevant prior experience in operating employment and training programs and providing services to participants similar to that which is proposed under this solicitation. Specific outcomes achieved by the applicant should be described in terms of clients placed in jobs, or other outcome measures of success. The applicant must also delineate its staff capability and ability to manage the financial aspects of Federal grant programs. Relevant documentation such as financial and/or audit statements should be submitted (required for applicants who are non-profit agencies). Final or most recent technical reports for HVRP, HVET or other relevant programs should be submitted as applicable. The applicant should also address its capacity for timely startup of the program.

5. Quality of Overall Housing Strategy: 15 Points

The application should demonstrate how the applicant proposes to obtain or access housing resources for veterans in the program and entering the labor force. This discussion should specify the provisions made to access temporary, transitional, and permanent housing for participants through

community resources, HUD, lease, HVRP or other means unique to the locale. HVRP funds may not be used to purchase housing.

Applicants can expect that the cost proposal will be reviewed for allowability, allocability, and reasonableness of costs, but will not be scored.

VII. Post Award Conference

A post-award conference for those awarded FY 1998 HVRP funds is tentatively planned for April or May, 1998. Costs associated with attending this conference for up to three grantee representatives will be allowed as long as they were incurred in accordance with Federal travel regulations. Such costs shall be charged as administrative costs and reflected in the proposed budget. The site of the conference has not yet been determined but will likely be in Washington, D.C. Please use Washington, D.C. for budget planning purposes. The conference will focus on providing information and assistance on reporting, record keeping, and grant requirements, and will also include best practices from past projects.

VIII. Reporting Requirements

The grantee shall submit the reports and documents listed below:

A. Financial Reports

The grantee shall report outlays, program income, and other financial information on a quarterly basis using SF 269A, Financial Status Report, Short Form. These forms shall cite the assigned grant number and be submitted to the appropriate State Director for Veterans' Employment and Training (DVET) no later than 30 days after the ending date of each Federal fiscal quarter during the grant period. In addition, a final SF 269 shall be submitted no later than 90 days after the end of the grant period.

B. Program Reports

Grantees shall submit a Quarterly Technical Performance Report 30 days after the end of each Federal fiscal quarter to the DVET which contains the following:

1. a comparison of actual accomplishments to established goals for the reporting period and any findings related to monitoring efforts;

2. reason for slippage if established goals are not met and identification of the corrective action which will be taken to meet the goals, and the timetable for accomplishment of the corrective action.

A final Technical Performance Report will also be required as part of the final report package due 90 days after grant expiration.

C. Summary of Final Report Package

The grantee shall submit 90 days after the grant expiration date the following final report package:

1. Final Financial Status Report.

2. Final Technical Performance Report.

3. Final Narrative Report—Grantees will be required to submit a final narrative report identifying major successes of the program as well as obstacles to success.

IX. Administrative Provisions

A. Limitation on Administrative and Indirect Costs

1. Direct Costs for administration, plus any indirect charges claimed, may not exceed 20 percent of the total amount of the grant.

2. Indirect costs claimed by the applicant shall be based on a federally approved rate. A copy of the negotiated, approved, and signed indirect cost negotiation agreement must be submitted with the application. (Do not submit the State cost allocation plan.)

3. Rates traceable and trackable through the SESA Cost Accounting System represent an acceptable means of allocating costs to DOL and, therefore, can be approved for use in MHAA grants to SESAS.

4. If the applicant does not presently have an approved indirect cost rate, a proposed rate with justification may be submitted. Successful applicants will be required to negotiate an acceptable and allowable rate with the appropriate DOL Regional Office of Cost Determination within 90 days of grant award.

B. Allowable Costs

Determinations of allowable costs shall be made in accordance with the following applicable Federal cost principles:

State and local government—OMB Circular A–87

Nonprofit organizations—OMB Circular A–122

C. Administrative Standards and Provisions

All grants shall be subject to the following administrative standards and provisions:

29 CFR Part 97—Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments.

29 CFR Part 95—Grants and Agreements with Institutes of Higher Education, Hospitals, and Other Non-Profit Organizations.

29 CFR Part 96—Federal Standards for Audit of Federally Funded Grants, Contracts and Agreements.

29 CFR Part 30—Equal Employment Opportunity in Apprenticeship and Training.

29 CFR Part 31—Nondiscrimination in Federally Assisted Programs of the Department of Labor—Effectuation of Title VI of the Civil Rights Act of 1964.

Signed at Washington, D.C. this 22nd day of January, 1998.

Lawrence J. Kuss,

Grant Officer.

Prescribed by OMB Circular A-102

INSTRUCTIONS FOR THE SF-424

Public reporting burden for this collection of information is estimated to average 45 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0043), Washington, DC 20503.

PLEASE DO NOT RETURN YOUR COMPLETED FORM TO THE OFFICE OF MANAGEMENT AND BUDGET. SEND IT TO THE ADDRESS PROVIDED BY THE SPONSORING AGENCY.

This is a standard form used by applicants as a required facesheet for preapplications and applications submitted for Federal assistance. It will be used by Federal agencies to obtain applicant certification that States which have established a review and comment procedure in response to Executive Order 12372 and have selected the program to be included in their process, have been given an opportunity to review the applicant's submission.

Item: Entry:

1. Self-explanatory.

2. Date application submitted to Federal agency (or State if applicable) and applicant's control number (if applicable).

3. State use only (if applicable).

4. If this application is to continue or revise an existing award, enter present Federal identifier number. If for a new project, leave blank.

5. Legal name of applicant, name of primary organizational unit which will undertake the assistance activity, complete address of the applicant, and name and telephone number of the person to contact on matters related to this application.

6. Enter Employer Identification Number (EIN) as assigned by the Internal Revenue Service.

7. Enter the appropriate letter in the space provided.

8. Check appropriate box and enter appropriate letter(s) in the space(s) provided:

   -- "New" means a new assistance award.

   -- "Continuation" means an extension for an additional funding/budget period for a project with a projected completion date.

   -- "Revision" means any change in the Federal Government's financial obligation or contingent liability from an existing obligation.

9. Name of Federal agency from which assistance is being requested with this application.

10. Use the Catalog of Federal Domestic Assistance number and title of the program under which assistance is requested.

11. Enter a brief descriptive title of the project. If more than one program is involved, you should append an explanation on a separate sheet. If appropriate (e.g., construction or real property projects), attach a map showing project location. For preapplications, use a separate sheet to provide a summary description of this project.

Item: Entry:

12. List only the largest political entities affected (e.g., State, counties, cities).

13. Self-explanatory.

14. List the applicant's Congressional District and any District(s) affected by the program or project.

15. Amount requested or to be contributed during the first funding/budget period by each contributor. Value of in-kind contributions should be included on appropriate lines as applicable. If the action will result in a dollar change to an existing award, indicate *only* the amount of the change. For decreases, enclose the amounts in parentheses. If both basic and supplemental amounts are included, show breakdown on an attached sheet. For multiple program funding, use totals and show breakdown using same categories as item 15.

16. Applicants should contact the State Single Point of Contact (SPOC) for Federal Executive Order 12372 to determine whether the application is subject to the State intergovernmental review process.

17. This question applies to the applicant organization, not the person who signs as the authorized representative. Categories of debt include delinquent audit disallowances, loans and taxes.

18. To be signed by the authorized representative of the applicant. A copy of the governing body's authorization for you to sign this application as official representative must be on file in the applicant's office. (Certain Federal agencies may require that this authorization be submitted as part of the application.)

PART II - BUDGET INFORMATION

SECTION A - Budget Summary by Categories

	(A)	(B)	(C)
1. Personnel	$		
2. Fringe Benefits(Rate %)			
3. Travel			
4. Equipment			
5. Supplies			
6. Contractual			
7. Other			
8. Total, Direct Cost (Lines 1 through 7)	$		
9. Indirect Cost(Rate %)			
10. Training Cost/Stipends			
11. TOTAL Funds Requested (Lines 8 through 10)	$		

SECTION B - Cost Sharing/ Match Summary (if appropriate)

	(A)	(B)	(C)
1. Cash Contribution			
2. In-Kind Contribution	$		
3. TOTAL Cost Sharing / Match (Rate %)	$		

NOTE: Use Column A to record funds requested for the initial period of performance (i.e. 12 months, 18 months, etc.); Column B to record changes to Column A (i.e. requests for additional funds or line item changes; and Column C to record the totals (A plus B).

INSTRUCTIONS FOR PART II - BUDGET INFORMATION

SECTION A - Budget Summary by Categories

1. **Personnel:** Show salaries to be paid for project personnel.
2. **Fringe Benefits:** Indicate the rate and amount of fringe benefits.
3. **Travel:** Indicate the amount requested for staff travel. Include funds to cover at least one trip to Washington, DC for project director or designee.
4. **Equipment:** Indicate the cost of non-expendable personal property that has a useful life of more than one year with a per unit cost of $5,000 or more.
5. **Supplies:** Include the cost of consumable supplies and materials to be used during the project period.
6. **Contractual:** Show the amount to be used for (1) procurement contracts (except those which belong on other lines such as supplies and equipment); and (2) sub-contracts/grants.
7. **Other:** Indicate all direct costs not clearly covered by lines 1. through 6 above, including consultants.
8. **Total, Direct Costs:** Add lines 1 through 7.
9. **Indirect Costs:** Indicate the rate and amount of indirect costs. Please include a copy of your negotiated Indirect Cost Agreement.
10. **Training /Stipend Cost:** (If allowable)
11. **Total Federal funds Requested:** Show total of lines 8 through 10.

SECTION B - Cost Sharing/Matching Summary

Indicate the actual rate and amount of cost sharing/matching when there is a cost sharing/matching requirement. Also include percentage of total project cost and indicate source of cost sharing/matching funds, i.e. other Federal source or other Non-Federal source.

NOTE:

PLEASE INCLUDE A DETAILED COST ANALYSIS OF EACH LINE ITEM.

1998
UMI

HVRP PERFORMANCE GOAL DEFINITIONS

1. Assessments. This process includes addressing the supportive services and employability and training needs of individuals before enrolling them in an HVRP program. Generally, this includes an evaluation and/or measurement of vocational interests and aptitudes, present abilities, previous education and work experience, income requirements, addressing supportive service needs, substance abuse treatment needs, counseling needs, temporary or transitional housing needs, personal circumstances and other related services.

2. Participants Enrolled. A client should be recorded as having been enrolled when an intake form has been completed, and services, referral, or employment has been received through the HVRP program. This should be an unduplicated count over the year: i.e., each participant is recorded only once, regardless of the number of times she or he receives assistance.

3. Placed Into Transitional Or Permanent Housing. A placement into transitional or permanent housing should be recorded when a veteran served by the program upgrades his/her housing situation during the reporting period from shelter/streets to transitional housing or permanent housing or from transitional housing to permanent housing. Placements resulting from referrals by HVRP staff shall be counted. This item is however an unduplicated count over the year, except that a participant may be counted once upon entering transitional housing and again upon obtaining permanent housing.

4. Direct Placements Into Unsubsidized Employment. A direct placement into unsubsidized employment must be a placement made directly by HVRP-funded staff with an established employer who covers all employment costs for 20 or more hours per week at or above the minimum wage. Day labor and other very short-term placements should not be recorded as placements into unsubsidized employment.

5. Assisted Placements Into Unsubsidized Employment. Assisted placements into unsubsidized employment should be recorded where the definition for placement with unsubsidized employment above is met, but the placement was arranged by an agency to which the HVRP referred the homeless veteran, such as a Job Training Partnership Act (JTPA) program.

6. Cost Per Placement. The cost per placement into unsubsidized employment is obtained by dividing the total HVRP funds expended by the total of direct placements plus assisted placements.

7. Number Retaining Job For 30 Days. To be counted as retaining a job for 30 days, continuous employment with one or more employers for at least 30 days must be verified and the definition for either direct placement or assisted placement into unsubsidized employment above is met. This allows clients who have moved into a position with a different employer to be recorded as retaining the job for 30 days as long as the client has been steadily employed for that length of time.

8. Number Retaining Job For 90 Days. To be counted as retaining a job for 90 days, continuous employment with one or more employers for at least 90 days must be verified, and the definition for either placement or assisted placement into unsubsidized employment above is met. This allows clients who have moved into a position with a different employer to be recorded as retaining the job for 90 days as long as the client has been steadily employed for that length of time.

9. Rate of Placement Into Unsubsidized Employment. The rate of placement into unsubsidized employment is obtained by dividing the number placed into unsubsidized employment (HVRP), plus the number of assisted placements into unsubsidized employment by the number of clients enrolled.

10. Average Hourly Wage At Placement. The average hourly wage at placement is the average hourly wage rates at placement of all assisted placements plus direct placements.

11. Employability Development Services. This includes services and activities which will develop or increase the employability of the participant. Generally, this includes vocational counseling, classroom and on-the-job training, pre-employment services (such as job seeking skills and job search workshops), temporary or trial employment, sheltered work environments and other related services and activities. Planned services should assist the participant in addressing specific barriers to employment and finding a job. These activities may be provided by the applicant or by a subgrantee, contractor or another source such as the local Job Partnership Training Act program or the Disabled Veterans'Outreach Program (DVOP) personnel or Local Veterans' Employment Representatives (LVERs). Such services are not mandatory but entries should reflect the services described in the application and the expected number of participants receiving or enrolled in such services during each quarter. Participants may be recorded more than once if they receive more than one service.

12. Total Planned Expenditures. Total funds requested. Identify forecasted expenditures needed for each fiscal quarter.

13. Administrative Costs. Administrative costs shall consist of all direct and indirect costs associated with the supervision and management of the program. These costs shall include the administrative costs, both direct and indirect, of subrecipients and contractors.

14. Participant Services. This cost includes supportive, training, or social rehabilitation services which will assist in stabilizing the participant. This category should reflect all costs other than administrative.

LEGAL SERVICES CORPORATION

Sunshine Act Meeting of the Board of Directors

Time and Date: The Board of Directors of the Legal Services Corporation will meet on February 7, 1998. The meeting will begin at 9:00 a.m. and continue until conclusion of the Board's agenda.

Location: Legal Services Corporation, 750 First Street NE.—10th Floor, Washington, DC 20002.

Status of Meeting: Open, except that a portion of the meeting may be closed pursuant to a unanimous vote of the Board of Directors to hold an executive session. At the closed session, the Corporation's General Counsel will report to the Board on litigation to which the Corporation is or may become a party, and the Board may act on the matters reported. The closing is authorized by the relevant provisions of the Government in the Sunshine Act (5 U.S.C. 552b(c) (10)) and the corresponding provisions of the Legal Services Corporation's implementing regulation (45 CFR § 1622.5(h)). A copy of the General Counsel's Certification that the closing is authorized by law will be available upon request.

Matters to be Considered:

Open Session:

1. Approval of agenda.
2. Approval of minutes of the Board's meeting of Nov. 15, 1997.
3. Approval of minutes of the Board's executive session meeting of Nov. 15, 1997.
4. Approval of minutes of the Board's teleconference meeting of Jan. 22, 1998.
5. Chairman's and Members' Reports.
6. Election of officers of the Board.
7. Scheduling meetings of the Board for the balance of FY '98.
8. President's Report.
9. Consider and act on the report of the Board's Operations and Regulations Committee.
10. Consider and act on the report of the Board's Finance Committee.
11. Consider and act on the report of the Board's Provision for the Delivery of Legal Services Committee.
12. Consider and act on the report of the Ad Hoc Committee on Performance Reviews of the President and Inspector General.
13. Consider and act on report on the strategic planning process.
14. Consider and act on a technical amendment to section 6.10 of the Corporation's bylaws.
15. Inspector General's Report.

Closed Session:

16. Briefing [1] by the Inspector General on the activities of the OIG, including a draft report on special audits.
17. Consider and act on the General Counsel's report on potential and pending litigation involving the Corporation.

Open Session:

18. Public comment.
19. Consider and act on other business.

CONTACT PERSON FOR INFORMATION:
Victor M. Fortuno, General Counsel and Secretary of the Corporation, at (202) 336–8810.

Special Needs: Upon request, meeting notices will be made available in alternate formats to accommodate visual and hearing impairments. Individuals who have a disability and need an accommodation to attend the meeting may notify Sylvia Speight, at (202) 336–8906.

Dated: January 27, 1998.

Victor M. Fortuno,

General Counsel and Secretary of the Corporation.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (98–015)]

NASA Advisory Council (NAC), Aeronautics and Space Transportation Technology Advisory Committee, Task Force on NASA's Aviation Environmental Compatibility Research; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Aeronautics and Space Transportation Technology Advisory Committee, Task Force on NASA's Aviation Environmental Compatibility Research meeting.

DATES: February 24, 1998, 8:30 a.m. to 5 p.m., and February 25, 1998, 8:30 a.m. to 12 p.m.

ADDRESSES: National Aeronautics and Space Administration, Room 6H46, 300 E Street, SW., Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Ms. Darlene Boykins, Office of Aeronautics and Space Transportation Technology, National Aeronautics and Space Administration, Washington DC 20546, (202) 358–4743.

SUPPLEMENTARY INFORMATION: The meeting will be open to the public up to the seating capacity of the room. The preliminary agenda for the meeting is as follows:

—Team Charter
—Environmental Impact of Aviation
—Emission Reduction Goals and Status
—Technology Transfer Into a Product
—Status of Emissions Regulations
—Environmental Impact of Aviation vs. Other Emissions Sources
—Status of Noise Regulations
—Go Forward Plan

It is imperative that the meeting be held on these dates to accommodate the scheduling priorities of the key participants.

Dated: January 23, 1998.

Alan M. Ladwig,

Associate Administrator for Policy and Plans.

[Notice (98–014)]

NASA Advisory Council (NAC), Space Science Advisory Committee (SScAC), Solar System Exploration Subcommittee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the National Aeronautics and Space Administration announces a meeting of the NASA Advisory Council, Space Science Advisory Committee, Solar System Exploration Subcommittee.

DATES: Monday, February 16, 1998, 8:30 a.m. to 5 p.m.; and Tuesday, February 17, 1998, 8:30 a.m. to 5 p.m.

ADDRESSES: Jet Propulsion Laboratory, Building 180, Room 101, California Institute of Technology, 4800 Oak Grove Drive, Pasadena, California 91109–8099.

FOR FURTHER INFORMATION CONTACT: Carl Pilcher, Code S, National Aeronautics and Space Administration, Washington, DC 20546, (202) 358–2470.

SUPPLEMENTARY INFORMATION: The meeting will be open to the public up to the capacity of the room. The agenda for the meeting is as follows:

—Goals of meeting
—ESS and OSS updates, budget
—Mars program issues and mission options
—Near-Earth asteroid prospector
—R & A task group report
—Outer planets mission sets:
—Viable opportunities
—Program costs
—Technology needs and programs

Discussion and assessment of mission sets:

—Apply selection criteria
—Identify pros and cons
—Discussion and formulation of recommendations

It is imperative that the meeting be held on these dates to accommodate the scheduling priorities of the key participants. Visitors will be requested to sign a visitor's register.

Dated: January 23, 1998.

Alan M. Ladwig,

Associate Administrator for Policy and Plans, National Aeronautics and Space Administration.

NASA Advisory Council (NAC), Space Science Advisory Committee (SScAC), Astronomical Search for Origins and Planetary Systems (ORIGINS); Subcommittee Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Science Advisory Committee, ORIGINS Subcommittee.

DATES: Tuesday, February 24, 1998, 8:30 a.m. to 5 p.m.; Wednesday, February 25, 1998, 8:30 a.m. to 5 p.m.; and Thursday, February 26, 1998, 8:30 a.m. to noon.

ADDRESSES: Carnegie Observatory, 813 Santa Barbara Street, Pasadena, CA 91101.

FOR FURTHER INFORMATION CONTACT: Dr. Edward J. Weiler, Code SA, National Aeronautics and Space Administration, Washington, DC 20546, 202/358–2150.

SUPPLEMENTARY INFORMATION: The meeting will be open to the public up to the capacity of the room. The agenda for the meeting includes the following topics:

—Status of ORIGINS Mission
—Discussion of NGST Institute
—Status of 2002 HST Instruments
—ORIGINS Technology Status
—SScAC Task Force Status

It is imperative that the meeting be held on these dates to accommodate the scheduling priorities of the key participants. Visitors will be requested to sign a visitor's register.

Dated: January 23, 1998.

Notice of Prospective Patent License

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of prospective patent license.

SUMMARY: NASA hereby gives that SGL Carbon Composites, Inc., of Gardena, California 90249–2506, has applied for a partially exclusive to practice the inventions described and claimed in NASA Case Numbers LAR 15643–1, entitled "Chopped-Fiber Composite Piston Architecture"; LAR 15274–1, entitled "Carbon Fiber Reinforced Carbon Composite Valve for an Internal Combustion Engine," and LAR 15653–1, entitled "Method of Manufacturing Carbon Fiber Reinforced Carbon Composite Valves for an Internal Combustion Engine," for which United States Patent Applications were filed by the United States of America as represented by the Administrator of the National Aeronautics and Space Administration. Written objections to the prospective grant of a license should be sent to Langley Research Center.

VOL 63 ISS 19 JA 29 1998 UMI

DATE: Responses to this notice must be received by March 30, 1998.

FOR FURTHER INFORMATION CONTACT: Ms. Kimberly A. Chasteen, Patent Attorney, NASA Langley Research Center, Mail Stop 212, Hampton, VA 23681–0001, telephone 864–3227 and fax (757) 864–9190.

Dated: January 21, 1998.

NATIONAL SCIENCE FOUNDATION

Committee Management; Notice of Establishment

The Deputy Director of the National Science Foundation has determined that the establishment of NSF2000 Steering Committee is necessary and in the public interest in connection with the performance of duties imposed upon the Director, National Science Foundation (NSF), by 42 U.S.C. 1861 *et seq.* This determination follows consultation with the Committee Management Secretariat, General Services Administration.

Name of Committee: NSF2000 Steering Committee.

Purpose: The Foundation will be observing its 50th anniversary in the year 2000. To advise and assist in this important endeavor, NSF is establishing a steering committee that includes representatives from science and engineering and other key groups, such as educators, to help ensure that the objectives of NSF2000 are met. These objectives are to highlight 50 years of U.S. achievements in science and engineering research and education, and to increase awareness of NSF's role in enabling U.S. world leadership in science and engineering.

Balanced Membership Plans. The Committee will be balanced with 15 to 20 men and women who represent science and engineering and education. Members will be selected:

- For having made significant contributions and commitment to science and technology and/or to science and engineering education,
- For having standing and creditability with the key target audiences of NSF2000,
- For having knowledge of or experience with NSF, and
- For having knowledge and experience to help NSF2000 reach its goals and objectives.

Responsible NSF Official: Mary Bullock, Section Head, Special Projects Section, Office of Legislative and Public Affairs, Room 1245, National Science Foundation, 4301 Wilson Boulevard, Arlington, Va. 22300, telephone (703) 306–1070.

Dated: January 23, 1998.

M. Rebecca Winkler,

Committee Management Officer.

[FR Doc. 98–2206 Filed 1–28–98; 8:45 am]

BILLING CODE 7555–01–M

NATIONAL SCIENCE FOUNDATION

Advisory Committee for Engineering; Committee of Visitors; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting.

Name: Advisory Committee for Engineering, Committee of Visitors (1170).

Date and Time: February 18–19, 1998; 8:00 a.m. to 5:30 p.m.

Place: Rooms 365 and 580, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230.

Type of Meeting: Closed.

Contact Person: Dr. Delcie Durham, Program Director, Materials Processing and Manufacturing, and Dr. Ming Leu, Program Director, Manufacturing Machines and Equipment, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230. Telephone (703) 306–1330.

Purpose of Meeting: To carry out Committee of Visitors (COV) review, including examination of decisions on proposals, reviewers comments, and other privileged materials.

Agenda: To provide oversight review of the Materials Processing and Manufacturing, and the Manufacturing Machines and Equipment Programs.

Reason for Closing: The meeting is closed to the public because the Committee is reviewing proposal actions that will include privileged intellectual property and personal information that could harm individuals if they are disclosed. If discussions were open to the public, these matters that are exempt under 5 U.S.C. 552b(c)(4) and (6) of the Government in the Sunshine Act would be improperly disclosed.

Dated: January 23, 1998.

M. Rebecca Winkler,

Committee Management Officer.

Special Emphasis Panel in Graduate Education

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting.

Name: Special Emphasis Panel in Graduate Education (#57).

Date and time: February 18 and 19, 1998; 8:30 a.m.–5:00 p.m.

Place: Room 330, National Science Foundation, 4201 Wilson Blvd., Arlington, VA.

Type of meeting: Closed.

Contact persons: Dr. Sonia Ortega, Mrs. Carolyn L. Piper and Mrs. Arneeta S. Speight, Division of Graduate Education, National Science Foundation, 4201 Wilson Blvd., Arlington, VA 22230, Telephone: (703) 306–1697.

Purpose of meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate proposals submitted to the NSF–NATO program as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c) (4) and (6) of the Government in the Sunshine Act.

Dated: January 26, 1998.

Special Emphasis Panel in Information and Intelligent Systems; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting.

Name: Special Emphasis Panel in Information and Intelligent Systems (1200).

Date and Time: February 12–13, 1998, 8:30 am–5:00 pm

Place: National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230.

Type of Meeting: Closed.

Contact Person: Dr. Gary Strong, Acting Deputy Division Director, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230, (703) 306–1928.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate Knowledge and Cognitive Systems Program proposals as part of the selection process of awards.

Reasons for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information, financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act.

Dated: January 23, 1998.

NATIONAL SCIENCE FOUNDATION

Special Emphasis Panel in Materials Sciences; Notice of Meetings

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces that the Special Emphasis Panel in Materials Research (1203) will be holding panel meetings for the purpose of reviewing proposals submitted to the Integrative Graduate Education and Research Training Program. These proposals reflect multidisciplinary research themes that draw from all areas of science, engineering, and education supported by the National Science Foundation. In order to review the proposals, panel meetings will be held on February 19–20, 1998 (2). All meetings will be closed to the public and will be held at the National Science Foundation, 4201 Wilson Boulevard, Arlington, Virginia, from 8:00 AM to 5:00 PM each day.

Contact person: Dr. Henry Blount, Head, Office of Multidisciplinary Activities, Office of the Assistant Director for Mathematical and Physical Sciences, National Science Foundation, Room 1005, 4201 Wilson Boulevard, Arlington, VA 22230, (703) 306–1946.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information, financial data such as salaries, and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c) (4) and (6) of the Government in the Sunshine Act.

Dated: January 26, 1998.

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–334 and 50–412]

In the Matter of The Cleveland Electric Illuminating Company, et al; Order Approving Application Regarding Merger Agreement Between DQE, Inc. and Allegheny Power System, Inc.

I

The Cleveland Electric Illuminating Company (CEI), Duquesne Light Company (DLC), Ohio Edison Company (OE), Pennsylvania Power Company (Penn Power), and Toledo Edison Company (TE) are the licensees of Beaver Valley Power Station, Unit Nos. 1 and 2 (BVPS–1 and BVPS–2). DLC acts as agent for the other licensees and has exclusive responsibility for and control over the physical construction, operation, and maintenance of BVPS–1 and BVPS–2 as reflected in Facility Operating Licenses Nos. DPR–66 and NPF–73. The Nuclear Regulatory Commission (NRC) issued Licenses Nos. DPR–66 and NPF–73 on July 2, 1976, and on August 14, 1987, respectively, pursuant to Part 50 of Title 10 of the Code of Federal Regulations (10 CFR Part 50). The facility is located on the southern shore of the Ohio River in Beaver County, Pennsylvania, approximately 22 miles northwest of Pittsburgh and 5 miles east of East Liverpool, Ohio.

II

Under cover of a letter dated August 1, 1997, DLC submitted an application for consent under 10 CFR 50.80 regarding a proposed merger of DQE, Inc. (the parent holding company of DLC) and Allegheny Power System, Inc., which would result in DQE, Inc. becoming a wholly owned subsidiary of Allegheny Power System, Inc. Allegheny Power System, Inc. would change its name to Allegheny Energy, Inc. (Allegheny Energy). CEI, OE, Penn Power, and TE are not involved in the merger. Supplemental information was submitted by letter dated October 30, 1997.

Under the proposed merger, DLC will become an indirect subsidiary of Allegheny Energy by reason of DQE, Inc. becoming a subsidiary of Allegheny Energy. DLC and the other current licensees will continue to hold the licenses, and no direct transfer of the licenses will result from the merger. On September 12, 1997, a Notice of Consideration of Approval of Application Regarding Proposed Corporate Restructuring was published in the **Federal Register** (62 FR 48113). An Environmental Assessment and Finding of No Significant Impact was published in the **Federal Register** on September 25, 1997 (62 FR 50411).

Under 10 CFR 50.80, no license shall be transferred, directly or indirectly, through transfer of control of the license, unless the Commission gives its consent in writing. Upon review of the information submitted in the application and letters of August 1, 1997, and October 30, 1997, the NRC staff has determined that the proposed merger will not affect the qualifications of DLC as holder of Facility Operating Licenses Nos. DPR–66 and NPF–73, and that the transfer of control of the licenses, to the extent effected by the proposed merger, is otherwise consistent with applicable provisions of law, regulations, and orders issued by the Commission, subject to the conditions set forth herein. These findings are supported by a safety evaluation dated January 23, 1998.

III

Accordingly, pursuant to Sections 161b, 161i, 161o. and 184 of the Atomic Energy Act of 1954, as amended, 42 USC 2201(b), 2201(i), 2201(o), and 2234; and 10 CFR 50.80, *It is hereby ordered*

VOL 63 ISS 19 JA 29 1998 UMI

that the Commission approve the application regarding the merger agreement between DQE, Inc. and Allegheny Power System, Inc. subject to the following: (1) DLC shall provide the Director of the Office of Nuclear Reactor Regulation a copy of any application, at the time it is filed, to transfer (excluding grants of security interests or liens) from DLC to its first- or second-tier parent or to any other affiliated company, facilities for the production, transmission, or distribution of electric energy having a depreciated book value exceeding 10 percent of DLC's consolidated net utility plant, as recorded on DLC's books of account; and (2) should the merger not be completed by December 31, 1998, this Order shall become null and void, unless upon application and for good cause shown this date is extended.

This Order is effective upon issuance.

IV

By March 2, 1998, any person adversely affected by this Order may file a request for a hearing with respect to issuance of the Order. Any person requesting a hearing shall set forth with particularity how such person's interest is adversely affected by this Order and shall address the criteria set forth in 10 CFR 2.714(d).

If a hearing is to be held, the Commission will issue an order designating the time and place of such hearing.

The issue to be considered at any such hearing shall be whether this Order should be sustained.

Any request for a hearing must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemakings and Adjudications Staff, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. Copies should also be sent to the Office of the General Counsel and to the Director, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and to John O'Neill, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC 20037, attorney for DLC.

For further details with respect to this action, see the application submitted under cover of a letter dated August 1, 1997, and supplemental letter dated October 30, 1997, and the safety evaluation dated January 23, 1998, which are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC., and at the local public document room located at the B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, PA 15001.

Dated at Rockville, Maryland, this 23rd day of January 1998.

For the Nuclear Regulatory Commission.

Samuel J. Collins,

Director, Office of Nuclear Reactor Regulation.

[FR Doc. 98–2181 Filed 1–28–98; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–352 and 50–353]

Philadelphia Electric Company Notice of Consideration of Issuance of Amendment to Facility Operating Licenses and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License Nos. NPF–39 and NPF–85, issued to Philadelphia Electric Company (the licensee), for operation of the Limerick Generating Station (LGS), Units 1 and 2, located in Montgomery and Chester Counties, Pennsylvania.

The proposed amendment would allow installation of replacement suction strainers for the Emergency Core Cooling System at LGS, Units 1 and 2. The installation for LGC, Unit 1, will be during the refueling outage currently scheduled for April 1998. Installation of the suction strainers in LGS, Unit 2, would be completed at a later date. Moreover, the licenses for LGS, Units 1 and 2, would be revised to reflect approval of the installation of the above cited strainers. The new large-capacity replacement strainers would be installed in the Residual Heat Removal and Core Spray systems' pump suction piping.

Before issuance of the proposed license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By March 2, 1998 the licensee may file a request for a hearing with respect to issuance of the amendments to the subject facility operating licenses and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Pottstown Public Library, 500 High Street, Pottstown, PA 19464. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendments under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemakings and Adjudications Staff, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and to J.W. Durham, Sr., Esquire Sr. V.P. and General Counsel, Philadelphia Electric Company, 2301 Market Street, Philadelphia, PA 19101, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

If a request for a hearing is received, the Commission's staff may issue the amendments after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its proposed finding of no significant hazards consideration in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendments dated October 6, 1997, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Pottstown Public Library, 500 High Street, Pottstown, PA 19464.

Dated at Rockville, Maryland, this 23rd day of January, 1998.

For the Nuclear Regulatory Commission.

John F. Stolz,

Director, Project Directorate I–2 Division of Reactor Projects—I/II Office of Nuclear Reactor Regulation.

[FR Doc. 98–2180 Filed 1–28–98; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–352]

Philadelphia Electric Company; Limerick Generating Station, Unit 1 Environmental Assessment and Finding of no Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from certain requirements of its regulations for Facility Operating License No. NPF–39 issued to Philadelphia Electric Company (the licensee), for operation of the Limerick Generating Station (LGS), Unit 1, located in Montgomery and Chester Counties, Pennsylvania.

Environmental Assessment

Identification of the Proposed Action

The proposed action would exempt Philadelphia Electric Company from the requirements of 10 CFR 70.24(a), which requires in each area in which special nuclear material is handled, used, or stored, a monitoring system that will energize clear audible alarms if accidental criticality occurs. The proposed action would also exempt the licensee from the requirements to maintain emergency procedures for each area in which this licensed special nuclear material is handled, used, or stored to ensure that all personnel withdraw to an area of safety upon the sounding of the alarm, to familiarize personnel with the evacuation plan, and to designate responsible individuals for determining the cause of the alarm, and to place radiation survey instruments in accessible locations for use in such an emergency.

The proposed action is in accordance with the licensee's application for exemption dated December 23, 1997.

The Need for the Proposed Action

The purpose of 10 CFR 70.24 is to ensure that if a criticality were to occur during the handling of special nuclear material, personnel would be alerted to that fact and would take appropriate action. At a commercial nuclear power plant the inadvertent criticality with which 10 CFR 70.24 is concerned could occur during fuel handling operations. The special nuclear material that could be assembled into a critical mass at a commercial nuclear power plant is in the form of nuclear fuel; the quantity of other forms of special nuclear material that is stored on site in any given location is small enough to preclude achieving a critical mass. Because the fuel is not enriched beyond 5.0 weight percent Uranium-235 and because commercial nuclear plant licensees have procedures and design features that prevent inadvertent criticality, the staff has determined that it is unlikely that an inadvertent criticality could occur due to the handling of special nuclear material at a commercial power reactor. The requirements of 10 CFR 70.24(a), therefore, are not necessary to ensure the safety of personnel during the handling of special nuclear materials at commercial power reactors. However, an exemption to 10 CFR 70.24(a) is needed to permit deviation from these requirements.

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed action and concludes that the proposed action involves features located entirely within the protected area as defined in 10 CFR part 20.

The proposed action will not result in an increase in the probability or consequences of accidents or result in a change in occupational or offsite dose. Therefore, there are no radiological impacts associated with the proposed action.

The proposed action will not result in a change in nonradiological plant effluents and will have no other nonradiological environmental impact.

Accordingly, the Commission concludes that there are no environmental impacts associated with this action.

Alternatives to the Proposed Action

Since the Commission has concluded there is no measurable environmental impact associated with the proposed action, any alternatives with equal or

VOL 63 ISS 19 JA 29 1998 UMI

greater environmental impact need not be evaluated. As an alternative to the proposed exemption, the staff considered denial of the requested exemption. Denial of the request would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the "Final Environmental Statement Related to the Operation of Limerick Generating Station, Units 1 and 2," dated November 1973.

Agencies and Persons Consulted

In accordance with its stated policy, on January 23, 1998, the staff consulted with the Pennsylvania State official, Mr. David Ney of the Bureau of Radiation Protection, Department of Environmental Protection, regarding the environmental impact of the proposed action. The State official had no comments.

Finding of No Significant Impact

Based upon the environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment.

Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated December 23, 1997, which is available for public inspection at the Commission's Public Document Room, The Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Pottstown Public Library, 500 High Street, Pottstown, PA 19464.

Dated at Rockville, Maryland, this 23rd day of January 1998.

For the Nuclear Regulatory Commission.

Bartholomew C. Buckley,

Senior Project Manager, Project Directorate I–2, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 98–2179 Filed 1–28–98; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

Proposed Generic Communication; Year 2000 Readiness of Computer Systems at Nuclear Power Plants (MA0138)

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of opportunity for public comment.

SUMMARY: The Nuclear Regulatory Commission (NRC) is proposing to issue a generic letter to all holders of operating licenses for nuclear power plants, except those who have permanently ceased operations and have certified that fuel has been permanently removed from the reactor vessel, to require that all addressees provide certain information regarding their programs, planned or implemented, to address the Year 2000 (Y2K) problem in computer systems at their facilities. In particular, addressees are being asked to provide written confirmation of implementation of the programs, and written certification that their facilities are Y2K ready and in compliance with the terms and conditions of their licenses and NRC regulations. This information is being requested under 10 CFR 50.54(f).

The NRC is seeking comment from interested parties on both the technical and regulatory aspects of the proposed generic letter presented under the Supplementary Information heading. In this regard, the NRC encourages the industry to propose a viable alternative to the generic letter as a means of providing the necessary assurance to the NRC that licensees are effectively addressing the Y2K problem in computer systems at their facilities. Such an alternative could consist of a voluntary initiative on the part of the nuclear power industry to obtain licensee inputs and communicate its findings to the NRC.

The proposed generic letter has been endorsed by the Committee to Review Generic Requirements (CRGR). Relevant information that was sent to the CRGR will be placed in the NRC Public Document Room. The NRC will consider comments received from interested parties in the final evaluation of the proposed generic letter. The NRC's final evaluation will include a review of the technical position and, as appropriate, an analysis of the value/impact on licensees. Should this generic letter be issued by the NRC, it will become available for public inspection in the NRC Public Document Room.

DATES: Comment period expires March 2, 1998. Comments submitted after this date will be considered if it is practical to do so, but assurance of consideration cannot be given except for comments received on or before this date.

ADDRESSES: Submit written comments to Chief, Rules and Directives Branch, Division of Administrative Services, U.S. Nuclear Regulatory Commission, Mail Stop T6–D69, Washington, DC 20555–0001. Written comments may also be delivered to 11545 Rockville Pike, Rockville, Maryland, between 7:45 am to 4:15 pm, Federal workdays. Copies of written comments received may be examined at the NRC Public Document Room, 2120 L Street, N.W. (Lower Level), Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Matthew Chiramal, (301) 415–2845.

SUPPLEMENTARY INFORMATION:

NRC Generic Letter No. 98–XX: Year 2000 Readiness of Computer Systems at Nuclear Power Plants

Addressees

All holders of operating licenses for nuclear power plants, except those who have permanently ceased operations and have certified that fuel has been permanently removed from the reactor vessel.

Purpose

The U.S. Nuclear Regulatory Commission (NRC) is issuing this generic letter to require that all addressees provide the following information regarding their programs, planned or implemented, to address the Year 2000 (Y2K) problem in computer systems at their facilities: (1) written confirmation of implementation of the programs, and (2) written certification that the facilities are Y2K ready and in compliance with the terms and conditions of their licenses and NRC regulations.

Description of Circumstances

Simply stated the Y2K computer problem pertains to the potential inability of computers to correctly recognize dates beyond the current century, i.e., beginning with January 1, 2000 and beyond. The problem results from computer hardware or software that uses two-digit fields to represent the year. If the Y2K problem is not corrected, computer systems will be unable to recognize the change in century and will misread "00," for the year 2000, as 1900. The Y2K problem has the potential to interfere with the proper operation of any computer system, any hardware that is microprocessor-based (embedded

software), and any software or database at nuclear power plants. As a consequence, there is a risk that affected plant systems and equipment will fail to function properly.

The Y2K problem is urgent because it has a fixed, non-negotiable deadline. This matter requires priority attention because of the limited time remaining to assess the magnitude of the problem, its associated technical and cost risks, and resource availability, and to implement programs that will achieve satisfactory resolution.

Existing reporting requirements under 10 CFR part 21, 10 CFR 50.72, and 10 CFR 50.73 provide for notification to the NRC staff of deficiencies, non-conformance and failures, such as the Y2K problem in safety-related systems. To date, the NRC staff has not identified nor received notification from licensees or vendors of digital protection systems (e.g., Westinghouse, General Electric, Combustion Engineering, Foxboro, Allen Bradley, or Framatome/Babcock & Wilcox) that a Y2K problem exists with safety-related initiation and actuation systems. However, problems have been identified in non-safety, but important, computer-based systems. Such systems, primarily databases and data collection processes necessary for plant operation that are date driven, may need to be modified for Y2K compliance. Some examples of systems and computer equipment that may be affected by Y2K problems follow:

- Security computers
- Plant process (data scan, log, and alarm) and safety parameter display system computers
- Emergency response systems
- Radiation monitoring systems
- Dosimeters and readers
- Plant simulators
- Engineering programs
- Communication systems
- Inventory control systems
- Surveillance and maintenance tracking systems
- Control systems

To alert nuclear power plant licensees to the Y2K problem, the NRC issued Information Notice (IN) 96–70, "Year 2000 Effect on Computer System Software," on December 24, 1996. In IN 96–70 the staff described the potential problems that nuclear power plant computer systems and software may encounter as a result of the change to the new century and how the Y2K issue may affect NRC licensees. In IN 96–70 the staff encouraged licensees to examine their uses of computer systems and software well before the turn of the century and suggested that licensees consider actions appropriate to examine and evaluate their computer systems for Y2K vulnerabilities. The NRC staff also incorporated recognition of the Y2K concern in the updated Standard Review Plan (SRP), NUREG–0800, Chapter 7, "Instrumentation and Control," dated August 1997, which contains guidance for staff review of computer-based instrumentation and control systems.

At the Nuclear Utilities Software Management Group (NUSMG) Year 2000 Workshop, an industry workshop held in July 1997, nuclear power plant licensees described their Y2K programs, and gave examples of areas in which they addressed Y2K issues in order to ensure the safety and operability of their plants on January 1, 2000. Some of the issues discussed were the (1) evaluation of the impact of the Y2K problem on plant equipment, (2) assessment process involved in the identification of Y2K affected components, vendors, and interfaces, (3) development of Y2K testing strategies, and (4) identification of budget needs to address the Y2K problem.

The Nuclear Energy Institute (NEI) met with NUSMG and nuclear plant utility representatives in August 1997 to formulate an industry-wide plan to address the Y2K issue. On October 7, 1997, representatives of NEI and NUSMG met with the NRC staff to discuss actions NEI was taking to help utilities make their plants "Year 2000 ready." NEI was preparing a framework document with guidance for utility use in readying for the Year 2000. The framework document makes a distinction in terminology between "Y2K readiness" ("Y2K Ready" is defined as a computer system or application that has been determined to be suitable for continued use into the year 2000 even though the computer system or application is not fully Y2K Compliant) and "Y2K compliance" ("Y2K Compliant" is defined as computer systems or applications that accurately process date/time data (including but not limited to, calculating, comparing, and sequencing) from, into and between the twentieth and twenty-first centuries, the years 1999 and 2000, and leap-year calculations). NEI/NUSMG issued the framework document NEI/NUSMG 97–07, "Nuclear Utility Year 2000 Readiness" to all licensees in November 1997. The document recommends methods for nuclear utilities to attain Y2K readiness and thereby ensure that their facilities remain safe and continue to operate within the requirements of their license. The scope of NEI/NUSMG 97–07 covers software, or software-based systems or interfaces, whose failure (due to the Y2K problem) would (1) prevent the performance of the safety function of a structure, system or component and (2) degrade, impair, or prevent operability of the nuclear facility.

Discussion

Diverse concerns are associated with the potential impact of the Y2K problem on nuclear power plants because of the variety and types of computer systems in use. Some of the concerns are the (1) scheduling of maintenance and technical specification surveillance requirements, (2) use and application of programmable logic controllers and other commercial off-the-shelf software and hardware, (3) operation of process control systems, (4) performance of engineering calculations, and (5) collection of operating and post-accident plant parameter data.

Some vendors have taken such actions as placing information on the Internet discussing which of their products are Y2K compliant, and how the vendor is addressing the Y2K problem with respect to specific products, including products purchased by their nuclear power plant customers. When addressing some of the particular issues associated with the use and application of software, it has been found that even if the application has no apparent date manipulation algorithms, it may still be affected by a Y2K related problem. For example, a subroutine that date stamps the header information in archival tapes regardless of the rest of the content of the tape may be affected. In addition, although individually several systems may be "date safe," the integrated operations that the systems support may be vulnerable to the Y2K problem. Further, there are potential impacts from the operating system supporting their instrumentation system's application software and from sub-programs (such as calibration and data recording/reporting) associated with the main application software.

One application which is common to all power reactor licensees is the link between plant computers and the NRC's Emergency Response Data System (ERDS). This application performs the communication and data transmission function which provide near real-time data availability to NRC and state incident response personnel during declared emergencies. The NRC is currently performing Y2K related upgrades to ERDS which will maintain the same communication protocol as the current system with the exception that either 2-digit or 4-digit year fields will be accepted. Those licensees that anticipate changes to their ERDS link should allow time in their schedules for retesting their systems. NRC contractors

VOL 63 ISS 19 JA 29 1998 UMI

will support requests for testing on a "first come, first served" basis.

NEI/NUSMG 97–07 suggests a strategy for developing and implementing a nuclear utility Y2K program. The strategy recognizes management, implementation, quality assurance, regulatory considerations, and documentation as the fundamental elements of a successful Y2K project. The document contains additional guidance for these fundamental elements. The recommended components for management planning are management awareness, sponsorship, project leadership, project objectives, project management team, management plan, project reports, interfaces, resources, oversight, and quality assurance. The suggested phases of implementation are awareness, initial assessment (which includes inventory, categorization, classification, prioritization, and analysis of initial assessment), detailed assessment (including vendor evaluation, utility-owned or -supported software evaluation, interface evaluation, remedial planning), remediation, Y2K testing and validation, and notification. The quality assurance (QA) measures apply to project management QA and implementation QA.

Regulatory considerations include the performance of appropriate reviews, reporting requirements, and documentation. Documentation of Y2K program activities and results includes documentation requirements, project management documentation, vendor documentation, inventory lists, checklists for initial and detailed assessments, and record retention. NEI/NUSMG 97–07 also contains examples of various plans and checklists as appendices.

The staff believes that the guidance in NEI/NUSMG 97–07, when properly implemented, will present an appropriate approach for licensees to address the Y2K problem at nuclear power plant facilities.

In the course of implementing the Y2K readiness program, problems could be identified that potentially impact the licensing basis of the plants. In certain cases, license amendments may be needed to address the problem resolution. Licensees should submit such license amendments to the NRC on a timely basis. The utility Y2K readiness programs and schedules should have the flexibility to accommodate such an eventuality. In addition, licensees are reminded that any changes to their facilities that impact their current licensing basis must be reviewed in accordance with existing NRC requirements and the change properly documented.

Required Response

In order to gain the necessary assurance that addressees are effectively addressing the Y2K problem and are in compliance with the terms and conditions of their licenses and NRC regulations, the NRC staff requires that all addressees submit a written response to this generic letter as follows:

(1) Within 90 days of the date of this generic letter, submit a written response indicating whether or not you have pursued and are continuing to pursue a Y2K readiness program as outlined in NEI/NUSMG 97–07. If you are not conforming to the NEI/NUSMG guidance, present a brief description of the program(s) that have already been completed, are being conducted, or are planned to ensure Y2K readiness of the computer systems at your facility(ies). This response should address the program's scope, assessment process, and plans for corrective actions (including testing, and schedules).

(2) Upon completing your Y2K readiness program, or, in any event, no later than July 1, 1999, submit a written response confirming that your facility is Y2K ready and in compliance with the terms and conditions of your license(s) and NRC regulations. In addition, the response should contain a status report of work remaining to be done to complete your Y2K program, including completion schedules. ("Y2K Ready" is defined as a computer system or application that has been determined to be suitable for continued use into the year 2000 even though the computer system or application is not fully Y2K Compliant. "Y2K Compliant" is defined as computer systems or applications that accurately process date/time data (including but not limited to, calculating, comparing, and sequencing) from, into and between the twentieth and twenty-first centuries, the years 1999 and 2000, and leap-year calculations.)

Address the written reports to the U.S. Nuclear Regulatory Commission, Attention: Document Control Desk, Washington, D.C. 20555–0001, under oath or affirmation under the provisions of Section 182a, Atomic Energy Act 1954, as amended, and 10 CFR 50.54(f). In addition, submit a copy to the appropriate regional administrator.

Backfit Discussion

This generic letter only requests information from addressees under the provisions of Section 182a of the Atomic Energy Act of 1954, as amended, and 10 CFR 50.54(f). The requested information will enable the staff to verify that each nuclear power plant licensee is implementing an effective plan to address the Y2K problem and provide for safe operation of the facility before January 1, 2000, and is in compliance with the terms and conditions of their license(s) and NRC regulations. The following NRC regulations are a basis for this request:

- 10 CFR 50.36, "Technical Specifications," paragraph (c)(3), "Surveillance requirements," and paragraph (c) (5), "Administrative controls." These relate, respectively, to requirements relating to test, calibration, or inspection to assure that the necessary quality of systems and components is maintained, and to provisions relating to management, procedures, record keeping, and review and audit necessary to assure operation of the facility in a safe manner.
- 10 CFR 50.47, "Emergency plans," paragraph (b)(8), which relates to the provision and maintenance of adequate emergency facilities and equipment to support the emergency responses.
- Appendix B to 10 CFR Part 50, Criterion III, "Design Control," requires that design control measures shall provide for verifying or checking the adequacy of design, such as by the performance of design reviews, by the use of alternate or simplified calculational methods, or by the performance of a suitable testing program.
- Appendix B to 10 CFR Part 50, Criterion XVII, "Quality Assurance Records," requires that sufficient records shall be maintained to furnish evidence of activities affecting quality. The records are to include, among others, operating logs and results of reviews.
- Appendix E to 10 CFR 50, Section VI, "Emergency Response Data System" which relates to the provision and maintenance of licensee links to the Emergency Response Data System.

In addition, the following requirements from Appendix A to 10 CFR part 50, "General Design Criteria for Nuclear Power Plants", also provide a basis for the request: (In the statement of consideration (SOC) for the amendment to 10 CFR part 50 which added Appendix A, "General Design Criteria for Nuclear Power Plants," published in the **Federal Register** on February 20, 1971, the Commission noted that the general design criteria added as Appendix A to Part 50 establish the minimum requirements for the principal design criteria for water-cooled nuclear power plants similar in design and location to plants for which construction permits have been issued by the Commission. Principal design criteria established by an applicant and accepted by the Commission will be incorporated by reference in the construction permit. The SOC also notes that in considering the issuance of an operating license under part 50, the Commission will require assurance that these criteria have been satisfied in the detailed design and construction of the facility and any changes in such criteria are justified. It should be noted that a proposed Appendix A to 10 CFR part 50 was published in the **Federal Register** on July 11, 1967, and the comments and suggestions received in response to the notice of proposed rule making and subsequent developments in the technology and in the licensing process have been considered in developing the general design criteria.)

- Appendix A to 10 CFR part 50, General Design Criterion (GDC) 13, "Instrumentation and control," which addresses the provision of appropriate instrumentation and controls to monitor and control systems and variables during normal operation, anticipated operational occurrences, and accident conditions as appropriate to ensure adequate safety.
- Appendix A to 10 CFR part 50, GDC 19, "Control room," which requires the provision of a control room from which actions can be taken to operate the nuclear plant safely.
- Appendix A to 10 CFR part 50, GDC 23, "Protection system failure modes," which requires that the protection system shall be designed to fail into a safe state or into a state demonstrated to be acceptable on some other defined basis.

Dated at Rockville, Maryland, this 23rd day of January 1998.

For the Nuclear Regulatory Commission.

Jack W. Roe,

Acting Director, Division of Reactor Program Management, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 40–8989; License No. SUA–1559]

Envirocare of Utah, Inc.; Notice of Receipt of Petition for Director's Decision Under 10 CFR 2.206

Notice is hereby given that by petition dated December 12, 1997, Mr. Thomas B. Cochran, Director of Nuclear Programs, Natural Resources Defense Council (NRDC) requested that the U.S. Nuclear Regulatory Commission (NRC) take action with regard to Envirocare of Utah, Inc. (Envirocare). The Petitioner requests that the NRC: (1) Conduct an immediate investigation of issues raised in the Petition and immediately suspend Envirocare's NRC license; (2) conduct an investigation of possible criminal violations of section 223 of the Atomic Energy Act of 1954, as amended (the Act); (3) immediately suspend Envirocare's license with the State of Utah, under section 274j(2) of the Act; (4) investigate the adequacy of the State of Utah agreement state program to protect whistle blowers; (5) contact each current and former Envirocare employee personally, on a confidential basis, to advise them of their rights to inform the NRC of unsafe practices and violations, to inform them of the protections available to them, and to ask them if they have any information which they wish to disclose, on a confidential basis or otherwise; and (6) order a special independent review of Envirocare's relationships with its employees, along the lines of the review ordered by the NRC for the Millstone site.

As a basis for this request, the petitioner states that Envirocare's employee-related practices and contractual provisions constitute a violation of 42 U.S.C. 5851 and the NRC's whistle blower protection regulations under Parts 19 and 40 of Title 10 of the Code of Federal Regulations (i.e., 10 CFR 19.16, 19.20, and 40.7). Specifically, the petitioner states that current and former Envirocare employees who have provided to governmental authorities information adverse to Envirocare's interests fear for their lives and the lives of their families, should their identities become known to an officer of Envirocare. The petitioner also states that certain provisions in Envirocare's standard employment contract prevent its employees from disclosing to the NRC information concerning unsafe practices and violations under the NRC license and threaten them with severe financial penalties in the event of a disclosure.

The request for an investigation and the suspension of Envirocare's NRC license is being treated pursuant to 10 CFR 2.206 of the Commission's regulations. The request has been referred to the Director of the Office of Nuclear Material Safety and Safeguards. As provided by § 2.206, appropriate action will be taken on this petition within a reasonable time. By letter dated January 16, 1998, the Director denied the petitioner's request for immediate action concerning Envirocare's NRC license. A copy of the petition is available for public inspection and copying at the NRC Public Document Room, in the Gelman Building, 2120 L Street NW., Washington, DC 20555.

Dated at Rockville, Maryland, this 16th day of January 1998.

For the Nuclear Regulatory Commission.

Carl J. Paperiello,

Director, Office of Nuclear Material Safety and Safeguards.

[FR Doc. 98–2178 Filed 1–28–98; 8:45 am]

BILLING CODE 7590–01–P

RAILROAD RETIREMENT BOARD

Proposed Collection; Comment Request

SUMMARY: In accordance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 which provides opportunity for public comment on new or revised data collections, the Railroad Retirement Board (RRB) will publish periodic summaries of proposed data collections.

Comments Are Invited On

(a) Whether the proposed information collection is necessary for the proper performance of the functions of the agency, including whether the information has practical utility; (b) the accuracy of the RRB's estimate of the burden of the collection of the information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden related to the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Title and Purpose of Information Collection

Withholding Certificate for Railroad Retirement Monthly Annuity Payments; OMB 3220–0149.

The Internal Revenue Code requires all payers of tax liable private pensions to U.S. citizens to: (1) Notify each recipient at least concurrent with initial withholding that the payer is, in fact, withholding benefits for tax liability and that the recipient has the option of electing not to have the payer withhold, or to withhold at a specific rate; (2) withhold benefits for tax purposes (in the absence of the recipient's election not to withhold benefits); and (3) notify all beneficiaries, at least annually, that they have the option of changing their withholding status or elect not to have benefits withheld.

The Railroad Retirement Board provides Form RRB–W4P, Withholding Certificate for Railroad Retirement

VOL 63 ISS 19 JA 29 1998 UMI

Payments, to its annuitants to exercise their withholding options. Completion of the form is required to obtain or retain a benefit. One response is requested of each respondent.

No changes are being proposed to the current version of Form RRB W–4P used by the RRB. The RRB estimates that 25,000 annuitants utilize Form RRB W–4P annually. The completion time for Form RRB W–4P varies depending on individual circumstances. The average completion time for Form RRB W–4P is estimated at 40 minutes for recordkeeping, 20 minutes for learning about the law or the form, and 49 minutes for preparing the form.

ADDITIONAL INFORMATION OR COMMENTS: To request more information or to obtain a copy of the information collection justification, forms, and/or supporting material, please call the RRB Clearance Officer at (312) 751–3363. Comments regarding the information collection should be addressed to Ronald J. Hodapp, Railroad Retirement Board, 844 N. Rush Street, Chicago, Illinois 60611–2092. Written comments should be received within 60 days of this notice.

Chuck Mierzwa,

Clearance Officer.

BILLING CODE 7905–01–M

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. IC–23007; 812–10932]

American Century Capital Investment Management, Inc., et al.; Notice of Application

January 22, 1998.

AGENCY: Securities and Exchange Commission (the "SEC" or the "Commission").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 (the "Act").

APPLICANTS: American Century Capital Portfolios, Inc. (the "Company"), on behalf of its series American Century Real Estate Fund (the "Fund"), American Century Investment Management, Inc. (the "Advisor"), RREEF Real Estate Securities Adviser, L.P. (the "Subadvisor"), and ROMEO America. L.L.C. (the "New Subadvisor").

RELEVANT ACT SECTIONS: Order requested under section 6(c) of the Act to exempt applicants from the provisions of section 15 (a) of the Act.

SUMMARY OF APPLICATION: Applicants seek an order to permit the implementation, without prior shareholder approval, of an investment subadvisory agreement ("New Subadvisory Agreement") among the Fund, the Advisor and the New Subadvisor for a period of up to 120 days following the later of the acquisition of substantially all the assets of the Subadvisor by the New Subadvisor or the date on which the order is issued, but in no event later than May 27, 1998 (the "Interim Period"). The order would also permit the New Subadvisor to receive from the Advisor fees earned under the New Subadvisory Agreement following approval by the Fund's shareholders.

FILING DATES: The application was filed on December 29, 1997. Applicant has agreed to file an amendment, the substance of which is incorporated in this notice, during the notice period.

HEARING OR NOTIFICATION OF HEARING: An Order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on February 13, 1998, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, N.W., Washington, D.C. 20549. Applicants, c/o Skadden, Arps, Slate, Meagher & Flom (Illinois), 333 West Wacker Drive, Suite 2300, Chicago, Illinois 60606, Attn: Peter C. Krupp.

FOR FURTHER INFORMATION CONTACT: Lawrence W. Pisto, Senior Counsel, at (202) 942–0527, or Nadya B. Roytblat, Assistant Director, at (202) 942–0564 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch, 450 Fifth Street, NW., Washington, DC 20549 (tel. (202) 942–8090).

Applicants' Representations

1. The Company is a Maryland corporation registered under the Act as an open-end management investment company. The Fund is a series of the Company. The Advisor, a Delaware corporation and an investment adviser registered under the Investment Advisers Act of 1940 ("Advisers Act"), acts as the Fund's investment adviser. The Subadvisor, a California limited partnership and an investment adviser registered under the Advisers Act, acts as subadviser to the Fund under the terms of a subadvisory agreement (the "Existing Subadvisory Agreement"). The New Subadvisor is a Delaware limited liability company and an indirect, wholly-owned subsidiary of ROMEO U.S. Group, Inc. ("ROMEO"). The applicants represent that the New Subadvisor will be a duly registered investment adviser under the Advisers Act because either (i) the New Subadvisor shall have filed a Form ADV with the SEC that has become effective on or before the Closing Date (as defined below), or (ii) in reliance on section 203(g) of the Advisers Act.

2. The New Subadvisor has agreed to acquire and purchase substantially all of the assets of the Subadvisor pursuant to an acquisition agreement dated December 14, 1997 (the "Acquisition"). In connection with the Acquisition, the Subadvisor will transfer all of the investment advisory agreements to which the Subadvisor is a party, including the Existing Subadvisory Agreement, to ROMEO. Applicants expect that the Acquisition will be consummated on January 27, 1998.

3. The consummation of the Acquisition will result in an assignment of the Existing Subadvisory Agreement within the meaning of section 2(a)(4) of the Act, terminating such agreement according to its terms and the Act. Applicants seek an exemption to permit: (i) The implementation, without prior shareholder approval, of the New Subadvisory Agreement; and (ii) the New Subadvisor to receive from the Advisor, subject to shareholder approval, any and all fees earned under the New Subadvisory Agreement during the Interim Period. The requested exemption would cover an Interim Period of not more than 120 days beginning on the later of the day the Acquisition is consummated (the "Closing Date"), or the issuance of the requested order and continuing through the date the New Subadvisory Agreement is approved by the shareholders of the Fund (and in any event no later than May 27, 1998).[1] The New Subadvisory Agreement will contain substantially the same terms and conditions as the Existing Subadvisory Agreement, except for the dates of execution and termination and the inclusion of escrow arrangements.

4. Applicants state that prior to the Closing Date, the Board of Directors of the Company (the "Board") will meet, in accordance with Section 15(c) of the Act to consider the New Subadvisory Agreement and to evaluate whether the terms of the New Subadvisory Agreement are in the best interests of the Fund and its shareholders. The Board intends to hold such a meeting on January 23, 1998. To the extent that the Board cannot meet prior to the Closing Date, applicants acknowledge that they may not rely on the exemptive relief requested in the application.

5. Applicants propose to enter into escrow arrangements with an unaffiliated financial institution as escrow agent. The arrangements, in substance, would provide that: (i) The portion of the investment subadvisory fees earned by the New Subadvisor during the Interim Period under the New Subadvisory Agreement would be paid into an interest-bearing escrow account maintained by the escrow agent; and (ii) the amounts in the escrow account (including interest earned on such amounts) would be paid to the New Subadvisor only upon approval by the Fund's shareholders of the New Subadvisory Agreement or, in the absence of such approval, to the Fund. Before any such release is made, the Board will be notified.

Applicants' Legal Analysis

1. Section 15(a) of the Act prohibits an investment adviser from providing investment advisory services to a registered investment company except under a written contract that has been approved by a majority of the voting securities of the investment company. Section 15(a) of the Act further requires that the written contract provide for automatic termination in event of its assignment. Section 2(a)(4) of the Act defines "assignment" to include any direct or indirect transfer of a contract by the assignor or of a controlling block of the assignor's outstanding voting securities by a security holder of the assignor.

2. Applicants represent that the Acquisition will result in an "assignment," within the meaning of section 2(a)(4) of the Act, of the Existing Subadvisory Agreement, terminating the Agreement according to its terms.

3. Rule 15a–4 provides, in pertinent part, that if an investment adviser's investment advisory contract with a registered investment company is terminated by assignment, the adviser may continue to act as such for 120 days under a written contract that has not been approved by the investment company's shareholders, if the new contract is approved by the board of directors of the investment company (including a majority of the noninterested directors), the compensation to be paid under the new contract does not exceed the compensation which would have been paid under the contract most recently approved by shareholders of the investment company, and neither the investment adviser nor any controlling person of the investment adviser "directly or indirectly receive money or other benefit" in connection with the assignment. Applicants cannot rely on rule 15a–4 because of the benefits to the members, partners and shareholders of the Subadviser arising from the Acquisition.

4. Section 6(c) of the Act permits the SEC to conditionally or unconditionally exempt any person, security, or transaction from any provision of the Act or any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Applicants believe that the requested relief meets this standard.

5. Applicants note that the terms and timing of the Acquisition were determined by the New Subadvisor and the Subadvisor in response to a number of factors beyond the scope of the Act and substantially unrelated to the Fund. The Acquisition contemplates the sale of the assets of four entities, including the Subadvisor, and the assignment of more than 200 investment advisory and property management contracts. The assignment of the Existing Subadvisory Agreement constitutes a relatively small part of the Acquisition.

6. During the Interim Period, the New Subadvisor will render investment subadvisory services to the Fund under the New Subadvisory Agreement, which will be substantially the same as the Existing Subadvisory Agreement. The applicants represent that during the Interim Period the Fund will receive the same scope and quality of investment subadvisory services provided by essentially the same personnel under the New Subadvisory Agreement as it receives under the Existing Subadvisory Agreement, in the same manner and at the same fee levels. Although the Subadvisor does not anticipate any change in the personnel providing services to the Fund, if such personnel change materially, the New Subadvisor will apprise and consult with the Board to make sure that the Board, including a majority of the noninterested Board members, is satisfied that the services provided during the Interim Period will not be diminished in scope and quality.

7. Applicants believe that the requested relief is consistent with the protection of investors because it will permit continuity of investment subadvisory services to the Fund. Applicants submit that to deprive the New Subadvisor of investment advisory fees earned during the Interim Period would be an unduly harsh and unreasonable penalty.

Applicants' Conditions

Applicants agree as conditions to the issuance of the exemptive order requested by this application that:

1. The New Subadvisory Agreement will contain substantially the same terms and conditions as the Existing Subadvisory Agreement, except for the dates of execution and termination and the inclusion of escrow arrangements.

2. That portion of the investment subadvisory fee earned by the New Subadvisor during the Interim Period will be maintained in an interest-bearing escrow account, and amounts in the account (including interest earned on such amounts) will be paid (a) to the New Subadvisor in accordance with the New Subadvisory Agreement, only upon approval of the Fund's shareholders, or (b) in the absence of such approval prior to the expiration of the Interim Period, to the Fund.

3. The Fund will promptly schedule a meeting of shareholders to vote on the approval of the New Subadvisory Agreement to be held within 120 days following the commencement of the Interim Period (but in no event later than May 27, 1998).

4. The Subadvisor or the New Subadvisor will pay the costs of preparing and filing the application. The Subadvisor or the New Subadvisor will pay the costs relating to the solicitation and approval of Fund shareholders of the New Subadvisory Agreement necessitated by the Acquisition.

5. The New Subadvisor will take all appropriate actions to ensure that the scope and quality of subadvisory and other services provided to the Fund by the New Subadvisor during the Interim Period will be at least equivalent, in the

[1] Applicants state that if the Closing Date precedes issuance of the requested order, the New Subadvisor will serve as subadviser to the Fund after the Closing Date and until the issuance of the order in a manner consistent with its fiduciary duty. Applicants also state that the Advisor will be required to pay to the New Subadvisor, with respect to the period from the Closing Date until the issuance of the order, no more than the actual out-of-pocket cost to the New Subadvisor for providing investment subadvisory services to the Fund.

VOL 63 ISS 19 JAN 29 1998 UMI

judgment of the Board, including a majority of the noninterested Board members, to the scope and quality of services previously provided. In the event of any material change in personnel providing material services pursuant to the New Subadvisory Agreement, the New Subadvisor will apprise and consult with the Board to make sure that the Board, including a majority of the noninterested members, is satisfied that the services provided will not be diminished in scope or quality.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. IC–23006; File No. 812–10750]

Great-West Life & Annuity Insurance Company, et al; Notice of Application

January 22, 1998.

AGENCY: The Securities and Exchange Commission ("Commission").

ACTION: Notice of application for an order pursuant to Section 26(b) of the Investment Company Act of 1940 (the "1940 Act") approving certain substitutions of securities, and pursuant to Section 17(b) of the 1940 Act exempting related transactions from Section 17(a) of the 1940 Act.

SUMMARY OF APPLICATION: Applicants request an order to permit certain registered unit investment trusts to substitute shares of certain registered open-end investment companies for shares of certain registered investment companies currently held by those unit investment trusts, and to permit certain in-kind redemptions of portfolio securities in connection with the substitutions.

APPLICANTS: Great-West Life & Annuity Insurance Company ("GWL&A"), Maxim Series Account (the "Maxim Account"), Pinnacle Series Account (the "Pinnacle Account," together with GWL&A and the Maxim Account, the "Separate Accounts"), Maxim Series Fund, Inc. ("Maxim Series Fund") and BenefitsCorp Equities, Inc. ("BCE").

FILING DATE: The application was filed on August 8, 1997, and amended and restated on December 9, 1997.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Secretary of the Commission and serving Applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on February 17, 1998, and should be accompanied by proof of service on Applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the Secretary of the Commission.

ADDRESSES: Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Applicants, c/o Jorden Burt Berenson & Johnson, LLP, 1025 Thomas Jefferson Street, N.W., Suite 400 East, Washington, D.C. 20007–0805, Attention: Josephine Cicchetti, Esq.

FOR FURTHER INFORMATION CONTACT: Ethan D. Corey, Senior Counsel, at (202) 942–0675, or Kevin M. Kirchoff, Branch Chief, at (202) 942–0672, Office of Insurance Products, Division of Investment Management.

SUPPLEMENTARY INFORMATION: The following is a summary of the application; the complete application may be obtained for a fee from the Public Reference Branch of the Commission, 450 5th Street, N.W., Washington, D.C. 20549 (tel. (202) 942–8090).

Applicants' Representations

1. GWL&A, a Colorado stock life insurance company, does business in the District of Columbia, Puerto Rico, and in all states of the United States, except New York.

2. GWL&A is wholly-owned by The Great-West Life Assurance Company, which is a subsidiary of Great-West Lifeco Inc., an insurance holding company. Great-West Lifeco Inc. is a subsidiary of Power Financial Corporation of Canada, which is controlled by Power Corporation of Canada.

3. The Maxim Account, a separate account established by GWL&A under Colorado law, is registered with the Commission as a unit investment trust. The Maxim Account is a distinct investment account of GWL&A which acts as a funding vehicle for certain individual flexible premium variable deferred annuity contracts (the "Maxim Contracts").

4. Currently there are three different Maxim Contracts issued under the Maxim Account. Two of the Maxim Contracts ("MSA–1" and "MSA–2") are no longer sold, have fewer than 5,000 participants and no longer file post effective amendments in reliance upon a no-action letter. MSA–1 has five investment divisions, each of which invests exclusively in one of the corresponding portfolios of Maxim Series Fund, an open-end management investment company. MSA–2 has seven investment divisions, five of which invest solely in corresponding portfolios of Maxim Series Fund and two of which invest solely in corresponding portfolios of American Century Variable Portfolios, Inc. ("American Century"), another open-end management investment company. The third Maxim Contract ("MVP") has fifteen investment divisions, thirteen of which invest solely in corresponding portfolios of Maxim Series Fund and two of which invest solely in corresponding portfolios of American Century.

5. The Maxim Account is used in connection with Maxim Contracts that may be issued under retirement plans which qualify for federal tax benefits under Sections 401 and 408 of the Internal Revenue Code (the "Code") as individual retirement accounts and under other retirement plans which do not qualify under the Code.

6. The Pinnacle Account, a separate account established by GWL&A under Colorado law, is registered with the Commission as a unit investment trust. The Pinnacle Account is a distinct investment account of GWL&A which acts as a funding vehicle for certain single premium variable life insurance policies (the "Policies," together with the Maxim Contracts, the "Contracts").

7. The Policies have five investment divisions, each of which invests exclusively in one of the corresponding portfolios of the Maxim Series Fund.

8. The Pinnacle Account no longer files post-effective amendments to its registration statement in reliance upon a no-action letter granted to GWL&A and the Pinnacle Account.

9. BCE is the principle underwriter and distributor of MVP. The Policies, MSA–1, and MSA–2 are not currently sold and there is no need for an underwriter. BCE is registered with the Commission under the Securities Exchange Act of 1934 as a broker-dealer and is a member of the National Association of Securities Dealers, Inc.

10. Of the Contracts and Policies, only MVP is still sold. MVP may be issued under retirement plans which qualify for federal tax benefits under Sections 401 and 408 of the Code as individual retirement accounts and under other retirement plans which do not qualify under the Code.

11. All of the Contracts expressly reserve GWL&A's right, both on its own behalf and on behalf of the Separate Accounts, to eliminate investment divisions, combine two or more investment divisions, or substitute one or more underlying funds for others in which its investment divisions are invested.

12. GWL&A, on its own behalf and on behalf of the Pinnacle Account and the Maxim Account, proposes to exercise its contractual right to eliminate the Maxim Series Fund Total Return Portfolio ("Total Return Portfolio") as an investment division under the Policies and MSA–1. GWL&A also proposes, on its behalf and on behalf of the Maxim Account to exercise its contractual right to eliminate the Total Return Portfolio and the American Century Balanced Portfolio (collectively, the "Eliminated Portfolios") as investment divisions under MVP and MSA–2.

13. With respect to MVP, GWL&A proposes to substitute shares of the Maxim Series Fund Maxim INVESCO Balanced Portfolio (the "Balanced Portfolio") for shares of the Eliminated Portfolios. In addition, with respect to MSA–1 and MSA–2, GWL&A proposes to substitute shares of the Maxim Series Fund Maxim Stock Index Portfolio (the "Index Portfolio," together with the Balanced Portfolio, the "Substituted Portfolios") for shares of the Eliminated Portfolios. Finally, with respect to the Policies, GWL&A proposes to substitute shares of the Index Portfolio for shares of the Total Return Portfolio. When discussed together, the Pinnacle Account and the Maxim Account substitutions will be collectively referred to as the "Substitution." Applicants believe the Substitution will benefit the Contract owners by eliminating portfolios with below average historical return..

14. The investment objective of the Total Return Portfolio is to obtain the highest possible total return, through a combination of income and capital appreciation, consistent with reasonable risk. The investment objective of the American Century Balanced Portfolio is capital growth and current income. The investment objective of the Index Portfolio is to provide investment results, before fees, that correspond to the total return of the Standard & Poor's ("S&P") 500 Index and the S&P Mid-Cap Index, weighted according to their respective pro-rata shares of the market. The investment objective of the Balanced Portfolio is to achieve a high total return on investment through capital appreciation and current income.

15. As of September 30, 1997, the Maxim Total Return Portfolio has provided 1, 5 and 10 year (or since investment division inception) total returns of (i) 24.91%, 12.01% and 9.30% to MSA–1 Contract owners; (ii) 24.72%, 11.87% and 9.52% to MSA–2 Contract owners; (iii) 24.95% and 9.39% to MVP Contract owners; and (iv) 25.81%, 12.87% and 12.43% to Pinnacle Policy owners.[1] The American Century Balanced Portfolio has provided 1, 5 and 10 year (or since investment division inception) total returns of 19.20%, 10.56% and 10.23% to MSA–2 Contract owners. The Maxim Stock Index Fund has provided 1, 5 and 10 year (or since investment division inception) total returns of: (i) 36.68%, 17.00% and 11.37% to MSA–1 Contract owners; (ii) 37.40%, 17.21% and 11.41% to MSA–2 Contract owners; and (iii) 38.52%, 18.31% and 12.42% to Pinnacle Policy owners. The Maxim INVESCO Balanced Portfolio has provided total return of 28.26% to MVP Contract owners since its inception on October 1, 1996. The Maxim INVESCO Balanced Portfolio was created to copy the investment strategy of the INVESCO Balanced Fund and is sub-advised by the same portfolio manager that advises the INVESCO Balanced Fund. The one-year and since-inception total return of the INVESCO Balanced Fund are 25.75% and 20.63%, respectively. The expense level of the INVESCO Balanced Fund is 1.29%; the expense level of the Maxim INVESCO Balanced Portfolio is 1.00%.

16. Contract owners will be advised of their ability to transfer their Contract value to the remaining investment divisions or to leave their Contract value in the Eliminated Portfolios for an automatic substitution on the date that GWL&A will schedule the Substitution to occur (the "Automatic Selection Date"). As of the Automatic Selection Date, all Contract values allocated to the Eliminated Portfolios automatically will be reallocated to the Substituted Portfolios. No Eliminated Portfolio will accept additional premium payments (i.e., new money or transfers) on or after the Automatic Selection Date. Contract owners can transfer their assets from the Substituted Portfolios to any remaining investment division available under their Contracts. No sales load deductions or transfer charges will be assessed in connection with any transfers among the portfolios because of the Substitution or otherwise.

[1] Total return figures for the Pinnacle Policies do not reflect the deduction of cost of insurance charges..

17. Applicants represent that, as noted before, the total expenses of the Balanced Portfolio currently are 1.00%, which is the same as the total expenses of the American Century Balanced Portfolio. Therefore, MVP owners with investments in the American Century Balanced Portfolio will not pay greater costs at the portfolio level. The total expenses of the Maxim Total Return Portfolio are 0.60%. Should MVP owners with current allocations in the Maxim Total Return Portfolio determine that another investment is more appropriate, due to the change in portfolio expenses, those owners of MVP can transfer their assets to any of the remaining twelve investment divisions available under their Contract.

18. With respect to MSA–1 and MSA–2, Applicants represent the total expenses of the Index Portfolio are 0.60%. This is less than the total expenses of the American Century Balanced Portfolio and equal to the total expenses of the Maxim Total Return Portfolio. Should MSA–1 and MSA–2 Contract owners with current allocations in the Eliminated Portfolios determine that another investment is more appropriate for their needs, such Contract owners can transfer their assets to any of the remaining investment divisions available under their respective Contracts.

19. Policy owners will not incur any additional expenses at the policy level. As stated above, the total expenses of the Index Portfolio are equal to the total expenses of the Maxim Total Return Portfolio. Should Policy owners with current allocations in the Eliminated Portfolio determine that another investment is more appropriate for their needs, such Policy owners can transfer their assets to any of the remaining investment divisions.

Applicants' Legal Analysis And Conditions

1. Section 26(b) of the 1940 Act provides that it shall be unlawful for any depositor or trustee of a registered unit investment trust holding the security of a single issuer to substitute another security for such security unless the Commission shall have approved such substitution; and the Commission shall issue an order approving such substitution if the evidence establishes that it is consistent with the protection of investors and the purposes fairly intended by the policies and provisions of the 1940 Act. Section 26(b) protects the expectation of investors that the unit investment trust will accumulate shares of a particular issuer and is intended to insure that unnecessary or burdensome sales loads, additional reinvestment

VOL 63 ISS 19 JA 29 1998 UMI

costs or other charges will not be incurred due to unapproved substitutions of securities.

2. Applicants request an order pursuant to Section 26(b) of the 1940 Act approving the Substitution. Applicants represent that the purposes, terms, and conditions of the Substitution are consistent with the protection for which Section 26(b) was designed. Applicants believe the Substitution will benefit MVP and MSA–2 owners by eliminating two portfolios with below-average historical returns and consolidating their investments in portfolios which have investment objectives similar to the Eliminated Portfolios. MSA–1 owners and Policy owners will also benefit because of the elimination of a poorly performing portfolio and the consolidation of their investments in a portfolio which has investment objectives similar to the Total Return Portfolio.

3. Any Contract owner who does not want his or her assets allocated to the Substituted Portfolios would be able to transfer assets to any one of the other investment divisions available under their Contract without charge prior to or after the Automatic Selection Date.

4. Applicants represent that the Substitution will be effected at net asset value in conformity with Sections 22(c) and 22(g) of the 1940 Act and Rule 22c–1 thereunder. The Substitution may be effected primarily for cash, but also may involve partial redemptions in-kind of securities ("Related Transactions"). The use of in-kind redemptions in conformity with Section 22(g) of the 1940 Act would alleviate the impact of the brokerage fees and expenses upon GWL&A or the investment adviser or sub-adviser of the Substituted Portfolio, as these entities will bear all expenses related to the Substitution. The Related Transactions will be effected to the extent consistent with the investment objectives and any applicable diversification requirements.

5. GWL&A or the investment adviser of the Substituted Portfolios will assume the transfer and custodial expenses and legal and accounting fees incurred with respect to the Substitution. Contract owners will not incur any fees or charges as a result of the transfer of account values from any portfolio. Applicants represent that there will be no increase in the Contract or Separate Account fees and charges after the Substitution. Applicants further represent that the Substitution is designed to avoid any adverse federal income tax effect on Contract owners or Policy owners.

6. Section 17(a)(1) of the 1940 Act prohibits any affiliated person or an affiliate of an affiliated person, of a registered investment company, from selling any security or other property to such registered investment company. Section 17(a)(2) of the 1940 Act prohibits such affiliated persons from purchasing any security or other property from such registered investment company.

7. Section 17(b) of the 1940 Act authorizes the Commission to issue an order exempting a proposed transaction from Section 17(a) if: (a) the terms of the proposed transaction are fair and reasonable and do not involve overreaching on the part of any person concerned; (b) the proposed transaction is consistent with the policy of each registered investment company concerned; and (c) the proposed transaction is consistent with the general purposes of the 1940 Act.

8. Applicants request an order pursuant to Section 17(b) of the 1940 Act exempting the Related Transactions from the provisions of Section 17(a) of the 1940 Act.

9. Applicants represent that the terms of the Substitution are reasonable and fair and do not involve overreaching on the part of any person concerned. The Substitution will be effected at the net asset value of the securities involved and the interests of Contract owners will not be diluted. In-kind redemptions will alleviate some of the expenses involved with the Substitution and only will be used to the extent they are consistent with the investment objectives and applicable diversification requirements of the affected portfolios. All in-kind redemptions will be conducted in a manner conforming with the conditions of Rule 17a–7 under the 1940 Act.

10. Applicants represent that the Substitution and the Related Transactions are consistent with the policies of each investment company involved and the general purposes of the 1940 Act, and comply with the requirements of Section 17(b).

Conclusion

Applicants assert that, for the reasons summarized above, the requested order approving the Substitution and Related Transactions should be granted.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–39570; File No. SR–Amex–98–2]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the American Stock Exchange, Inc., To Revise the Exchange's Equity Fee Schedule To Include Transactions in DIAMONDS

January 22, 1998.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on January 12, 1998, the American Stock Exchange, Inc. ("Amex" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items, I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange seeks to revise its Equity Fee Schedule to reflect to transaction charges that will be imposed on trades in the newly listed and traded product called DIAMONDS.™ The Exchange commenced trading in DIAMONDS on January 20, 1998.

The text of the proposed rule change is available at the Office of the Secretary, the Exchange, and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Purposed Rule Change

1. Purpose

The Exchange recently amended its Equity Fee Schedule to revise the transaction charges that apply to trades in Standard & Poor's Depositary Receipts ("SPDRs") and Standard Poor's MidCap Depositary Receipts ("MidCap SPDRs")[2]. The transaction charges vary depending on for whom the trade is executed. Under the updated fee schedule, specialists are assessed a transaction charge of $.006 per share ($.60 per 100 shares), capped at $300 per trade (50,000 shares). Registered Traders are assessed a transaction charge of $.007 per share ($.70 per 100 shares), capped at $350 per trade (50,000 shares). Off-floor orders (both customer and broker-dealer) are assessed a transaction charge of $.006 per share ($.60 per 100 shares), capped at $100 per trade (16,667) shares).

In addition, orders up to 5,099 shares in SPDRs and MidCap SPDRs routed to the Exchange floor electronically through the Exchange's Post Execution Reporting (PER) System are exempt from transaction charges. This provision is consistent with the waiver that also exempts from transaction charges those PER System orders for up to 1,099 shares in equity securities. However, neither of those exemptions may be applied to a PER System order that is for the account of a non-member competing market maker.[3] Lastly, all trades executed on the Exchange in SPDRs and MidCAP SPDRs are exempt from the Exchange's Regulatory Fee ($.00005 × Total Value).[4]

The Exchange seeks to impose on DIAMONDS the same transaction charge schedule that currently applies to trading in SPDRs and MidCap SPDRs. As a result, all transaction charges and exemptions therefrom now applicable to SPDRs and MidCap SPDRS will also apply to trades in DIAMONDS. The exchange also proposed to charge the specialist in DIAMONDS, in addition to the $.006 per share transaction charge, a separate fee of $90,000 per month payable at the beginning of each month.

These changes are intended to lower the costs incurred by users of the DIAMONDS product while making the cost of trading DIAMONDS on the Exchange comparable to the economics of trading this and functionally similar products in other markets. The revisions to the Equity Fee Schedule have been implemented by the Exchange concurrently with the start of trading in DIAMONDS. Accordingly, the Exchange notified member firms regarding the changes to the equity Fee Schedule, as well as the date of their effectiveness.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with Section 6(b) of the Act,[5] in general, and furthers the objectives of Section 6(b)(4),[6] in particular, in that it is designed to assure the equitable allocation of reasonable dues, fees, and other charges among members, issuers, and other persons using the Exchange's facilities.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe the proposed rule change will impose any inappropriate burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange did not solicit or receive written comments with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing proposed rule change establishes or changes a due, fee, or other charge imposed by the Exchange and, therefore, has become effective pursuant to Section 19(b)(3)(A) of the Act[7] and subparagraph (e) of Rule 19b–4[8] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submissions, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any persons, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552 will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR–Amex–98–2 and should be submitted by February 19, 1998.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[9]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–39575; File No. SR–CBOE–97–68]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Changes by the Chicago Board Options Exchange, Inc. Relating to Continuing Education of Registered Persons

January 23, 1998.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934,[1] notice is hereby given that on December 30, 1997, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the CBOE. The Commission is publishing this notice to solicit comments on the proposed rule changes from interested persons.[2]

[1] 15 U.S.C. 78s(b)(1).

[2] The Commission is concurrently publishing notice of parallel proposed rule changes from other self-regulatory organizations relating to continuing education for registered persons. See Securities Exchange Act Releases Nos. 39574 (NASD); 39576 (MSRB); and 39577 (NYSE).

VOL 63 ISS 19 JA 29 1998 UMI

I. Self Regulatory Organization's Statement of the Term of Substance of the Proposed Rule Change

The CBOE, in support of the recommendations of The Securities Industry/Regulatory Council on Continuing Education ("Council"),[3] proposes to amend CBOE 9.3A *Continuing Education of Registered Persons*, by strengthening the requirements applicable to registered persons and implementing a new program specifically designed for managers and supervisors.

The text of the proposed rule change may be examined at the places specified in Item IV below.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the CBOE included statements concerning the purpose of, and statutory basis for, the proposed rule changes and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The CBOE has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose, of and Statutory Basis for, Proposed Rule Change

1. Purpose

The proposed rule change is to revise the CBOE's continuing education requirements contained in Rule 9.3A. The continuing education program consists of two parts—a Regulatory Element and a Firm Element. The Regulatory Element requires registered persons to participate in an interactive computer-based training at specified intervals and encompasses regulatory and compliance issues, sales practice concerns and business ethics. The current Regulatory Element contains content common to all registered representatives, supervisory persons, as well as other registration categories. This proposed rule change is intended to strengthen the continuing education requirements for Registered Representatives by implementing a new program component specifically designed for managers and supervisors. In addition, it is contemplated that in the future, specific programs may be implemented for other registration categories.

The CBOE also proposes, as recommended by the Council, to require ongoing participation in the Regulatory Element for the duration of a registered person's career in the industry, specifically, on the second registration anniversary and every three years thereafter (i.e., the fifth, eighth, eleventh, etc. anniversaries), with no graduation from the program. Under the current Rule 9.3A, after ten years an individual does not have to participate in the computer-based training, unless they have been subject to certain disciplinary action as enumerated in the Rule. The CBOE also proposes to amend the rule to clarify that a person's initial registration date shall establish the cycle of anniversary dates for purposes of the Rule.

The proposed rule change will allow a one-time graduation from the Regulatory Element for persons who, as of the effective date of the rule amendments, have been registered for more than ten years and who have not been the subject of a disciplinary action. However, persons delegated supervisory responsibility or authority pursuant to Rule 9.8 will have to have been registered for more than ten years and not been subject to any disciplinary action as enumerated in the Rule in order to be covered by this one-time provision for graduation. Therefore, those supervisors who have graduated from the program requirements based on their initial registration date but who have not completed ten years as a supervisor, will be required to re-enter the program.

Finally, the CBOE is proposing an amendment to the Firm Element component of Rule 9.3A. The proposed rule change will require each member organization's required analysis of training needs to specifically focus on supervisory training needs. If it is determined that there is a specific need for supervisory training, it must then be addressed in the Firm Element training plan.

These amendments, which will be adopted uniformly with rule changes of the other SRO Council members, will significantly enhance the continuing education program by requiring all registered persons to participate in the Regulatory Element on an ongoing basis.

2. Statutory Basis

The CBOE believes that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and in particular, with Section 6(c)(3) of the Act.[4] Under that Section, it is the CBOE's responsibility to prescribe standards of training, experience and competence for persons associated with Exchange members and member organizations. Pursuant to this statutory obligation, the CBOE has proposed this rule change in order to enhance the established continuing education program for registered persons.

The proposed rule change is also consistent with the requirements of Section 6(b)(5) of the Act.[5] Section 6(b)(5) requires, among other things, that the rules of an exchange be designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The CBOE does not believe that the proposed rule changes will impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule changes.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the CBOE. All submissions should refer to the file number SR–CBOE–97–68 and should be submitted by February 19, 1998.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[6]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–39576; File No. SR–MSRB–98–2]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the Municipal Securities Rulemaking Board Relating to Rule G–3 on Professional Qualifications

January 23, 1998.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1935 ("Act"),[1] notice is hereby given that on January 21, 1998, the Municipal Securities Rulemaking Board ("Board" or "MSRB") filed with the Securities and Exchange Commission ("Commission" or "SEC") a proposed rule change (File No. SR–MSRB–98–2). The proposed rule change is described in Items I, II, and III below, which Items have been prepared by the Board. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.[2]

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Board is filing herewith an amendment to rule G–3, on professional qualifications (hereinafter referred to as the "proposed rule change"). The proposed rule change consists of an amendment to rule G–3 regarding the Board's continuing education requirements. The text of the proposed rule change may be examined at the places specified in Item IV below.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Board included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The texts of these statements may be examined at the places specified in Item IV below. The Board has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The proposed rule change is to revise the Board's continuing education requirements contained in rule G–3(h). Rule G–3(h) provides for a continuing education program for registered persons of brokers, dealers and municipal securities dealers. The program, which is uniform within the securities industry, consists of two parts—a Regulatory Element and a Firm Element. The Regulatory Element requires registered persons to participate in interactive computer-based training at specified intervals and encompasses regulatory and compliance issues, sales practice concerns and business ethics.

The Regulatory Element program applies generally to *all* registered persons and currently does not discern between registration types or categories. The exiting program contains content common to registered representatives, supervisory persons as well as other registration categories. The Securities Industry/Regulatory Council on Continuing Education (a council of broker-dealer and self-regulatory organization ("SRO")[3] representatives that oversees and provides ongoing development and operation of the program) has recommended development of a new program component specifically for supervisors. In addition, it is contemplated that in the future, specific programs may be implemented for other registration categories. The proposed rule change will allow for the Board to require new programs as appropriate with customized training for various registration categories, with the supervisor's program being the first such initiative. For purposes of Board rules, the following registration categories shall be deemed to be included in the supervisory categories: Series 8 (Municipal Securities Sales Supervisor Examination); Series 27 (Financial and Operations Principal Examination); and Series 53 (Municipal Securities Principal Qualification Examination).

The proposed rule change also addresses the time-frames at which registered persons must participate in the Regulatory Element computer-based training. Rule G–3(h) currently requires all registered persons to complete the training on three occasions, *i.e.*, their second, fifth and tenth registration anniversaries, and also when they are the subject of significant disciplinary action(s). Once persons are registered for more than ten years, they are graduated from the program and are not required to participate further in the Regulatory Element unless they become subject to significant disciplinary action. The Council has recommended that this requirement be revised to require ongoing participation in the program by registered persons. In accordance with that recommendation, the proposed rule change will require participation in the Regulatory Element throughout a registered person's career, specifically on the second registration anniversary and *every* three years thereafter (*i.e*, the fifth, eight, eleventh, etc, anniversaries), with no graduation from the program.

The proposed rule change will allow a one-time exemption for persons currently graduated from the program by providing that those persons who have been registered for more than ten years as of the effective date of the rule amendments, and who have not been the subject of a disciplinary action during the past ten years, will continue to be excluded from required ongoing participation in the Regulatory Element. However, persons registered in a

[1] 15 U.S.C. 78s(b)(1).

[2] The Commission is concurrently publishing notice of parallel proposed rule changes from other self-regulatory organizations relating to continuing education for registered persons. See Securities Exchange Act Releases Nos. 39574 (NASD); 39575 (CBOE); and 39577 (NYSE).

[3] In addition to the Board, SROs represented on the Council include the American Stock Exchange, Chicago Board Options Exchange, National Association of Securities Dealers, New York Stock Exchange and Philadelphia Stock Exchange.

VOL 63 ISS 19 JA 29 1998 UMI

supervisory capacity will have to have been registered in a supervisory capacity for more than 10 years in order to be covered by this one-time provision for graduation from participation in the program. Therefore, those supervisors who have graduated from the program requirements based on their initial registration date who have not completed 10 years as a supervisor, will be required to re-enter the program.

The Firm Element requires that each broker, dealer and municipal securities dealer conduct annually an analysis of their training needs and administer such training, as is appropriate, to their registered persons who have direct contact with customers and the immediate supervisors of such registered persons, on an ongoing basis in topics specifically related to their business such as new products, sales practices, risk disclosure and new regulatory requirements and concerns. The proposed rule change will require brokers, dealers and municipal securities dealers to specifically focus on supervisory training needs in conducting their analysis of training needs and, if it is determined that there is a specific need for supervisory training, it must be addressed in the Firm Element training plan.

These amendments, which will be adopted uniformly with rule changes of the other SRO Council members, will significantly enhance the continuing education program by requiring all registered persons to participate in the Regulatory Element on an ongoing basis throughout their securities industry careers. In addition, the Board believes that rule amendments allowing for the implementation of a program specifically geared towards supervisors and the issues that may arise in that role will result in more effective regulatory training of supervisors as well as improved front-line supervision overall of brokers, dealers and municipal securities dealers.

2. Statutory Basis

The Board believes the proposed rule change is consistent with the Act and the rules and regulations thereunder. The Board believes that the proposed rule change is consistent with Section 15B(b)(2)(A) of the Act,[4] which states that the rules of the Board, as a minimum, shall provide such standards of training, experience, competence, and such other qualifications as the Board finds necessary or appropriate in the public interest or for the protection of investors. The proposed rule change is also consistent with Section 15B(b)(2)(C) of the Act,[5] which requires, in pertinent part, that the Board's rules be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principals of trade, to remove impediments to and perfect the mechanism of a free and open market in municipal securities, and, in general, to protect investors and the public interest. Pursuant to this statutory obligation, the Board has proposed this rule change in order to enhance the established continuing education program for registered persons.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Board does not believe that the proposed rule change would impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act, since it would apply equally to all brokers, dealers and municipal securities dealers.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested people are invited to submit written data, views, and arguments concerning the foregoing. People making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submissions, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of the filing will also be available for inspection and copying at the Board's principal offices. All submissions should refer to File No. SR–MSRB–98–2 and should be submitted by February 19, 1998.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[6]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–39574; File No. SR–NASD–98–03]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the National Association of Securities Dealers, Inc. Relating to Continuing Education Requirements

January 23, 1998.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on January 22, 1998, the National Association of Securities Dealers, Inc. ("NASD") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by NASD Regulation, Inc. ("NASD Regulation"). The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.[2]

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

NASD Regulation is proposing to Amend Rule 1120 regarding the continuing education requirements for registered persons. Below is the text of the proposed rule change. Proposed new language is italicized; proposed deletions are in brackets.

[1] 15 U.S.C. 78s(b)(1).

[2] The Commission is concurrently publishing notice of parellel proposed rule changes from other self-regulatory organizations relating to continuing education for registered persons. See Securities Exchange Act Releases Nos. 39575 (CBOE); 39576 (MSRB); and 39577 (NYSE).

1120. Continuing Education Requirements

This Rule prescribes requirements regarding the continuing education of certain registered persons subsequent to their initial qualification and registration with the Association. The requirements shall consist of a Regulatory Element and a Firm Element as set forth below.

(a) Regulatory Element

(1) Requirements: No member shall permit any registered person to continue to, and no registered person shall continue to, perform duties as a registered person unless such person has complied with the requirements of paragraph (a) hereof.

(A) Each registered person shall complete the Regulatory Element on [three occasions, after] the occurrence of their second[, fifth and tenth] registration anniversary [dates] *date and every three years thereafter,* or as otherwise prescribed by the Association. On each [of three occasions] occasion, the Regulatory Element must be completed within [one hundred twenty] *120* days after the person's registration anniversary date. *A person's initial registration date shall establish the cycle of anniversary dates for purposes of this Rule.* The content of the Regulatory Element shall be [prescribed by the Association] *determined by the Association and shall be appropriate to either the registered representative or principal status of person subject to the Rule.*

(B) *Persons Exempted from the Rule*—[Registered persons] *Persons* who have been continuously registered for more than 10 years [as of the effective date of this Rule] *on July 1, 1998,* shall be exempt from participation in the Regulatory Element *programs for registered representatives,* provided such persons have not been subject *within the last ten years* to any disciplinary action [within the last 10 years] as enumerated in paragraph (a)(3). *A person who has been continuously registered as a principal for more than 10 years on July 1, 1998, shall be exempt from participation in the Regulatory Element programs for registered principals, provided such person has not been subject within the last ten years to any disciplinary action as enumerated in paragraph (a)(3).* In the event [of such disciplinary action,] *that* a [person] *registered representative or principal who was exempt from participation in Regulatory Element programs subsequently becomes the subject of a disciplinary action as enumerated in paragraph (a)(3), such person shall* [will] be required to satisfy the requirements of the Regulatory Element [by participation for the period from the effective date of this Rule to 10 years after the occurrence of the disciplinary action] *as if the date of such disciplinary action is such person's initial registration date with the Association.*

(C) Persons who have been currently registered for 10 years or less as of [the effective date of this Rule] *July 1, 1998,* shall [initially] participate in the Regulatory Element within 120 days after the occurrence of the second[, fifth or tenth] registration anniversary date, *or every third year thereafter,* whichever anniversary date first applies[, and on the applicable registration anniversary date(s) thereafter. Such persons will have satisfied the requirements of the Regulatory Element after participation on the tenth registration anniversary].

[(D) All registered persons who have satisfied the requirements of the Regulatory Element shall be exempt from further participation in the Regulatory Element subject to re-entry into the program as set forth in paragraph (a)(3).]

(2) Failure to Complete—No change.

(3) Re-entry into Program: Unless otherwise determined by the Association, a registered person will be required to re-enter the Regulatory Element and satisfy all of its requirements in the event such person:

(A)–(C) No change.

Re-entry shall commence with initial participation within 120 days of the registered person becoming subject to the statutory disqualification, in the case of (A) above, or the disciplinary action becoming final, in the case of (B) and (C) above[, and on three additional occasions thereafter, at intervals of two, five and 10 years after re-entry, notwithstanding that such person has completed all or part of the program requirements based on length of time as a registered person or completion of ten years of participation in the program]. *The date of the disciplinary action shall be treated as such person's initial registration date with the Association.*

(4) Reassociation in a Registered Capacity: Any registered person who has terminated association with a member and who has, within two years of the date of termination, become reassociated in a registered capacity with a member shall participate in the Regulatory Element at such intervals [(two, five and 10 years)] that may apply (*second anniversary and every three years thereafter*) based on the initial registration anniversary date rather than based on the date of reassociation in a registered capacity.

(5) Definition of Registered Person: For purposes of this Rule, the term "registered person" means any person registered with the Association as a representative, principal, or assistant representative pursuant to the Rule 1020, 1030, 1040, and 1110 Series.

(b) Firm Element

(1) Persons Subject to the Firm Element—No change.

(2) Standards for the Firm Element:
